Materials for quick construction of doors with glass infill for cabinets or tambour doors.	Cordia Rehau	**aluminium frames, tambour doors**	13
Handles, locks, door stops, pull handles for fitting interior doors.	Twin	**fittings for interior doors**	14

How to use the **printed** catalogue?

In the catalogue you will find all the information you need when selecting suitable fittings. Other technical information, certificates and assembly instructions can be found at www.demos24plus.com

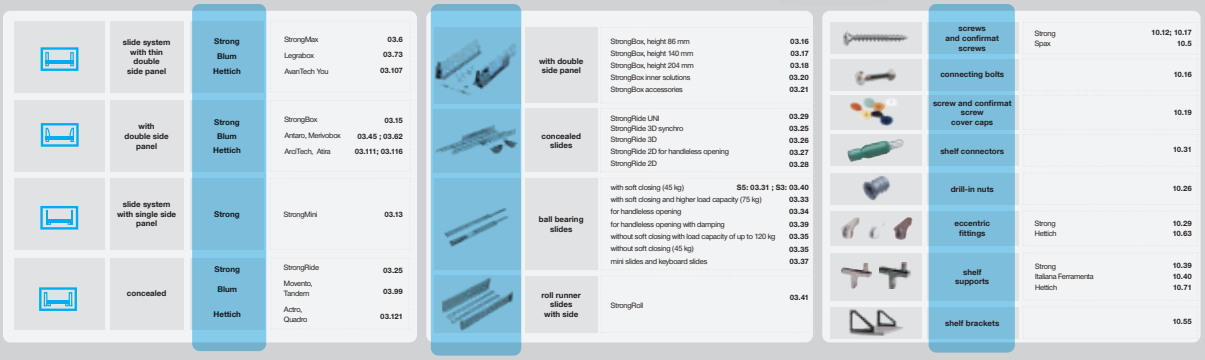

1. **The catalogue contains 14 chapters** divided by the type of fittings and the situation they address.

2. **The colour coding and a small icon** in the tab on the side of the catalogue will help you navigate.

3. On the inside of the cover there is a **complete overview** of chapters with a description of what goods you can find in them.

At the beginning of each, chapter there is an overview of services we offer beyond the sale of fittings (for example samples, configurators, material supplies, etc.).

On the next page you will find two types of contents: if the chapter contains products we offer from multiple suppliers (Strong, Blum, Hettich, Vibo, etc.), you will find a comparison contents.

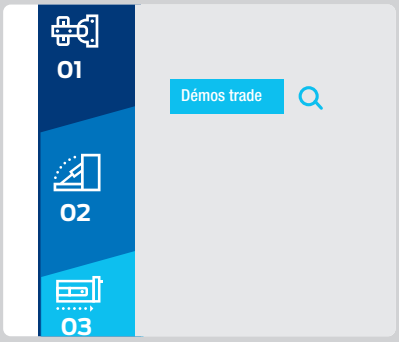

In chapters where this is not the case, a standard contents page referring to individual products is provided at the beginning.

There is also a contents page for individual products, with a link to it at the beginning of the comparison contents.

How to use the **online** catalogue?

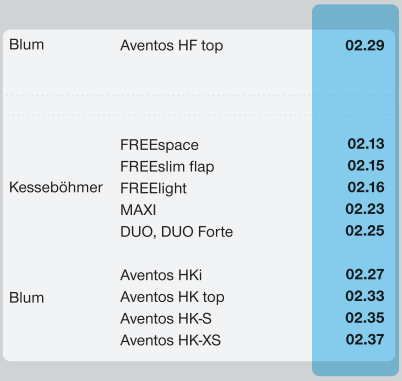

It looks the same as the printed version, so you can easily find your way around it. It also contains many tools that make navigation and, above all, searching easier.

The magnifying glass icon in the upper right corner of the screen will speed up your search for individual products.

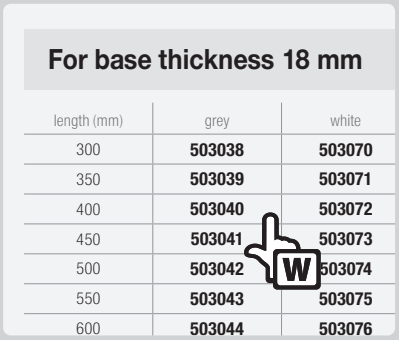

The coloured areas with icons on the right side of the catalogue will open the contents of the given chapter when clicked.

Blum	Aventos HF top	02.29

Everything is placed on the back of the cover together with a map of our branches.

furniture hinges

ADVISORY SERVICE

Not sure how to choose or assemble the fittings?
Call +420 556 684 310 or email export@demos-trade.com
and we will be happy to help you.

MATERIAL FOR DOOR PRODUCTION

The material for the door and cabinet body together with the fittings? There's nothing easier than ordering both from us.

COMPLETE CABINET BODIES

Do you have a great project but are struggling with time, workshop space, or other obstacles? Don't lose heart! We offer you our premises, machinery, and time — we will manufacture the cabinet bodies you need to your exact specifications.

PORTAL

A customer portal for purchasing, order overview, job submission, formatting, and status tracking. All in one place: stock availability, your prices, and much more.

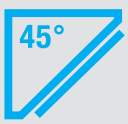

SAMPLE ROOM DISPLAYS

Representatives of wire systems need plenty of space to display their products — and we have it. Come and see for yourself, or send your customers to our sample room. We will walk them through everything and help them make the right choice.

DELIVERY TO YOUR DOOR

All orders will be delivered to your hands within 72 hours.

StrongHinges mechanism for handleless opening with soft closing

Smootis

- handleless opening,
- soft closing,
- all in combination with spring hinges (without damping)

The product has received TÜV, SGS, and UKAS certification for 60 000 cycles.

- The door opens by pressing on its surface, ideally as close as possible to the point where the mechanism is located.
- The same mechanism dampens the door movement upon closing.
- For optimal activation, the extension of the closed mechanism can be adjusted by +5 mm.
- Easy assembly with 4 screws.

Assembling as close to the centre of the door as possible, at the following distances:

- for cabinet bodies up to 450 mm in width – as far from the hinges as possible,
- for cabinet bodies wider than 450 mm (max. 600 mm) – 450 mm from the hinges.

- The mechanism is then covered with a cover cap for a clean finish.
- Thanks to its dimensions, it does not take up much space inside the cabinet.

D=K+1-H

- possible adjustment D ± 3 mm
- min./max. applicable door thickness for the given hinge

code	description
92581T	with integrated soft closing
198819	without soft closing[1]

[1] suitable for use with the 92581T hinge (for small doors)

- 110° opening angle

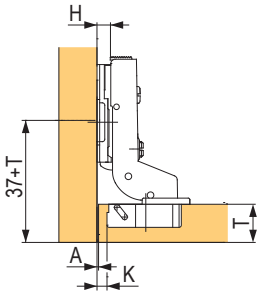

recommended plates H0: screw with cam 92594T, screw 92590T, with euro screws 92591T, for other plates, see p. 01.10

12345 Item in stock **12345** Item on demand

StrongHinges S5 for clipping onto a mounting plate

Inset

A=(6-K)+(H+2)

- possible adjustment A is ± 3 mm
- min./max. applicable door thickness for the given hinge

code	description
92582T	with integrated soft closing
198820	without soft closing[1]

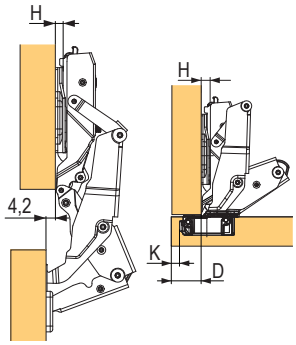

[1] suitable for use with the 92582T hinge (for small doors)

- 110° opening angle

recommended H2 plates: screw 92592T, with euro screws 92593T, for other plates see p. 01.10

Full overlay 155° for cabinets with internal drawers

D=K+6-H

- possible adjustment D ± 5 mm
- min./max. applicable door thickness for the given hinge

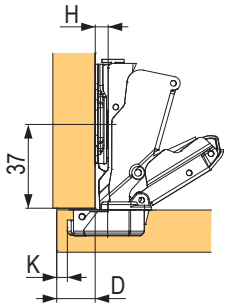

code	description
354224	with integrated soft closing

- the doors do not interfere with the interior of the cabinet body at 90° opening angle (they do not interfere with the output path of the inner drawers)

recommended H0 plates: screw with cam 92594T, screw 92590T, with euro screws 92591T, for other plates see p. 01.10

Full overlay 165°

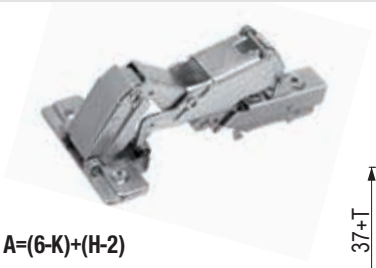

D=K+11-H

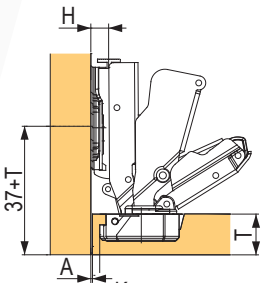

- possible adjustment D ± 3 mm
- min./max. applicable door thickness for the given hinge

code	description
205543	with integrated soft closing

recommended H0 plates: screw with cam 92594T, screw 92590T, with euro screws 92591T, for other plates see p. 01.10

Inset 165°

A=(6-K)+(H-2)

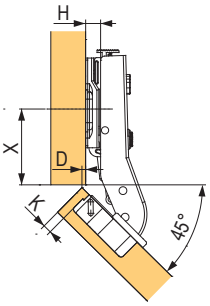

- possible adjustment A is ± 2 mm
- min./max. applicable door thickness for the given hinge

code	description
191109	with integrated soft closing

recommended H2 plates: screw 92592T, with euro screws 92593T, for other plates see p. 01.10

Full overlay 45°

X=37-(K-3) / D=(K-3)-H

- possible adjustment D ± 3 mm
- min./max. applicable door thickness for the given hinge

code	description
92583T	with integrated soft closing

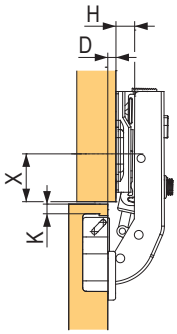

- recommended plates H0: screw with cam 92594T, screw 92590T, with euro screws 92591T

for other plates, see p. 01.10

StrongHinges S5 for clipping onto a mounting plate

Straight 90°

X=20-(K-3) / D=(K-3)-H

- possible adjustment D ± 3 mm
- min./max. applicable door thickness for the given hinge

code	description
191110	with integrated soft closing

- recommended plates H0: screw with cam 92594T, screw 92590T, with euro screws 92591T

for other plates, see p. 01.10

Full overlay for aluminium frames

D=K+11-H

- possible adjustment D ± 3 mm
- min./max. applicable door thickness for the given hinge

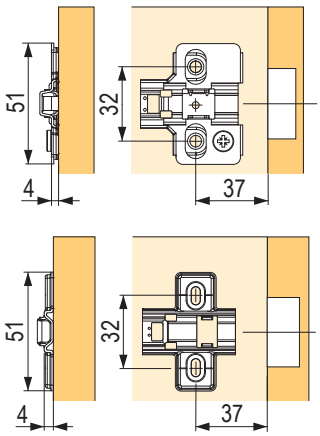

code	description
92584T	with integrated soft closing

- recommended plates H0: screw with cam 92594T, screw 92590T, with euro screws 92591T

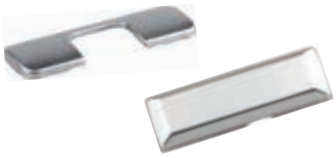

for other plates, see p. 01.10

- 110° opening angle

Plates

Cover caps

The cover cap can be printed with any logo.

code	description
92596T	hinge cup cover cap
92597T	arm cover cap for full overlay hinges

- you can have the arm cover cap printed (logo, picture, text...)

only for hinges from p. 01.13 - 01.15

handleless opening mechanisms

Mechanism for springless hinges

code	description
92985	metal + plastic

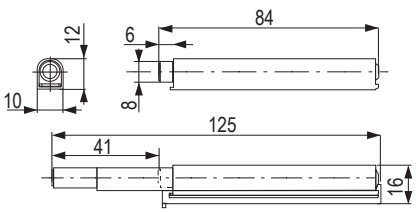

- plastic counterpart can also be purchased separately as 165458 code
- suitable for use in combination with springless hinges

StrongHinges – pin mechanisms for handleless opening

With adapter

colour

white	grey
399709	**399708**

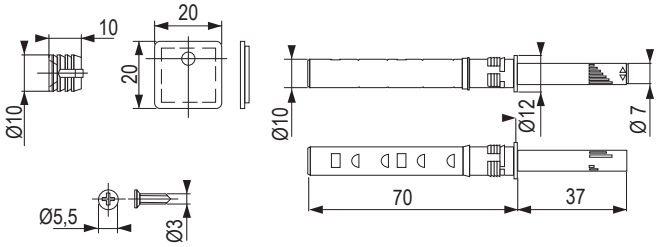

- magnetic PTO mechanism with cabinet body clip

Package includes:
- PTO mechanism
- adapter
- 3 screws
- counterpart plate for screw fixing
- screw with dowel with a diameter of 10 mm (for possible fixing of the counterpart plate)

For drilling-in

colour

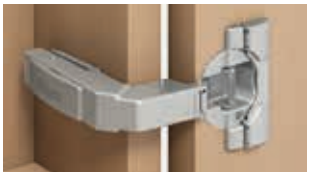

grey
399710

- magnetic PTO mechanism for 10 mm drilling-in hole

Package includes:
- PTO mechanism
- screw with dowel with a diameter of 10 mm (for possible fixing of the counterpart plate)
- counterpart plate with M3 tape

B CLIP top BLUMOTION
T CLIP top

The number of hinges depends on the weight and height of the door front.

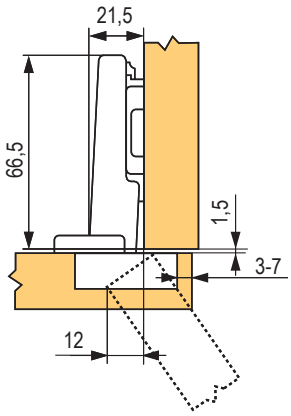

In order to achieve good stability, hinges should be placed as far apart as possible.
The loading and height data refer to a 600 mm wide door.

CLIP top 110°

- TIP-ON pins for handleless fronts open after a slight push
- they are used in combination with Blum spring-free hinges
- the pins are also designed for TIP-ON versions of AVENTOS
- colour-matched adapters for easy and fast assembly on the side of the cabinet body
- two pin lengths to which suitable adapters are designed
- it can be aligned with the rest of the fronts by rotating the ejector thanks to adjustment feature (+ 4 / – 1 mm), which is integrated into the pin

mounting and drilling templates and tools

ECODRILL

New features:

- one-hand clamping
- convenient adjustment of material thickness
- convenient adjustment of hole drilling depth and cup spacing
- side stops for setting standard distances
- option of dust extraction during drilling
- integrated square template for continuous hinge assembly

code	Blum code	description
527913	M31.1000.01	for processing hinge holes

Template for Blumotion and TIP-ON

code	Blum code	description
12378	65.5010	accurate drilling into the cabinet body edge

- template for drilling the mounting positions for BLUMOTION for doors handle side (970.1002) and hinge side (970A1002) as well as for TIP-ON (955 × 1004)
- assembly on a marking line
- material: plastic/steel

Universal template

code	Blum code	description
13844	ZML.0040.02	precise marking of the front fittings position

- template for marking or pre-drilling the fixing positions of front fittings including railing, drawer back and base
- as well as for AVENTOS front fittings

Drilling template

code	Blum code	description
65153	65.1000.01	quick marking or drilling of holes for slides

- template for pre-drilling the fixing positions for cabinet profiles, lifter, mounting and adapter plates
- the template can be used with assembled and unassembled cabinet bodies
- height and depth adjustment using a scale
- suitable for full overlay or inset constructions

CLIP TOP BLUMOTION 970A1002 – FOR DRILLING OF CRISTALLO WHEN USING MINI HINGES AND FOR GLASS DOORS

BLUMOTION 970A is carried out on the hinge side and ensures perfect movement even when angled mini hinges are applied. BLUMOTION 970A should be drilled first on the side of the top panel (ceiling) of the cabinet body.

Drilling distance when using angled hinges with mini cup

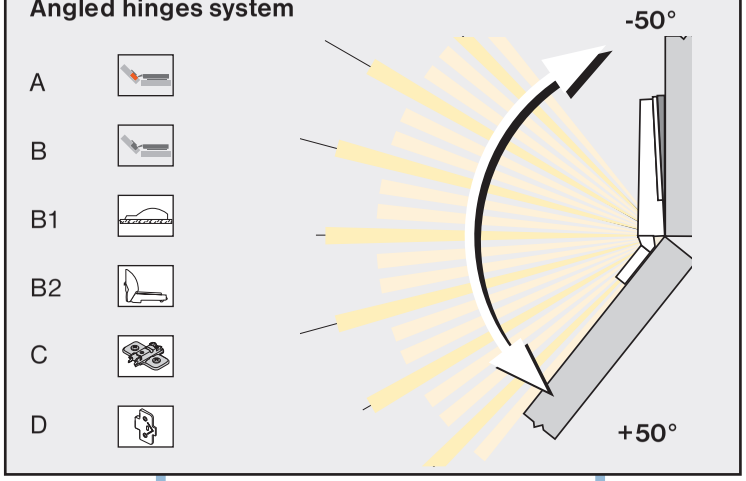

Angled hinge mounting

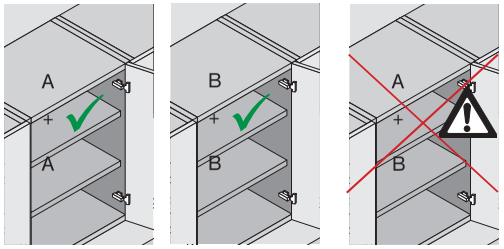

N° XX/XX

Drilling distance (BA) in mm

The correct position is set using the drilling distance (BA). If the effect of BLUMOTION is insufficient, we recommend mounting an additional BLUMOTION 970A on the base side.

Angled hinges system

contents

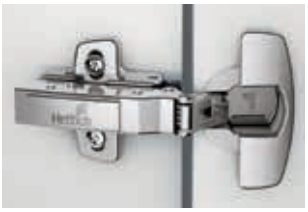

Explanation of terms:
Silent System – soft closing (integrated, external)
Push to Open – handleless opening
Push to Open Silent – handleless opening with soft closing
D = distance or height of the plate
B = protrusion of the cup over the side of the cabinet body in the closed position

Novisys hinges

with SiSy soft closing (Silent System)
without soft closing (with closing spring)
unsprung PTO (Push to Open)

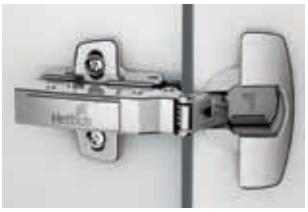

01.49

Sensys hinges for door thickness of 15–24 mm

with SiSy soft closing (Silent System)
without soft closing (with closing spring)
unsprung PTO (Push to Open)

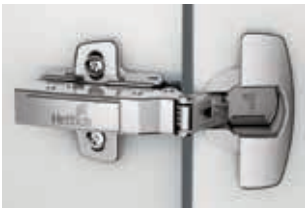

01.51

Sensys hinges for door thickness of 10 – 16 mm

with SiSy soft closing (Silent System)
without soft closing (with closing spring)
unsprung PTO (Push to Open)

01.52

Sensys hinges for door thickness of 15 – 32 mm

with SiSy soft closing (Silent System)
without soft closing (with closing spring)
unsprung PTO (Push to Open)

01.52

Sensys hinges with 165° opening angle and zero protrusion into the internal clearance

with SiSy soft closing (Silent System)
without soft closing (with closing spring)
unsprung PTO (Push to Open)

01.53

Sensys hinges, angled hinges, with soft closing

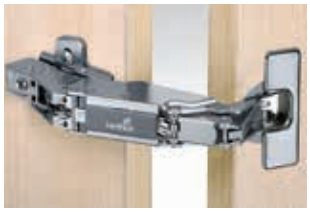

with SiSy soft closing (Silent System)
without soft closing (with closing spring)
unsprung PTO (Push to Open)

01.55

Hinge for folding doors

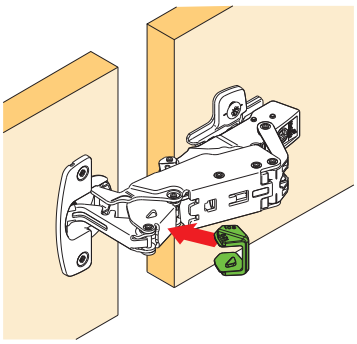

motion	code	Hettich code	cup mounting
with diagonal adjustment depending to the door thickness	**208857**	9090045	screw

Sensys 165°, TH52 (52×5.5)

Option A – holes for cups in one door

- enables optimisation of the gap between the leaves to a minimum
- cup distance C is identical on both sides of the door
- both leaves may be equally wide
- space between the holes for the plate on the loose leaf is 37 mm
- for door thickness 16–21 mm

Calculation of door width:

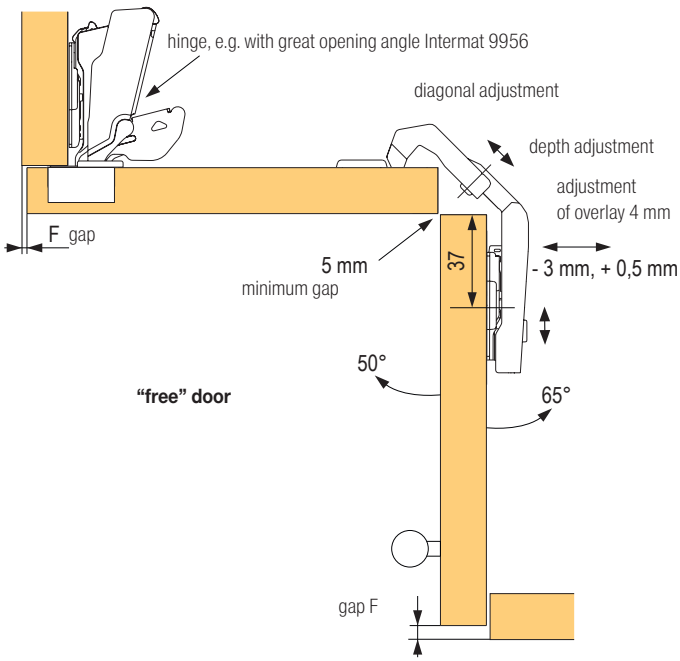

- hole clearance for the door including the cabinet body side – gap F – door thickness

Recommended height of the mounting plate [1]

- C = 4.5 mm: height of the plate D = 0
- C = 3.0 mm: height of the plate D = 1.5

[1] different drilling C can be compensated by in-depth and diagonal adjustment

Drawing – option A

Option B – holes for cups in both doors

- gap between leaves 5 mm
- cup distance C identical for both doors
- both leaves may be equally wide
- space between the holes for the plate on the leaf is 41 mm
- for door thickness 16–21 mm

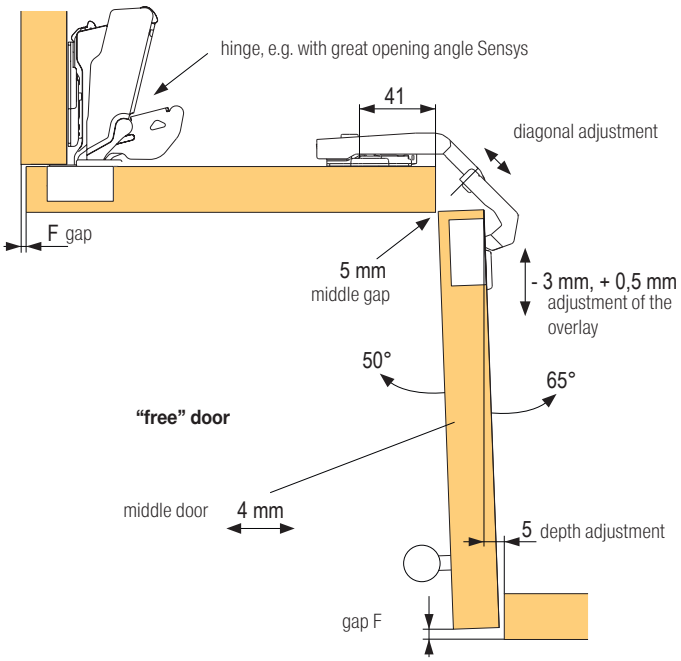

Calculation of door width:

- hole clearance for the door including the cabinet body side – gap F – door thickness – 5

Recommended height of the mounting plate [1]

- C = 4.5 mm: height of the plate D = 0
- C = 3.0 mm: height of the plate D = 1.5

Drawing – option B

code	Hettich code	description
311978	9210848	set including a transformer and a power supply cable

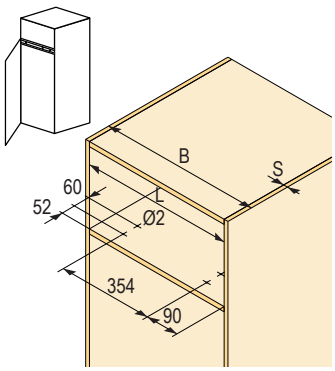

- Easys is an electromechanical system for opening refrigerator door that is built into the cabinet body. It can also be used for dishwashers.
- the functional unit contains a sensor that responds to motion caused by pressure on the door
- **mounting height only 22 mm**
- the door opens for 4–8 seconds, so you can open it with your hand completely
  - Easys is supplied as one complete universal set, i.e. a single ordering number for cabinet body width 50 to 60 cm, for left and right doors, regardless of side thickness
  - the unit is usually mounted above the refrigerator, but can also be placed under the refrigerator
  - the unit is screwed onto the shelf and can be covered with another shelf
  - the user only sees the front cover strip, sensor, and pin

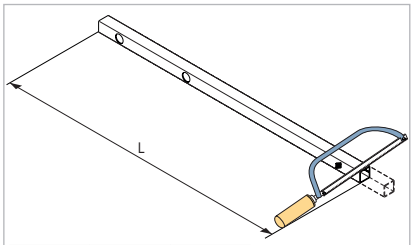

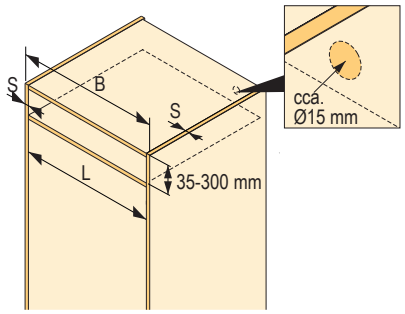

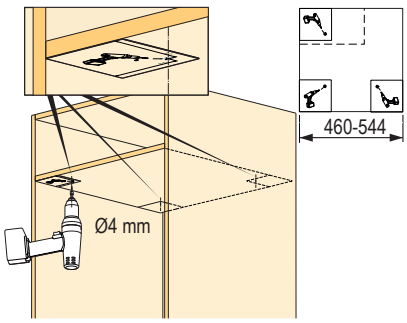

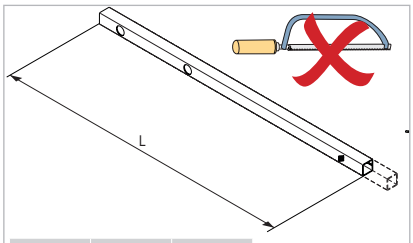

B (mm)	S (mm)	L (mm)
500	16	467
500	19	461

the required height is only 22 mm!

B (mm)	S (mm)	L (mm)
600	16	567
600	19	561

Intermat 110° and 125°

Full overlay 110°

motion	code	Hettich code	cup mounting
without soft closing	**104189**	48049	screw
Push to Open	**288349**	9043361	screw

Intermat – Silent System and accessories

For clipping onto hinges

code	Hettich code	description
104338	60576	for clipping onto the arm, full overlay
104343	60581	for clipping onto the cup

- dampers for full overlay doors
- damper for clipping onto the arm can be used only for hinges with straight arm
- soft closing can be controlled by the adjustment castor

External damper

code	Hettich code	description
104341	60579	for screwing-on, for full overlay and half overlay doors, with the possibility to adjust the soft closing force
107839	60685	for drilling-in, for full overlay and half overlay doors
104346	60687	for screwing-on, for full overlay and half overlay doors

- mounting by screwing on the base or the top, or drilling-in into the edge
- the metal damper for screwing on the hinge side can be controlled by the adjustment castor

Cover caps

code	Hettich code	description	material
105363	9101552	arm, full overlay, without logo	nickel

12345 Item in stock **12345** Item on demand

Selekta Pro 2000°

Full overlay, 270° opening angle, nickel

code	Hettich code	description
104078	45045	for cabinet body side and door side thickness up to 19 mm
104576	77736	T 22/9 for screwing-on

- type of cup
- cup T 22/9 for screwing-on

Inset, 180° opening angle, nickel

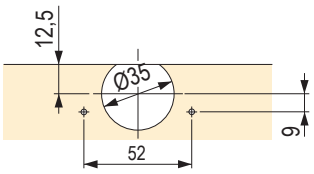

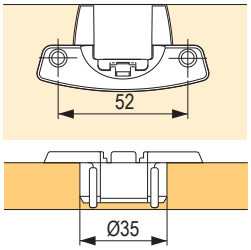

code	Hettich code	description	cup mounting
105606	77734	bowl	screw
105217	45064	arm	with expanding sockets

Full overlay, 270° opening angle, black

code	Hettich code	description	cup mounting
300846	9072543	bowl	screw
300850	9072547	arm	with expanding sockets

- The special finish allows this hinge to be used even in highly acidic environments (e.g. in a laboratory), or equally in other corrosion-intensive environments (e.g. outdoor kitchens).

- single-pivot hinge with clip technique
- with visible pin
- drilling pitch 32 mm
- cup diameter 35 mm, door overlay 15 or 16 mm, pin diameter 5.4 mm, knuckle length 39 mm
- separate mounting of the cup and hinge arm
- in the hinge arm, there are split dowels and pre-mounted screws
- quick assembly of the door with clip-type technique without using power tools
- high safety preventing unwanted release: the lock can only be released with a screwdriver
- at a 180° opening angle, the doors do not protrude into the internal clearance of the cabinet body, leaving the interior space free for pull-out elements
- overlay adjustment using cam – 2 mm
- cam height adjustment ± 2 mm
- cup and hinge arm: precision nickel-coated zinc casts
- hinge = arm + cup

Arm cover cap

code	Hettich code	description
103739	10067	silver-grey plastic

- can be used with Selekta Pro series hinges

Type ET 5150 hinge for glass doors

103899

104397

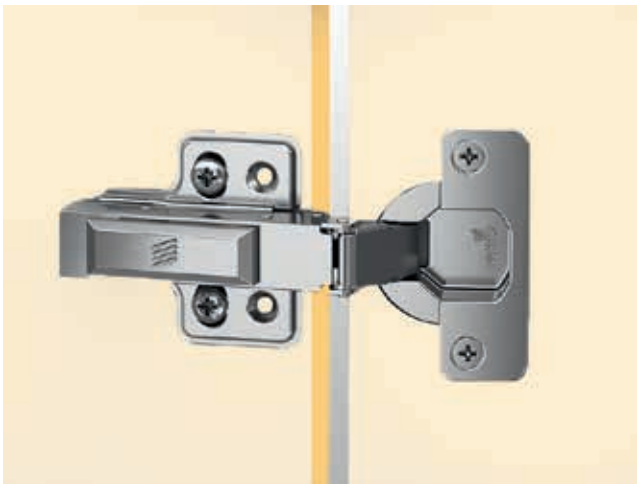

code	Hettich code	mounting	colour
103899	24908	in corners, without drilling, set of 2 pcs	matt nickel
104397	69934	central for doors over 1 000 mm, 12 mm boring required	matt nickel

- for inset glass doors
- maximum door dimensions 1 000 × 600 mm
- 170° opening angle
- maximum glass thickness 6.3 mm
- with spring
- required gap up and down 2.2 mm, on sides 2 mm
- the hinge is mounted on the glass door with a clamping screw, so it is not necessary to drill into glass
- zinc casting
- the set includes: 1 pair of hinges without handles

Stainless steel hinge VEOSYS

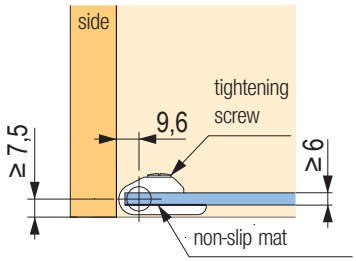

code	Hettich code	description
468852	9289590	movement with soft closing

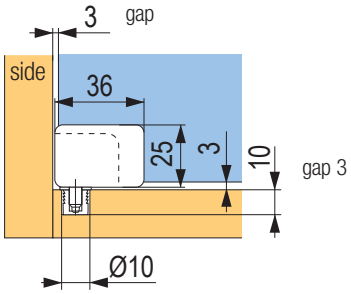

- stainless steel cup hinge with clip-on quick-mount and integrated damper and 105°
- door thickness 14–24 mm
- cup diameter 35 mm, cup bore depth 11.5 mm, boring pattern TH 52 × 5.5 mm
- stainless steel cruciform mounting plate D = 0 – 468855

Type ET 150 hinge for glass doors

code	Hettich code	description	colour
103879	20870	1 set	matt nickel
103880	20871	handle, left	matt nickel
103881	20872	handle, right	matt nickel

- for inset glass doors
- maximum door dimensions 1 000 × 500 mm
- 105° opening angle
- maximum glass thickness 5.2 mm
- required gap up and down 3 mm, on sides 2.8 mm
- the hinge is mounted on the glass door with a clamping screw, so it is not necessary to drill into glass
- zinc casting, nickel-coated matt
- only available as a set, i.e. one top and one bottom hinge
- the set includes: 1 pair of hinges

Handle for glass doors

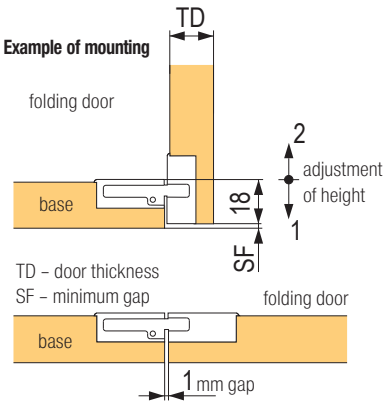

code	Hettich code	description	colour
103941	25314	1 pcs	matt nickel

- its design matches the ET 5150 hinge for glass doors
- the handle is mounted on the glass door with a clamping screw
- zinc casting

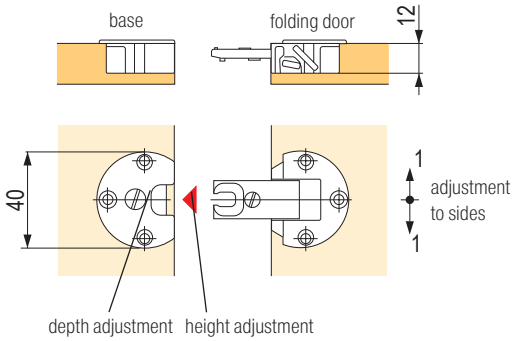

for folding doors

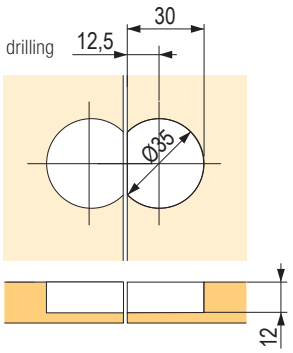

Markant 11

fixed by screws with a diameter of 3.0 × 15 mm or 3.0 × 13 mm
with countersunk head, head diameter 6 mm

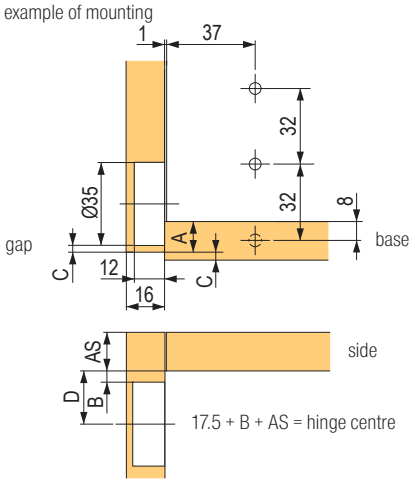

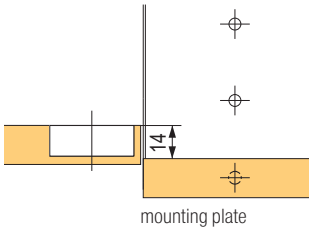

code	Hettich code	material
103980	40242	nickel-coated

- the hinge consists of two parts which are mounted separately, which makes it possible to retrofit the door
- independent height, side and depth adjustment
- identical drilling of bottom and door
- fixed and precise attachment of the hinge with three screws
- milling edges are covered
- in open position without height adjustment, the inner side of the base levels with the door
- precise zinc casting

Markant 7.1

lifting and folding mechanisms

MATERIAL FOR DOOR PRODUCTION

The material for the door and cabinet body together with the fittings? There's nothing easier than ordering both from us.

SAMPLE ROOM DISPLAYS

What are the differences between the different lift fittings? Come and see for yourself or send your customers to our sample room and we will show them and advise them on the selection.

FORMS FOR EASY ORDERING

The easiest way to choose the right lift force and order all the necessary parts to assemble it. Forms can be found on our website.

DOOR DELIVERIES

Bespoke furniture doors, where you pay per m² of material used. We cut, trim and bring it to you.

PORTAL

A customer portal for purchasing, order overview, job submission, formatting, and status tracking. All in one place: stock availability, your prices, and much more.

ADVISORY SERVICE

Not sure about the fittings and the choice of assembly?
Call +420 556 684 310 or email export@demos-trade.com
and we will be happy to help you.

DELIVERY TO YOUR DOOR

All orders will be delivered to your hands within 72 hours.

275676	**248166**	120 N

- the door opens to its maximum position (without positioning function)

recommended use in combination with springless hinges, p. 01.11

Adjustable

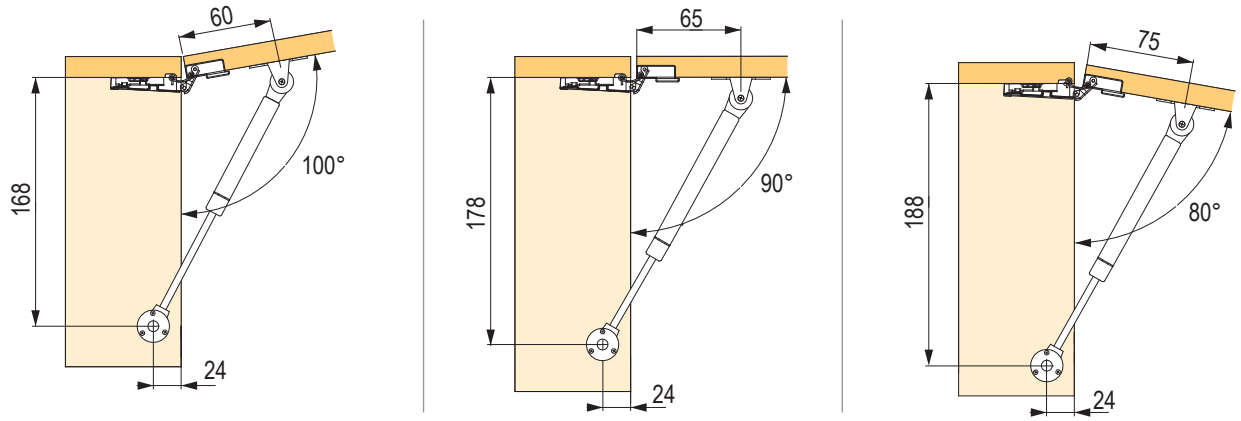

grey	white	lift force
284250	**284254**	60 N
284251	**284255**	80 N
284252	**284256**	100 N
284253	**284257**	120 N

- with a positioning function (you need to use the correct piston force)

recommended use in combination with springless hinges, p. 01.11

- for precise calculation of the force required to open the door, the following formula can be used:
  - required piston force (N) = door weight (kg) × door height (mm) / 13.5
- for a two-piston option, use half the force

Dimensional diagrams

Lift-up with option of milling into the cabinet body side

- **Body only 8 mm thin** – ideal even for narrow cabinet bodies.
- Easy mounting: side-mount or mill in.
- SoftSTOPP damping and multi-position stop.
- Quick assembly thanks to ClickFixx and 3D adjustment.
- Universal for both sides of the cabinet body – fewer variants, easy to stock.
- High load capacity (LF 480–4 800) for cabinet bodies 225–650 mm.
- Optionally available with electric drive.

Lift-up mechanisms

Standard	Push to Open

FREElift family – MAXI

KESSEBÖHMER

Maxi stay lift

code	description
135042	type “C”, strong
135043	type “D”, the strongest

- door with height 300 to 1000 mm or weight 2 to 27 kg (depending on the type of lift and opening angle)
- the possibility of controlling the lift force
- opening angle 75, 90 and 110°
- for push to open version, we recommend using hinges without spring

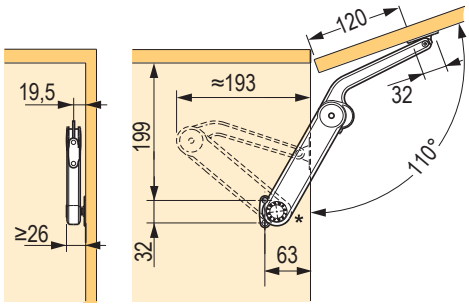

for the handle version, we recommend using hinges with soft closing, e.g. on p. 01.11

for handleless opening, we recommend the K-push system, p. 01.21 (extra strong with magnet)

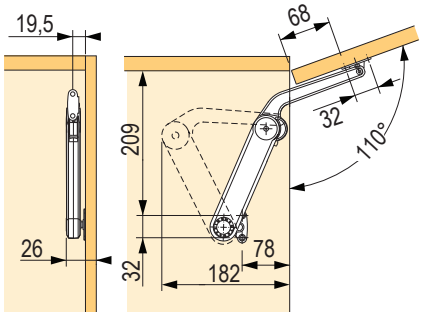

door height (mm)	type of the lift	110° with handle	110° push to open, automatic
		weight (kg)	weight (kg)
300	C	5,4 – 10,0	3,5 – 6,1
	D	–	5,1 – 7,8
400	C	4,2 – 8,1	2,7 – 4,6
	D	4,8 – 9,0	3,4 – 5,0
500	C	3,2 – 6,3	2,3 – 3,7
	D	2,8 – 7,5	3,0 – 4,9
600	C	2,7 – 6,0	1,8 – 3,1
	D	3,5 – 6,8	2,5 – 4,2
700	C	2,5 – 4,5	1,6 – 2,7
	D	3,0 – 5,2	2,2 – 3,5
800	C	2,2 – 3,6	–
	D	2,6 – 4,7	1,8 – 3,1
900	C	–	–
	D	2,3 – 4,3	1,4 – 2,9
1000	C	–	–
	D	2,0 – 4,0	1,2 – 2,6

110° version with handle

110° version push to open

AVENTOS HKi

Power factor (LF) = cabinet body height (KH) [mm] × combined weight of both fronts and two times handles [kg]

- Cabinet body height 162–600 mm.
- Cabinet body width: up to 1 800 mm.
- All visible parts in ONYX black.
- Thickness of the side walls of the cabinet body 16 –25 mm.
- Aluminium frames and wooden fronts are available in all standard dimensions thanks to 4 different types and forces of lifters (max. 18 kg with a height of 430 mm).

Aventos HF top

- Ideal for top cabinets with split fronts.
- Cabinet body height: 480–1 200 mm.
- Cabinet body width: up to 1 800 mm.
- Minimum internal depth: 264 mm.
- Integrated BLUMOTION setting for soft and silent closing.
- Front movement with light forces.
- Smooth stop.
- Integrated opening angle stop.
- The position of the lifting mechanism and front attachment is fixed.
- Symmetrical arms.
- Installation without tools.
- Two types of lifting mechanism installation.
- 3-D adjustment of both fronts.
- Centre hinges including finger safety lock.
- Power factor (LF) = *cabinet body height (KH in mm) x weight of the front including handle (in kg).
- * For asymmetrical fronts, use the theoretical cabinet height (TKH).

[3] 2 pcs must be ordered

[4] cannot be used for TIP-ON

- ideal for small heights of top cabinets
- cabinet body height: inner min. 150 mm, outer max. 400 mm
- minimum cabinet body depth 240 mm
- **the weakest version has springs and the soft closing mechanism only on one lift**
- closes softly and quietly thanks to BLUMOTION
- requires only minimum force to operate
- balanced ease of motion with a smooth stop
- simple assembly without tools
- adjustment of front in 3 directions
- simple and smooth adjustment of the lift mechanisms
- requires no hinges – for the simplest and most precise ordering, you can use the AVENTplan programme
- AVENTplan – available for download at www.demos-trade.com

	497010	956A1201	76 mm, carbon black

Combination options

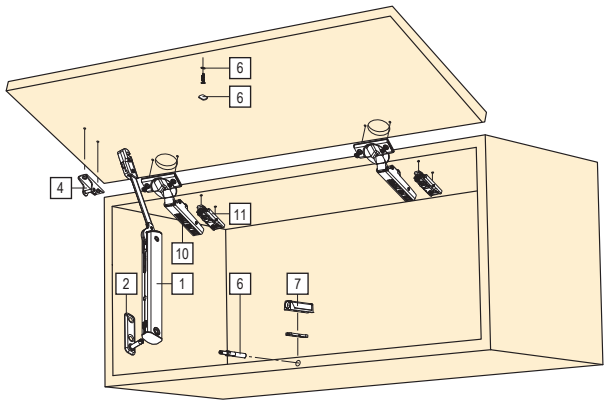

type of lifter	power factor
2× 20K2A01	not possible
1× 20K2A01 + 1× 20K2C01	220 – 500
2× 20K2C01	400 – 1000
2× 20K2E01	960 – 2215

- Power factor = cabinet body height (mm) × combined weight of both fronts and two times handles (kg).

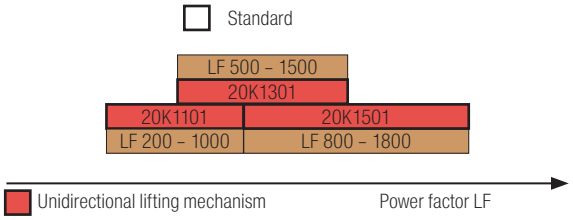

12345 Item in stock **12345** Item on demand

AVENTOS HK-XS

- ideal for high cabinets and top cabinets
- cabinet body height 240–600 mm
- minimum internal depth 125 mm
- symmetrical lift mechanism can be used on one or both sides
- lift fittings, designed for small lifts in high cabinets and top cabinets
- in combination with CLIP top BLUMOTION hinges, the lifts close softly and silently
- the variable stop ensures that the lift remains in the desired position and you can reach it comfortably whenever you want
- smaller cabinet fronts need only one lift; the larger can be supplemented by two

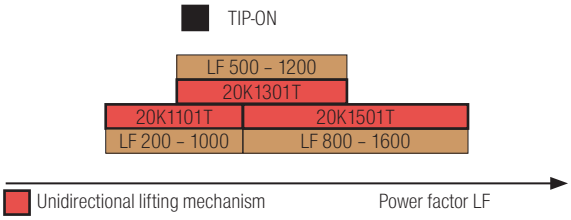

- low installation depth (125 mm) is its biggest advantage, can be used for narrow lifts above extractor or in bathrooms
- fast and easy installation is an indisputable advantage
- the correct strength of the lift is easy to set on the front side of the lift

TIP-ON version is combined with TIP-ON springless hinges and TIP-ON pistons (p. 01.42)

- for this version, one touch on the front is all that is needed to open the lift system wide enough upwards
- you can easily adjust the gap of the closed front by turning the ejector

for beds with storage space, gas and oil

Metal lifter body

code	recommended for pistons	description
224332	50-750 N	zinc
545333	1000-1500 N	black

- the set contains a pair of bed lifters
- for complete fitting order one of the recommended pistons according to the table
- maximum opening angle 40°

Pistons

code	force
224333	350 N
224334	450 N
224335	500 N
224336	650 N
224337	750 N
224338	1000 N
224339	1200 N
224340	1350 N
224341	1500 N

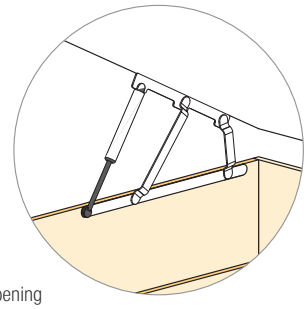

- 2 pistons are required for one bed fitting

Recommended piston types

bed type	width (cm)	recommended pistons
simple bed with transversal opening	60 – 70	2× 350 N
	80 – 90	2× 450 N
simple bed with longitudinal opening	80 – 90	2× 500 N
	100 – 120	2× 750 N
double bed with one bed base	140 – 150	2× 650 N/750 N
	160	2× 750 N/1000 N
	180	2× 1000 N
double bed with two bed bases	140 – 160	4× 450 N/500 N
	180	4× 500 N/750 N

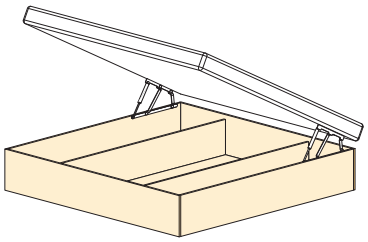

- calculated for bed length: 190–200 cm
- recommended types of pistons are informative (calculated for common slatted bed base and polyurethane mattress approx. 5 kg/m^2)

Detail of fittings orientation

ℹ simple bed
with longitudinal opening

Positioning of fittings

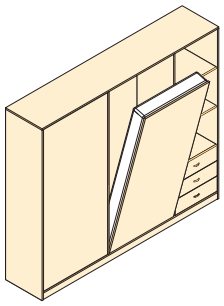

for folding down the bed — KP09

Bed lifter KP09

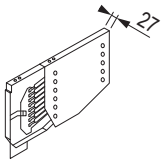

code	colour
11455	white

- all-metal enclosure with inner spring system
- set includes a complete pair of fittings
- for a minimum cabinet depth of 330 mm
- regulation of springs with a screw on the rear side
- use – folding beds
- can be used for single or double bed (max. bed width 140 cm)
- maximum weight of bed structure should not exceed 55 kg (construction + bed base + mattress)
- only cabinet mechanism is included, without supporting leg solution
- spare spring 211055

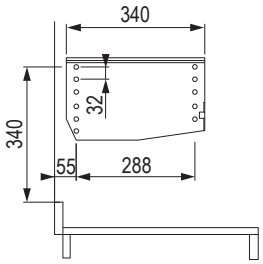

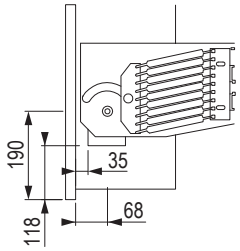

Releasing cassette from the enclosure

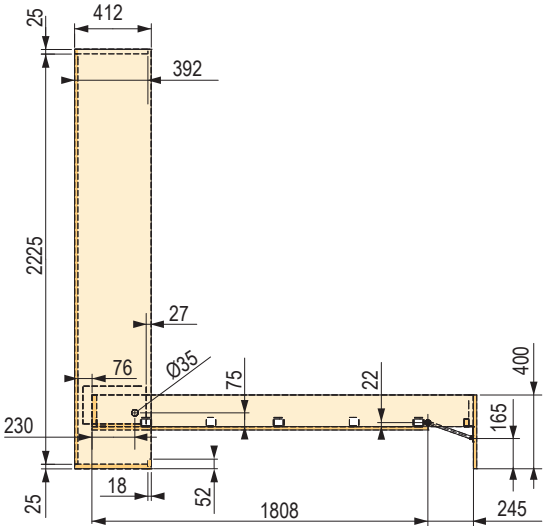

Assembly into cabinet body

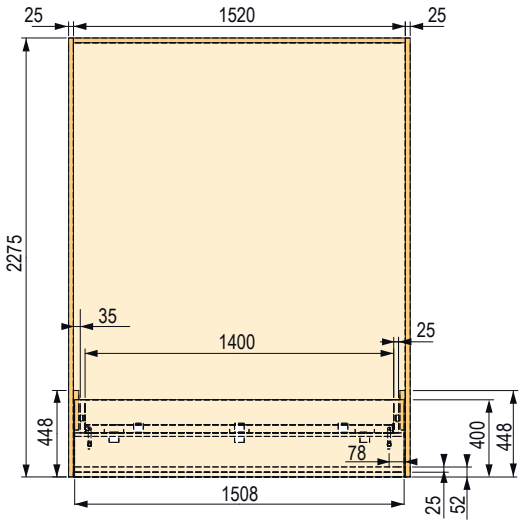

Assembly onto bed base

Installation of the enclosure into the cabinet

Dimensional diagram

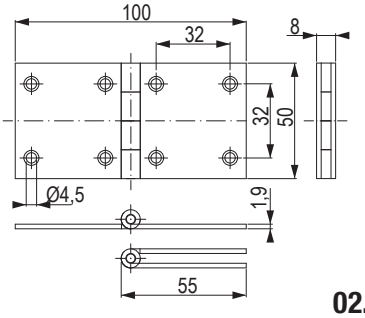

Hinge 50 × 50

code	description
392591	galvanised steel

- the outer diameter of the pin and the thickness of the hinge in the closed state is 8 mm
- sheet thickness is 1 mm

TEMPLATES

A template is the safest way to prepare a part accurately.
You can either buy or rent them at some of our stores.

COMPLETE DRAWERS

Some drawers are more difficult to assemble due to the number of parts that need to be combined. We've made it easy for you by creating special ordering codes under which you'll find everything you need.

MATERIAL FOR DRAWER PRODUCTION

The material for making the door together with the fitting? There's nothing easier than ordering both from us.

PORTAL

A customer portal for shopping, order overview, placing formatting orders and checking their status, information about stock and your prices and much more in one place.

MOUNTING FIXTURES

Like the template, the fixture is the safest way to prepare the part accurately. You can either buy or rent them at some of our stores.

SAMPLE ROOM DISPLAYS

What are the differences between drawers? Come and see for yourself, or send your customers to our sample room. We will walk them through everything and help them make the right choice.

DELIVERY TO YOUR DOOR

All orders will be delivered to your hands within 72 hours.

- load capacity 40 kg
- the maximum recommended width of the drawer is 1.6 times the length of the slide
- for wider drawers, we recommend using base supports (front, rear), p. 03.12
- drawer removal mechanism is integrated in the side
- vertical and horizontal adjustment of the drawer front
- adjustment of the drawer front inclination
- StrongMax18 (base thickness 18 mm), StrongMax16 (base thickness 16 mm)
- fittings for inner drawer and other accessories, pp. 03.11-12

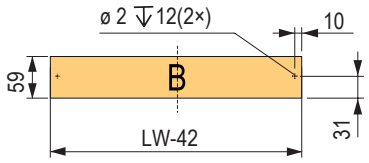

The complete set includes everything for drawer assembly, it consists of:

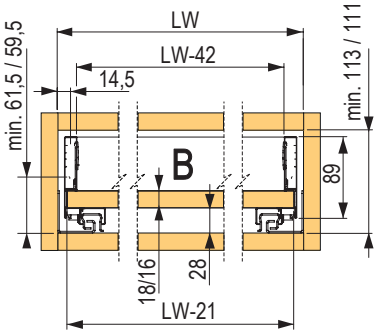

- L+R sides including front fittings, integrated back holders, front and back support and cover cap with STRONG logo and accessories
- L+R slide 40 kg with soft closing

Dimensional diagram

NL = nominal slide length

NL – 20 = base length

NL + 5 = minimum distance of the back of the cabinet body from the slide

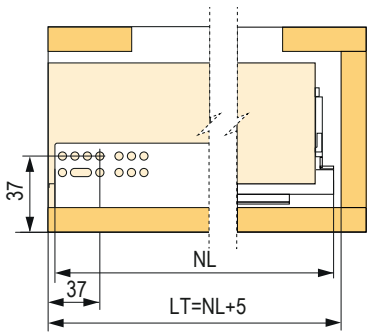

LW = minimum inner cabinet body width

LW – 42 = rear panel width

LW – 21 = base width

LT = inner cabinet body depth

slide systems with thin side panel
StrongMini 89 / 121 / 185 mm

StrongMini in brief:

- **complete drawer with runners**
- **side wall thickness of only 1 mm** – more usable space
- compact design for modern cabinetry
- partial extension with soft-close – load capacity up **to 25 kg**
- full extension with soft-close – load capacity up **to 30 kg**
- length range: **270–550 mm**
- heights: **89/121/185 mm**
- colour options: **white and grey** matching StrongMax drawers
- for boards **10/16/18 mm** thick
- identical cutting dimensions for bottom and back panel
- mounting template compatible with the StrongMax system

StrongMini complete sets — partial extension

length (mm)	89 mm		121 mm		185 mm	
	white	grey	white	grey	white	grey

550	**548534**	548555	**548541**	**548562**	**548548**	548569

- base and rear panel cutting dimensions are identical
- the slide system installation holes are identical to those of the StrongMax slide system, so the existing StrongMax template can be used

slide systems with thin side panel StrongMini 89 / 121 / 185 mm

Individual components

- **1 mm side panel width = 3 cm more internal space compared to a thin double side panel (e.g. StrongMax, Legrabox, etc.).**
- Combination with partial extension with a load capacity of 25 kg or full extension with a load capacity of 30 kg.
- In both cases, the slide system features soft closing.
- The slide system installation holes are identical to those of the StrongMax slide system, so the existing StrongMax template can be used.
- The rear and front holder is a fixed part of the side panel.
- The base and rear panel cutting dimensions are identical.

Strong marking template

For installation of drawers in the cabinet body

code

396273

- material stainless steel
- bidirectional use
- the holes on the front are intended to indicate the position of the hole for the rear mandrel from the StrongRide slides
- can be used to mark holes for drilling the hinge washers
- designed for slides:
  - StrongMax/
  - StrongBox
  - Strongride / StrongRide Uni
  - Strong ball bearing slides
  - Strong roll runner slides with or without a side

marking template

Examples of use:

- marking of drilling hole for the mandrel of Strong concealed slides

Examples of use:

- marking of drilling holes for StrongMax, StrongRide slides

Washer

code

503409

- reduction for 18 mm sides to 16 mm worktop material
- 6 pcs are needed for 1 drawers

TANDEMBOX ANTARO

TANDEMBOX ANTARO

Thanks to its time-proven technology, the TANDEMBOX system has been the cause of amazement and enthusiasm among furniture users and producers. We now introduce a new product assortment represented by TANDEMBOX ANTARO, characterised by a number of new design and arrangement options. TANDEMBOX ANTARO features a simple, straight, and clean design. Whether the drawer is open with a railing or closed with full side panels, the result is the same. In terms of colour design, all components are mutually harmonised. Clean and minimalist design, time-proven technology. That is TANDEMBOX ANTARO.

BLUMOTION

BLUMOTION system closes furniture softly and quietly. Yet the closing swing applied or the load extent of drawers do not play any role.

SERVO-DRIVE

Simply tap lightly on the handleless front or gently pull the handle, and the drawer opens automatically thanks to the SERVO-DRIVE electric system. Soft closing BLUMOTION is retained.

TIP-ON BLUMOTION

The TIP-ON BLUMOTION mechanical opening feature offers practical opening and closing comfort: just tap the front to open it. Then gently slide the drawer back to close it. The soft closing is elegant.

TANDEMBOX ANTARO drawer design

Cutting dimensions for 16 mm thick particle board

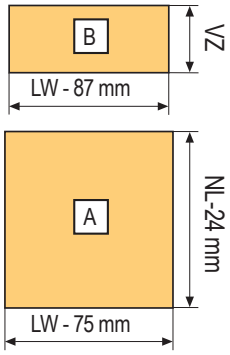

Explanatory notes:

LW	Internal width of cabinet body
NL	Slide depth
VZ	Rear panel height (chipboard)

AMPEROS AC

AMPEROS AC – concealed power supply for drawers and slides

AMPEROS AC provides an elegant and practical solution for powering appliances directly inside drawers and pull-out shelves.
No visible cables, no clutter – appliances remain stored but always ready for use.

Key features:

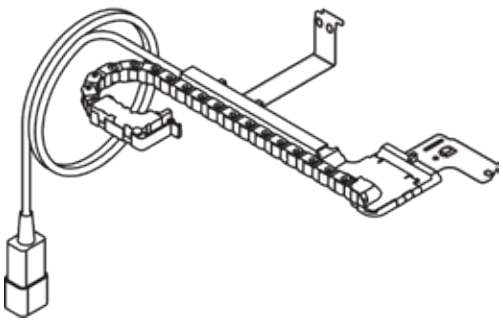

- Discreet design – electrical socket integrated into the slide base.
- Easy assembly – even retrospectively, without electrical expertise.
- Space saving – appliances can be concealed, keeping the worktop free.
- Compatibility – MOVENTO and LEGRABOX, with BLUMOTION, TIPON BLUMOTION and SERVODRIVE.
- Safety – slide lock when using an appliance.
- Universal application – kitchen, office, living room, bathroom.
- IP20 rating.
- For Movento, base thickness 12–32 mm.
- Minimum internal cabinet body widths:
  - from 336 mm
  - from 362 mm with TIPON BLUMOTION
  - from 562 mm with SERVODRIVE

Set contains:
- M side, left (20 pcs)
- M side, right (20 pcs)
- slide, right + left Blumotion/TOB (20 pcs)
- front holder side panel INSERTA or screw (40 pcs)
- inner cover cap with Blum logo (40 pcs)
- outer cover cap with Blum logo (40 pcs)

Must be ordered separately:
- back holders
- for higher drawers: railing, Boxcap or Boxcover
- for higher drawers: upper front holder (for railing, Boxcap or Boxcover)

LEGRABOX

LEGRABOX

Simple design provides more space for inspiration. In order to meet current trends in furniture production, the range of options needs to be expanded. With the LEGRABOX thin side and the new thin fronts assembly technology, the minimalist design of furniture is achieved quite easily. The basis for new thin fronts
is represented by

EXPANDO T
Steel pull-in anchors stabilise hard materials, plastic elements stabilise soft materials. EXPANDO T is installed in a assembly hole of 10 mm in diameter with a drilling depth of only 6 mm.

Three
Variability for the implementation of multiple motion technologies with only one guide rail, optimal soft closing function tailored to the respective technology – the new BLUMOTION S runner system for LEGRABOX has it all.

Optimised BLUMOTION
Have you ever closed a pull-out with a good swing? Then you should consider installing the BLUMOTION S guide rail. The soft closing will be better, therefore more efficient – closing the slides will be even softer.

TIP-ON BLUMOTION
Drawers and pull-outs that not only close softly, but also open with a gentle tap? TIP-ON BLUMOTION is the perfect solution. An opening unit is added to the BLUMOTION S guide rail which is also included in this system. Thanks to the product's unique intelligence, the soft closing adjusts automatically. Assembly is carried out without power tools.

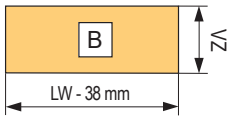

SERVO-DRIVE
Are you interested in the highest degree of handling comfort when opening and closing? SERVO-DRIVE serves this exact purpose.
The BLUMOTION S guide rail will be supplemented with the relevant SERVO-DRIVE components.

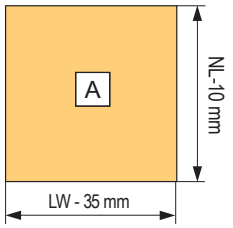

Easy and better: BLUMOTION S – one is better than

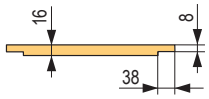

LEGRABOX – design of drawers

Cutting dimensions for 16 mm thick particle board

Base and back

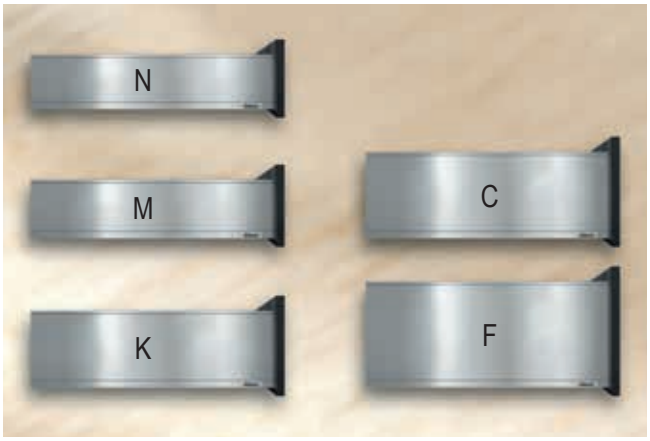

Cutting of back height for individual side heights

N	39 mm
M	63 mm
K	101 mm
C	148 mm
F	212 mm

Explanatory notes:

LW	Internal width of cabinet body
NL	Slide depth
VZ	Rear panel height (chipboard)
TOB	TIP-ON BLUMOTION

Cuttings for synchronisation bars

description	dimensions
TOB synchronisation linkage	LW-247 mm
TIP-ON synchronisation linkage	LW-229 mm

Inner drawer cutting

description	dimensions
front sheet metal	LW-126 mm
front cross railing	LW-90 mm

Material and colours

RAL colours have a significantly lighter look due to a rough surface.

Carbon black	CS-M	RAL 0002500
Orion grey	OG-M	RAL 8022
Silky white	SW-M	RAL 9003
Stainless steel (inox), anti-fingerprint	INOX	

SW-M OG-M CM-S INOX

Set for 410 or 460 mm depth

	code	Blum code	description
1	**389310**	Z95.4100	410 mm, Orion grey
	389311	Z95.4600	460 mm, Orion grey

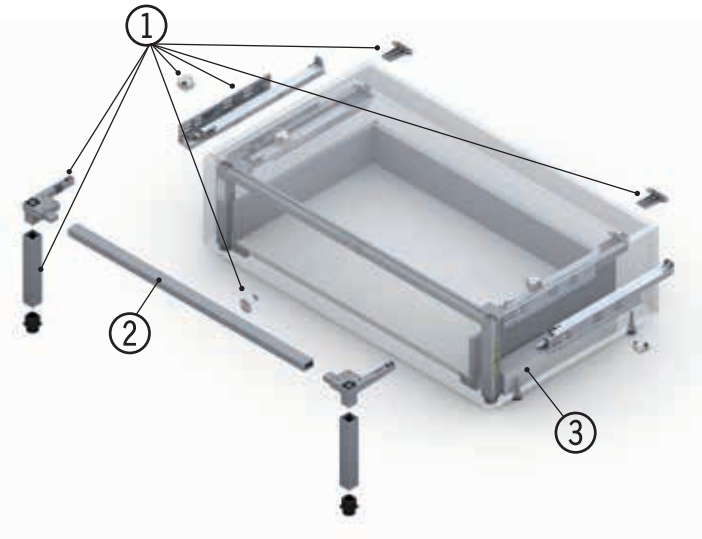

- load capacity 150 kg

Set contains:

- 1a – 2× TANDEM 561Hxxx1B95 left/right
- 1b – 2× plinth leg
- 1c – 2× corner connector
- 1d – 2× support feet
- 1e – 2× slide-on holder for shelf slide
- 1f – 1× front connecting fitting (magnet and catch plate)
- 1g - 4× spring stop[1]
- 1h – 2× sticker (safety instructions and producer's certificate)
- 14× flat headed screws 4 × 15 mm
- 1× assembly instructions
- KB – cabinet body width
- LW – internal cabinet body width

[1] – from KB > 900 mm, 4 pcs

Horizontal bracket profile

	code	Blum code	length
2	**389312**	Z95Q1040A	1200 mm

Cutting: LW – 130 mm

Recommended: for a cabinet body width (KB) of 1 200 mm, use 2 pcs to avoid possible excessive deformation

Distance profile

	code	Blum code	description
3	**389313**	Z95D4100	for assembly of the bottom slide

- optionally, you don't have to make your own, solid wood
- for assembly pull-out runners, suitable for all Blum's Box systems and runner systems

[1] Approval of the actual load capacity of furniture you have manufactured with Space Step must be provided by you as the manufacturer in accordance with standard EN-14183. This fact must be stated on the producer's label.

❗ Handleless extension of the step is ensured by the inner Tip-on or TOB drawer. The step itself cannot be extended handlelessly.

Recommended material:

For the plinth step, we recommend a coated plywood (3 layers) with a minimum thickness of at least 21 mm.

Step surface recommendations:

The surface of the step must be non-slip. For this purpose, it is possible to use a non-slip mat directly affixed to the surface of the step, or a non-slip plate.

Positioning of labels:

The EN-14183 standard assumes the positioning of both attached labels to be visible.

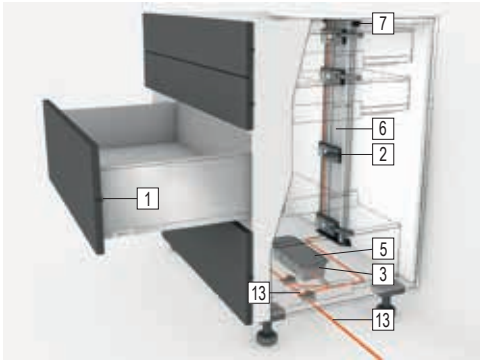

Slide under Space Step:

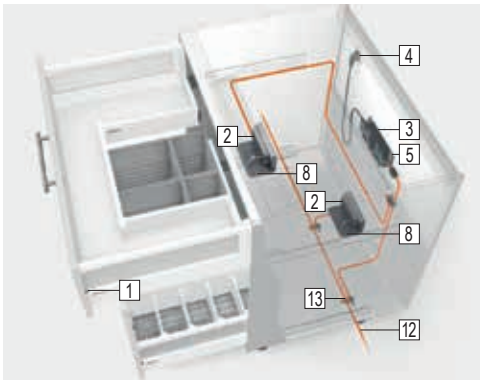

❗ Only 30 kg or 40 kg runner system may be used. The dynamic carrying load capacity for the slide under Space Step is 20 kg.

- The SERVO-DRIVE system allows combination of handleless opening with BLUMOTION damped closing
- there is no fixed connection between the system and the runner system of drawer; drawers can also be operated without power supply
- the minimum 2 mm offset of front from the cabinet body edge is ensured by distance bumper
- for fronts up to a height of 300 mm, 2 pcs of bumpers are mounted to the front centre; for higher ones (over 300 mm), 4 backstops in the corners

Complete set for different type and number of cabinet bodies

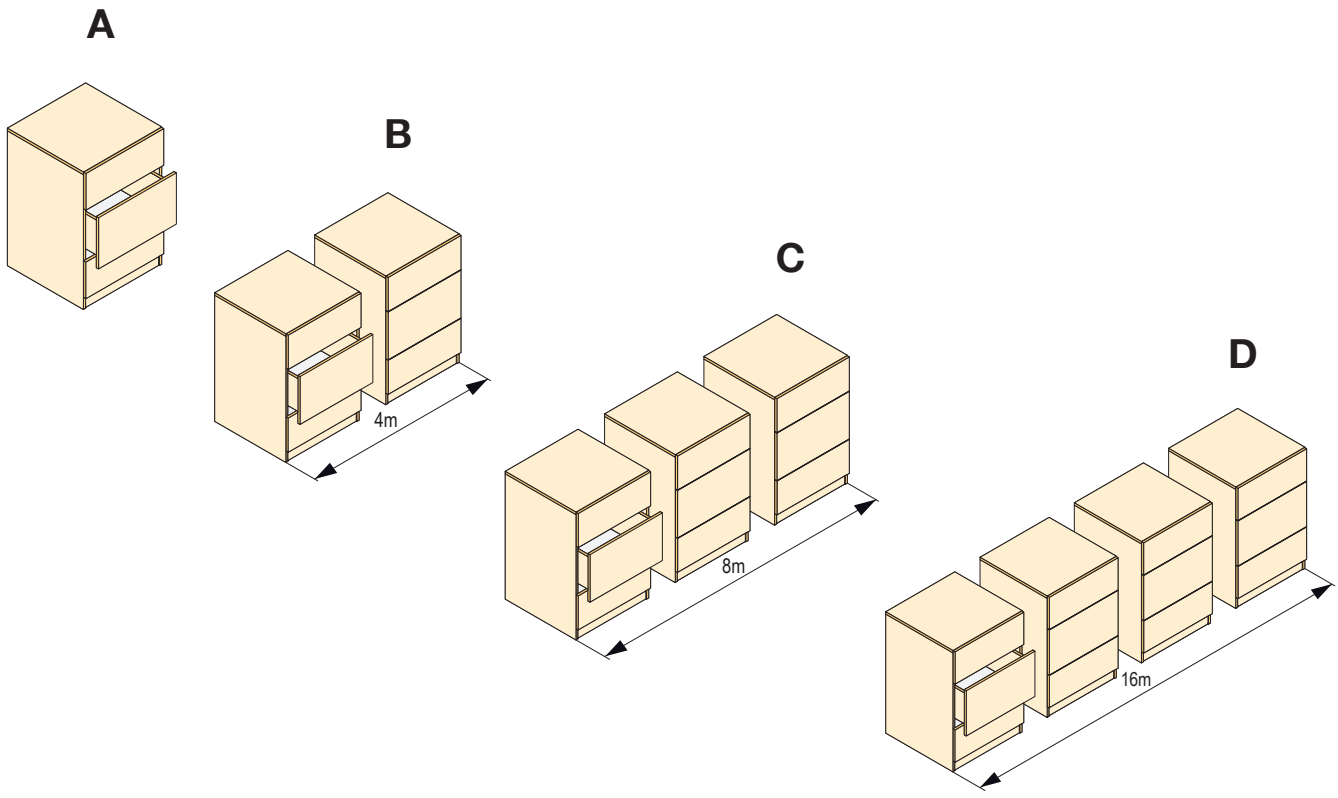

internal cabinet body height (mm)	number of drawers in the cabinet body	number of cabinet bodies			
		1	2	3	4
660–669	3	**388310**	**388311**	**388312**	**388313**

1180–1189	4	**388323**	**388324**	**388326**	**388327**
max. distance of the outer cabinet bodies (m)			4	8	16

The complete set includes:

- drive units according to the number of drawers
- bracket profiles according to the number of cabinet bodies
- bracket profile attachment (base/back) according to the number of cabinet bodies
- distance bumpers (low – 2×; high 4×)
- distribution cable (3 cabinet bodies – 1×; 4 cabinet bodies – 2×)
- connecting nodes
- transformer
- transformer holder for mounting into the base
- power supply cable

Maximum distance of 2 outer cabinet bodies

SERVO-DRIVE Flex

Individual components

	code	Blum code	description
15	**545024**	Z10C500A	SERVO-DRIVE FLEX for a dishwasher, refrigerator or freezer
16	**265356**	Z10C5005	dishwasher adapter for SERVO-DRIVE Flex
3	**523392**	Z10NE04EE	power supply 72 W
15	**991110**	Z10NG000	transformer holder for assembly into the base
	131344	Z10NG000	transformer holder for assembly into back

	459669	23P5020	separate switch, grey
	419890	23P5020	separate switch, white
	304165	Z10K300A	synchronisation cable 3 m, light grey

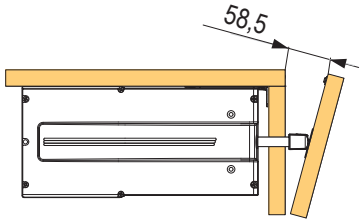

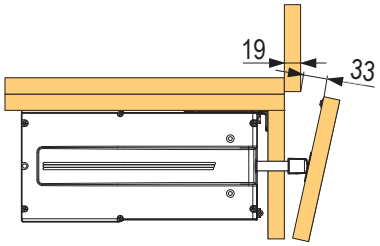

- set SERVO-DRIVE FLEX includes:
  - the FLEX unit
  - connecting node
  - counterpart for doors
  - 3 distance bumpers
  - assembly template
  - cover panel clip
  - hole cover cap
- for electric opening of handleless furniture and built-in refrigerators
- Flex is designed for opening of built-in appliances, such as refrigerators (up to 178 cm), freezers (158 cm) or dishwashers
- combined refrigerators have two doors. One for a refrigerator and one for a freezer. Each door is equipped with their own Flex drive and can be opened separately
- in case of bigger and heavier refrigerator fronts, two drive units can reliably and synchronously open the door
- in case of built-in dishwashers, the drive unit should be placed at the centre of the dishwasher
- required space above (below) the appliance is at least 60 mm
- Flex is always placed on the opposite side of the hinges
- must be completed with transformer, power supply cable and transformer holder (523392, 99108, 131344) in case these items are not already part of the kitchen

UNO for drawer with waste bin

code	Blum code	description
130787	Z10UB00EE	SERVO-DRIVE Uno complete set for 1 (bottom) drawer

- electrical opening set for drawers with waste bin
- by gently tapping the front of the pull-out with a knee or a toe, the pull-out with the waste bin can be opened easily
- integrated protection against opening, prevents unintentional opening in case someone is leaning against the furniture
- the UNO set in the standby mode consumes only 3.5 kWh per year
- the minimum space in the cabinet body required for the UNO set is the length of the cabinet profiles plus 35 mm

Movento TIP-ON BLUMOTION

Full extension slide, load capacity 40 and 60 kg

code	Blum code	description
349918	760H2500S	250 mm/40 kg

The 250 mm length is the only one that cannot be used in combination with TOB!

349941	766H7500S	750 mm/60 kg

- opening by a light tap, easy running, soft and silent closing
- its peculiarity is a purely mechanical course of motion
- extra large and high fronts – optional synchronisation even allows to additionally increase the space for a large trigger range
- for proper functioning, it is necessary to provide:
  - Movento runner system designed for TIP-ON BLUMOTION
  - front mounting (L + R)
  - suitable TOB module according to the depth and weight of the whole drawer
  - adapters (2 pcs)
  - synchronisation linkage
- use template 275419 for proper depth setting and adjustment

Set of modules for TOB

AvanTech YOU - InnoTech Atira

As special as you...

The **AvanTech YOU** drawer system impresses with its diverse design, concealed technology delivering the highest performance, and a well-thought-out concept focused on the real needs of customers. It combines precise function with maximum creative freedom.

Clean design, your own signature
Slim side panels of just **13 mm** thickness and clean, straight lines give the drawer an exceptionally elegant appearance. At the same time, they open up space for realising your own ideas and unique design solutions.

One drawer, many possibilities
Two slide types, a wide range of comfort functions, and a uniform boring pattern allow flexible combinations without complications during manufacture or assembly.

Efficient production without compromise
The extensive **AvanTech YOU** platform is designed with efficient manufacturing and assembly processes in mind. The result is cost-effective production of a wide range of variants whilst maintaining high quality.

Design without boundaries
Different shapes, colours, and materials make it possible to carry the design from the exterior of the furniture through to its interior. Decorative profiles and DesignCape create striking accents and give the drawers a distinctive character.

Technology that holds it all together
AvanTech YOU seamlessly combines technology, functionality, and performance into one precisely tuned system.

AvanTech YOU – see p. 03.107

Distinctive – Versatile – Flexible

The **InnoTech Atira** drawer system makes an immediate impression with its clean, angular lines and distinctive design. It stands out in kitchens and other interiors alike, becoming a natural part of the overall appearance of the furniture.

The single Hettich platform offers a wide range of finish options — from different colours to variable solutions for high drawers. This makes it easy to create diverse design variants and to make later modifications, such as switching from a railing to **TopSide** or **DesignSide**.

Well-designed organisers help make efficient use of storage space and maintain order in every drawer. User comfort is ensured by the **Push to open Silent** mechanism, which allows handleless opening with a light touch and dampens the drawer movement on closing.

All system components are colour-coordinated and can be complemented with decorative profiles. **InnoTech Atira** thus offers the perfect balance between design, functionality, and flexibility.

ArciTech complete sets

ArciTech

- Lightness, strength and elegance in one – that is ArciTech.
- A system that handles even heavy drawers with ease whilst remaining perfectly quiet and smooth.
- Thanks to the robust Actro slide, it carries everything without losing lightness of movement.
- ArciTech brings modern design in line with the latest trends and enables the creation of high, wide, and deep drawers with precise operation.
- The result is furniture that meets the highest demands for both functionality and aesthetics.
- Quiet. Strong. Flexible.

- Complete set contains L+R full extension Actro 5D for drawer side thickness 16 mm
- with integrated Silent System or Push to open + Actro 5D connectors.
- Drawer adjustment in 5 directions without power tools, using clamps.
- Height adjustment + 3 mm, side adjustment in front ± 1.5 mm and in back 1.5 mm, depth adjustment ± 2 mm and inclination adjustment + 4 mm.
- Convenient slide-on assembly with 5D catches.
- Additional: slide (depth) ± 2 mm.
- Slides with integrated damping (SiSy) can be combined with Push to Open Silent fittings.
- Slide load capacity 40 or 70 kg.

317649	450	463	86	256
317650	500	513	98	288

- **Silent System:** integrated soft closing system ensures that the drawer closes softly and quietly
- convenient slide-on assembly with latching elements and height adjustment without power tools
- **for side thickness up to 19 mm**
- **flexible system:** the Quadro partial extension slide can be substituted with the Quadro full extension slide without changing the dimensions of the cabinet body, drawer or its front
- load capacity according to EN 15338, class 3
- galvanised steel, suitable for wet environments

Quadro – optional accessories

Synchronisation for Quadro concealed slides

code	description
318279	Push to Open synchronisation bar 2000 mm
318281	Push to Open synchronisation connector
318282	Push to Open adapter type A
318283	Push to Open adapter type B
318284	Push to Open double adapter type A
318285	Push to Open double adapter type B

- synchronisation is mounted rigidly on the rear part of the slide
- for drawers with Quadro slide with Push to Open mechanism and width over 600 mm
- maximum cabinet body width: 2000 mm
- advantage for a sink cabinet (siphon!) and a unique solution for 2 drawers with shared front

Using adapter according to the type:
A for InnoTech on Quadro V6+ and for wooden drawers on Quadro V6 and Quadro V6+
B for InnoTech on Quadro V6
- double adapter is designed for 2 drawers with 1 shared front

Synchronisation set for specific slides

	slide	type of adapter	synchronisation bar	connector for two parts of synchronisation	type of adapter for 2 drawers with shared front

	Quadro V6+	**318282**			**318284**

Quadro slides locking for solid wood drawers

- can be easily added
- for Quadro V6 and Quadro V6+, EB 20
- colours: white and grey
- self-locking when fully pulled out of the slide shelf
- unlocking when slid in with a defined force
- they will replace the adapters for pull-out shelves that have been in use up until now

How to choose the right cutlery tray width

producer	subtraction from inner width of the cabinet body (LW - W) (mm)	inner depth compared to the defined slide depth (mm)
Blum LEGRABOX	42	26
Blum Merivobox	2×28=56	28
StrongMax 18	42	28
Blum TANDEMBOX ANTARO	48	26
StrongBox	60	
StrongMax 16	42	
Hettich InnoTech Atira	73	30
Hettich ArciTech	58	21 (sheet metal) and 24 (wooden)

For example StrongBox for cabinet with 600 mm external dimensions,
18 mm wall thickness and 500 mm slide length:

inner dimensions of cabinet body: **LW = 600 – 36 = 564 mm**
inner width of drawer: **W = 564 – 60 = 504 mm**
inner depth of drawer: **500 – 26 = 474 mm**

ℹ inner width of the drawers as specified by the producer
- valid for cutlery tray with 50 mm height (H)
- these dimensions are subtracted from the inner width of the cabinet body

12345 Item in stock **12345** Item on demand

OrgaTray cutlery trays

Cutting dimensions

ArciTech:

- cutting width (B) = LB – 2× EB – 47 mm
- cutting depth = nominal length – 27 mm

InnoTech Atira:

- cutting width (B) = LB - 2×EB - 37 mm
- cutting width (B) = LB – 2 × EB – 47 mm
- cutting depth = nominal length – 8 mm

AvanTech YOU:

- cutting width (B) = NB - 2×KD - 42
- cutting depth = nominal length – 27 mm

- EB (InnoTech + Atira) for sides thickness 18 mm = 10.5 mm
- EB (ArciTech) for sides thickness 18 mm = 13 mm
- KD (AvanTech) is the thickness of the material on the cabinet body sides
- LB = inner cabinet body clearance
- NB = outer cabinet body clearance

StrongBins sorters – pull-out

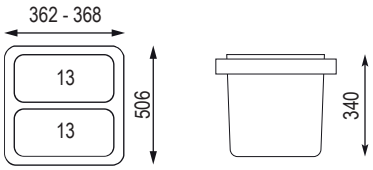

- StrongBins waste bins represent a practical waste sorting system with an emphasis on quality, functionality, and easy installation.
- A simple solution that replaces the standard pull-out drawer and is designed for base cabinets of width 400 and 600 mm.
- Enables sorting of up to 4 types of waste thanks to the arrangement of containers made from durable plastic.
- The packaging includes StrongBox slides with soft closing and a manual that serves as a drilling template for precise assembly.

For cabinet body width 400 mm

Package contents:
- manual, which also serves as a left/right marking template for drilling the slides
- StrongBox full extension slide design with soft closing
- metal sides and lid of the bin
- containers made of durable plastic

sorters for insertion into a drawer — StrongBins

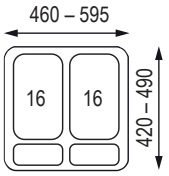

- A simple and practical waste sorter solution designed for insertion into a drawer.
- Suitable for cabinet bodies of width 600 mm and 800–900 mm.
- Made from durable polypropylene – a material with high thermal and mechanical resistance.
- The perforated base allows easy trimming to size; the modular base can be shortened by up to 5 cm.
- The lid protects the contents from odours and dirt.

Ritter built-in appliances

Built-in cordless blender BHB 50

code	description
348058	BHB 50

- for drawer width at least 300 mm
- three speed settings: 6 000 rpm
  9 000 rpm
  12 000 rpm
- the charging station is firmly mounted in the drawer, can be removed without tools for quick cleaning
- LED battery capacity indicator
- 4 attachments: universal, whipping, stirring, cutting
- two-finger switch-on safety system
- charging 100–240 V, lithium–ion battery: 7.2 V, 2.1 Ah
- total weight incl. charging station – 1.4 kg, blender weight – 1 kg
- overall dimensions in drawer: width 138 mm, length 420 mm, height 73 mm

Toaster BT 10

code	description
RI013	BT 10

- ready to use with one movement
- thermal insulated housing made of stainless steel
- defrosting cover
- reheating function
- stop button to interrupt toasting
- specially shaped crumb tray for cleaning in any position of the toaster
- rack for toasting rolls
- minimum inner width: 178 mm
- minimum pull-out height: 75 mm
- minimum inner depth: 415 mm
- weight: 2 kg

kitchen and wardrobe wire systems

MATERIAL FOR CABINET BODY PRODUCTION

The material for the door and cabinet body together with the fittings? There's nothing easier than ordering both from us.

ADVISORY SERVICE

Not sure how to choose or assemble the fittings?
Call +420 556 684 310 or email export@demos-trade.com
and we will be happy to help you.

COMPLETE CABINET BODIES

Do you have a great project but are struggling with time, workshop space, or other obstacles? Don't lose heart! We offer you our premises, machinery, and time — we will manufacture the cabinet bodies you need to your exact specifications.

PORTAL

A customer portal for purchasing, order overview, job submission, formatting, and order status tracking. Stock availability, your prices, and much more – all in one place.

SAMPLE ROOMS DISPLAYS

Representatives of wire systems need enough space for displaying demonstrations and we have it. Come and see for yourself, or send your customers to our sample room. We will walk them through everything and help them make the right choice.

DELIVERY TO YOUR DOOR

All orders will be delivered to your hands within 72 hours.

505430	aluminium	900
505431	black matt	

- set includes fittings for attachment to legs

QBit system

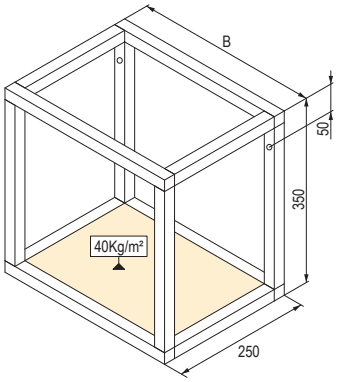

- modular solutions for wall-mounted shelves
- robust construction in anodised aluminium
- option of combining with wooden or glass shelves
- variable configuration: suspended and free-standing construction
- profile dimensions 20 × 20 mm
- colour options (anodised – all colours available to order): matt black, natural aluminium, gold, brown

Shelf structure

code	width B (mm)	height (mm)	depth (mm)
357804	400	350	250
357807	600		
357809	800		

- other dimensions for complete shelf assemblies can be provided on individual request
- material thickness for bottom shelf = 18 mm

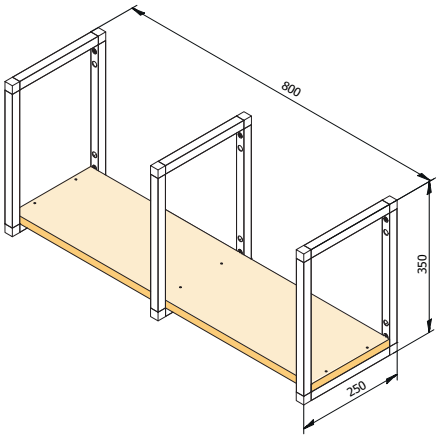

QBit system

Shelf frame

code	height (mm)	depth (mm)
357959	350	250

- option of preparing holes for shelves at any height and in any quantity

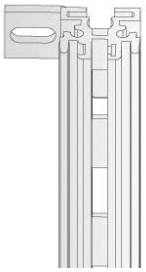

Vertiko system

- wall system of vertical profiles and shelf and cabinets holders

Wall profile, length 2606 mm

code	colour
500710	aluminium

- the profile includes a control plate and a screw
- the profile can be equipped with electrification

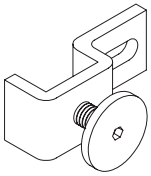

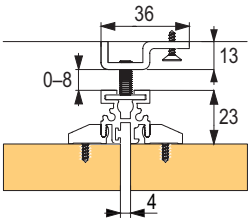

Plastic clip for panel attachment

402859		900
506934	black matt	

Centre shelf support

code	use
408377	for shelf attachment

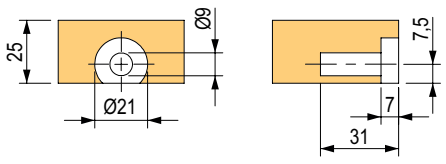

- complete set for continuous attachment of two shelves
- the set includes:
  - 4 pcs of shelf supports with thread
  - 4 pcs of screws M4×8

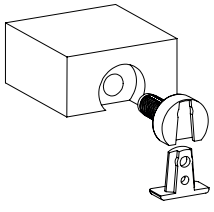

Side support shelf

code	use
408376	for shelf attachment

- use two sets of side shelf supports for one shelf
- the set includes:
  - 2 pcs of shelf supports with thread
  - 2 pcs of screws M4×8

ADVISORY SERVICE

Not sure about the fittings and the choice of assembly?
Call +420 556 684 310 or email export@demos-trade.com and we will be happy to help you.

ORDER FORM FOR LED STRIPS

Configure your own LED assembly quickly and easily with our online configurator that helps you order compatible components in one step.

CUSTOMISED LED STRIPS

We can supply you with customised lights according to your specifications using online configurators or order forms available for download on our website.

PORTAL

A customer portal for purchasing, order overview, job submission, formatting, and order status tracking. Stock availability, your prices, and much more — all in one place.

SAMPLE ROOM DISPLAYS

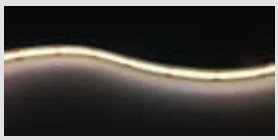

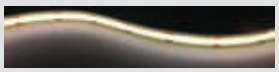

Do the strips shine enough? How do the sensors work? What do the chargers and connection points look like and how big are they? Does a wireless charger work with my phone? Come and see for yourself, or send your customers to our sample room. We will walk them through everything and help them make the right choice.

DELIVERY TO YOUR DOOR

All orders will be delivered to your hands within 72 hours.

StrongLumio LED strips

RGB Red-Green-Blue (red – green – blue)

It consists in mixing the three colours at different intensities. This combines to create any colour (up to 16 million shades). If the red, green and blue colours intersect in full intensity, a white colour is produced – bluish, not very natural. Connection by cable with 4 cores (Plus, red: R, green: G, blue: B – 4 PIN).

RGBW

Combination of RGB spectrum with white (RGB WW – with warm white, RGB NW – with daylight, neutral white, RGB CW – with cold white). The connecting cable has 5 outputs (Plus, red: R, green: G, blue: B, White: – 5 PIN).

RGBCCT

The best you can get. They combine RGB and CCT technology into one LED strip. Thanks to this, you can set any RGB colour, plus the white light temperature. The connecting cable has 6 outputs (Plus, red: R, green: G, blue: B, Warm white: – WW, cold white: CW – 6 PIN).

Single-colour LED strips

In our offer, the single-colour strips (white light) are divided into three groups according to their temperature: warm, neutral, cold. We can also change the intensity of the light, the white temperature is invariable. They are connected with a two-core cable (plus and minus – 2 PIN).

CCT (Correlated Color Temperature)

LED strip technology allows the user to adjust the white colour temperature from 2300 to 6500 K. Use the control to select between cold and warm light or to change the intensity of the light.
Connection by three-core cable (Plus, warm white: WW, cold white: CW – 3 PIN).

Explanation of the differences between 12 V and 24 V

Why choose 24 V LED lighting? Generally speaking, if all other parameters are maintained (number and size of diodes, total power, materials used, etc.), the difference in luminous intensity is not noticeable at first glance, but it does become apparent when longer continuous lines are used. 12 V strips have a more pronounced drop in luminous intensity when power supply is applied from one end. The result is a maximum recommended length of 5 m, while 24 V constant voltage strips are recommended by producers to be wired in maximum lengths of 7–10 m.

This is due to the lower current drawn from the source compared to 12 V strips. To achieve the same power, twice the voltage is enough to get half the current. This fundamental relationship allows 24 V devices to typically power twice as powerful sets compared to 12 V. As a result, a switch for a maximum current of 4 A can handle 48 W at 12 V while handling up to 96 W at 24 V.

Without going into too much technical detail, it can be simplified to say that in most cases the classic constructions have 12 V half length sections for shortening, which can play a role in cutting the length to suit a particular project.

Summary in points:

12 V strips
- can be shortened more flexibly

24 V strips
- allow the connection of longer sections in one piece
- they only need half the current for the same power
- with half the current, they generally heat up less and allow thinner conductors

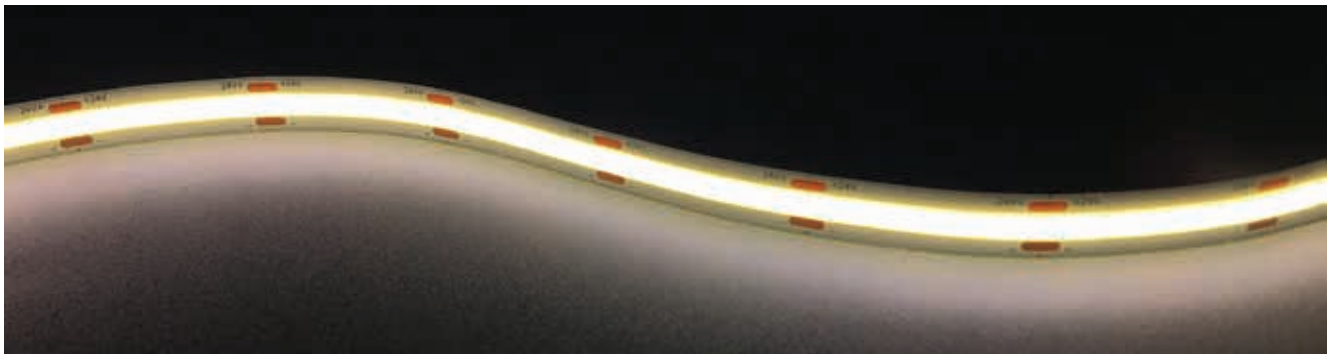

StrongLumio S3 | 24 V COB strips

COB (= chip on board) LED strips

Characterised by a high density of miniature diodes encapsulated in a layer of phosphor, creating a continuous line of light.
The result is generally good performance characteristics with the effect of uniform illumination even when viewed at close range.
This is a trend that, particularly in recent years, has become a standard and fully-fledged alternative to classic SMD (= surface mounted diode) strips, especially where visual comfort and aesthetics are prioritised.

Advantages
Uninterrupted line of light – high aesthetic quality
Homogeneous light diffusion, reduced glare
Better light uniformity even at short distances and in shallow profiles

Disadvantages
More susceptible to mechanical damage, as the individual chips do not each have their own housing
Slightly poorer heat dissipation due to the large number of chips placed in close proximity
Basic models may have lower efficiency in lm/W

8 mm COB strips 24 V

- CRI 90+ natural colour rendering
- protection rating: IP20, interior use only
- white phosphor edges ensure even better light diffusion
- uniform illumination even at low brightness or when dimming

Trimming every 50 mm

24 V, 5 W, 320 LED/m, 8 mm

- particularly suitable for decorative and subtle lighting
- low energy consumption, but also limited luminous intensity

WARRANTY 3 YEARS

24 V, 12 W, 480 LED/m, 8 mm

- primary and decorative interior lighting
- suitable for standard direct lighting and more demanding decorative applications
- high-luminosity chips
- extra warm white for lighting with emphasis on visual comfort and a natural evening ambience

507815 StrongLumio corner connector LED strips 2 pins 8 mm

StrongLumio S5 | 24 V CCT COB strips

CCT COB strips 24 V

CCT strips allow regulation of white colour temperature from warm yellowish to cool white.
Particularly suitable for spaces with varying requirements throughout the day, e.g. living rooms during the day and in the evening.
Standard control units regulate warm and cool white reciprocally, i.e. they increase one channel and decrease the other.
The total light output and energy consumption are therefore practically half compared to the simple sum of both channels.

24 V, 10 + 10 W, 576 LED/m, 8 mm

- CRI 90+ natural colour rendering
- protection rating: IP20, interior use only
- white phosphor edges ensure even better light diffusion
- uniform illumination even at low brightness or when dimming

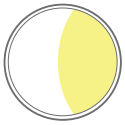

Trimming every 41.67 mm

- **CCT strip with 2 pins allows regulation of white colour temperature via 2 conductors (like single-colour strips)**
- requires the use of an appropriate control unit and controller
- in any other wiring configuration, can be used as warm or cool white (depending on polarity)

WARRANTY 3 YEARS

code	light colour	temperature	luminous intensity	LED/m	width	input power/m
544705	from warm white to cold white	2700 - 6500 K	930 lm/m	576	8 mm	10 W

CCT

Related product range:
546641 kinetic receiver for 2-wire CCT
546638 receiver for 2-wire CCT for standard controllers

Recommended connectors:
507813 StrongLumio universal connector LED strip/twin cable 8 mm
507815 StrongLumio corner connector LED strips 2 pins 8 mm

24 V, 11 + 11 W, 608 LED/m, 10 mm

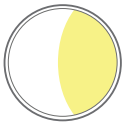

- CRI 90+ natural colour rendering
- protection rating: IP20, interior use only
- **allows independent regulation of white colour temperature**
- 3 conductors, corresponding connectors and three-core cable must be used
- requires the use of an appropriate control unit and controller

Trimming every 26.5 mm

472111	COB RGB strip

Recommended connectors:
543620 StrongLumio CCT/RGB COB LED strip – cable connector 10 mm
543621 StrongLumio CCT/RGB COB LED strip – strip connector 10 mm
543622 StrongLumio corner connector CCT/RGB COB LED strip 10 mm

24 V, 12 W, 360 LED/m, 10 mm digital

- **Digital COB strip allows individual segments to be switched sequentially, achieving various dynamic effects**
- CRI 90+ natural colour rendering
- protection rating: IP20, interior use only

- requires an appropriate switch or controller for setting more complex effects
- e.g. sequential wave activation, back-and-forth pulsing, etc.
- 12 independently controllable segments per 1 metre

Trimming every 82.3 mm

WARRANTY 3 YEARS

546609	touch switch with dimming and speed control option
544562	remote control with option of various dynamic effects

StrongLumio S3 | 24 V SMD strips

SMD (=surface mounted diode) LED strips

These represent a proven and still widely used technology in which individual LED chips are housed in separate casings mounted directly on a printed circuit board.
The individual diodes allow them to achieve high light efficiency and generally a favourable price point.
They are ideal where a continuous light effect is not required, but where the emphasis is instead on performance, flexibility, and a cost-effective solution.

Advantages
High light efficiency and a wide range of power variants.
Simpler construction and greater resistance to mechanical damage.

Disadvantages
Visible individual LED points – less homogeneous light.
For a uniform effect, they require a greater distance from the illuminated surface or a deeper profile.

24 V, 6 W, 60 LED/m, 8 mm

- CRI 80+ balanced colour rendering for general use
- protection rating: IP20, interior use only

- suitable for decorative and subtle lighting
- ideal in a deeper profile or as indirect light

WARRANTY 3 YEARS

Trimming every 100 mm

code	light colour	temperature	luminous intensity	LED/m	width	input power/m

12345 Item in stock **12345** Item on demand

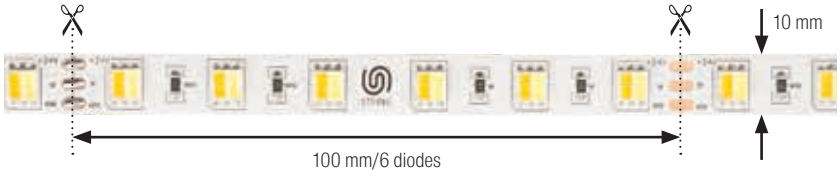

StrongLumio S5 | colour SMD strips 24 V

CCT 24 V, 7 + 7 W, 60 LED/m, 10 mm

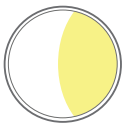

- CRI 90+ natural colour rendering
- protection rating: IP20, interior use only
- **allows independent regulation of white colour temperature**

- particularly suitable for spaces with varying requirements throughout the day, e.g. living rooms during the day and in the evening
- 3 conductors, corresponding connectors and three-core cable must be used
- requires the use of an appropriate control unit and controller

WARRANTY 3 YEARS

code	description	temperature	luminous intensity	LED/m	width	input power/m
405176	from warm white to cold white	2800 - 6500 K	1200 lm/m	60	10 mm	7 W

CCT

24V DC | [h] 30000 | Type of diode: **5050**

Recommended connectors:
543623 StrongLumio connector CCT LED strip – cable 10 mm
543624 StrongLumio connector CCT LED strip – strip 10 mm

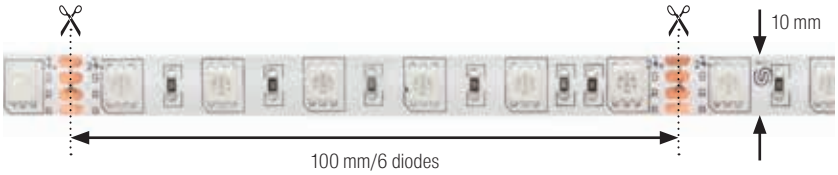

Input power: 14.4 W/m RGB

- protection rating: IP20, interior use only
- **RGB LED strips combine 3 colour components and thus allow lighting regulation in any shade**

- particularly suitable for decorative lighting of interiors, furniture, and suspended ceilings
- not suitable for standard white lighting, which places greater strain on the strip and does not appear natural
- power consumption of 14.4 W corresponds to full intensity of all 3 colours = when set to 'white'

- 4 conductors, corresponding connectors and four-core cable must be used
- requires the use of an appropriate control unit and controller

WARRANTY 3 YEARS

code	description
284602	RGB strip 60 LED/m

24V DC | Type of diode: **5050**

Recommended connectors:
543625 StrongLumio connector RGB LED strip – cable 10 mm
543626 StrongLumio connector RGB LED strip – strip 10 mm

StrongLumio S5 | colour SMD strips 24 V

RGBW 24 V, 14.4 W, 60 LED/m, 12 mm

- protection rating: IP20, interior use only
- **allows colour regulation and full-quality white light**

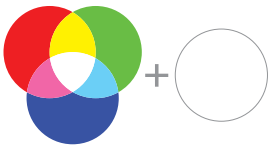

- RGBW strips have an additional segment with full-quality white light in each diode compared to RGB strips.
- as a result, colours are true to life, however the light output is not particularly high
- particularly suitable for spaces with varying requirements for atmospheric and functional lighting
- power consumption of 14.4 W corresponds to full intensity of all colours
- 5 conductors, corresponding connectors and five-core cable must be used
- requires the use of an appropriate control unit and controller

Trimming every 100 mm / 6 diodes

WARRANTY 3 YEARS

Neons 24 V

- manufactured by co-extrusion of LED strip and silicone
- greater durability than when a strip is subsequently inserted into an empty profile
- manufactured from gas-phase silicone – a high-purity material
- resistant to yellowing, ageing, and weathering
- **adequate heat dissipation, possible to install directly into a prepared groove**

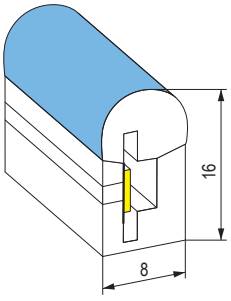

- pleasant matt surface without reflections
- waterproof IP67 after proper sealing of end caps
- suitable for damp environments as well as for direct installation into furniture
- **horizontal bending - sideways when light is directed upwards**

8×16 mm silicone profile without LED strip

- **empty profile - rounded shape**
- pre-installed pull cord for threading your own LED strip through
- suitable for strips with a power output of up to 10 W/m due to heat dissipation
- suitable for strips up to 10 mm in width, however for diodes smaller than 5050
- RGB LED strips can also be used, however their white light may result in overheating and damage
- use of COB strip is recommended for straight or only slightly curved installations

code	description
406053	silicone profile without LED strip
406054	end cap without hole
406055	end cap with hole
535091	aluminium clip for surface mounting

StrongLumio S5 | 24 V neons

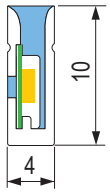

4×10 mm 24 V, 9.6 W 168 LED/m

- inside: 6 mm strip with 2835 diodes
- supplied in rolls of 5 m with a feed cable and Mini connector
- can be ordered in any length, however it may be necessary to solder your own cable
- 'T' shape with overhang for recessed installation – edges overlap groove irregularities and ensure a clean installation appearance
- CRI 90+ natural colour rendering

12345 Item in stock **12345** Item on demand

StrongLumio 24 V power supplies

Principles for selection and installation

Power supply power (W) = x+ 20% (30%)

x = LED strip length (m) × LED strip input power (W/m)

Example: using a strip of 14.4 W/m and an installed strip length of 2.5 m, the strip power is 36 W + 20% reserve (7.2 W) = 43.2 W. You will therefore need a power supply with a minimum power of 44 W.

Warning
It is not possible to combine 12 V LED strips with a 24 V transformer and vice versa.
The power supply must always have sufficient reserve for the respective LED strip set.
During normal use, the reserve should be 20%, if used for more than 5 hours, we recommend increasing the reserve to 30% or more. Offered power supply have protection to prevent damage, the transformer switches off at overloading and after reducing the load and cooling, the power supply is functional again. However, overloading has a negative impact on the overall service life.

The power supply should be installed in such a way that it can be accessed at any time for replacement and is well ventilated. Installation in small, unventilated space reduces its service life.

Please note that the supply voltage must comply with ČSN EN 60038, **damage due to over-voltage in the electrical network is not a reason for placing a complaint.**

Claims are resolved by replacing the faulty power supply. Additional costs associated with replacing the connection are not recognised.

StrongLumio S1 24 V power supplies plug-in

- for power supply of LED strips and lights with 24 V voltage, direct current
- power supply: 220–240 V, 50 Hz
- black adapter for direct plug-in connection
- overvoltage and short-circuit protection

WARRANTY 3 YEARS

code	power	L × W × H (mm)	PF

MEAN WELL
Branded resources, high power

– 24 V MEAN WELL LED power supplies with high power (option up to 320 W available) and top quality

The power supplies are fitted with only the highest quality components to ensure years of trouble-free operation.

Cables without end connectors on both sides – installation must be carried out by a qualified person in accordance with applicable regulations. The encapsulated housing of the power supply protects the components from moisture or liquid ingress. The body of the power supply is equipped with two fixing brackets for easy attachment to the substrate.

- dustproof and waterproof construction of the power supply
- Mean Well reliability and quality guarantee – 5 years warranty

code	light colour	temperature	luminous intensity	LED/m	width	input power/m
231392	warm white	±3000 K	915 lm/m	120	8 mm	9,6 W
250029	neutral white	±4000 K	970 lm/m	120	8 mm	9,6 W
231387	cold white	±6500 K	970 lm/m	120	8 mm	9,6 W

Recommended connectors:
507813 universal
507815 corner

12 V, 12 W, 60 LED/m, 8 mm, IP65

- version with IP65 protection rating = suitable for damp environments
- we recommend for shorter-duration lighting due to poorer heat dissipation; installation directly onto glass for example may cause overheating

code	light colour	temperature	luminous intensity	LED/m	width	input power/m
231401	warm white	±3000 K	1000 lm/m	60	8 mm	12 W
231396	neutral white	±4000 K	1050 lm/m	60	8 mm	12 W

For LED strips with IP65 protection and a waterproofing requirement, we recommend connecting the cable by soldering and sealing the joint.
A quick connector does not guarantee the preservation of waterproofing and if exposed could lead to oxidation of the joint.

12345 Item in stock **12345** Item on demand

StrongLumio 12 V power supplies

Principles for selection and installation

Power supply power (W) = x+ 20% (30%)

x = LED strip length (m) × LED strip input power (W/m)

Example: using a strip of 14.4 W/m and an installed strip length of 2.5 m, the strip power is 36 W + 20% reserve (7.2 W) = 43.2 W. You will therefore need a power supply with a minimum power of 44 W.

Warning
It is not possible to combine 12 V LED strips with a 24 V transformer and vice versa.
The power supply must always have sufficient reserve for the respective LED strip set.
During normal use, the reserve should be 20%, if used for more than 5 hours, we recommend increasing the reserve to 30% or more. Offered power supply have protection to prevent damage, the transformer switches off at overloading and after reducing the load and cooling, the power supply is functional again. However, overloading has a negative impact on the overall service life.

The power supply should be installed in such a way that it can be accessed at any time for replacement and is well ventilated. Installation in small, unventilated space reduces its service life.
Please note that the supply voltage must comply with ČSN EN 60038, **damage due to over-voltage in the electrical network is not a reason for placing a complaint.**

Claims are resolved by replacing the faulty power supply. Additional costs associated with replacing the connection are not recognised.

StrongLumio S1 12 V power supplies plug-in

F | IP 20 | 220-240 V | 12V DC

- round connector on output
- in order to achieve optimal function, it is recommended to have the power supply as close to the light source as possible (Longer cables cause voltage losses and a subsequent drop in luminous intensity. They may also have disturbing influence on nearby electrical appliances.)
- power supply should have a minimum distance of 0.5 m from other electrical appliances
- power supplies must be located in such a way that sufficient ventilation – heat dissipation, if located in a closed room, sufficient ventilation (ventilation holes) must be provided
- cable length 2 × 1 m

StrongLumio 3PIN power supplies with 12 V mini connectors

- with Mini connectors on the output and one 3PIN connector for common switch
- related switches see p. 06.33
- PF>0,9
- overload, overvoltage, and short-circuit protection

WARRANTY 3 YEARS

code	power	dimensions	number of Mini connectors

MEAN WELL
Branded resources, high power

– 12 V MEAN WELL LED power supplies with high power (option up to 264 W available) and top quality

The power supplies are fitted with only the highest quality components to ensure years of trouble-free operation.

Cables without end connectors on both sides – installation must be carried out by a qualified person in accordance with applicable regulations. The encapsulated housing of the power supply protects the components from moisture or liquid ingress. The body of the power supply is equipped with two fixing brackets for easy attachment to the substrate.

- dustproof and waterproof construction of the power supply
- Mean Well reliability and quality guarantee – 5 years warranty

Strong Lumio S5 | Self-powered kinetic switches

Self-powered kinetic switches

Kinetic switches require no power supply or batteries for correct operation.

Particularly suitable for interior renovations as well as for easy installation of new fittings.
It draws the energy needed to send wireless commands to the unit (on/off/mute) from pressing the switch, similar to a piezoelectric lighter.
Can be used to control 12/24 V or 230 V lighting systems – only the control unit differs.

The switches are compatible with all receivers and can also be combined with each other, as well as with receivers for 12/24 V and 230 V simultaneously.
Signal range up to 20 m (through obstacles) or 100 m in open space.

Round switches for adhesive mounting or milling in

- **Decorative single-button switches for furniture.**
- The milling-in version is fitted with a housing for surface mounting.

code	type	colour	diameter
535065	surface-mount	white	60 mm
535066	surface-mount	black	60 mm
546642	for milling in	white	35 mm/40 mm
546647	for milling in	black	35 mm/40 mm

Door switches

- 1 button, up to 10 switches can be paired with one receiver.
- **When the first door opens, the light turns on; when the last door closes, it turns off.**
- **Also allows pairing in reverse mode - activation upon door closing.**
- Cannot dim, but intensity can be regulated by another switch paired with the same unit (if the unit supports this).
- Force required to compress the piston approx. 5 N. Position near the pivot axis of the door (approx. 5 cm).

code	colour
535063	white
535064	black

Square wall switches

- Degree of protection IP67 – suitable for damp environments and outdoor use.
- Dimensions 86 × 86 mm – can be installed on an existing electrical back box.
- **Multi-button variants allow control of several independent zones from one location.**
- A separate unit must be installed for each zone.
- 4 colours, 1–3 buttons.

Strong Lumio S5 | Self-powered kinetic switches

Overview of control units

The choice of receiver is important with regard to the intended use. Most models are designed for single-colour lighting.
All are compatible with all switches and allow use in various combinations. Some models additionally allow control via the Tuya mobile app over wifi.
Simple pairing with switches using a single button.

code	description	voltage	dimming	example of use	Wifi - Tuya
535062	12/24 V unit with connectors	12/24 V	yes	LED strips in multiple branches*	no
546639	3PIN	12/24 V	yes	exclusively with 3PIN power supplies (p. 6.12)	no
546641	2PIN CCT	12/24 V	yes	2PIN CCT LED strips	no
467133	12/24 V unit with terminal boxes	12/24 V	yes	LED strips – larger assemblies	yes
469139	230 V unit with terminal boxes	230 V	yes	dimmable light sources – LED bulbs	yes
535067	230 V switching relay	230 V	no	power supply switching	no

12/24 V receiver with connectors

Simple wiring thanks to connectors
round 5.5 mm DC connector on input – directly into power supply
6 Mini connectors on output, all control-led simultaneously
max current 3 A – designed for lighter assemblies

code	description
535062	receiver/distributor with Mini connectors 12/24 V

3PIN receiver

Compact control unit with 3PIN connector.
Used to control single-colour LED strips exclusively in conjunction with a 3PIN power supply (p. 6.33).
LED strips are connected via Mini connectors to the power supply.
Maximum switched lighting power is determined by the selected power supply.

code	description
546639	receiver for wireless self-powered switches 12/24 V 3PIN

Receiver for 2PIN CCT strips

Control unit for two-wire CCT strips – allows regulation of white colour temperature.
Requires at least a 2-button switch for brightness and temperature regulation.
When a single-colour strip or single-button switch is connected, functions as a standard dimmer.
Snap-in terminal block, max 2×3 A.
52 × 52 × 23 mm

recommended LED strip 544705

code	description
546641	receiver for 2PIN CCT strips 12/24 V

Dimmer units with terminal blocks

dimming option also for 230 V
wifi module – supports Tuya app

code	description
467133	12/24 V, max 9 A
469139	230 V – suitable for dimmable LED bulbs, **not designed for power supply switching**

230 V switching relay

Dimensions 44 × 44 × 22 mm – suitable for installation in an electrical back box.
Maximum load 500 W LED; 1 100 W other devices.
In addition to kinetic switches, can also be combined with a standard wired wall switch.
Does not support dimming.
Suitable for example for switching a power supply or a luminaire with a built-in transformer.

code	description
535067	switching relay for 230 V

Caution: 230 V units are intended for fixed installation. Installation must be carried out by a qualified person in accordance with applicable regulations.

Strong Lumio S5 | Smart LED lighting control

24 V All in One unit

Thanks to this unique device on the market, which combines everything needed to connect LED lighting, lighting installation becomes a simple and convenient matter.

StrongLumio All in One, as the name suggests, is an all-in-one device.

It hides within itself:
- 50 or 100 W power supply for powering LED lighting,
- receiver of the signal from the remote control,
- a Wi-Fi unit to pair the All in One HUB with the TUYA app
- HUB for connecting up to 4 branches of LED lights.

The product is available in single colour, CCT, RGB, RGBW, or RGBCCT LED strips options.

Simply plug into the socket using the included cable and connect the LED strip from the other side. After these two steps, the LED lights are ready to use and it is up to you to choose whether you want to use one of our remote controls, the TUYA Smart app for mobile phones and tablets, or both at the same time.

Each package includes a 2 m long connecting cable to the appropriate type of LED strips. For dimming, CCT and RGB options, two cables are included: 1× for classic SMD strip and 1× for COB strip.

Connecting cables to the All in one unit according to the colour of the strips used:

487570 | single-colour LEDs
487571 | CCT
487572 | RGB
487573 | RGBW
487574 | RGBCCT
487575 | single-colour LED COB
487576 | CCT COB
487577 | RGB COB

Strong Lumio S5 | Smart LED lighting control

12/24 V control unit

This revolutionary and simple LED lighting wiring system is compatible with all LED strips in our assortment. With this system, the installed lighting becomes intelligent and part of a smart home in a few simple steps.

Smart lighting allows you to control the lights in your home.

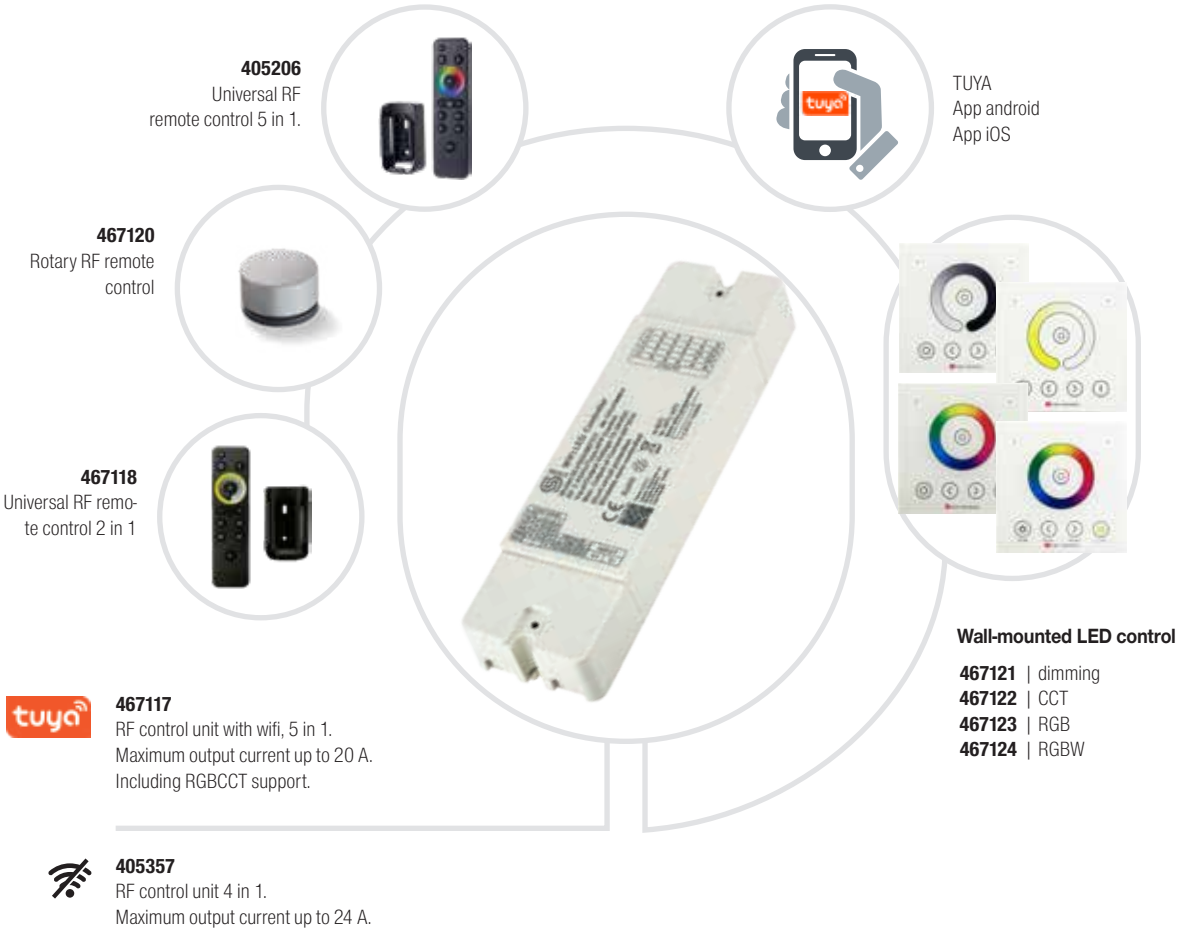

Not only will you be able to turn the light off or on using your mobile phone, but you can also change the colour or intensity of the light to suit your needs.

With intelligent lighting systems, you can easily adjust the home atmosphere created by the LED light sources in the rooms. With just a smartphone or tablet in your hand, you can control the lights throughout your home, home or office, including intensity and colour control. Depending on the mood or situation, you can choose from pre-set lighting scenes, from romantic dinner to colourful party lighting.

Another advantage of intelligent lighting is the ability to program random or precisely timed switching on and off of various lights in the home when you are on vacation, which can act as one of the elements of property protection from thieves.

The Smart Unit 467117 is compatible with conventional battery-operated (AAA batteries) controllers, wall-mounted controllers (230 V power supply), a rotary design controller that can be used to control any LED strip in our range and the TUYA Smart mobile app. All of these control options can be used simultaneously and the possibilities of combining different controllers and the mobile app depend only on the user's needs and imagination.

Voltage at input and output is 12– 24 V. Must be powered using a power supply, never directly from the mains. Supply cable is not included. This must be used from the power supply.

- power supply must be used

12345 Item in stock **12345** Item on demand

remote controls

Wall-mounted touch controls – mains power supply

- Assembly into a conventional 86x86 mm installation box makes it easy to replace existing equipment in the event of renovation.
- **Power supply directly** from the mains, wireless control of one zone of lights.
- Can be combined with battery-powered models.

467124

467121

467122

467123

code	destination
467121	dimming
467122	CCT
467123	RGB
467124	RGBW

Battery controls

- Classic remote control shape for convenient adjustment of lighting as required
- 4-zone – possibility to control up to 4 control units separately
- Included in the package is a holder for screwing to the wall

467118

405206

code	destination
467118	dimming + CCT
405206	RGB, RGBW, RGBCCT

Rotary control

- Design assistant to control one zone.
- Equipped with magnetic pad with 3M tape on the bottom side. This keeps the control in its designated place but can be conveniently moved as required
- Primarily designed to control single-colour and CCT strips, but can also handle colour including RGBW. However, their control is not very intuitive.

code	description
467120	rotary remote control

Overview of recommended combinations according to the colour of the lighting used

LED type	recommended control		
Single-colour			
	467118	**467121**	**467120**
CCT			
	467118	**467122**	**467120**
RGB			
	405206	**467123**	
RGBW			
	405206	**467124**	
RGBCCT			
	405206		

- All of the controls listed here transmit on the 2.4 GHz RF frequency and are compatible with the All in One unit as well as the 405357 and 546638 control units.
- Cannot be used in combination with a receiver for self-powered switches

Remote control with control unit

- remote control for LED strips (single-colour) with high power and advanced dimming pulse modulation
- functions – on / off / dimming / dynamic modes
- due to its high power, it is necessary to connect it to a terminal box, in compliance with enclosed instructions
- maximum switching power: 300 W (12 V), 600 W (24 V)
- range: up to 20 m (in free space)
- possibility of mutual synchronisation of multiple units via RJ45 cable
- AAA battery in the remote control

code	description
284572	set for one zone

Technical parameters:
Voltage: 12 V/24 V
Unit dimensions: 130 × 40 × 32 mm
Regulation range: 0–100%
Maximum current: 25 A
Standby mode consumption: < 1 W

12V DC | 24V DC

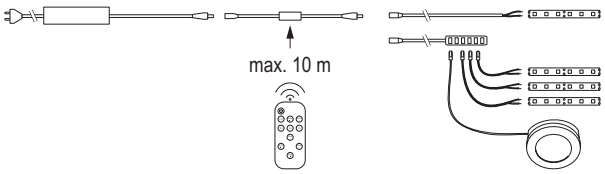

Accessories

code	description
134114	connecting cable for transformer, Jack (2 m)
179054	connecting cable for transformer, Jack (15 cm)
347904	StrongLumio two-core cable 2×0.5 mm² 20 AWG red-black

Remote switch/dimmer

- radio transmission with a range of about 10 m (direct visibility is not required)
- functions – on / off / dimming / dynamic modes
- connectors compatible with supplied power supplies for LED strips, just insert into the set
- maximum switching power: 72 W (12 V), 144 W (24 V)
- RoHS, CE
- if you use this switch/dimmer, do not connect other sensors and electronic switches to it, lower dimming voltage affects their function
- battery in the remote control – CR 2025

StrongLumio remote controls

RF control unit for 2PIN CCT strips

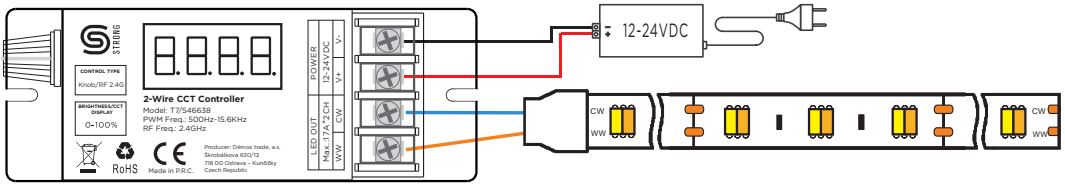

- Allows dimming and regulation of white colour temperature.
- Screw terminal block on both input and output.
- Rotary button for operation without a remote control.
- Display showing the set value and mode.
- For use in combination with 2PIN CCT strips.
- Compatible with remote controls on p. 06.29.
- Recommended combination = CCT variant.

Technical parameters:
Voltage: 12/24 V.
Maximum current (depending on set PWM frequency): 17 A in default setting
~ 200 W/12 V; 400 W/24 V.
Dimming 0–100%, CCT regulation 100% cool – 100% warm.
Standby mode consumption: < 1 W.

- Allows switching and brightness regulation for one zone.
- Magnetic wall bracket.
- Remote control powered by CR2032 button battery.

code	description
546601	set: remote control + RF control unit

Technical parameters:
Voltage: 12/24 V.
Maximum current: 15 A total, 6 A/channel ~ 180 W/12 V; 360 W/24 V.
Standby mode consumption: < 1 W.
Dimensions of remote control only: 140 × 36 × 11 mm.
Wiring diagram:

StrongLumio remote controls

USB rechargeable wireless switches

- For single-colour LED strips.
- 2 receiver options: with 3PIN connector or with 5.5 mm jack for connection to the appropriate power supply.
- Wireless communication with selected sensors.
- Memory for up to 8 switches of the same type.
- Voltage: 12/24 V.

code	description
546610	3PIN for power supplies on p. 6.33
546611	round connector for standard power supplies (max 3.5 A/channel, total 6 A)

- The switches are fitted with a built-in rechargeable battery for charging via USB.
- Held on the surface by a magnetic pad – easy removal for charging.
- Dimensions 46 × 46 × 13 mm (including pad).
- Touch switches and door sensors cannot be combined on the same receiver at the same time.

546612

The magnetic door switch responds to the proximity of a magnetic counterpart located on the door. Distance approx. 1–1.5 cm.
The touch switch allows brightness regulation and responds at the location of the drawn icon.

546613

code	description
546612	touch switch
546613	door switch

USB A/C charging cable is included in the packaging

Digital strip control

- For single-colour digital LED strips (e.g. 544564, see p. 06.9). Allow sequential activation of segments or other dynamic effects.
- Recommended accessories: 543631 1 m connecting cable for digital strip Mini connector – JST SM.

Remote control
Allows regulation of brightness and speed, including 28 different effects
Voltage: 12/24 V
Power supply: 2×AAA batteries
The remote control is supplied as a set with a receiver

code	description
544562	remote control for digital LED strips
546609	touch switch for digital LED strips
543631	connecting cable for digital LED strips 1 m

Touch switch.
Long touch regulates brightness; double touch switches to speed regulation mode.
Allows regulation of brightness and speed, without further dynamic effects.
Voltage: 12/24 V.
The switch is fitted with a Mini connector on the input and a 3-pin JST SM connector on the output.

StrongLumio 3PIN switches

Switches/dimmers 3PIN 12/24 V

They connect directly to a special 3PIN socket in the body of the power supply and provide on/off/dimming of all connected LED strips/spotlights at the same time. This makes lighting installation very simple. Just connect LED strips or 12 V spotlights to the Mini connectors (6 to 10 depending on the power supply), connect one of the offered switches/dimmers to the 3PIN connector marked SENSOR.

Using 3PIN switches in this way directly into the power supply eliminates the limitation for maximum switching current. This is now determined by the power supply power and the cable/connector used, not the switch.
Maximum current on individual Mini connectors = 4 A

80 W and 100 W models are equipped with one XT30 connector in addition to the Mini, which is used to connect a stronger light to one line

(7×Mini connector + 1×3PIN connector)
185 × 53 × 18 mm

484190 | 24 V – 100 W power supply
(8× Mini connector + 1× 3PIN sensor)
265 × 65 × 19 mm

Connection diagram – only single-colour LEDs

- power supply directly from the mains

Note: for more information and a detailed description of features, please visit the website.

StrongLumio touch switches

Touch switch/dimmer for shallow depth – 3PIN

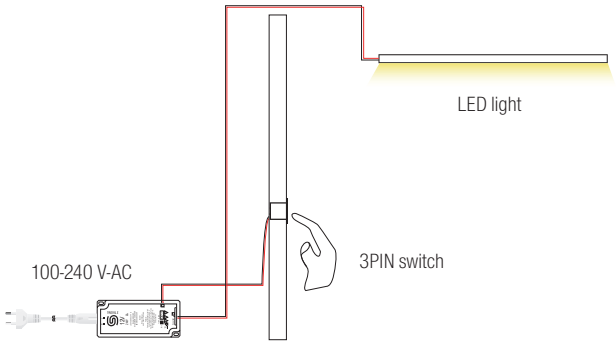

code	colour
492726	black colour without diode

- designed for flush-mounting without drilling through the entire thickness of the board material
- first touch switches the lighting on, second touch switches it off
- long touch will set the intensity
- memory function – remembers the intensity at the moment of the switch-off and uses the same intensity when it is switched on
- 3PIN variant only – for use with power supplies on p. 06.33

Technical parameters:
Dimensions: 34 × 10 mm
Drilling diameter: 30 mm
Voltage: 12/24 V
Connector type – 3PIN
The maximum switching current is determined by the limitation of the power supply
Feed cable length: 1 m

Touch switch/dimmer

code	colour
342516	black
342517	white
405197	silver with blue backlight

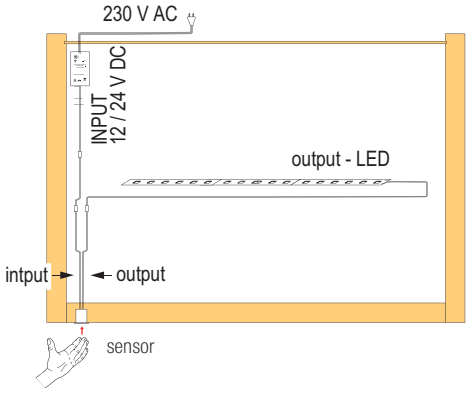

- first touch switches the lighting on, second touch switches it off
- long touch will set the intensity
- the silver option is equipped with a blue LED (cannot be switched off)
- memory function – remembers the intensity at the moment of the switch-off and uses the same intensity when it is switched on

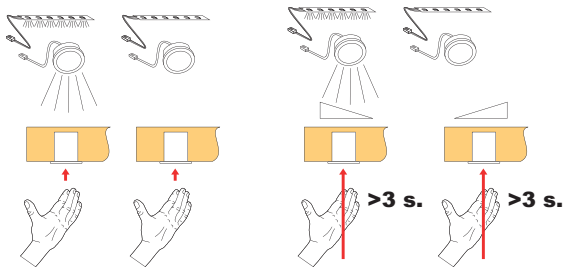

3PIN variant with the same functions, see p. 06.33

Technical parameters:
Voltage: 12 V/24 V
Dimensions: 22 × 17 mm
Maximum current: 4 A (for option with Mini connectors)
Maximum switching power: 48 W (12 V), 96 W (24 V)
Drilling diameter: 18 mm
Cable length: 1 m supply + 1 m output

Tips for use:
- kitchens
- dining rooms
- bed lighting
- lighting control in a gallery

StrongLumio touch/contactless switches

Touch switch/dimmer

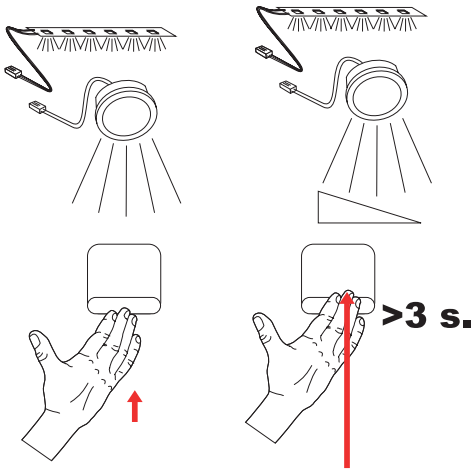

- touching the switch turns the lighting on/off
- equipped with Mini connectors
- metal body with elegant design
- the switch has 3M tape for easier installation

code	colour
405199	black
405200	white
405201	silver

Technical parameters:
Voltage: 12 V/24 V
Dimensions: 43 × 31 × 9 mm
Maximum current: 4 A
Maximum switching power: 48 W (12 V), 96 W (24 V)
Connector type: Mini
Cable length: 1 m supply + 1 m output

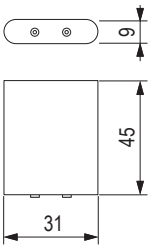

Touch-free switch with dimming dimming

- touch-free switch / dimmer
- the lighting is switched on/off by waving your hand in front of the switch
- when covered for a long time, the lighting intensity can be set
- works by waving your hand from a distance of max. 5 cm
- metal body with elegant design
- the switch has 3M tape for easier installation
- cables with Mini connectors

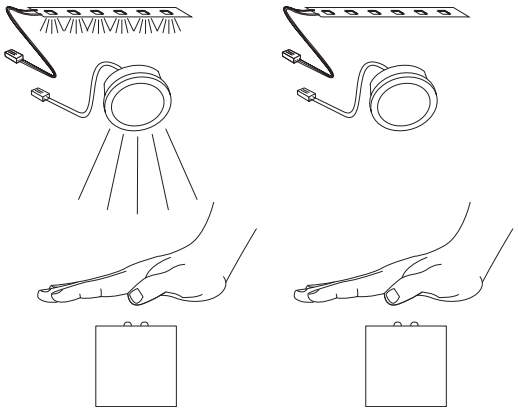

code	colour	description
405918	black	touch-free switch / dimmer
405917	white	touch-free switch / dimmer

Technical parameters:
Voltage: 12 V/24 V
Dimensions: 45 × 31 × 9 mm
Maximum current: 4 A
Maximum switching power: 48 W (12 V), 96 W (24 V)
Connector type: Mini
Cable length: 1 m supply + 1 m output

StrongLumio door switches

Door / touch-free switch, up to 3 sensors

- used to control lighting
- control unit with selector switch, sensors to be purchased separately
- **DOOR mode functions as an IR door switch**
- **HAND mode is for control by hand movement**
- option of connecting up to 3 sensors – switches on the impulse of each
- sensor range max 5 cm (depending on door colour)

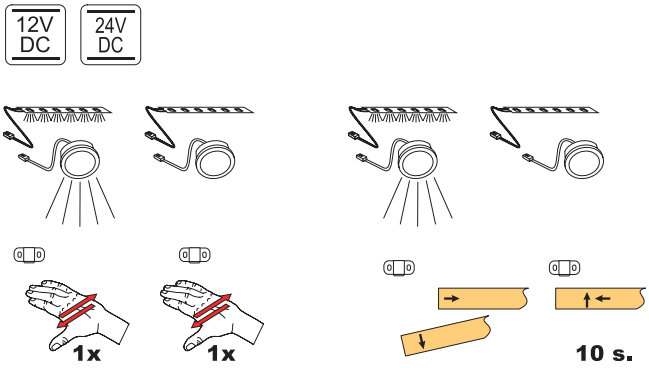

342518

342520

code	description
342518	control unit
342519	black sensor
342520	white sensor
362939	extension cable for door sensors, 2 m

Technical parameters:
Voltage: 12 V/24 V
Dimensions: 62 × 47 × 22 mm
Maximum current: 8 A
Maximum switching power: 96 W (12 V), 192 W (24 V)
Sensor hole diameter: 16 mm
Sensor cable length: 2 m

code	description
134114	2 m connecting cable to power supply (Jack)
179054	15 cm connecting cable to power supply (Jack)
543616	2 m connecting cable with Mini connector

543616

Magnetic door switch for up to 4 sensors

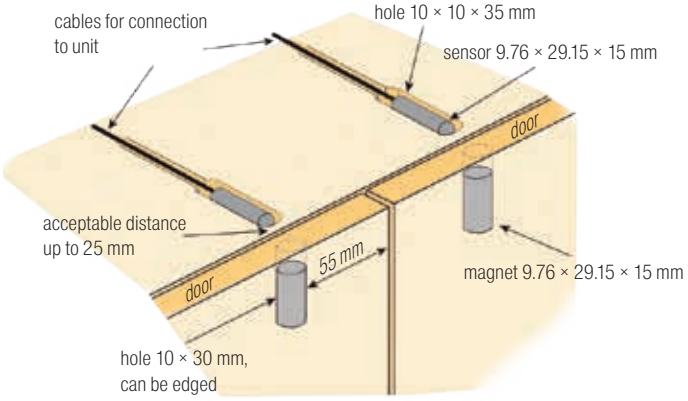

- control unit, sensors with magnetic counterparts sold separately
- **option of fully concealed installation - magnets respond through obstacles**
- round hole 10×30 mm, can be fully covered by an edge
- option of connecting up to 4 sensors – switches on the impulse of each
- sensing at a maximum distance of 2.5 cm
- magnets with diameter 9.76 mm, length 29.15 m

546608

546602

code	description
546608	control unit
546602	magnetic sensor

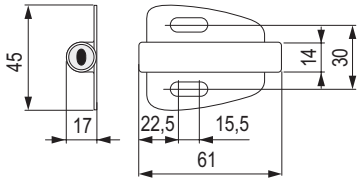

134114

StrongLumio door switches

Door / touch-free switch

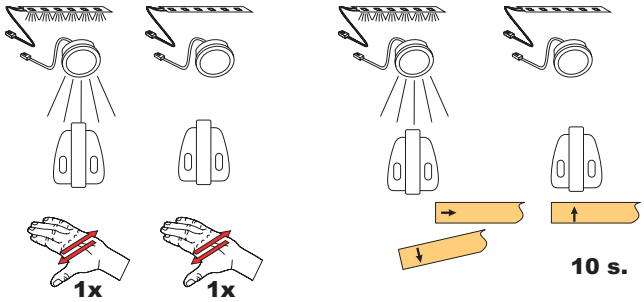

- door switch is suitable for lighting control in cabinets
- the lighting is switched on by opening the door / clearing the area in front of the switch and it is switched off by covering it
- the switch can be fastened with 2 screws, or can be removed from the holder and installed in a hole
- maximum distance of door from the switch is 10 cm (darker door reduces the range of the switch)
- to increase the range for darker decors, we recommend gluing a white cover cap (283272) opposite the sensor
- touch-free switch works by waving your hand from a distance of max. 5 cm

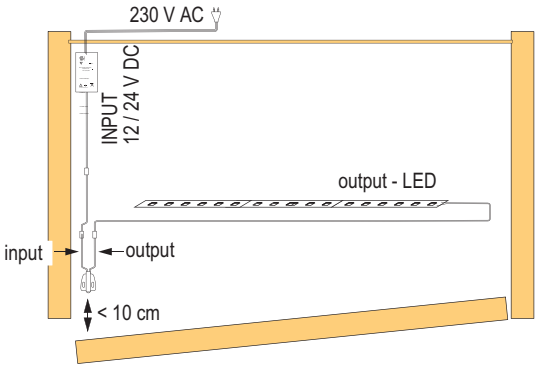

code	description
374369	door switch
374370	touch-free switch

Touch-free switch
- the lighting is switched on/off by waving your hand in front of the switch
- when covered for a long time, the lighting intensity can be set
- works by waving your hand from a distance of max. 5 cm
- cables with Mini connectors

Technical parameters:
Voltage: 12 V/24 V
Dimensions: 61 × 45 × 17
Installation space: ø 14 mm, depth: 54 mm
Maximum current: 4 A
Maximum switching power: 48 W (12 V), 96 W (24 V)
Connector type: MINI
Cable length: 1 m supply + 1 m output

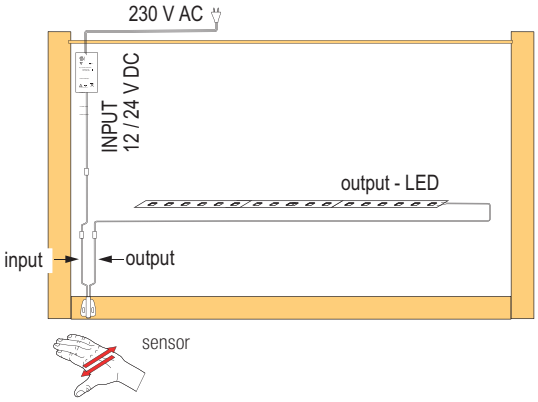

12V DC | 24V DC | MINI

Tips for use:
- lighting for cabinets with both sliding and hinged doors
- top cabinets in the kitchen
- drawer lighting
- chests of drawers and others

Accessories

code	description
356328	Mini distributor (up to 3 A individually, 6 outputs), total max. 3 A, 0.25 m
342541	connecting cable, Mini and Jack, 15 cm
283272	self-adhesive cover cap for dark shades of door, it will increase switch range

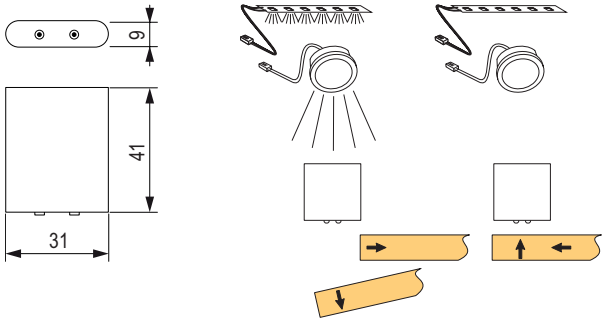

StrongLumio door switches

Door switch

- door switch is suitable for lighting control in cabinets
- the lighting is switched on by opening the door / clearing the area in front of the switch and it is switched off by covering it
- the switch has 3M tape for easier installation
- maximum distance of door from the switch is 10 cm (darker door reduces the range of the switch)
- to increase the range for darker decors, we recommend gluing a white cover cap (283272) opposite the sensor

code	colour	description
342514	silver	door switch
405915	white	door switch
405916	black	door switch

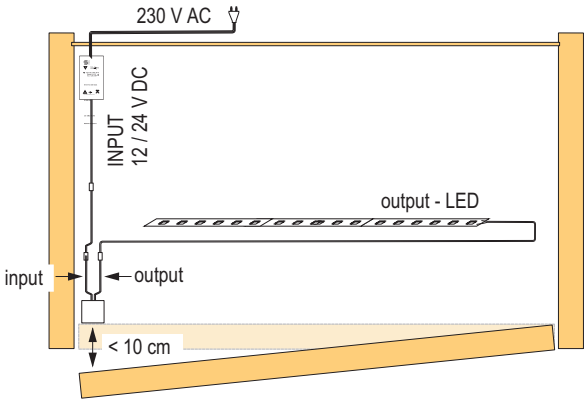

Technical parameters:
Voltage: 12 V/24 V
Dimensions: 41 × 31 × 9 mm
Maximum current: 4 A
Maximum switching power: 48 W (12 V), 96 W (24 V)
Connector type: Mini
Cable length: 1 m supply + 1 m output

12V DC | 24V DC | MINI

Tips for use:
- lighting for cabinets with both sliding and hinged doors
- top cabinets in the kitchen
- drawer lighting
- chests of drawers and others

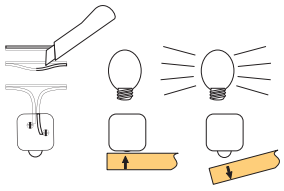

silver 3PIN option, see p. 06.33

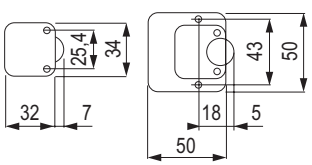

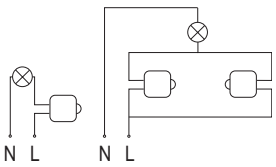

Mechanical (door) switch

- simple switch, activates on opening
- 12 V DC, 220–240 V, 50 Hz, max. 2 A, 2× 0.75 mm
- when installing on the door, installation at hinges is recommended to ensure sufficient pressure

example of use – switch on of lighting

code	colour
134116	white
134117	black

- in case of using at 230 V voltage, installation should be carried out by an authorised person

F | IP 20 | 12V DC | 24V DC | 220-240 V

Accessories

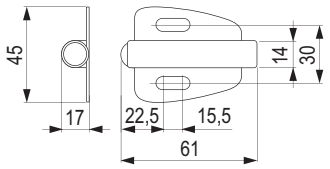

code	description
356328	Mini distributor (up to 3 A individually, 6 outputs), total max. 3 A, 0.25 m
342541	connecting cable, Mini and Jack, 15 cm
283272	self-adhesive cover cap for dark shades of door, it will increase switch range

StrongLumio motion sensors

PIR motion sensor

- the lighting is switched on when a motion is detected, it switches off after 40 seconds of no motion
- the sensor detects temperature difference – if an object with the same temperature moves, it may not detect any difference and may not switch on the lighting
- the switch can be fastened with 2 screws or removed from the holder and installed in a hole
- maximum range is 2 m

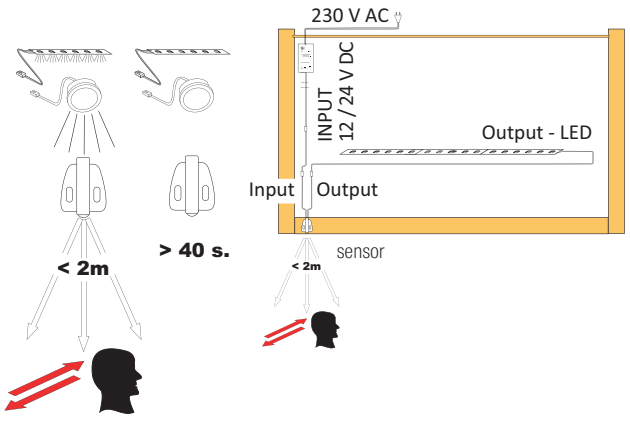

code	description
343040	PIR motion switch

Technical parameters:
Voltage: 12 V/24 V
Dimensions: 61 × 45 × 17 mm
Installation space: ø 14 mm, depth: 54 mm
Detection range: < 2 m
Maximum current: 4 A
Maximum switching power: 48 W (12 V), 96 W (24 V)
Connector type: Mini
Cable length: 1 m supply + 1 m output

Tips for use:
- hall lighting
- walk-in wardrobe
- staircases
- orientation lighting

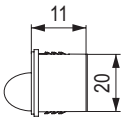

Accessories

code	description
356328	Mini distributor (up to 30 W separately, 6 outlets), max. 100 W (Mini) in total, 0.25 m
342541	connecting cable, Mini and Jack, 15 cm

Motion sensor with twilight sensor

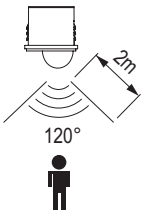

- motion sensor with built-in ambient lighting sensor and adjustable switching time
- switches off the motion sensor in sufficient lighting (can be set)
- the second potentiometer is used to set the light duration in the range of 6–70 seconds
- sensitivity adjustable in the range of 2–60 lx

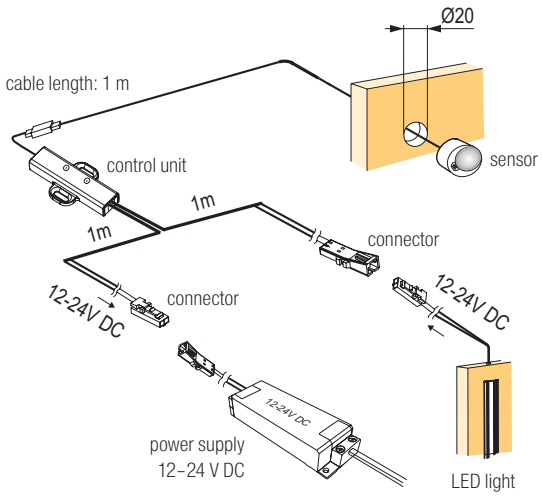

code	description
405209	motion sensor with twilight sensor

Technical parameters:
Voltage: 12 V/24 V
Lens dimensions: 20 × 11 mm
Installation space: ø 20 mm, depth: 11 mm
Detection range: 2 m
Maximum current: 4 A
Maximum switching power: 48 W (12 V), 96 W (24 V)
Connector type: Mini
Cable length: 1 m supply + 1 m output

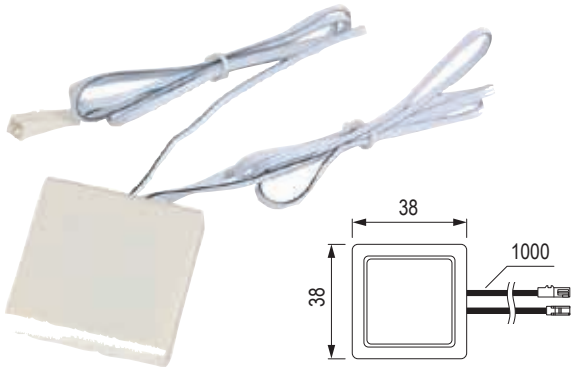

Accessories

code	description
356328	Mini distributor (up to 30 W separately, 6 outlets), max. 100 W (Mini) in total, 0.25 m
342541	connecting cable, Mini and Jack, 15 cm

StrongLumio other switches

Capacitive switch

- the light switches on/off by touching the surface above the installed sensor
- intended for boards with a thickness up to 38 mm

code	description
405198	capacitive switch

- the sensor is glued to the rear side of the board where we wish to control the light
- installation surface needs to be cleaned and degreased
- after installation, connect lighting and finally the power supply
- the sensor does not work on metal surfaces
- the light switches on/off by touching the surface above the installed sensor
- with long touch it is possible to set the lighting intensity (dimming)
- intended for boards with thickness up to 38 mm
- it must not be located near induction plates, transformers, metal objects, etc.
- with Mini connectors and cables (1 m and 1 m)
- 3PIN option without switching current limitation and with 3-core cable length of 1 m

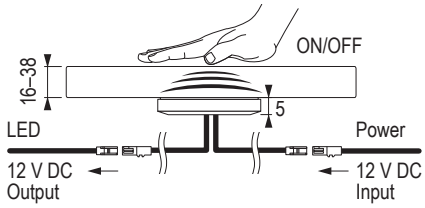

3PIN variant with the same functions, see p. 06.33

Technical parameters:
Voltage: 12 V/24 V
Max. current: 4 A
Maximum input power: 48 W (12 V), 96 W (24 V)
intended for boards with thickness up to 38 mm
dimensions: 38 × 38 × 7 mm
must not be located near induction plates, power supplies, etc.

F | III | 12V DC | 24V DC | MINI

Accessories

code	description
356328	Mini distributor (up to 3 A individually, 6 outlets), total max. 3 A (Mini) 0.25 m
342541	connecting cable, Mini and Jack, 15 cm

Cable with foot switch, 230 V

- maximum load: 2.5 A, 550 W
- length: 3.5 mm
- wires: 2 × 0.75 mm
- free ends at the output

code	description
285105	cable with foot switch, 230 V

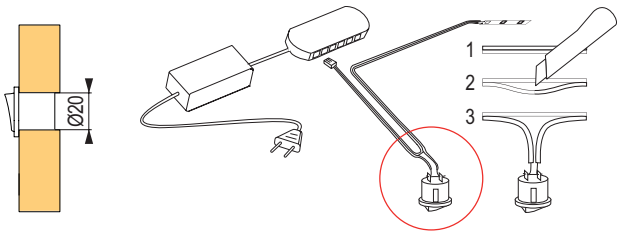

if used for voltage 230 V, installation should be carried out by an authorised person

220-240 V

Mechanical switch

- 12 V DC, 24 V DC, 220–240 V, 50 Hz, max. 4 A

code	colour
SAL341	white
SAL342	black
SAL343	grey
SAL344	brown

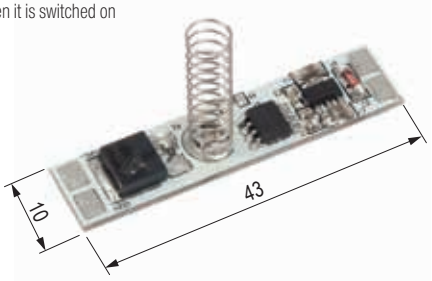

- in case of using at 230 V voltage, installation should be carried out by an authorised person

F | IP 20 | 12V DC | 24V DC | 220-240 V

StrongLumio switches for aluminium profiles

Touch switch/dimmer for aluminium profiles

- the lighting is switched on/off by touching the illuminated point
- intensity of lighting can be set by a longer touch
- memory function – remembers the intensity at the moment of the switch-off and uses the same intensity when it is switched on

code	description
342513	switch/dimmer for aluminium profiles

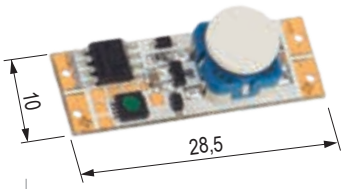

Technical parameters:
Voltage: 12 V/24 V
Dimensions: 10 × 43 mm
Regulation range: 0–100%
Maximum current: 8 A
Maximum switching power: 96 W (12 V), 192 W (24 V)

- shorten the spring as needed to touch the profile cover
- in case of a too long spring, a short circuit can occur and thus cause malfunctions or damage to the switch
- excessively shortened spring can be carefully extended – avoid pulling out, risk of damage, careful handling is needed
- especially in the case of higher power switching, the switch must be adjacent to the aluminium profile for heat dissipation
- we recommend taping with a double-sided adhesive tape 3M
- lit diode cannot be turned off

Switch/dimmer for aluminium profiles, mechanical

- lighting switches on/off by pressing the button
- intensity of lighting can be set by a longer touch
- memory function – remembers the intensity at the moment of the switch-off and uses the same intensity when it is switched on

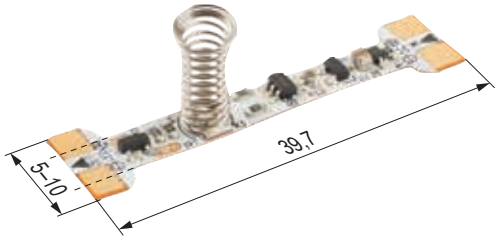

code	description
312317	mechanical switch/dimmer for aluminium profiles

Technical parameters:
Voltage: 12 V DC /24 V DC
Dimensions: 10 × 28.5 mm
Regulation range: 0–100%
Maximum current: 7.5 A
Maximum switching power: 90 W (12 V), 180 W (24 V)
Standby mode consumption: 0,07 W (12 V), 0.22 W (24 V)

Flexible touch switch/dimmer for aluminium profile

- the lighting is switched on/off by touching the illuminated point
- intensity of lighting can be set by a longer touch
- memory function – remembers the intensity at the moment of the switch-off and uses the same intensity when it is switched on
- flexible material – like PCB strip itself
- the edges of the contact points can be cut off and the switch can be tapered as required
- also suitable for narrow profiles
- **the possibility of using quick connectors and snap-on cables becomes a great advantage**

code	LED indicators
507818	flexible touch switch/dimmer

Technical parameters:
Voltage: 12 V/24 V
Dimensions: 10 x 39.7 mm, can be narrowed to 5 mm
Regulation range: 5–100%
Maximum current 3.5 A
Maximum switching power: 42 W (12 V), 84 W (24 V)

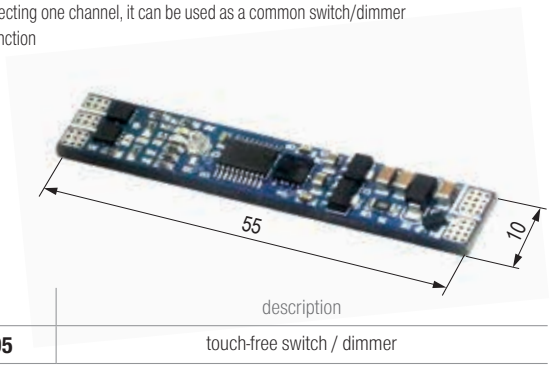

- the LED cannot be switched off – it is used to indicate the place of contact

StrongLumio switches for aluminium profiles

Touch-free switch/dimmer for aluminium profile for CCT LED strips

- touch-free sensor for profile
- switches the lighting on when waving in front of the sensor
- detection distance: <18 cm without cover, the detection distance decreases with cover according to the filtration of IR rays
- for longer shading, the lighting temperature can be adjusted
- (the power ratio between the two channels changes), while the yellow LED flashes
- with the second shading, the lighting intensity can be set while the blue LED flashes
- when connecting one channel, it can be used as a common switch/dimmer
- memory function

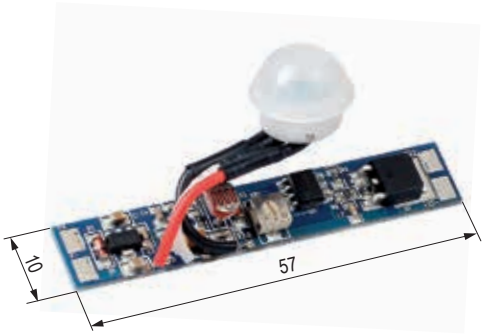

code	description
405195	touch-free switch / dimmer

Technical parameters:
Voltage: 12 V/24 V
Dimensions: 10 × 55 mm
Regulation range: 0–100%
Maximum current: 4 A / 1 channel
Maximum switching power per channel: 48 W (12 V), 96 W (24 V)

12V DC | 24V DC | _ +

Motion sensor for aluminium profile

- motion sensor for profile which switches the lighting on when detecting a movement in the dark (sensor is inactive in daylight) at the detection distance (2 m – in a straight line)
- sensitivity adjustable in the range of 2–60 lx
- the lighting is switched on for 40 seconds (if the sensor does not detect movement after this time, the lighting switches off).

code	description
405196	motion sensor for profile

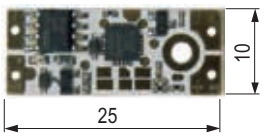

Technical parameters:
Voltage: 12 V/24 V
Dimensions: 10 × 57 mm, 10.5 mm hole for sensor in the cover
Maximum current: 8 A
Maximum switching power: 96 W (12 V), 192 W (24 V)

12V DC | 24V DC | _ +

Switch/dimmer for aluminium profiles, touch

- capacitive sensor – touching any part of the profile will switch the lighting on/off
- intensity of lighting can be set by a longer touch
- memory function – remembers the intensity at the moment of the switch-off and uses the same intensity when it is switched on

code	LED indicators
215666	yellow LED
215772	blue LED
392223	without LED indicator

Technical parameters:
Voltage: 12 V/24 V
Dimensions: 10 × 25 mm
Regulation range: 0–100%
Max. current: 7.5 A
Maximum switching power: 90 W (12 V), 180 W (24 V)
Standby mode consumption: 0,1 W (12 V), 0.282 W (24 V)

12V DC | 24V DC | _ +

- easy installation by soldering to a LED strip; power supply is soldered from the other end
- necessary to screw to the aluminium profile with a stainless steel screw (2 mm hole)
- maximum length of the control profile is 3 m, other profiles must be insulated to avoid interference with sensor function
- does not work with battery and earthed power supplies
- **does not work on lacquered profiles (white and other)**
- aluminium profile must not be earthed, contact with wall may cause malfunction, must be tested in place
- we recommend taping the switch with an insulating tape
- slightly bend the end of the LED strip away from the aluminium profile or also tape with the insulating tape
- installation instructions included, detailed instructions and installation video can be found on www.demos24plus.com

230 V switches

HALEMEIER

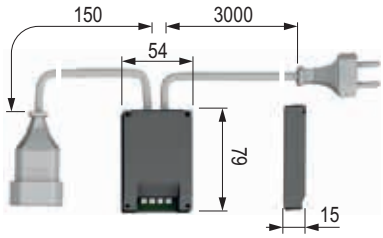

Control unit for 230 V

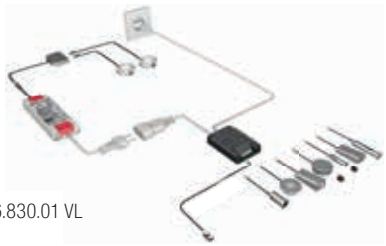

code	description
	control unit for 230 V and up to 4 switches
467280	

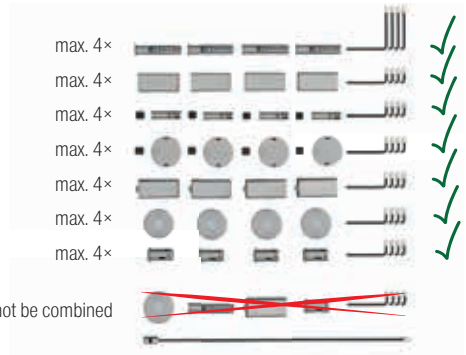

500 W | 220-240 V

- 230 V voltage control system
- switching of appliances up to a maximum input power of 500 W, 230 V AC (LED power supplies, 230 V lighting or other appliances)
- up to **4 same switches** can be connected to the control unit, a combination of different types of switches is not possible
- the connection must be carried out in compliance with the instructions, it is forbidden to interfere with the installation
- dimming is not supported with this control unit, it always uses 230 V voltage
- standby mode consumption: 0.5 W

36.830.01 VL

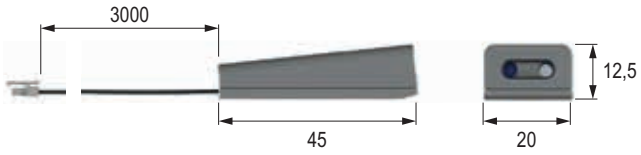

Door switch / touch-free switch

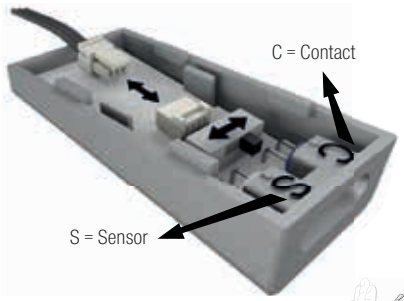

code	description
467276	door switch / touch-free switch
467280	control unit for 230 V and up to 4 switches

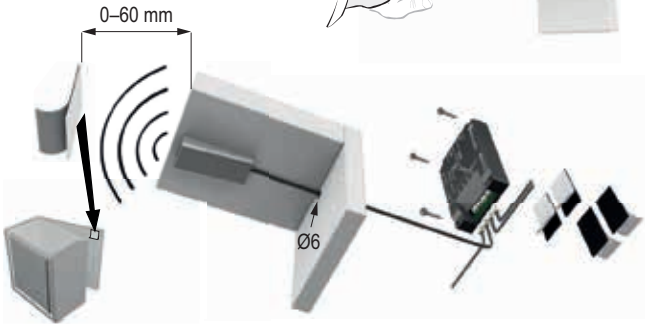

500 W | 220-240 V

- 230 V voltage control system
- up to **4 same switches** can be connected to the control unit, a combination of different types of switches is not possible
- switch function can be changed: C – door switch, S – touch-free switch
- switch range up to 6 cm
- the connection must be carried out in compliance with the instructions, it is forbidden to interfere with the installation
- dimming is not supported with this control unit, it always uses 230 V voltage
- standby mode consumption: 0.5 W

230 V switches

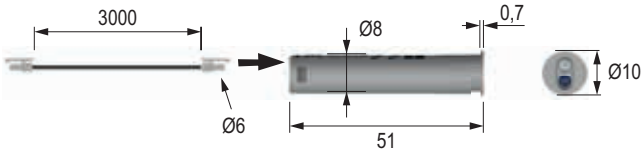

Door switch – for milling-in

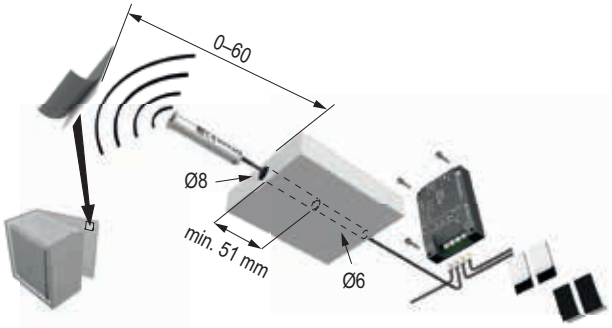

code	description
539504	door switch – for milling-in
467280	control unit for 230 V and up to 4 switches

500 W | 220-240 V

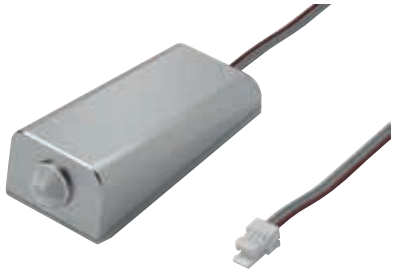

- 230 V voltage control system
- up to **4 same switches** can be connected to the control unit, a combination of different types of switches is not possible
- switch range up to 6 cm
- the connection must be carried out in compliance with the instructions, it is forbidden to interfere with the installation
- dimming is not supported with this control unit, it always uses 230 V voltage
- standby mode consumption: 0.5 W

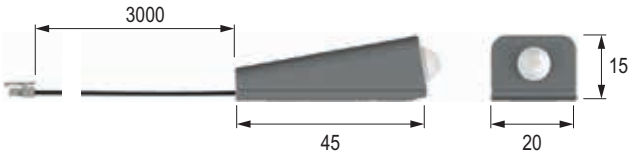

Motion sensor

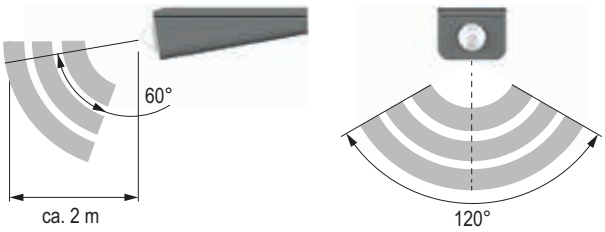

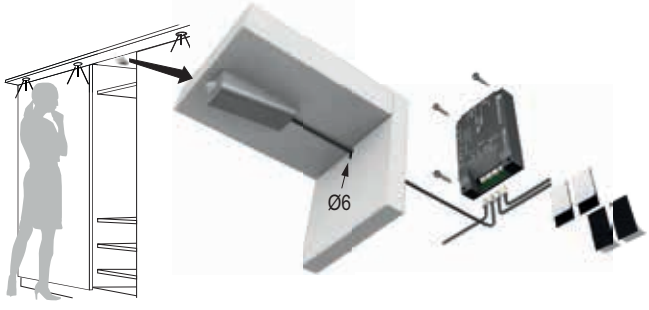

code	description
467291	PIR motion sensor
467280	control unit for 230 V and up to 4 sensors

500 W | 220-240 V

- 230 V voltage control system
- up to **4 same switches** can be connected to the control unit, a combination of different types of switches is not possible
- sensor range up to 2 m
- the connection must be carried out in compliance with the instructions, it is forbidden to interfere with the installation
- dimming is not supported with this control unit, it always uses 230 V voltage
- standby mode consumption: 0.5 W

230 V switches

HALEMEIER

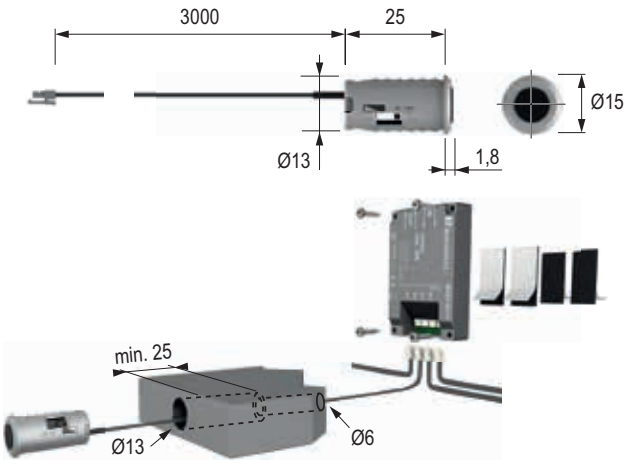

Mechanical switch

code	description
467281	mechanical switch
467280	control unit for 230 V and up to 4 switches

500 W | 220-240 V

- 230 V voltage control system
- up to **4 same switches** can be connected to the control unit, a combination of different types of switches is not possible
- mechanical button, micro-switch
- the connection must be carried out in compliance with the instructions, it is forbidden to interfere with the installation
- dimming is not supported with this control unit, it always uses 230 V voltage
- standby mode consumption: 0.5 W

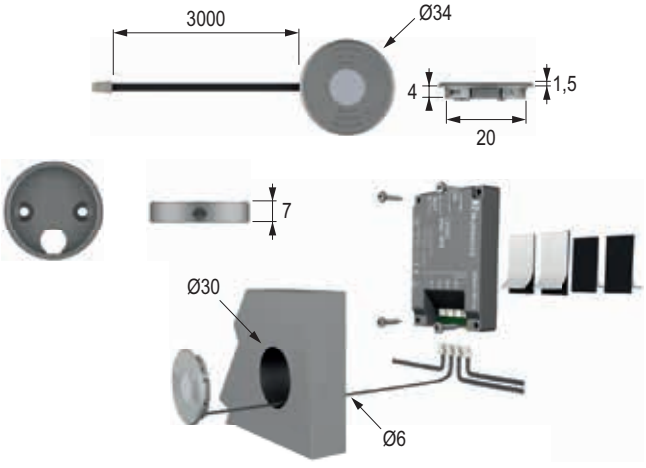

Touch switch

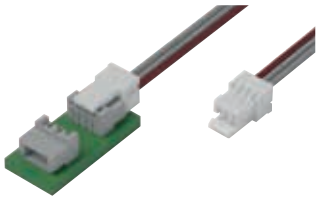

code	description
467284	touch switch
467280	control unit for 230 V and up to 4 switches

500 W | 220-240 V

- 230 V voltage control system
- up to **4 same switches** can be connected to the control unit, a combination of different types of switches is not possible
- touch sensor, constantly lit diode
- the connection must be carried out in compliance with the instructions, it is forbidden to interfere with the installation
- dimming is not supported with this control unit, it always uses 230 V voltage
- standby mode consumption: 0.5 W

Accessories for switches

code	description
467282	extension cable to Master unit 3 m

- in the event of cable damage (cutting), the claim will not be accepted

230 V switches

Sub-surface switch

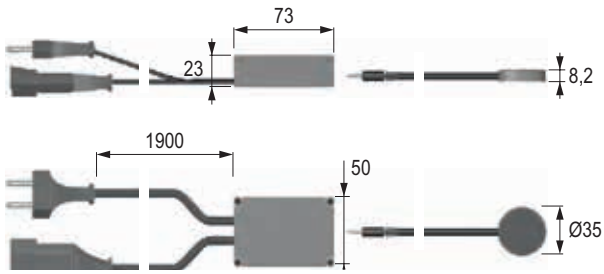

- the light (electrical appliance) switches on/off by touching the surface above the installed switch
- switching of appliances up to a maximum input power of 250 W, 230 V AC (LED power supplies, 230 V lighting or other appliances)
- for material with width of up to 19 mm (non-metallic materials only)
- it must not be located near induction plates, transformers, metal objects, etc.
- possibility of milling-in
- the connection must be carried out in compliance with the instructions, it is forbidden to interfere with the installation
- standby mode consumption: 0.5 W

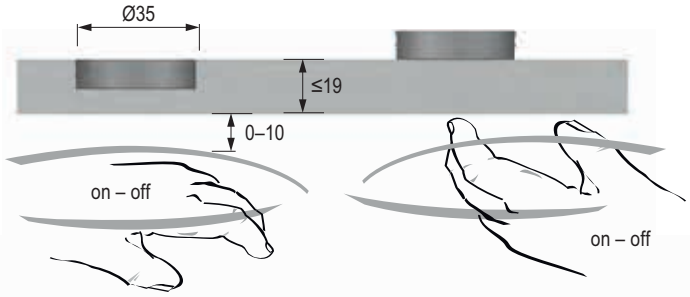

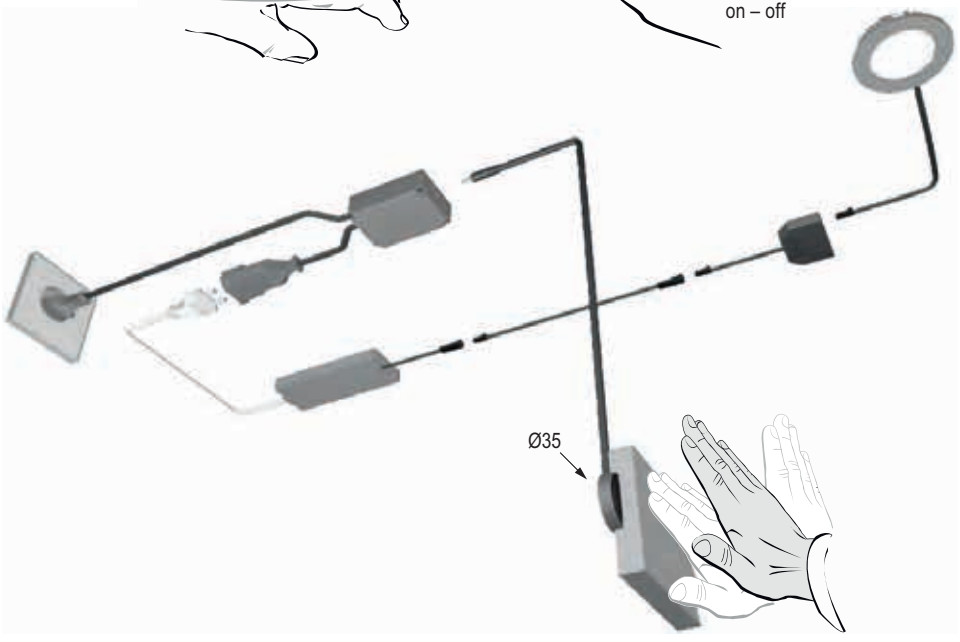

code	description
536854	subsurface switch + unit
536852	sub-surface switch

250 W | 220-240 V

accessories for LED strips

Connecting cables

- for connection of power supply and LED strip (horizontal connection)

134114

179054

code	description
134114	for power supply of LED strips (soldering), jack, 2 m
179054	for power supply of LED strips (soldering), jack, 0.15 m

12V DC 24V DC

- use as short connecting cables as possible
- never roll the cables into a ball or coil, but cut the cables to the required length, or let them freely stretched

12 V and 24 V distributor

- for distribution at multiple distribution points
- round connector on the input
- ideal for using multiple branches of LED strip or spotlights controlled at the same time

285093

code	type of connector
285093	Mini (up to 3 W separately, 6 outlets), max. 3.5 W (jack) in total, 0.25 m

12V DC 24V DC MINI

12 V and 24 V distributor

- Mini connector on the input
- ideal for using multiple branches of LED strip or spotlights controlled at the same time
- for distribution to multiple outlets from sensors and switches

356328

code	type of connector
356328	Mini (up to 3 A individually, 6 outlets), total max. 3 A (Mini), 0.25 m

12V DC 24V DC MINI

Connecting cables with connectors

- suitable for connecting the switch with Mini end piece to StrongLumio power supplies
- suitable for connecting LED strip with Mini connector to StrongLumio power supplies
- suitable for connection of the LED strip with Mini end piece and remote control 223823

342541

code	description
342541	power supply (jack) – Mini connector, 0.15 m

12V DC 24V DC MINI

Extension cable for 3PIN switches

code	description
507817	extension cable for 3PIN switches, 2 m

12V DC 24V DC MINI

Connecting cable for distributors, for soldering

- for LED strips connecting
- for power supply
- UL2468 AWG 20# conductors

285094

code	description
543616	connector type Mini [1] F, 2 m

12V DC 24V DC

[1] this type is equipped with a fuse, we recommend it for use in mechanically stressed places, places with vibrations, etc.

- cables for soldering show higher reliability, suitable for use in the presence of moisture, etc.
- we recommend insulating the connection with a shrink tubing or at least taping it with an insulation tape

Extension cables

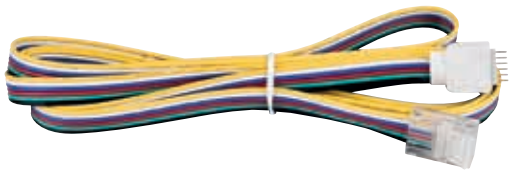

285110

code	description
285110	extension cable Mini – Mini, 1.8 m

12V DC 24V DC

Connecting cables to All in One unit

- used to connect the All in One unit with the corresponding LED strip
- just snap-on and plug-in
- the output connectors are detachable and can be used repeatedly if the strip is changed
- the single-colour are sized for 10 mm strips, but are also suitable for 8 mm. When choosing a profile, however, it is necessary to take into account the larger dimensions

487574

code	the corresponding type of strip

487577	RGB COB
487573	RGBW
487574	RGBCCT

DC power socket with terminal box

- used for example for connection to the round connector of a power supply
- simple connection of the two-core cable without soldering

381175

543615

code	description
381175	female
543615	male

12V DC 24V DC

- maximum current: 5 A
- maximum voltage: 50 V

accessories for LED strips

StrongLumio connectors

- Fast and secure connection using standard pliers, without soldering.
- Permanent joint – intended for one-time assembly.
- **Ensure sufficient space in the profile. Connectors for 8 mm strips generally fit into profiles for 10 mm with a clip-on cover (and wider).**
- Do not strip the conductor insulation. Take care to observe correct polarity.
- Suitable for IP20 strips.

Universal connection of strips and cables – 2 PINS

Suitable for all types of single-colour IP20 strips (including COB).

code	description	external dimensions W × H × D	maximum current load
507813	8 mm	9,8 × 5,1 × 10 mm	5 A

Power supply cables

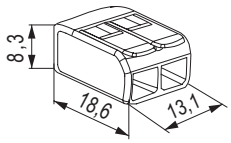

347904

399079

code	description
347904	two-core cable 2 x 0.5 mm², 20 AWG, red-black
465852	two-core cable 2 x 0.5 mm², 20 AWG, white-red
367822	three-core cable for CCT strips, 3 × 0.35 mm²
276497	four-core cable for RGB strips, 4 × 0.35 mm²
399079	five-core cable for RGBW strips, 5 × 0.3 mm²
489472	six-core cable for RGBCCT strips, 6 × 0.3 mm²

- colour-coded cables make it easy to connect the tape to the control and to connect the strips to each other
- max. load according to DIN VDE 0100 up to 30°C: 7 A (group 1), 9 A (group 2), 12 A (group 3)
- in order to achieve optimal function, it is recommended to have the power supply as close to the light source as possible; longer cables cause voltage losses and a subsequent drop in luminous intensity, they can also affect nearby electrical appliances
- do not roll the cable into a ball or coil – a risk of interference and overheating

Joining connectors for cables

code	description
316055	splicing connector – 2 poles (Wago)
507264	splicing connector – 3 poles (Wago)

- serves to connect 12 V, 24 V and 230 V conductors – substitution for soldering
- **inputs are connected together**
- solid conductor: 0.2 × 4 mm²
- fine-stranded conductors: 0.14–4 mm²
- rated voltage: 450 V
- 2 interconnected inputs – **for each pole there must be a separate connector**
- with control levers – simple handling

388187

388189

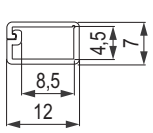

code	description
388187	quick coupling for two-core cable, straight
388189	quick coupling for two-core cable, splitter, type T

- cable diameter 0.32–0.5 mm²
- max. load 5 A

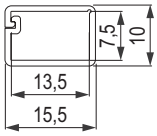

accessories for LED strips

Wiring duct

mini 12 × 7 mm

large 15 × 10 mm

- with an adhesive tape
- to cover cables installed in furniture
- material: plastic PVC
- complies with ČSN EN 50085
- degree of flammability B (flammable with difficulty)
- unsuitable for outdoor use

length (m)	mini 12 × 7 mm			large 15 × 10 mm
	white	wood	dark wood	white
2	**356974**	**356975**	**356976**	**356977**

Shrink tubing

- suitable for insulating the LED strip / supply cable transition
- put on the connection from the cable to the LED strip
- it shrinks when heated
- if a waterproof connection is required, silicone sealant must be applied inside
- sale by the metre from a roll or one metre by pieces

359353

code	description
359353	8.0/4.0 mm, black
359355	10.0/5.0 mm, black

Information about aluminium profiles

Aluminium profiles warrant cooling of LED strips. Inadequate cooling reduces the service life of the LED strip, or damage of the LED strip may occur.

Profile preparation and gluing
For good adhesion of LED strip, profiles must always be thoroughly cleaned and degreased. Some types of surfaces (e.g. powder paints) have lower adhesion, the LED strip can unglue over time. For long-term use, we recommend testing adhesion with the LED strip switched-on (heated). Surface can be easily roughened to increase adhesion.

Absorbing light using different covers

Different types of covers are available for individual aluminium profiles, they differ in light transmittance and type of mounting.
Clipping covers are the most convenient for mounting, allowing them to be removed from the profile at any time, without the need for additional space around the profile. Individual covers, thanks to their ability to scatter/absorb light, can reduce the intensity of LED lighting or create a continuous light line without the visibility of individual points.
Translucent and transparent covers absorb a minimum of light, the individual diodes of the LED strip are visible.
Milk covers partially absorb the light from LED strips. Individual types of covers absorb 20–30% of the light (depending on the respective type). These covers make a more pleasant impression of the LED strip when it is on the front part. Individual LED diodes are not visible on the profiles indicated below, in combination with the appropriate LED strip. To achieve a continuous line of light, the use of COB strip is recommended for all profile types (p. 06.6).

profiles with surface mounting

Surface

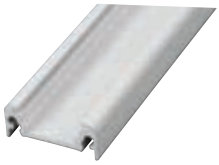

- profile for surface mounting, anodised surface
- fixing with clamps, by gluing or screwing
- massive profile for surface mounting, good heat dissipation

Protection classes (insulation)

class	symbol	description
0	×	Protection against electric shock is based on basic insulation.
I		Protection against electric shock is based on and secured by the connection of non-live parts to a protective conductor.
II		Devices in protection class II do not contain means for connecting to a protective conductor, such devices are equipped with additional or strengthened insulation.
III		Class III protection against electric shock is based on safe and low-voltage power supply.

Protection against flare-up

symbol	description
×	Designed for assembly on non-flammable surfaces (stone, concrete).
	Designed for mounting on normally combustible surfaces (furniture). Material flash point greater than 200°C.
	Designed for installation on easily flammable surfaces. The flash point is less than 200°C.

IP – protection levels against penetration of solid objects and water

the first number refers to the protection level against mechanical objects, the second refers to the level of protection against water

IP	description
0	without protection
1	protection against objects larger than 50 mm
2	protection against objects larger than 12 mm
3	protection against objects larger than 2.5 mm
4	protection against objects larger than 1 mm
5	protection against dust
6	dust-proof

IP	description
0	without protection
1	protection against dripping water
2	protection against dripping water at 15° inclination
3	protection against sprayed water
4	protection against splashing water
5	protection against gushing water
6	protection against intense gushing water
7	protection against effects of temporary immersion in water
8	protection against effects of permanent immersion in water

Power supply

pictogram	description
	DC voltage 12 V
	DC voltage 24 V
	AC voltage 220–240 V, 50 Hz

Types of connectors

pictogram	description
	for correct operation, components with the same connector type and the same supply voltage must be used

Other properties

pictogram	description
	for internal use
	minimum distance from the object of lighting
	cable length

pictogram	description
	equipped with a switch
	dimming function
	service life

Wireless charging

You may not know this, but the famous inventor Nikola Tesla was ahead of his time in many ways and was able to light a light bulb several metres away without the use of wires. The trend today is wireless charging based on the simple principle of electromagnetic induction. Qi wireless chargers try to offer comparable efficiency to conventional wired ones, but there are still some losses. It depends on the distance of the device and whether the device is in a cover or a case.

Wireless charger
- 7,5–15 W | 1–4 h [1]

Standard charger
- 5 W / 1 A | 3 h [1]
- 10 W / 2 A | 2 h [1]
- 18 W / 3 A | 45 min [1]

[1] according to the device type and battery capacity

ADVANTAGES

+ There is no contact between connectors, reducing the risk of electrical faults such as short circuits.
+ Connecting and disconnecting devices is eliminated and the connecting cable is not subject to wear and tear.
+ Convenient charging – just place the device on the pad.
+ You don't get any charging cables mixed up.
+ Concealed charger mounting.

DISADVANTAGES

– Slower charging – due to lower efficiency, the device takes longer to charge compared to wired charging.
– Compatibility – not all devices are compatible with different induction chargers.

StrongPower by Digitel

pop-up sockets

Unique safety electrical socket Surface

- higher security – impeded access to live cables
- cleanliness – simpler cleaning and maintenance
- hygiene – plastic parts are made of antibacterial plastic with silver ions

Note: only applies to type E socket (french type with pin).

Pop-Up, simple

- mounting hole: 107 × 129 mm
- built-in depth: approx. 75 mm
- flat surface socket
- finished sets ready for connection to the mains
- RJ 45 – type 6
- USB A / C, 5 V, 3 A, max. 15 W

fittings for sliding and folding doors

ORDER FORM FOR FITTINGS FOR BUILT-IN WARDROBES SEVROLL

It is easy to assemble all the components for the sliding door correctly thanks to the online configurator. Available for download on our website.

MATERIAL FOR THE PRODUCTION OF WARDROBES AND DOORS

Materials for manufacturing doors and cabinet bodies together with fittings? Nothing is easier than sourcing both from us.

ADVISORY SERVICE

Not sure which fittings to choose or how to assemble them?
Call +420 556 684 310 or email export@demos-trade.com
and we will be happy to help you.

SAMPLE ROOM DISPLAYS

What do handles for fitted wardrobes look like? How do cabinets with overlay sliding doors work? How do the individual types work? Come and see for yourself, or send your customers to our sample room. We will walk them through everything and help them make the right choice.

PORTAL

A customer portal for purchasing, order overview, job submission, formatting, and order status tracking. Stock availability, your prices, and much more — all in one place.

REVEGO uno — single door

REVEGO

REVEGO pocket systems with extended range of use for front height up to 2980 mm. The extensive **REVEGO** product range now offers even greater scope for individual realisation.
Thanks to supplementary beam sets for **REVEGO uno** and **REVEGO duo** hinges, fronts with a height of 1800 to 2980 mm can now be fitted. Suitable for all applications with single-door and double-door doors: **REVEGO uno**, **REVEGO duo**, **REVEGO uno + duo**, **REVEGO duo + duo**.

Hawa Concepta III, Folding Concepta III

Concepta III 25/35 and Folding Concepta III 20/25

18–26 mm

load
20/25 kg
25/35 kg

- patented pivot/sliding system of door fittings for pocket installation
- allows the door door to slide into the pocket
- Push – handleless version, Pull – handle version. Universal left/right solution
- soft-closing opening and retraction into pocket
- suitable for door thickness from 18 up to 26 mm

Warning:
To maintain the door rigidity that is essential for this system, it is very important to use door reinforcements (levelling fittings). Without these fittings, the door door is at risk of bowing, and in this case we cannot guarantee the faultless operation of this system.

Magic Living sliding wooden door system

Magic Living sliding wooden door system

bottom guide | min. 25 mm | load 40 kg

- New and original Magic Living sliding door system, fully concealed.
- The unique sliding mechanism brings minimalism, innovation, functionality, and design.
- The doors move without visible tracks, offering smooth closing and quiet operation.
- Door width – 600–1 800 mm, maximum height – 2 400 mm, load capacity – 40 kg. Minimum material thickness – 25 mm.

surface treatment	door width (mm)	
	600–1100	600–1800

anodised silver	**531300**	**531303**

Spin folding door fitting set

Spin folding wooden door system

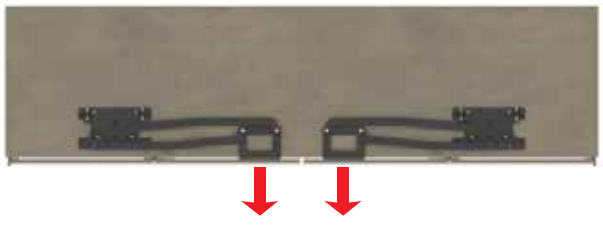

top guide | 18 – 22 mm | load 2× 17.5 kg | folding doors

- Pivot-sliding movement – a combination of pivoting and sliding allows the doors to be fully opened, providing comfortable access to the entire space.
- Exceptionally smooth and quiet opening.
- Ideal for corner and fitted wardrobes – maximum use of space even in challenging locations.
- Minimal clearance is required between the ceiling or suspended ceiling and the cabinet, enabling full-surface design solutions.
- Easy adjustment – practical three-axis adjustment, quick and simple adaptation to requirements.

Set contains:
- 1 pc pre-assembled upper fitting
- 1 pc pre-assembled lower fitting
- 1 pc assembly aid
- fasteners
- assembly manual

Configurator:

Version:
- Left version: opening in clockwise direction.
- Right version: opening in counter-clockwise direction.

Position:
- Push to Open Silent is assembled into the upper or lower fitting assembly (selected according to the height and assembly position of the furniture).

Height, tilt, depth, width, and end positions can be adjusted.
The Cadro frame system for FurnSpin can optionally be used.

folding full overlay wardrobe doors

Sets of running components

top guide | 16–30 mm | ball bearings | load 20 kg | folding doors

- fittings for full overlay folding doors with top guide
- the weight of doors is mainly supported by hinges on the side of the cabinet (not included in the set)
- use appropriate number of hinges according to weight and type of doors
- we recommend full overlay hinge 110° (see Chapter 1)

Without bottom guide

code	description
87470	set of fittings for door max. 300 × 2 000 mm

- bottom slider – castor runs on the edge

With bottom guide

code	description
87478	set of fittings for door max. 300 × 2 000 mm

With bottom guide for larger doors

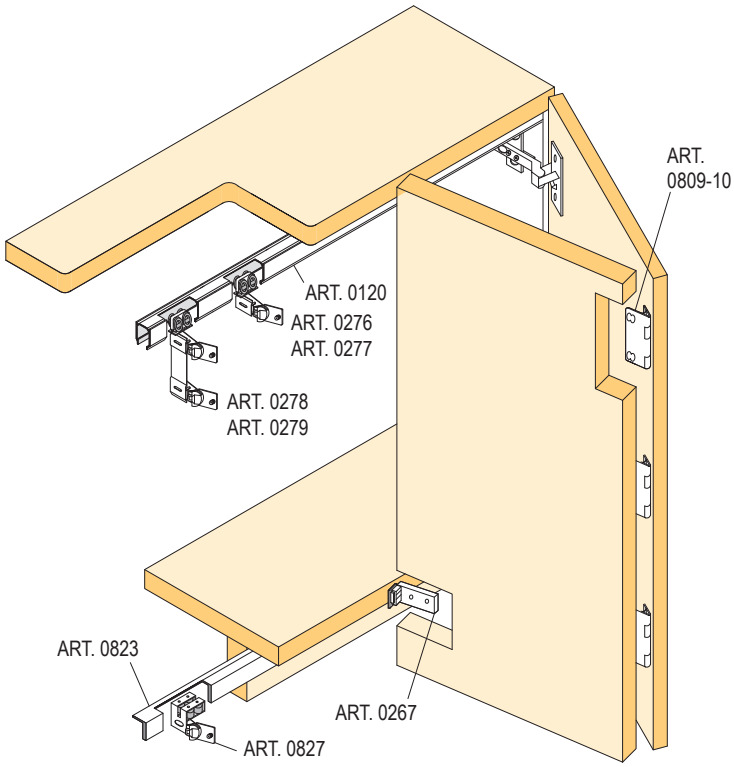

code	description
87479	set of fittings for door max. 500 × 2 600 mm

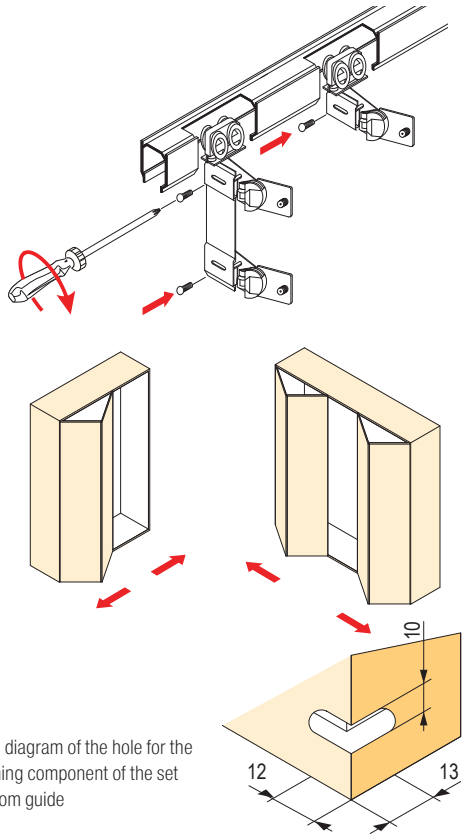

- versions with bottom guide for larger doors, double hinge

Top and bottom guide

guide length	top guide Art. 0120	bottom guide Art. 0823

2 m	**87482**	**87517**
3 m	**87483**	**87518**

dimensional diagram of the hole for the bottom running component of the set without bottom guide

folding full overlay wardrobe doors

StrongLine Turnio

top guide | 18–25 mm | load 15/25 kg | folding doors

- Smooth and space-saving opening of cabinets and wardrobes.
- Ideal wherever efficient use of space and aesthetic design are important.
- Brushes positioned in the upper profile prevent the accumulation of dirt.
- Right-left version.
- When folded, the maximum distance between individual doors is only 115 mm.
- Thanks to the integrated stop, the doors remain securely in place when open.

538057

538058

Fitting sets

code	description	door thick-ness (mm)	guide hinge	maximum door width (mm)	maximum height (mm)

folding full overlay wardrobe doors

top guide | 18–25 mm | load 15/25 kg | folding doors

- Fitting set up to 15 kg and up to height 1 200 mm.

- Fitting set up to 25 kg and up to height 2 500 mm.

in-plane overlay wardrobe doors

StrongLine Dornio

- Uniform and clean door line.
- **Suitable for doors with a thickness of 18–45 mm.**
- Soft closers in the opening and closing direction.
- Safety latch against unhinging.
- Minimum gap between doors and at the sides.
- **Profile can be trimmed.**

Complete sets for 2 doors

code	internal cabinet body clearance (mm)	load capacity (max., kg)	door thickness (mm)
540950	1650 – 2050	80	18 - 45
540951	2050 – 2450		

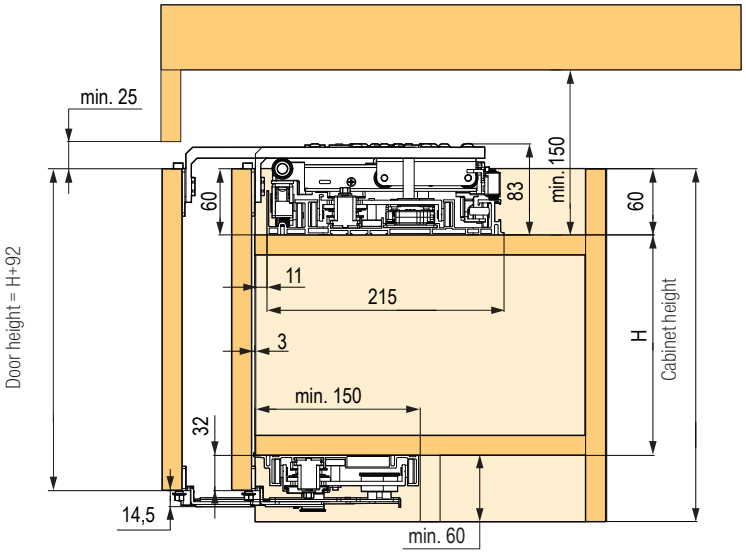

Set contains:

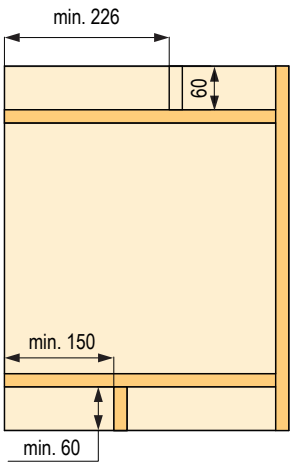

- top and bottom guide mechanisms for 2 doors
- top and bottom guide
- damping set
- assembly key

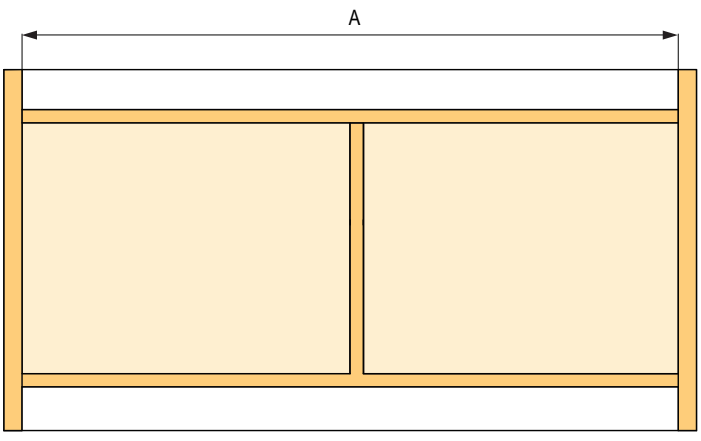

540950

Installation (door thickness including handle ≤ 45 mm)

ℹ To prevent sliding doors from bowing, we recommend using door reinforcements - see related range.

in-plane overlay wardrobe doors

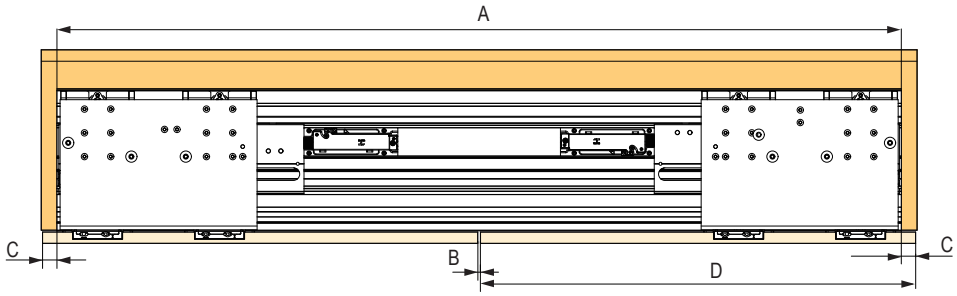

top guide | 18–45 mm | load 80 kg

DOOR DIMENSIONS – OVERLAY DOOR VERSION

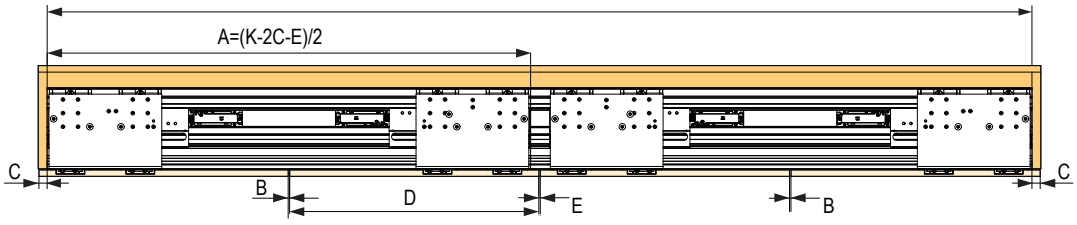

TWO DOORS

A = Internal cabinet width
B = Gap between doors ≥ 4 mm
C = Side panel thickness ≤ 25 mm
D = Door width = (A + 2C – B)/2

FOUR DOORS

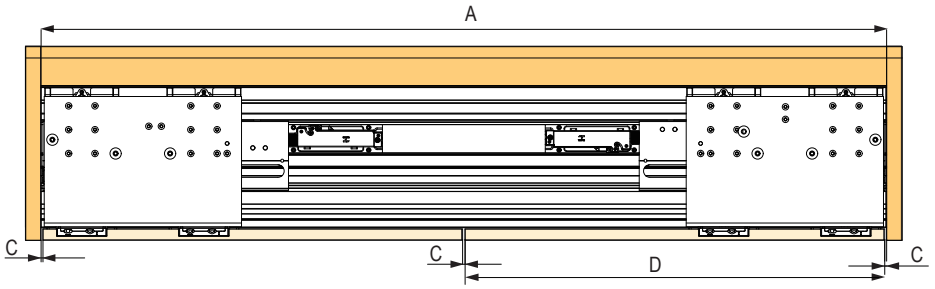

A = Standard clear width
B = Gap between two doors ≥ 4 mm
C = Side panel thickness (≤25 mm)
D = Door width = (K + 2C - B - E)/4
E = Gap between two centre doors (doors do not open simultaneously – E≥3 mm; doors open simultaneously – E≥6 mm)
K = Internal cabinet body width

INSET DOOR VERSION

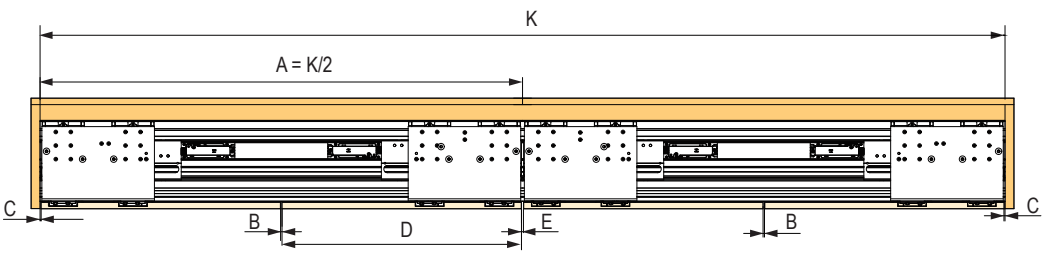

TWO DOORS

A = Internal cabinet width
B = Gap between doors ≥4 mm
C = Side panel thickness ≤ 3 mm
D = Door width = (A - 2C - B)/2

FOUR DOORS

A = Standard clear width
B = Gap between two doors ≤ 4 mm
C = Side panel thickness ≤ 3 mm
D = Door width = (K - 2C - B)/4
E = Gap between two centre doors (doors do not open simultaneously – E≥3 mm; doors open simultaneously – E≥6 mm)
K = Internal cabinet body width

sliding full overlay wardrobe doors

StrongLine Planio

top guide | ball bearings | 16–46 mm | load 20–80 kg

- sliding full overlay system for 2 or 3 doors
- double-sided soft closing for all doors
- also suitable for narrower doors
- anti-collision system for the version for 3 doors
- adjustable for material thicknesses 16–46 mm
- safety latch against dropping of the door

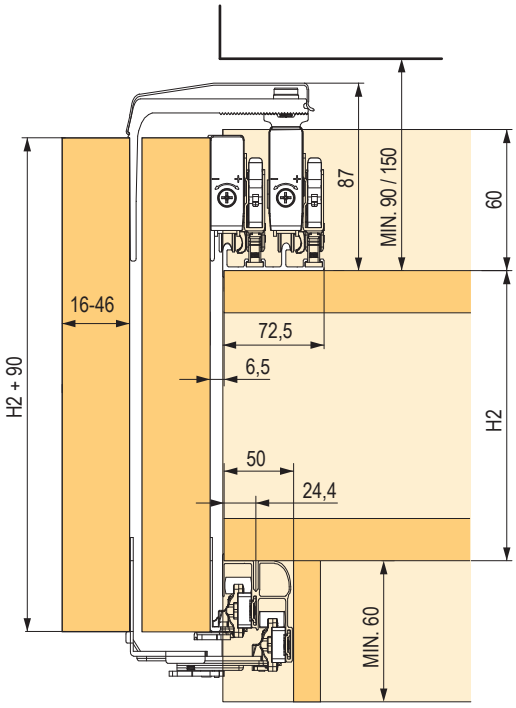

code	description
388537	set of fittings for 2 doors including soft closers
398930	set for 3 doors including soft closers, central soft closer and anti-collision element
388539	top guide anodised 2 m
388540	top guide anodised 3 m
388541	top guide anodised 4 m
388542	bottom guide anodised 2 m
388543	bottom guide anodised 3 m
388544	bottom guide anodised 4 m
388545	cover profile anodised 2 m

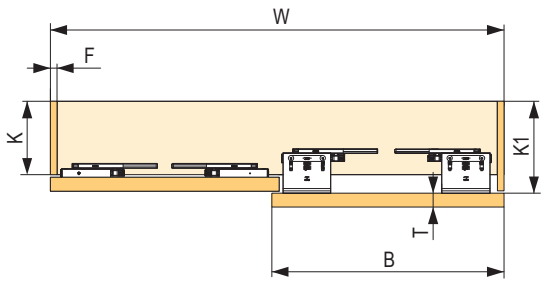

- To prevent sliding doors from bowing, we recommend using door reinforcements, see related range.

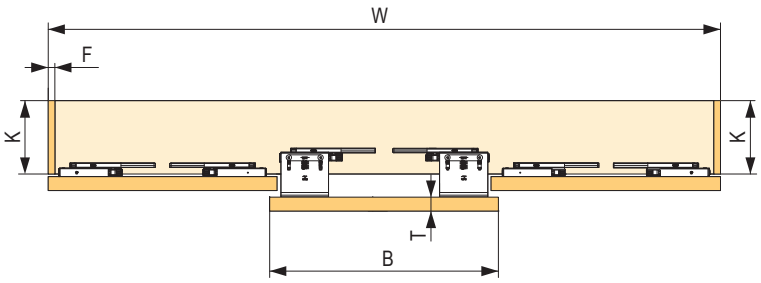

Calculation of dimensions

dimensions of sides: K1 (mm) = K + T + 8 (T = door thickness 16 ≤ T ≤ 46)
door width: B = W / 2 + 10 (2 doors)
B = W / 3 + 10 (3 doors)

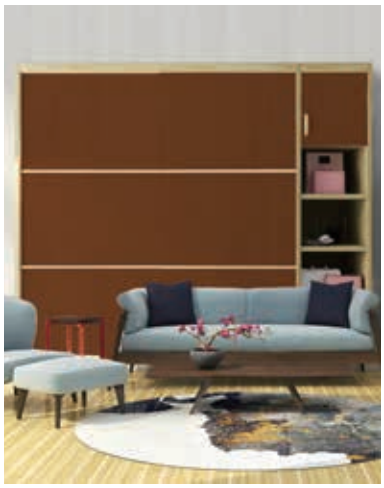

sliding inset wardrobe doors

StrongLine Piato

- Simple installation without milling required for door thickness up to 20 mm.
- Smooth and safe door movement.
- **Brushes positioned on the carriages automatically remove dust and dirt from the track.**
- Soft closers are fitted with an anti-jump function to prevent doors from coming off the guide trail.

bottom guide | 18–20, 20–32 mm | load 10–50 kg

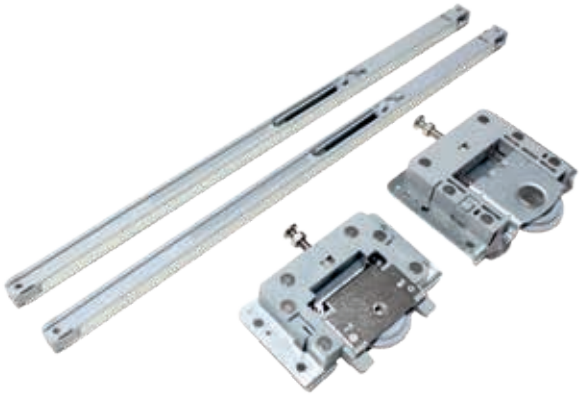

Fitting sets with damping

code	description	load capacity (kg)	door thickness (mm)	door width (mm)	door height (mm)
540953	for 2 doors	10 – 50	≤ 20	500 –1200	≤ 2500
540954	for 3 doors				

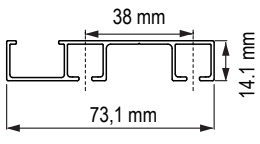

[1] door thickness ≤ 20 mm without milling, 20 mm–32 mm with milling
- recommended aspect ratio height/width is max. 3:1

the set includes:
- top and bottom running components
- connecting and assembly hardware
- soft closers

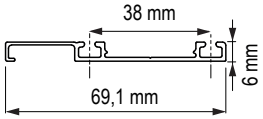

Top and bottom guide track set including cover profile

sliding inset wardrobe doors

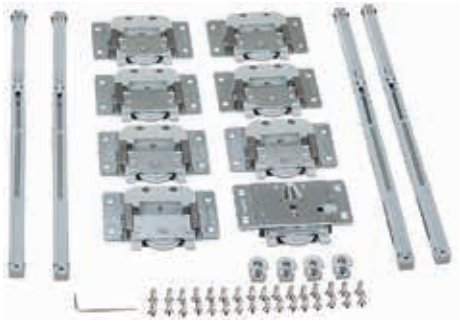

StrongLine LINIO

bottom guide | min. 18 mm | ball bearings | load 40 kg

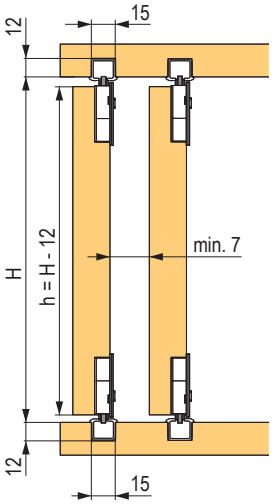

- elegant solution for inset doors
- guide milled into the cabinet body, min. thickness 18 mm
- quiet running, high-quality bearings for long life service
- soft closing hidden in guide for silent closing of the door
- simple regulation, safety latch for easier door installation

code	description
284545	set for 2 doors, 4 × soft closer
284546	set for 3 doors, 4 × soft closer

- the set includes running components in the appropriate quantity, guide end pieces, fasteners and hex key
- minimum door width is 600 mm

dimensional diagram

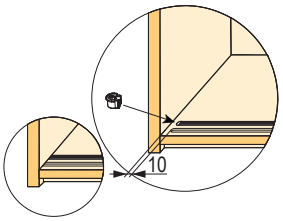

Centre soft closer

code	description
284551	for a 3-doors set

- for centre soft closer mounting, the middle door must be in the rear or the gap between the doors must be enlarged to allow other doors to move
- centre soft closer should be mounted to the cabinet body, guiding pin on door

use of the end pieces of the guide profile

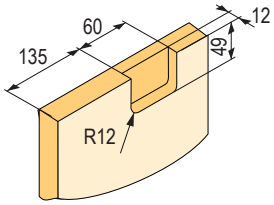

Top/bottom guide

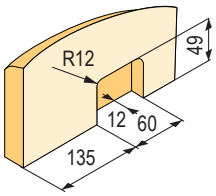

code	length (m)
284547	1,5
284549	2
284550	3

- surface treatment – anodised silver

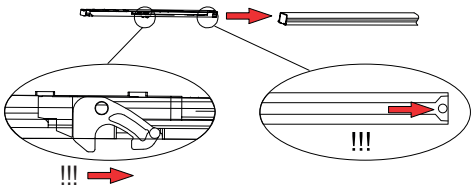

hole for top running component

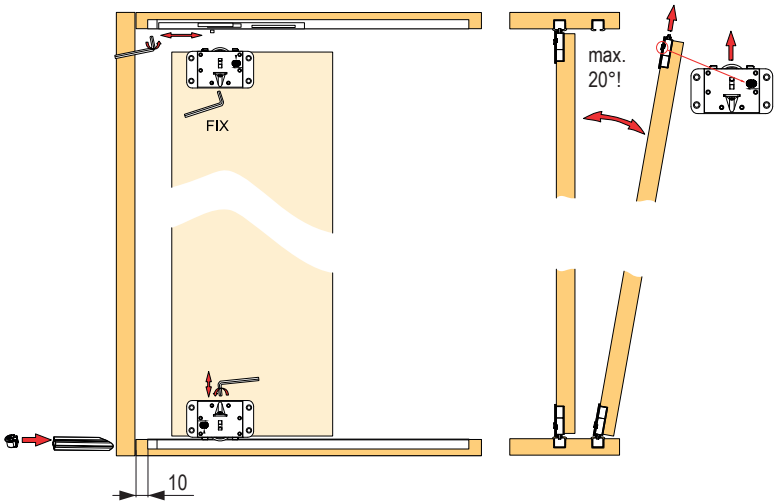

hole for the bottom running component

correct orientation of the soft closer in the guide profile

doors deployment and adjustment

Mounting information:

1. Before inserting the guide into the cabinet body, insert soft closers and end pieces to the rail. Please mind the correct orientation of the soft closer – arrows must point to the cabinet body centre.
2. Draw soft closers in the working position (according to the arrow – towards the cabinet body centre).
3. Before installing the door, push top running components in installation position and secure them with a safety latch.
4. Insert the door into the bottom rail, then direct the top running component to the top rail and release the safety latch.
5. Warning – door deflection during installation must not exceed 20°, otherwise the guide or even the cabinet body may suffer damage!
6. Regulate the door position, then secure against unhooking by tightening the top running component.
7. Align and secure the position of soft closing to close the door to the cabinet body side properly.

sliding inset wardrobe doors

With bottom guide

bottom guide | 18–22 mm | ball bearings | load 30 kg

- high-quality fittings for smaller doors, without soft closing option

positioning and dimensions of running components

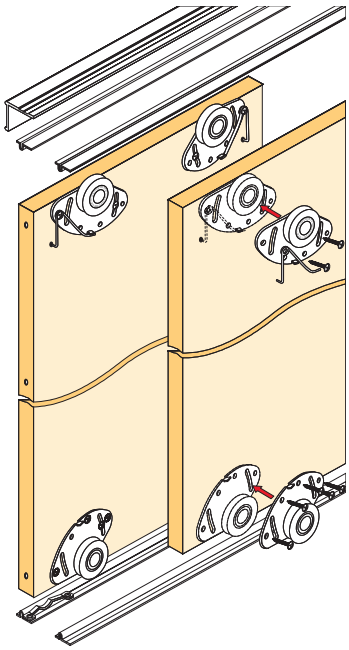

fittings for Micra C and V sliding doors

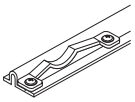

- simple fittings for lighter doors, soft closing not available
- for heights above 1.5 m, use an angle bracket to secure doors against falling out (Fig. 4)
- set of fittings for one door contains top and bottom running components + screws
- any type of 16/18 mm handle profile may be used

Two versions:
- Micra C – bottom guide with bend
- Micra V – bottom guide with groove

Calculation of dimensions

door height (mm)	h	h = H[1] - 13

[1] H = Inner cabinet body height

Protective foil for glass panels

- the safety foil is intended for securing glass panes used in the furniture industry to prevent injury by fragments in case of breaking
- it is installed on the rear side of glass panels, on a clean and degreased surface
- when applying multiple strips, an overlap must be maintained, min. 20 mm

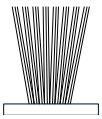

- material – polyolefin foil, thickness 0.1 mm, irremovable, transparent
- not suitable for interior glass partitions, windows, doors, etc.

code	width
203857	200 mm
203859	250 mm
203860	300 mm
203861	400 mm
203862	500 mm

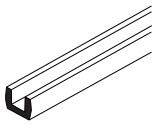

Backstop and anti-dust brushes

- anti-dust brushes in different heights and colours, used for soft closing of the door backstop and sealing the inside of the wardrobes against dust

white	grey	black	type	width (mm)	height (mm)

GEMINI 10

Surface treatment

Use safety glass or mirror, or secure with a protective foil

- use the form at www.demos-trade.com to calculate the dimensions of the individual components

code	description
547242	sampler of handle profiles 2026 – binder

The different types

- the Sevroll system in the frame design enables wide use of glass panels also in combination with LDF 10 mm
- glass panels are fixed in the frame by gaskets, with the option of a wide range of panel thickness
- the size of the door is limited only by running component load capacity (50 kg)
- we recommend using the widest doors possible
- narrow and tall doors are less stable and especially in connection with a soft closer may cause bouncing and malfunction
- use safety glass or mirror, or secure with a protective foil

SYSTEM 10 II

- length 2.7 m, for LDF thickness 10 mm, glass [1]

SEVROLL

accessories for fitted wardrobes, sliding – panel thickness 10 mm or glass

Set of top running components

228009

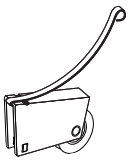

89265

code	description
228009	set of top symmetric running components
89265	set of top asymmetric running components

- varies according to the handle profile, specified for each type

Set of bottom running components

328321

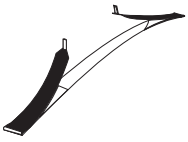

code	description
328321	set of bottom running components Elegant II
229441	set of bottom running components Gemini

Positioners

code	description
298035	for top running component

- brake for the top running component, it keeps the door in the selected position
- mounted firmly into the top guide with screw

code	description
89063	for bottom running component

Connecting screw

code	description
89244	6,3 × 32

- for connecting frame (4 pcs / door) and dividing (only dividing profile H30) profiles with handle profiles
- when using dividing profiles H30, a clearance of ca. 2 mm must be left between individual lamino parts for dilatation of panels

Screw for bottom guide

code	description
98019	2,5 × 18

- serves to fasten simple bottom guide
- narrow head allows mounting straight into the bottom guide groove; a hole of 2.5 mm must be pre-drilled

Mounting and drilling templates and tools

code	description
128842	step drill bit 6.5/9.5 mm
129677	mounting preparation

- a simple tool for drilling holes in the handle profile
- for pre-drilling of holes in handles in correct positions, without the need of measuring, marking, etc.
- notice – the tool cannot be used in other systems using different types of profiles

STRONG

StrongLine

something for everyone

Strong brand fittings always combine good quality with an equally good price. The same applies to StrongLine door fittings.

Choose the fitting version that best suits your project and rest assured that it can be relied upon in every respect.

www.demos-trade.com

soft closers – 10 mm thick panel or glass

Sevroll

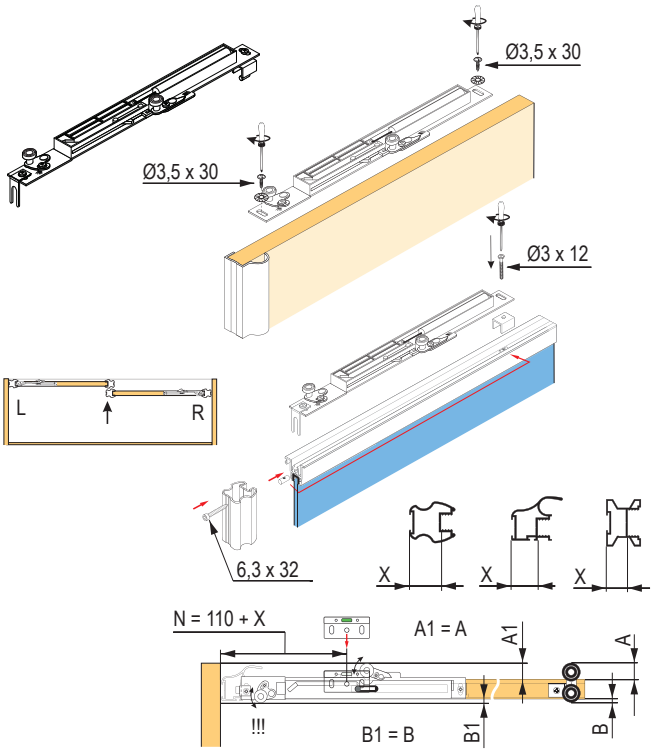

Standard soft closers for systems 10 and 18 mm

- replacement for top running components
- adjustable width – can be used for conventional and COMFORT guide
- for correct operation, correct adjustment with respect to the rail width and positions in the rail must be carried out
- handle profile must not touch the rails, distances must be the same as when using conventional running components in order to prevent door torsion

code	description
227185	for door weight 14–25 kg
227187	for door weight 25–50 kg

- package contains 2 pcs – right + left
- soft closers are also available individually, right and left versions

Attention!
Before inserting the doors, stretch the soft closer trap.
Do not install positioner if using soft closers.

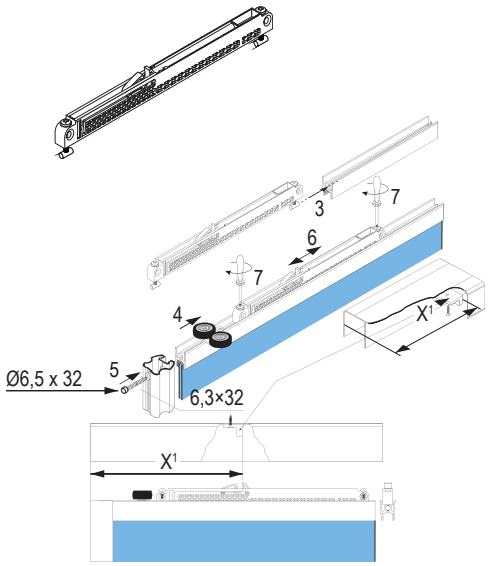

Mini SV

- for door weights up to 25/40/60 kg
- 3 heights of trap in the package, for fine adjustment
- when using the Single simple rail, gently grind the bottom edges of the trap so it touches the rail with its entire surface

code	description
318662	Mini SV-25 (14–25 kg)
283956	Mini SV-40 (25–40 kg)
351743	Mini SV-60 (40–60 kg)

Important
When the door is closed for the first time, the soft closers are not activated. Close the door slowly to activate the soft closers (click).
Rapid impact can damage the soft closer as the door strikes the end position without soft closing.
Always demonstrate before handing the product to the customer in order to prevent possible complications.

[1] X = optional distance, see assembly manual

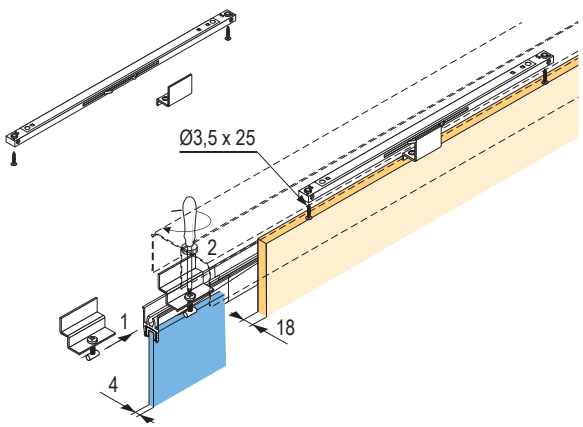

CENTRAL SV

- double-sided soft closer, for the middle door; it allows opening to both sides, stops the middle door in a central position from both sides
- for door weights up to 25/40 kg
- when using in the Single simple rail, gently grind the bottom edges of the trap so it touches the rail with its entire surface

Note that the system requires reducing the door height, the total door height must be 44 mm less than the height of the hole.

code	description
318663	Central SV-25 (double-sided) up to 25 kg
283955	Central SV-40 (double-sided) up to 40 kg

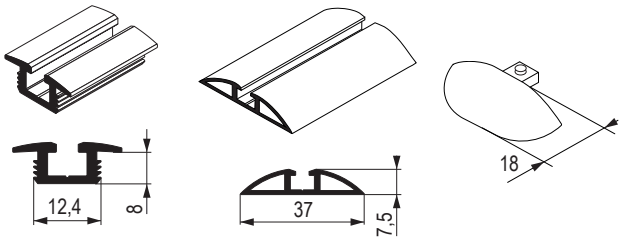

- detailed instructions on individual soft closers are available for download on the portal, identified by a code

special fittings for built-in sliding cabinets – 10 mm thick panel or glass

For door heights up to 3.5 m

bottom, double | lamino 10 mm | glass 4/4,5/ 6/8 mm | ball bearings | load 50 kg

- this series uses COMFORT top guide and DOUBLER bottom guide
- cannot be combined with other guiding systems
- solid wood profiles allow the installation of tall doors
- decorative materials such as Decoacryl can also be used as panel infill
- we recommend using the widest doors possible
- narrow and tall doors are less stable and especially in connection with a soft closer may cause bouncing and malfunction
- use safety glass or mirror, or secure with a protective foil

SEVROLL
simpleblue

Simple Blue system for built-in wardrobes – panel thickness 10 mm or glass

Handles

bottom guide | lamino 10 mm | glass 4/4,5/ 6/8 mm | ball bearings | load 35 kg

- Simple Blue system in the frame design allows the use of glass panels in combination with LDF 10 mm
- glass panes (4–4.5 mm) are fixed in the frame using gaskets, with the option of a wide range of panel thickness
- we recommend using the widest doors possible; narrow tall doors are less stable

glass panel infills must be backed with safety film (p. 07.33 - 35)

Démos trade is not liable for possible deflection of doors caused by using poor quality panels.

PAX fittings for all-glass doors of built-in sliding cabinets

- The PAX system allows the construction of a circumferential frame to which the glass panel is bonded
- running components are mounted into horizontal frame profiles
- for larger sizes, we recommend using a straightener profile
- maximum door width 1 100 mm
- we recommend using the widest doors possible, narrow and tall doors are less stable, and especially in connection with a soft closer may cause bouncing and malfunction
- use safety glass or mirror, or secure with a protective film, see p. 7.26

[1] for this guide, bottom running components 229441 are required

Mounting information:

- safety film must not be applied at the point of bonding of the frame profiles and door handle
- for bonding, use adhesives designed for bonding glass and mirrors to aluminium (non-absorbent); see chapter Adhesives; glass edges must be ground

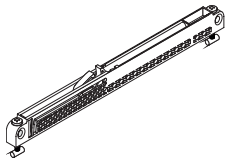

Soft-closing systems

Soft closer – Sevromatic Standard

description	code
for door weight 14–25 kg	**227185**
for door weight 25–50 kg	**227187**

- universal soft closer, also replaces 1 top running component
- package contains 2 pcs – right + left
- soft closers are also available individually, right and left versions

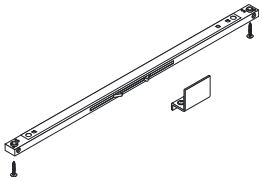

Soft closer – Mini SV

description	code
mini SV-25 (14 – 25 kg)[1]	**318662**
mini SV-40 (25 – 40 kg)[1]	**283956**
mini SV-60 (40 – 60 kg)[1]	**351743**

[1] this type does not replace top running component

- 2 pcs in package

Soft closer – Central

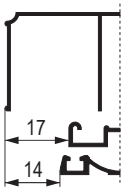

description	code
central SV-25 (double-sided)[2]	**318663**
central SV-40 (double-sided)[2]	**283955**

[2] for the middle door; it allows opening to both sides, stops the middle door in a central position from both sides

Attention: these soft closers require different height of the door!

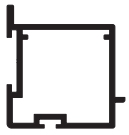

Calculation of doors size

handle profile
H – hole height
N – number of door doors

door door height	h	h = H - 40 mm
door door height for mounting Central SV soft closer	h	h = H - 44 mm
panel height glass/mirror	hp	hp = h - 4 mm

- handle profile length is identical to door door height h

D – hole width

door door width	d	d = (D - 3 + Z): N
panel width glass/mirror	dp	dp = d - 4 mm

D = hole width

number of doors	N	2	3	4
overlap length (mm)	Z	25	50	75

SEVROLL
simpleblue

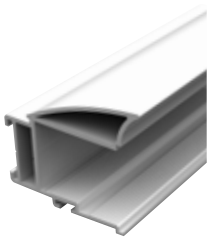

Simple Blue system for built-in sliding cabinets – 18 mm thick panel

- system Blue in frame design allows the use of glass panels in combination with LDF 18 mm without the need of using LDF underlayment 12 mm
- glass panels (4–4.5 mm) are wedged in the frame, without the need of using gaskets or gluing
- we recommend using the widest doors possible; narrow tall doors are less stable

Individual handle profiles (frame system)

example of mounting of built-in sliding cabinet – 18 mm thick panel

Era and Rekord handle profiles

Simple Blue system for built-in sliding cabinets – 18 mm thick panel

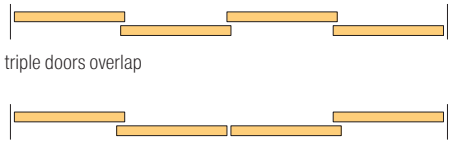

Calculation table:

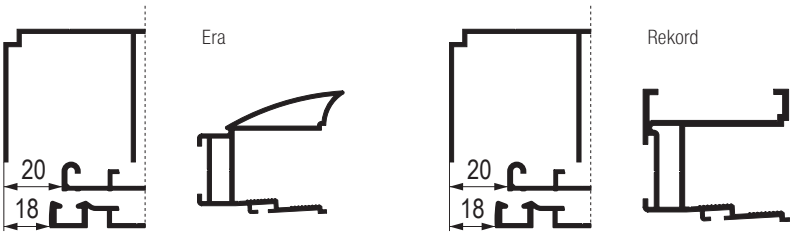

handle	door door height h [1]	panel height 18 mm hp	mirror/glass panel height hl	door width d	panel width 18 mm dp	panel width 4 mm dl	guide rail and cover strip length P
Era Rekord	h = H - 35 mm	hp = h - 60 mm	hl = hp	d = (D - 3 mm + Z) : N	dp = d - 37 mm	dl = dp + 16 mm	P = d - 57 mm

H – inner hole height in mm Z – overlap width in mm W – inner hole width in mm N – number of doors

[1] when a soft closer is used, the deduction changes to h = H – 39 mm (lower guide Blue-V)

handle	number of doors – N	2	3	4 (two doors overlap)	4 (triple doors overlap)	5
Era	overlap width in mm – Z	34	68	65	102	136
Rekord		30	60	57	90	120

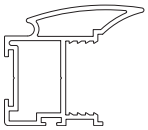

built-in sliding cabinets – 18 mm thick panel/glass

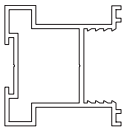

Individual handle profiles

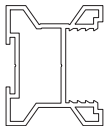

- length 2.7 m, for LDF 18 mm or glass/mirror[1)]
- system with solid wood profiles, allows a combination of lamino 18 mm with glass panels using gaskets

Sevroll sliding wardrobe lock

- for wooden panel 10 mm + 18 mm
- cannot be used for glass panels
- blocks doors against each other, does not have a safety function, doors can be unhinged, etc.

code	description
216363	sliding wardrobe lock

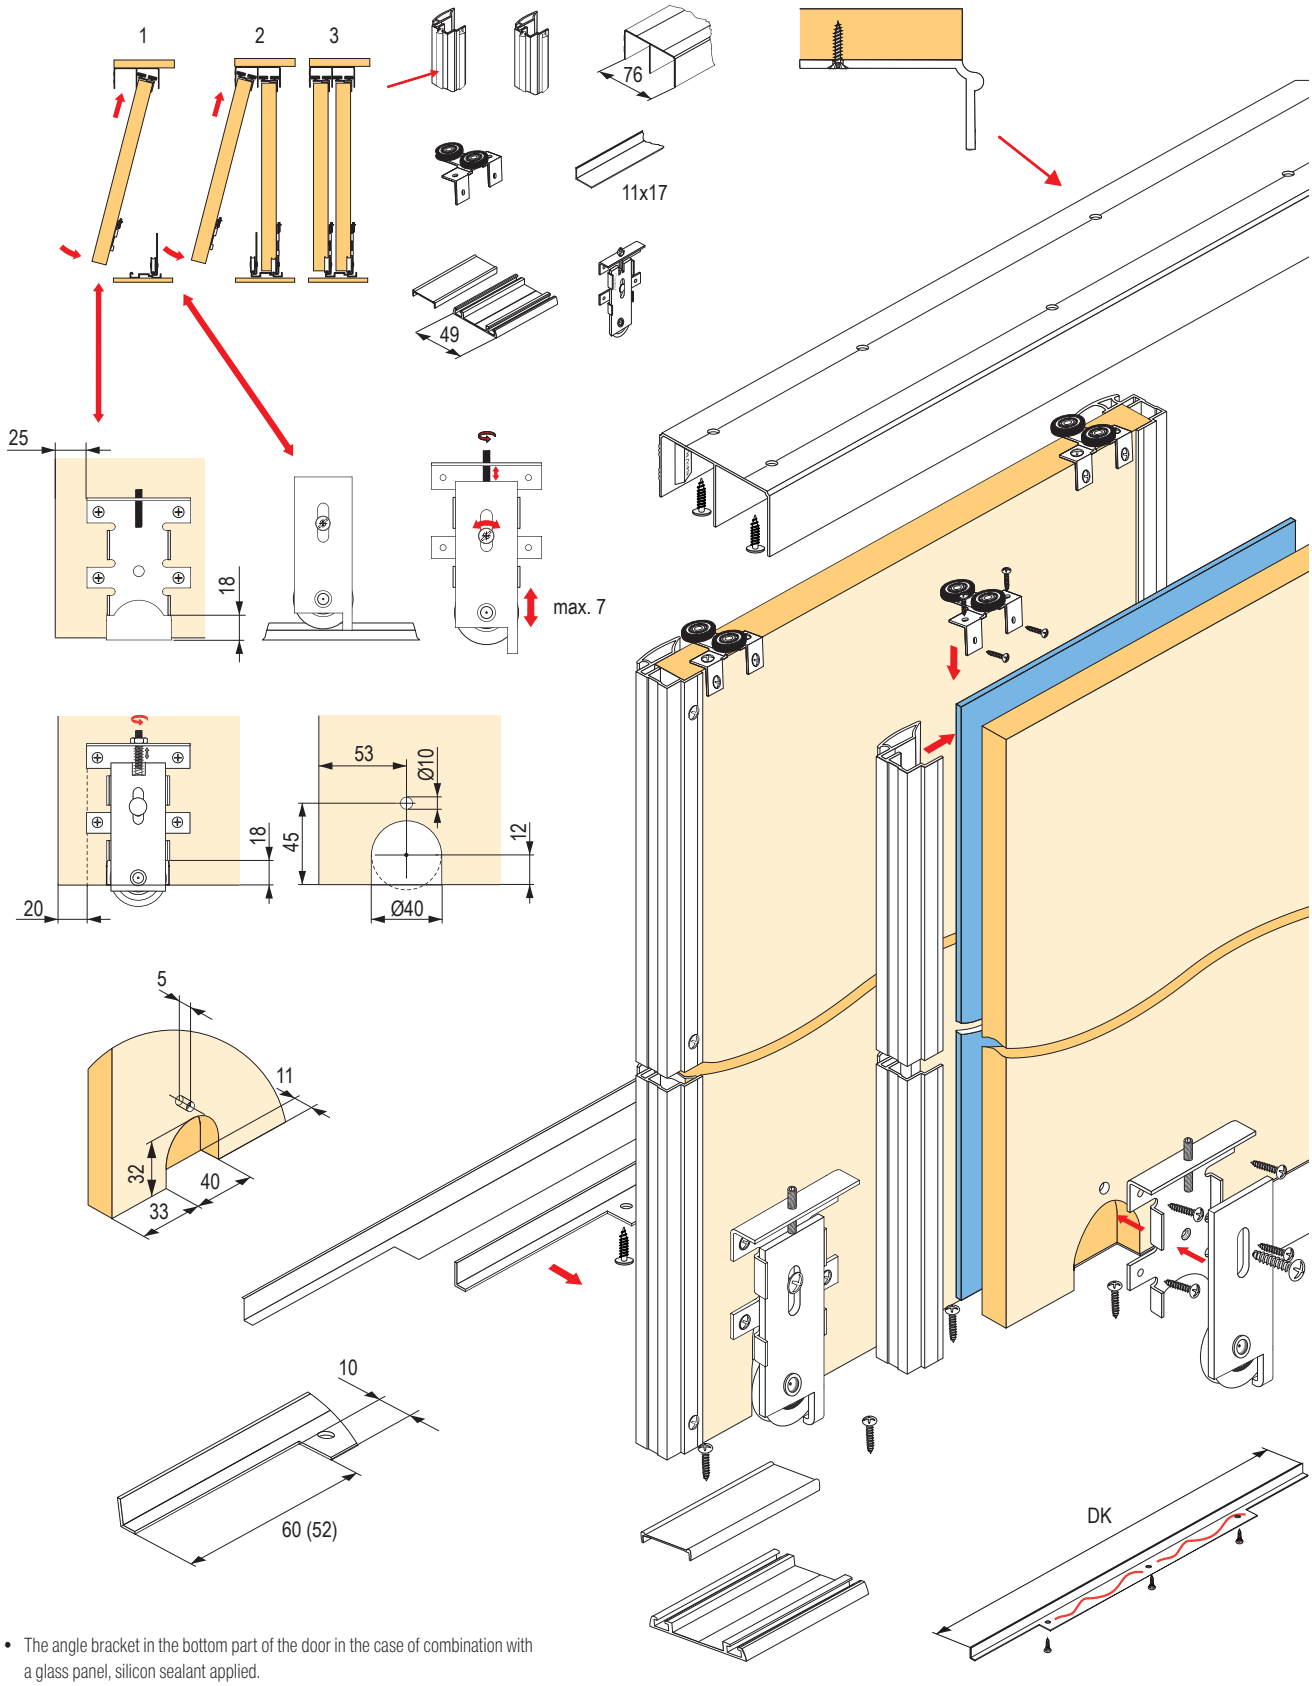

example of mounting of built-in sliding cabinet – 18 mm thick panel

ALFA II handle profile

- mounting diagrams for other handles are available for download on www.demos-trade.com

- The angle bracket in the bottom part of the door in the case of combination with a glass panel, silicon sealant applied.

soft closer for built-in sliding cabinets – 18 mm thick panel

Sevroll

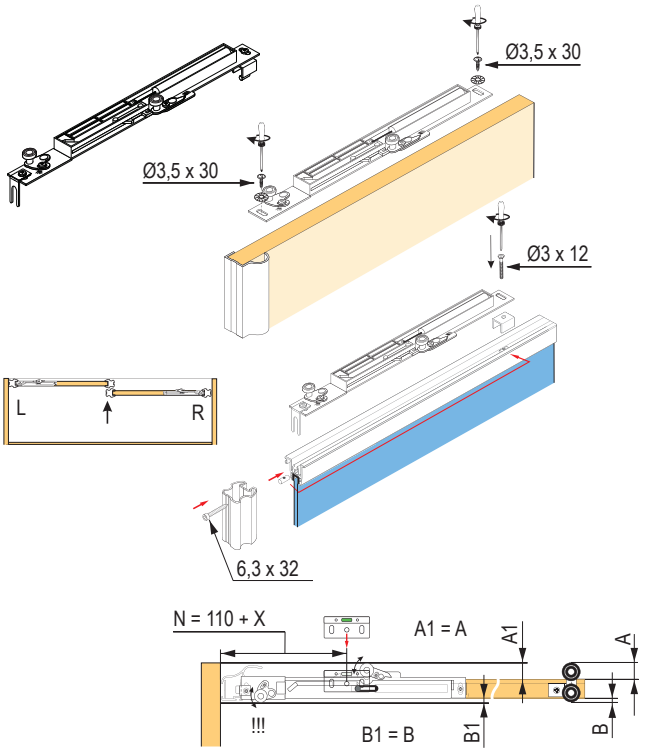

Standard soft closers for systems 10 and 18 mm

- replacement for top running components
- adjustable width – can be used for standard guide as well as COMFORT and Maxim guides
- for correct operation, correct adjustment with respect to the rail width and positions in the rail must be carried out
- handle profile must not touch the rails, distances must be the same as when using conventional running components in order to prevent door torsion

description	code
for door weight 14–25 kg	**227185**
for door weight 25–50 kg	**227187**

- package contains 2 pcs – right + left
- soft closers are also available individually, right and left versions

Attention!
Before inserting the doors, stretch the soft closer trap.
Do not install positioner if using soft closers.

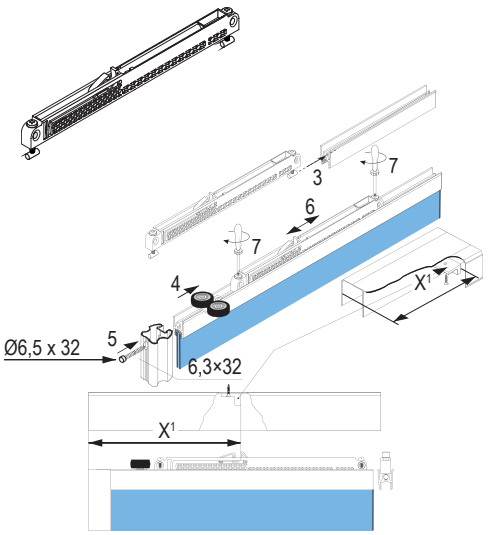

Mini SV

- for door weights up to 25/40/60 kg
- 3 heights of trap in the package, for fine adjustment
- when using the Single simple rail, gently grind the bottom edges of the trap so it touches the rail with its entire surface

description	code
Mini SV-25 (14 – 25 kg)	**318662**
Mini SV-40 (25–40 kg)	**283956**
Mini SV-60 (40 – 60 kg)	**351743**

Important
When the door is closed for the first time, the soft closers are not activated. Close the door slowly to activate the soft closers (click).
Rapid impact can damage the soft closer as the door strikes the end position without soft closing.
Always demonstrate before handing the product to the customer in order to prevent possible complications.

Central SV

- double-sided soft closer, for the middle door; it allows opening to both sides, stops the middle door in a central position from both sides
- for door weights up to 25/40 kg
- when using the Single simple rail, gently grind the bottom edges of the trap so it touches the rail with its entire surface

Note that the system requires reducing the door height, the total door height must be 44 mm less than the height of the hole.

description	code
Central SV-25 (double-sided) up to 25 kg	**318663**
Central SV-40 (double-sided) up to 40 kg	**283955**

- detailed instructions on individual soft closers are available for download on the portal, identified by a code

Soft closer

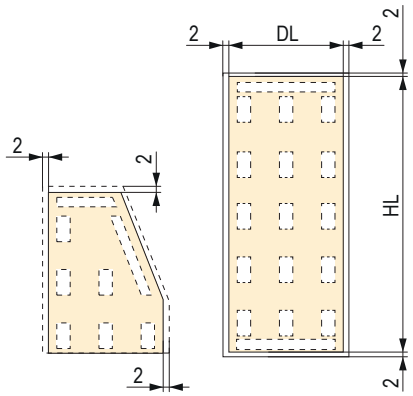

description	code
for door weight 14–25 kg	**227185**
for door weight 25–50 kg	**227187**

- universal soft closer, also replaces 1 top running component
- package contains 2 pcs – right + left
- soft closers are also available individually, right and left versions
- the soft closer can be used on the angled door only if the angled door has a sufficiently long horizontal component for soft closer installation

- the soft closer can be used on the angled part only if the angled door has a sufficiently long horizontal component in the length of the soft closer

for additional accessories, see p. 07.36
for calculations table, see p. 07.52

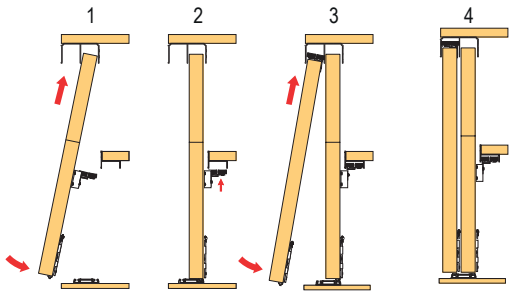

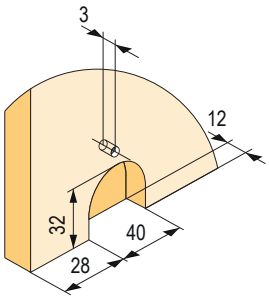

- positioning of the double-sided adhesive tape in the case of a combination of LDF 12 mm + glass 4 mm

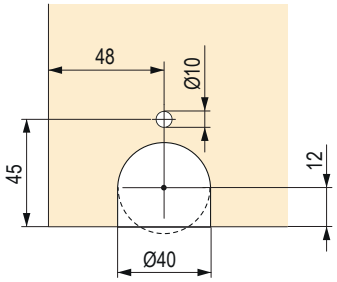

- the maximum door dimensions when using a mirror is 2 400 × 700 mm
- use a double-sided adhesive tape for connection LDF 12 mm and the mirror

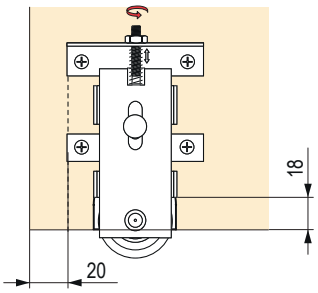

use a corner bracket on the bottom edge of the door (see p. 07.68)

Era and Rekord handle profiles

Simple Blue system for built-in sliding cabinets – 18 mm thick panel

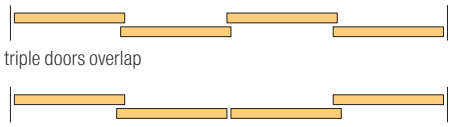

Calculation table:

handle profile [1]	door door height h [2]	panel height 18 mm hp	panel height mirror/glass 4 mm hl	doors width door d	panel width 18 mm dp	panel width 12 mm dpL	panel width mirror/glass 4 mm dl	bottom angle bracket length dk
Era	h = H - 40 mm	hp = h - 1 mm	hl = hp - 4 mm	d = (D - 3 mm + Z) : N	dp = d - 37 mm	dpL = d - 17 mm	dl = dpL - 6 mm	dk = d - 57 mm
Rekord								

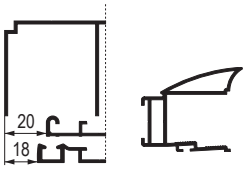

H – inner hole height in mm Z – overlap width in mm W – inner hole width in mm N – number of doors

[1] handle profile height is the same as the door height
[2] door height is reduced by an additional 5 mm when using soft closers

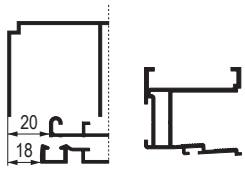

handle	number of doors – N	2	3	4 (two doors overlap)	4 (triple doors overlap)	5
Era	overlap width in mm – Z	34	68	65	102	136
Rekord		30	60	57	90	120

Era

Rekord

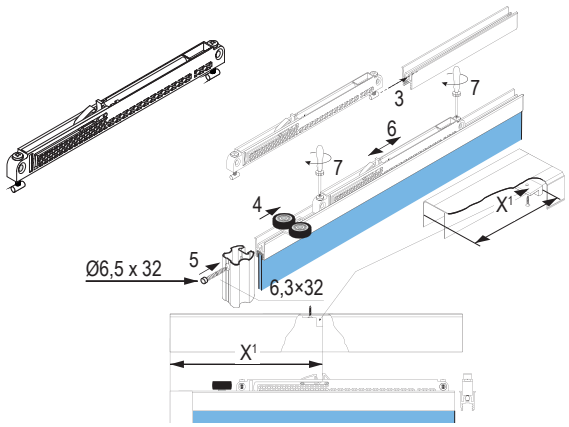

Soft-closing systems

Mini SV

- for door weights up to 25/40/60 kg
- 3 heights of trap in the package, for fine adjustment
- when using the Single simple rail, gently grind the bottom edges of the trap so it touches the rail with its entire surface

description	code
Mini SV-25 (14–25 kg)	**318662**
Mini SV-40 (25–40 kg)	**283956**
Mini SV-60 (40–60 kg)	**351743**

Important
When the door is closed for the first time, the soft closers are not activated. Close the door slowly to activate the soft closers (click).
Rapid impact can damage the soft closer as the door strikes the end position without soft closing. Always demonstrate before handing the product to the customer in order to prevent possible complications.

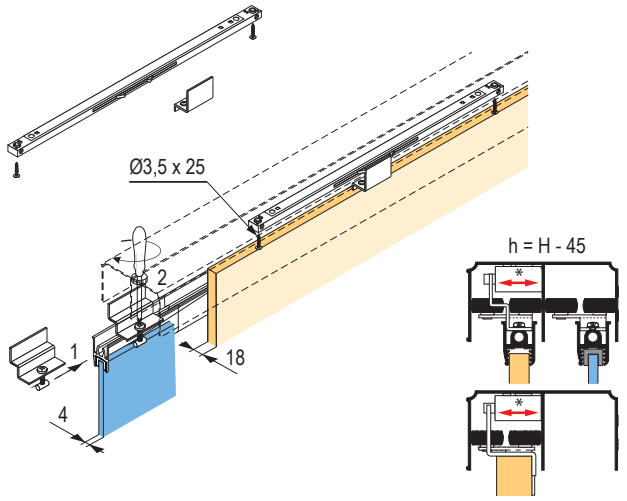

Central SV

- double-sided soft closer, for the middle door; it allows opening to both sides, stops the middle door in a central position from both sides
- for door weights up to 25/40 kg
- Attention! Requires a reduction in door height, the overall door height must be 44 mm lower than the hole height
- when using in the Single simple rail, gently grind the bottom edges of the trap so it touches the rail with its entire surface

description	code
Central SV-25 (double-sided) up to 25 kg	**318663**
Central SV-40 (double-sided) up to 40 kg	**283955**

- detailed instructions on individual soft closers are available for download on the portal, identified by a code

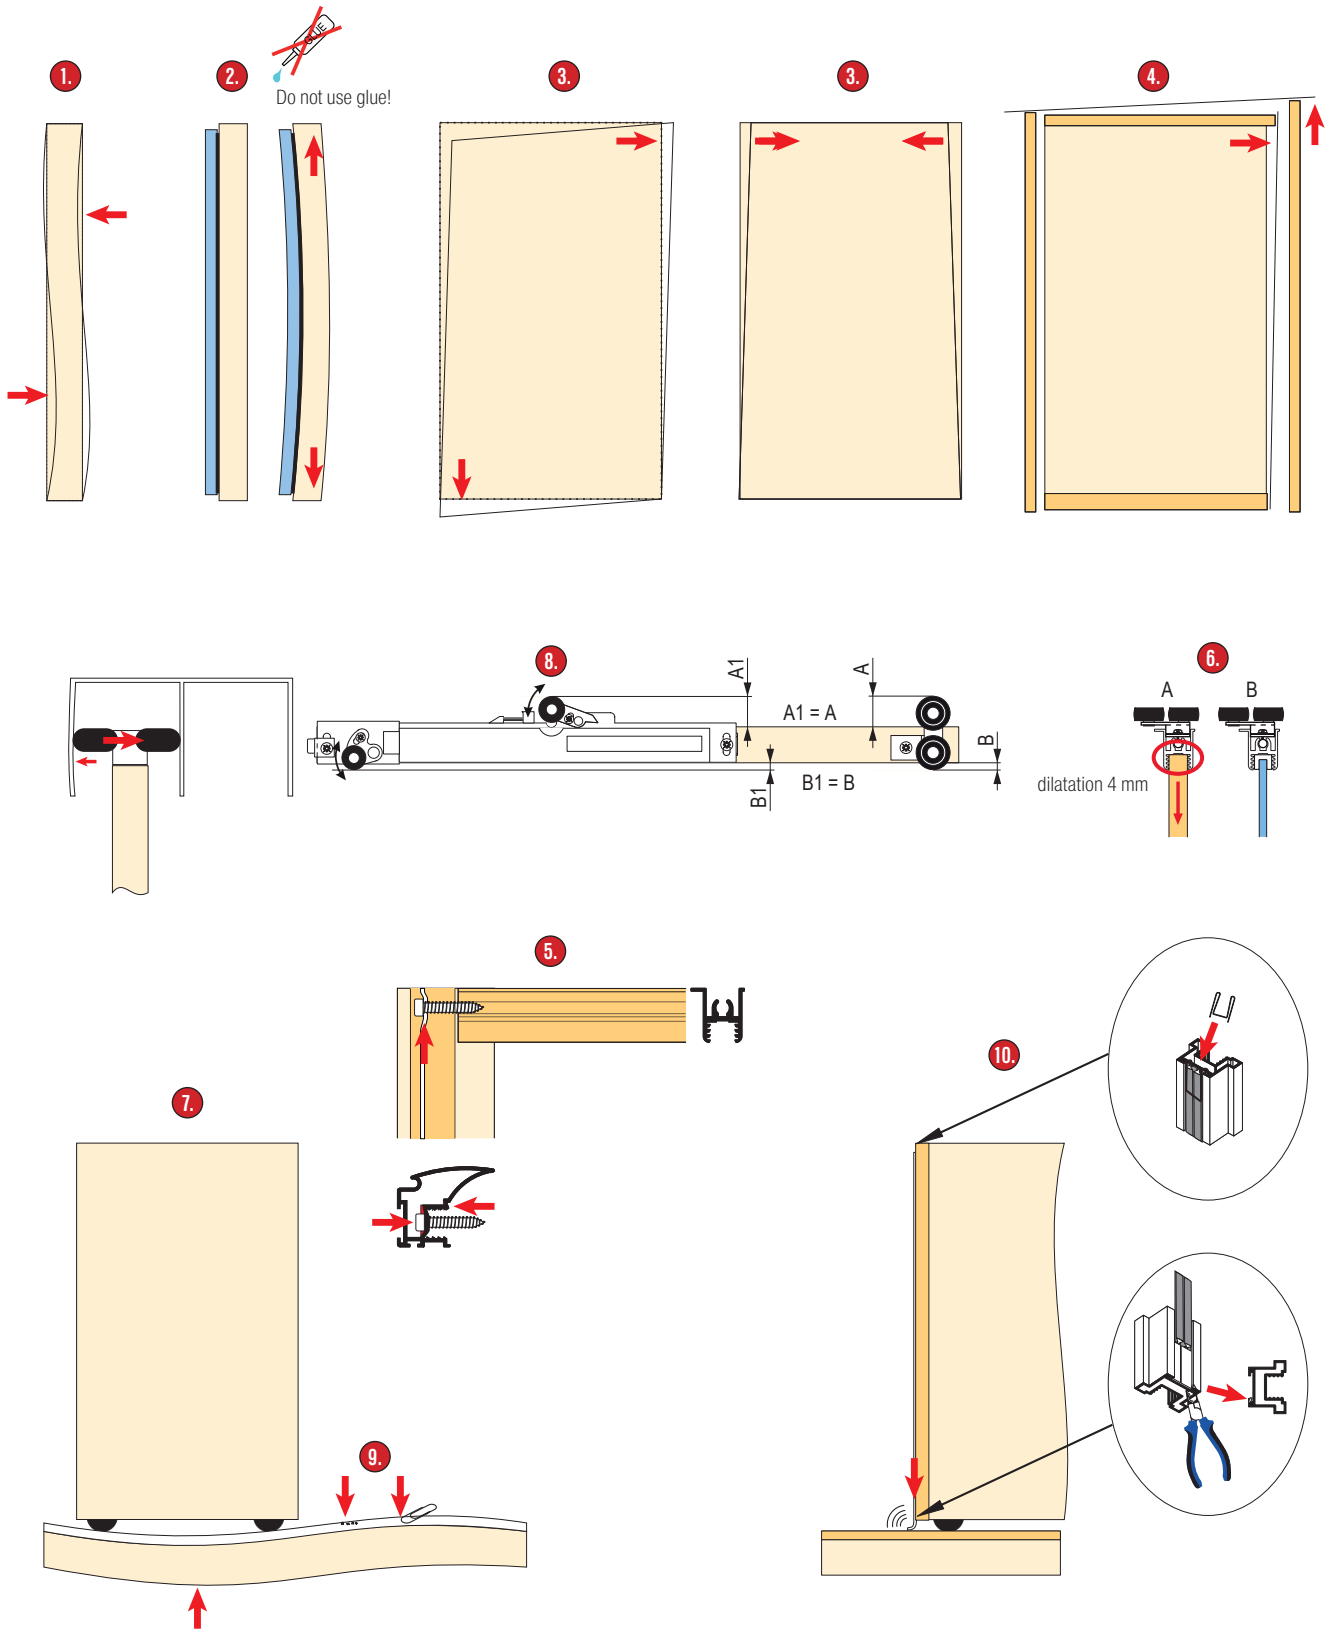

built-in sliding cabinets – 18 mm thick panel

Troubleshooting the most common problems

defect	possible causes	drawing	solution
Door bending.	Panel distortion – laminate board, e.g. due to changes in humidity.	1	Milling-in grooves on the rear side of the door. Groove width 2–3 mm, groove depth lamino 10 mm – ca. 3 mm, lamino 18 mm ca. 8 mm.
			Note that laminate board manufacturers recommend edging boards as well as sides that are hidden in the profile due to possible damp suction.
			In damp environments and in areas with substantial change of ambient conditions, it is necessary to use more solid profiles. Additional door straighteners must be used in extreme conditions.
	Excessive difference between the thickness of lamino and the groove in the profile.		Laminate boards have certain manufacturing tolerance and tolerance also applies to aluminium profiles. In the event that the thickness of the laminate panel exceeds the groove dimension in the profile, we recommend milling off the excess to a maximum of 0.1–0.2 mm above the standard dimension.
	Twisting of the panel due to varnishing, veneering, etc.		These processes may cause a considerable twisting of the board. To decrease the risk, it is possible to use the same technology also for the other side of the board.
	Sticking the glass panel on a laminate board 12 mm.	2	We recommend using double-sided adhesive tapes to attach glass panels. The drawing with the instructions shows placement of the adhesive tape, the largest area is placed at the bottom part of the door, the amount of the tape at the top may be smaller. We strongly warn against using glues and silicone. In such a case, there is a risk of substantial twisting of the door without any possibility of repair.
Door bending with frame systems.	Used panels not perpendicularly cut, uneven lengths of sides.	3	Check whether the panels are cut correctly, possibly cut them down to the correct dimensions.
	Horizontal frame strips are not perpendicularly cut.	4	Check whether the profiles are cut correctly, possibly cut them down to the correct dimensions.
	Deformation of profiles due to excessive tightening of connecting screws.	5	When tightening the connecting screws, make sure that the profiles are not deformed due to the excessive tightening of screws.
	Required dilatation 4 mm not complied with or cut to larger dimensions.	6	Dismantling the door and cutting it down to the right size.
Friction of the door against bottom guide	Bottom rail placed on an uneven surface, non-adjusted door.		Align the base under the rail. Adjust bottom running components – the height of the door above the rail.
Friction of the door against top guide.	Unevenness between top and bottom guide.	7	Compare positioning of top and bottom guide so that they are parallel.
	Incorrectly localised inner dimension and the subsequent wrong dimensions of the door.		Measure the inner dimensions of the cabinet and check the cabinet size, reduce the door height if necessary.
Braking of the door with a soft closer, noticeable resistance when moving.	Incorrectly mounted soft closer, incorrectly adjusted running component castors.	8	The soft closer has an adjustable pitch of castors for different types of guides. It is necessary to adjust the pitch so that the door moves without any play but the pressure is not too strong.
Friction of the door with a soft closer.	Incorrectly adjusted running component castors.		The door must not touch the guide, it is necessary to adjust the running components so that any contact is prevented.
Friction of bottom running components, noise during movement.	Dirt in guides.	9	Vacuum any dirt in guides, wipe the guides.
	Bottom running components damaged by dirt in guides (e.g. a paper clip in the guide).		Replacement of running components.
	Damage of guides – e.g. little stones in a shoe, etc.		Replacement of bottom guide.
Rustling sound when moving the door.	Backstop or anti-dust brush slid down in the handle profile groove and rubs against the guide.	10	Use a staples to fasten the brush, press the bottom end of the handle profile.

built-in sliding cabinets – 18 mm thick panel

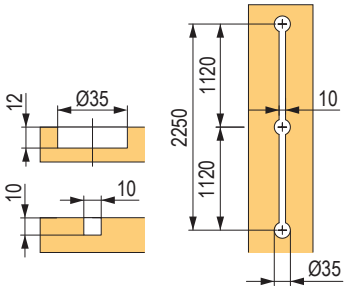

door reinforcements

- panel infill: min. 18 mm
- maximum pitch: 2 250 mm
- one piece is sufficient for width of up to 750 mm, 2 pcs for wider doors
- in case of excessively wide doors, it is advisable to use straighteners also in the horizontal direction

StrongLine

- prevents the bending of sliding doors with bottom guide; we recommend to use it for all doors with above-standard height or width or for doors with a glued mirror, etc.
- solution with threaded bars allows shortening to any pitch
- 4 clips are included in the set for better fixation of the bar in the cut-out

code	colour	hinge pitch (mm)
351707	white	2250
351706	black	

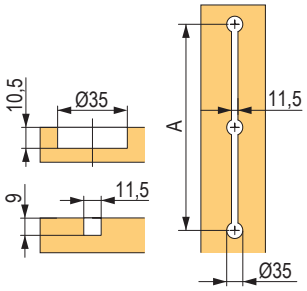

Terno

- high-quality brace preventing tall door doors from bending
- metal cups, high strength, plastic cover of draw bars
- one piece is sufficient for width of up to 750 mm, 2 pcs for wider doors
- **can be cut by up to 210 mm on each side**

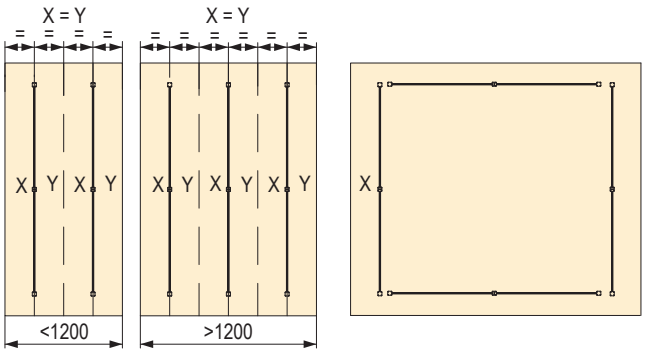

code	hinge pitch A (mm)
475044	2 248

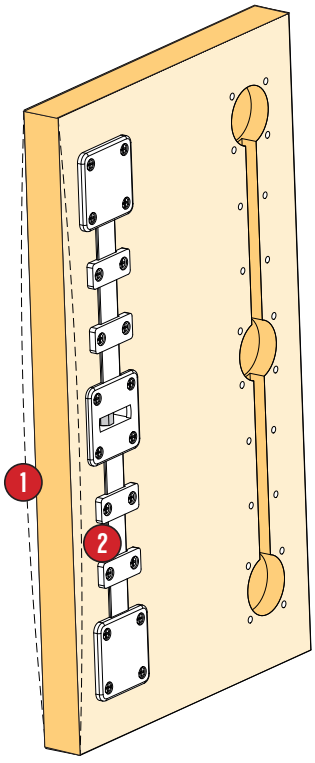

- set of two complete reinforcements

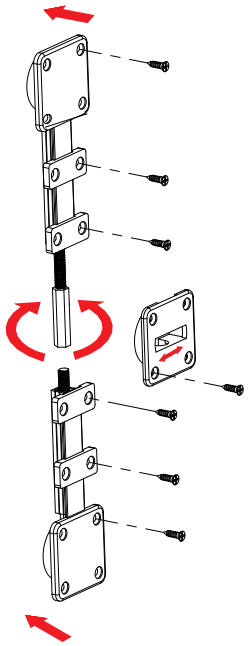

Installation

After milling the grooves and cups deepening, cut threaded bars and cover caps for threaded bars. Slide cover caps on threaded bars and insert into grooves. The central cover cap has a dilatation area 5 mm on each side. Secure cover caps with attached clips. Instructions available for download on the portal.

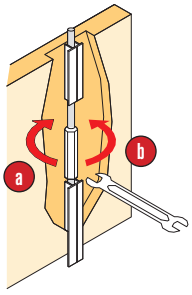

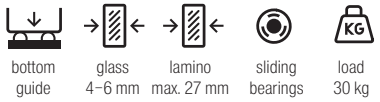

Use

If the door is in the position (1), screw the nut "P" in the direction (a), or conversely, if the door is in position (2), tighten in the opposite direction (direction (b))

fittings for DAMA inset and full overlay doors

- allows full overlay and inset doors, or a combination of both
- elegant solution, extraordinary impression
- maximum door door height 2.3 m

For glass doors – full overlay

210114	9136103	set of running components without soft closing[3]

- inset doors with top guide
- fittings for sliding doors with 1 or 2 tracks
- top thickness at least 16 mm
- for wooden doors and doors with aluminium frame
- load capacity up to 15 kg
- door height up to 1 500 mm
- width 400–1000 mm and thickness 16–19 mm
- height adjustment without power tools ± 1.5 mm
- quick hanging of the door without using power tools
- can be combined with guide glides or guide systems STB 11 or STB 35
- tested in accordance with DIN EN 15706, level 3

299879

[1] set includes:

- components for wardrobe with 2 doors
- 4 pcs of Silent System top running components
- 4 pcs of activators for Silent system
- 4 pcs of adapters for wooden doors
- 2 pcs of bottom guide components for wooden doors
- 2 pcs of bottom guide components for doors with aluminium frame
- 2 pcs of door backstops / spacers
- min. door width 590 mm

209808

[2] the set includes:

- components for wardrobe with 2 doors
- 2 pcs of top running components
- 2 pcs of Silent System top running components
- 2 pcs of activators for Silent system
- 2 pcs of backstops
- 4 pcs of adapters for wooden doors
- 2 pcs of bottom guide components for wooden doors
- 2 pcs of bottom guide components for doors with aluminium frame
- 2 pcs of door backstops / spacers
- min. door width 410 mm

210114

[3] the set includes:

- components for wardrobe with 2 doors
- 4 pcs of top running components
- 4 pcs of backstops
- 4 pcs of adapters for wooden doors
- 2 pcs of bottom guide components for wooden doors
- 2 pcs of bottom guide components for doors with aluminium frame
- 2 pcs of door backstops / spacers
- min. door width 400 mm

Running profiles

code	Hettich code	description

For sliding glass doors

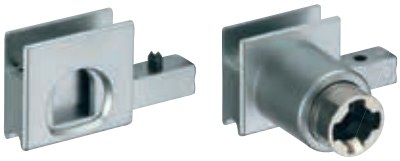

- system for guiding inset glass doors
- soft closing not available
- door weight 25 or 50 kg
- running components with ball bearing ensure a very easy operation

Door specifications:

- width (mm), 250–2500
- height (mm), 2800
- weight (kg), 25 or 50
- thickness (mm), 5, 6 and 8
- when using glass with a thickness of 8 mm, no gasket is required

option
- with end piece 76 480

option:
- 76 481 with handle
- and end piece 76 480

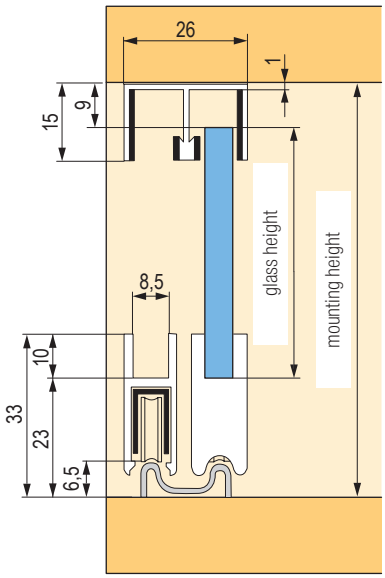

option:
- with adapter 76 482
- and a push lock 76 483

For folded doors

Specification:
- full overlay folding doors
- unique opening system for both small and large cabinets:
- Push to move – by pushing on the door
- Pull to move Silent – by pulling the handle

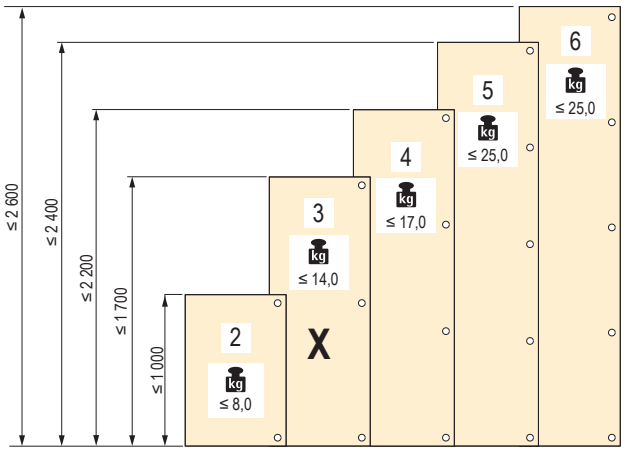

- with the Push/Pull to move system, the doors must be pushed fully closed when closing
- with Pull to move Silent the door closes silently by itself
- opening and closing is always with soft closing
- use for solid wood doors
- installation without tools
- minimum overlap of the open door into the clear width
- use: bedroom, kitchen and office

Door specifications:
- width 250–600 mm
- height 1 000–2 600 mm
- maximum weight 25 kg
- material thickness 16–25 mm
- required clearance between top and ceiling 0 mm
- minimum distance from the door to the ceiling 2 mm
- required plinth height 70 mm

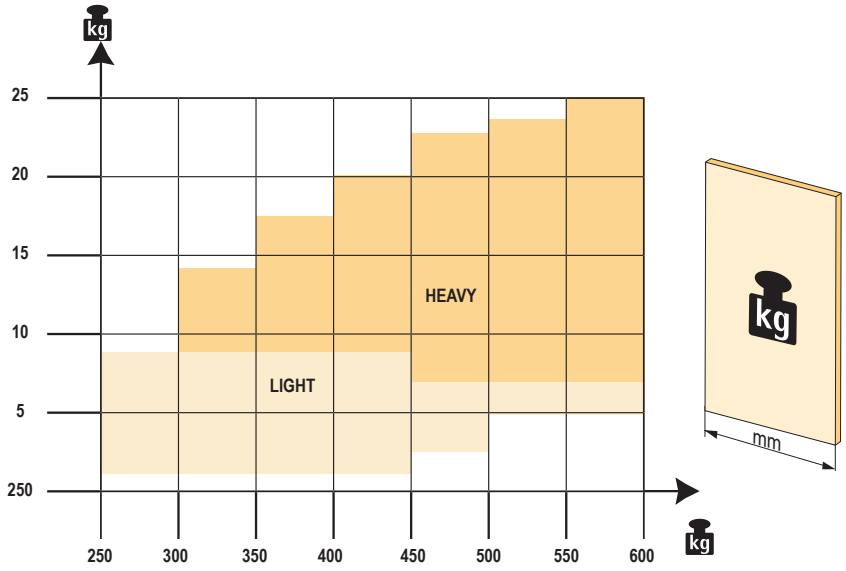

Pull to move Silent and Push/Pull to move are two new and unique opening mechanisms for folding doors
- the set automatically opens by pulling lightly on the handle or gentle pushing the door (without handles) and moves into the open position with soft closing
- fascinating opening effect on a purely mechanical basis
- does not require cables or power supply

Recommended number of cabinet and folding hinges

X = min. 280 mm

The decisive factors for the required number of hinges on doors are:
- the width, height, weight of the doors, and the properties of the door material,
- in practice, the factors vary considerably from case to case,
- the quantities shown in the diagram are indicative values only. In case of doubt, we recommend carrying out a trial assembly and adjusting the number of hinges accordingly,
- for stability reasons, the spacing X between hinges should always be as large as possible.
- Dimension X must be a minimum of 280 mm.

fittings for folding doors

Push/Pull to move for light doors without bottom guide track

- **Version:** Complete WingLine L Push/Pull to move fitting set for light doors up to 9 kg, including opening mechanism, upper guide track, and folding inter-door hinges. Without the bottom guide. The doors open either by a light push or a light pull on the handle; when closing, they must be pushed fully closed.

- silver-anodised aluminium

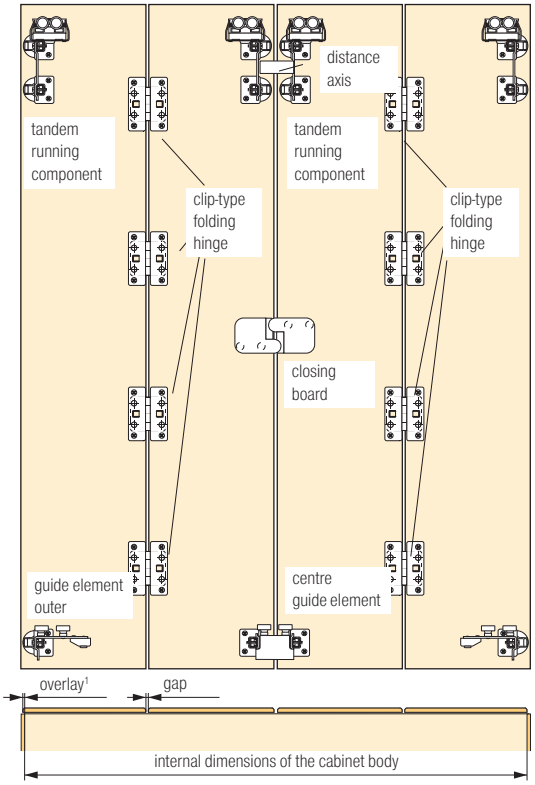

calculation of door width and door width

door width = internal clear width of cabinet body + (2× overlay[1])
door width = internal clear width of cabinet body – (3× gap) + (2× overlay [1]) ÷ 4

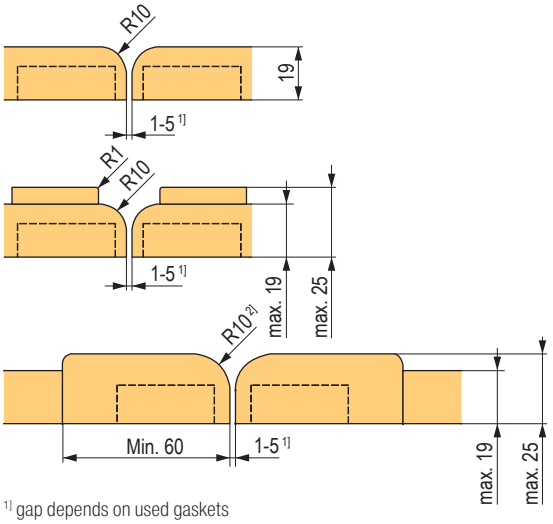

[1] overlay max. 15 mm, dimension C 6 mm

folding doors with 4 doors

Roundness of door edges and gaps (finger protection)

[1] gap depends on used gaskets
[2] as big radius as possible

hinges for folding doors

Type 625 for folding doors

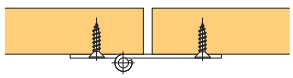

code	Hettich code	colour
104439	71648	nickel-plated steel

- hinge 625 is especially suitable for folding doors
- 180° opening angle
- hinge and pin are made of steel, with abrasion-resistant plastic intermediate rings
- with fixed pintle
- nickel-plated steel

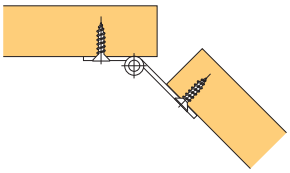

Calculation of pintle offset for folding doors

B hole pitch mm [1]	11,25	11,75	12,25	12,75	13,25
gap mm	5	4	3	2	1

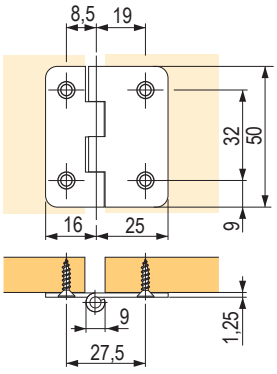

[1] carry out trial mounting

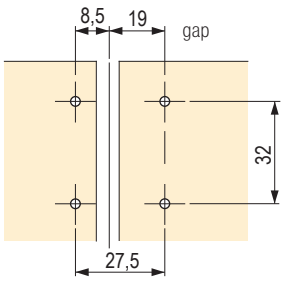

hinge 625 for folding doors

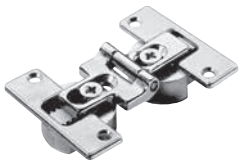

use with offset pintle

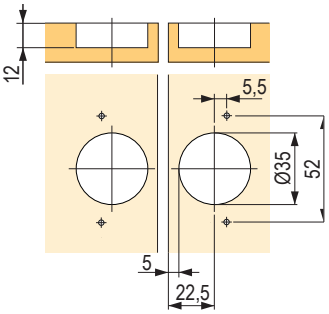

5.25 pin offset

Hinge for folding doors with offset pin

code	Hettich code	description
104142	46787	for screwing-on

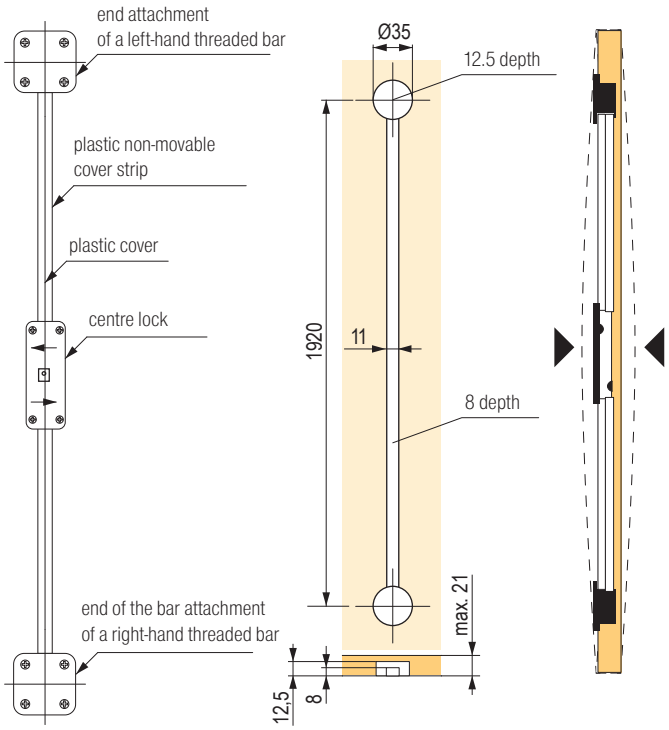

- door thickness from 15 mm
- gap is adjustable from hair-size to + 4 mm
- door doors are always in one plane.
- drilling is identical for both hinge parts which are mounted separately
- 180° opening angle
- offset adjustment 0 mm, 3 mm, and 6 mm
- nickel-coated zinc casting

alignment fittings for sliding doors

- can be used to prevent possible warping or to straighten an already existing warp
- can be used for door thickness from 16 mm and to a height of 2 600 mm
- 2 fittings are recommended for assembly of one door
- easy and trouble-free mounting
- screw the left- or right-hand threaded bar into the clamping sleeve
- screw the threaded bars into end attachments which are mounted in holes with a diameter of 35 mm and are fixed with screws
- rotating the nut in the clamping sleeve causes an expansion or constriction of bars and thus the tension of the plate
- covering the clamping sleeve, threaded bar and end attachments of the bar prevents damaging of items stored in the cabinet

code	Hettich code	colour
104091	45198	brown plastic

- with cover strips

the set includes

1 end attachment
of a right-hand threaded bar

1 plastic cover

1 end attachment
of a left-hand threaded bar

2 plastic strips

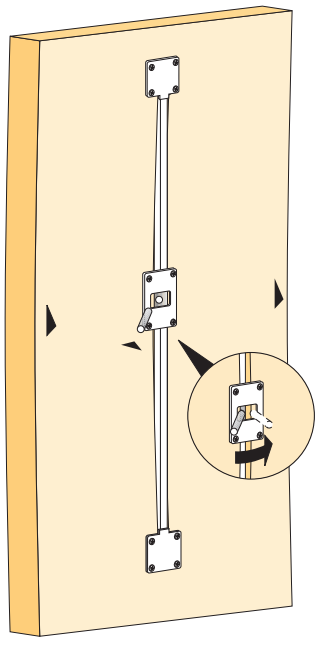

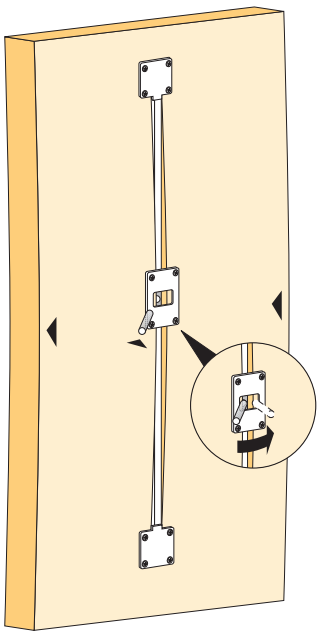

1 clamping sleeve

2 retainers for cover strips

KA 5740

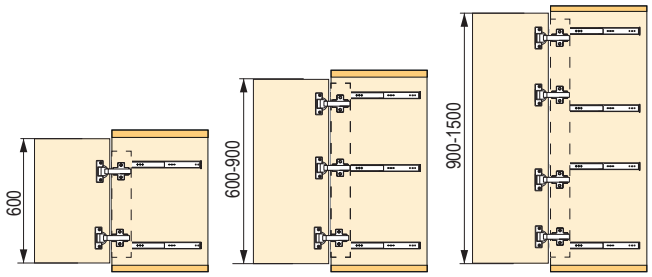

- for classically opened doors with the possibility of sliding into the cabinet body
- when using the accessories set, the door can be slid up

StrongLine Barnio – sliding rustic interior doors

Complete sets including guide profiles

- attractive design of running components with bearings
- easy assembly
- simple operation
- possibility of soft closing on both sides
- 80 kg load capacity
- door thickness 30 to 45 mm

Set contains:
- castors
- wall mounting material
- connecting material for guides
- end stops
- guide pin
- top guide
- soft closers

MINIMALIST DESIGN

Maximum performance

Original StrongMini fittings for drawers = slides with thin single side panel on a concealed slide, which allow **maximum use of cabinet space** for drawers, **can be found on p. 03.13**

Vetro 40 sliding interior glass doors

For glass doors up to 120 kg

- interior fittings for glass thickness 8–12.7 mm and weight up to 120 kg
- no need to drill into the glass
- the set contains complete fittings for one door door including bracket cover caps
- we recommend using the widest doors possible
- narrow and tall doors are less stable and especially in connection with a soft closer may cause bouncing and malfunction

top guide | 8/10/12 mm | ball bearings | load 80/120 kg

Important

When the door is closed for the first time, the soft closers are not activated. Close the door slowly to activate the soft closers (click).
Rapid impact can damage the soft closer as the door strikes the end position without soft closing!
Always demonstrate before handing the product to the customer in order to prevent possible complications.

length (m)	1,5	2	2,5	3	3,5	4	4,5	5	5,5	6
number of brackets	4	5	6	7	7	8	9	10	11	12

- the quality of operation of the fitting depends on proper fastening of the guide – no bending, twisting, etc.
- in case of lower load capacity of the wall, increase the number of fasteners
- check the planarity of fasteners before mounting the guide

Side cover caps

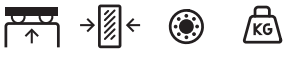

code	description
306413	of the cover profile

Step sliding wooden interior doors

For solid wood doors up to 160 kg

- minimum door thickness 20 mm (25 mm when assembled by milling), turned castors for quiet operation
- set for lighter doors, with soft closing option
- when attached to the wall, maximum door thickness is 40 mm
- we recommend using the widest doors possible
- narrow and tall doors are less stable and especially in connection with a soft closer may cause bouncing and malfunction

top guide | min. 20 (25) mm | ball bearings | load 30–160 kg

type of fittings	load capacity in kg					door width in mm
	30	50	80	120	160	
set of fittings with brake	**392694**	×	**392703**	×	**392715**	min. 600 (160 kg – min 700)
set of fittings 2 × fluid soft closer	**392699**	**392701**	**392704**	**392707**	**489956**	min. 740 (160 kg – min. 865)
set of fittings 2 × absorber	×	**392702**	**392705**	**392709**	×	min. 600 (160 kg – min. 865)

- The Step system is equipped with a rubber soft closer which significantly reduces the noise level
- easy to assemble and disassemble, easier adjustment of the door position before placing the door; secured against dropping
- the main advantage is the possibility of milling the running components into the top edge of the door, which can reduce the gap between the top edge of the door and the guide profile to a minimum

Important

When the door is closed for the first time, the soft closers are not activated. Close the door slowly to activate the soft closers (click).
Rapid impact can damage the soft closer as the door strikes the end position without soft closing.
Always demonstrate before handing the product to the customer in order to prevent possible complications.

StrongLine smooth opening set

Fittings for smooth gradual opening of door

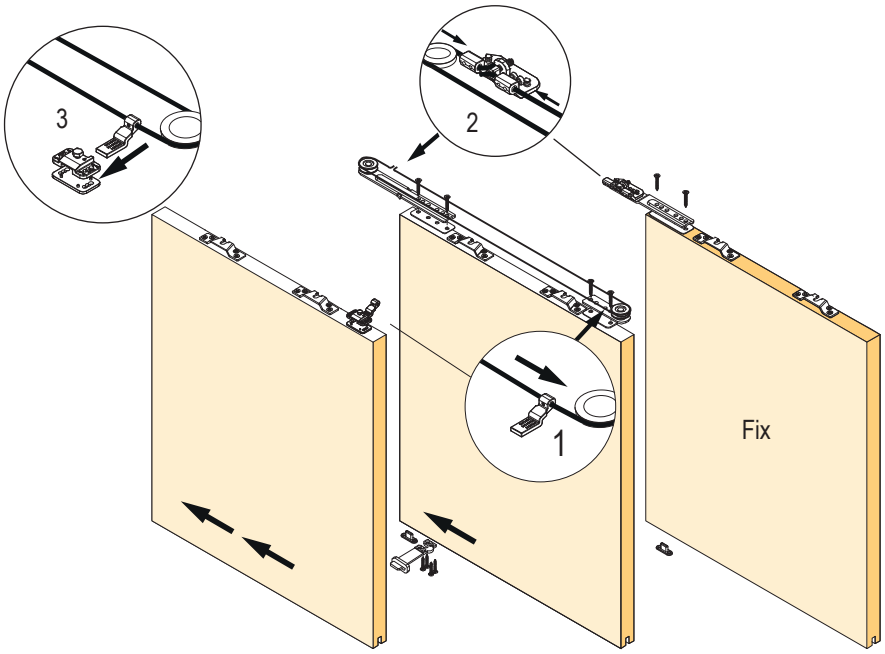

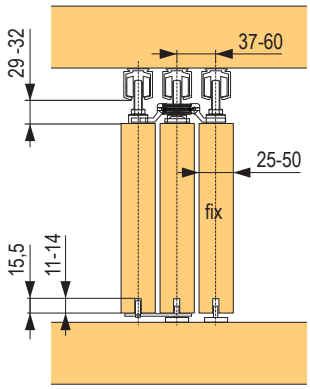

- by pulling the outer door, the middle door moves smoothly
- it is possible to install with any set meeting the following conditions:
  - distance between the door and guide 29–32 mm
  - distance between doors 37–60 mm (axes of individual doors)
- guide profiles and fitting sets are not included in the system, must be purchased separately

code	description
355892	complete set

Assembly manual:
1. fasten the fittings on the individual doors,
2. install a fixed door,
3. install a middle door,
4. thread the cable through the fastening element, Fig. 1,
5. pull the cable around the pulleys so that the free ends are at the fixed door and the fastening element 2 is on the third door,
6. thread the loose ends of the cable through the fastening element, Fig. 2 (on the fixed door), and fasten slightly,
7. install the third door, attach the fastening element to it, Fig. 3,
8. adjust and tighten, cut off the remaining part of the cable,
9. tighten the cable using an adjustment screw on the middle door, loosen the cable on the fastening element in order to adjust the mutual position of the doors,
10. on the third door, it is possible to install soft closers in the outer positions, the remaining sets must be without soft closing.

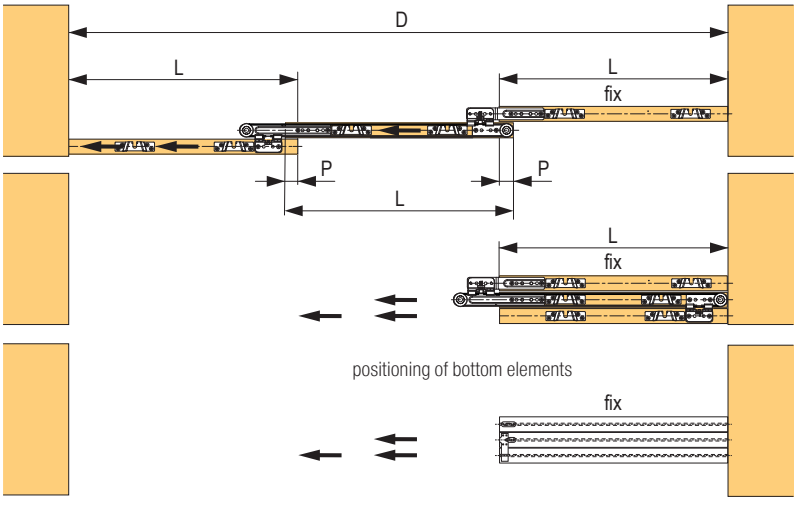

P > 75 mm
400 < L < 1350 mm

$$L = \frac{(2 \times P) + D}{3}$$

D – hole width
L – door width
P – door overlap

394327	synchro set for interior fittings with absorber 80 kg
402868	synchro set for interior fittings with brake 80 kg

- a complete set for 2 doors, ensures soft closing when closing the door
- doors weight up to 80 kg

it is necessary to buy the top guide to these sets, see table

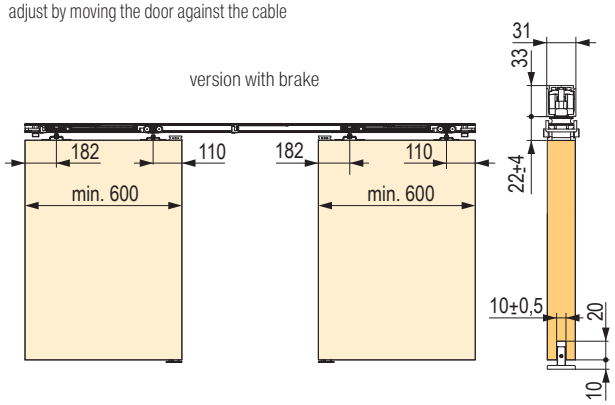

Top guide 50–80 kg

code	length (m)
284681	2,5
DT304	3
393803	4
DT336	guide bracket

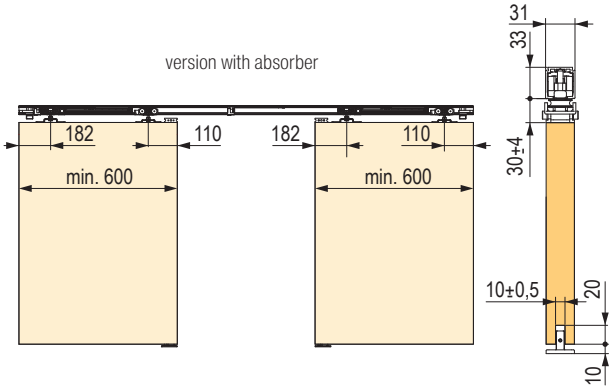

Assembly

- attach the pulleys to the guide profile, mount the anchoring elements on the doors
- thread the cable through the pulleys and secure to one anchoring element (1), then secure both ends to the second anchoring element (2)
- adjust by moving the door against the cable

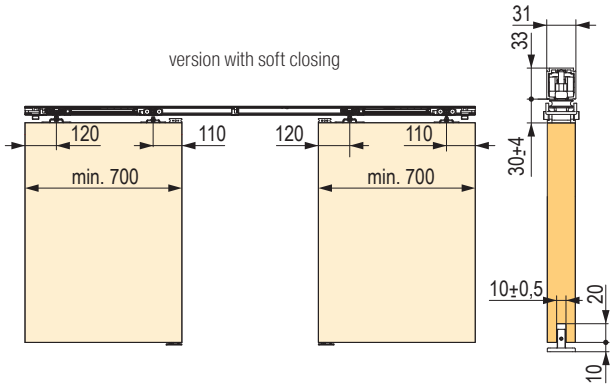

version with brake

version with absorber

version with soft closing

Important

When the door is closed for the first time, the soft closers are not activated. Close the door slowly to activate the soft closers (click).
Rapid impact can damage the soft closer as the door strikes the end position without soft closing.
Always demonstrate before handing the product to the customer in order to prevent possible complications.

Set of fittings

top guide | min. 30 mm | ball bearings | load 30 kg | folding doors

code	description
87449	for 2 doors

- fittings suitable for folding doors (partition walls) in the interior for two doors, one is anchored to the side of the wall
- the system includes the set of fittings itself plus the top aluminium rail with the length of 1.5 to 3 m (longer on demand)
- designed for door width 30 mm; thicker doors can also be used if the top groove in the door door is milled-in asymmetrically (distance of the groove 5 mm from the outer edge of the door is preserved)

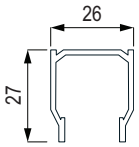

Top guide – simple

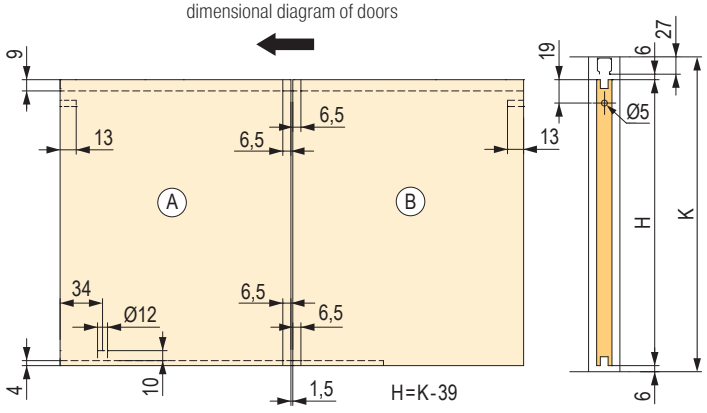

code	length
87481	1,5 m
87482	2 m
87483	3 m

X = 9 mm	angle bracket Art. 0125 is mounted to the door frame

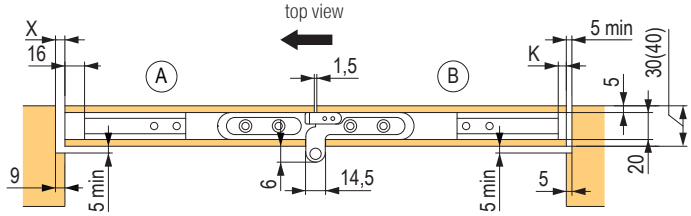

K = 8 mm	door opening angle 105° (recommended)
K = 16 mm	door opening angle 90°

Silent Filo

Simple sliding interior doors

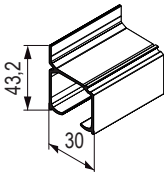

- fittings for lighter sliding doors and sliding walls
- running components have bearings to ensure quiet operation
- designed for door thickness from 18 mm
- 2 guide versions available – with attachment to the ceiling or to the wall
- when mounted on the wall, the need for wall fasteners and their adjustment is eliminated

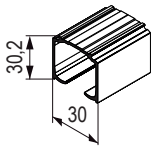

code	description
399180	set of fittings for 1 door, load capacity 50 kg, without soft closing
404307	set of fittings for 1 door, load capacity 50 kg 1 × soft closer
404308	set of fittings for 1 door, load capacity 50 kg 2 × soft closer

when using sets with a soft closer, the minimum recommended door width/weight is 800 mm/30 kg; correct soft-closing function is not guaranteed at lower values

- a cabinet of total weight with a total weight of up to 300 kg (cabinet body + contents) can be adjusted
- allows easy adjustment of the legs even in less accessible places
- the legs can be adjusted even at full load
- for use only with Korrekt legs from Hettich

adjustable legs

Legs with flange

code	height H (mm)	adjustment (mm)
82750	100	-5 / + 18
82756	120	
82757	150	

- tested load capacity according to CATAS is 300 kg/pc
- the leg consists of 2 parts: top flange with central part and adjusting screw

Scilm adjustment key

code	description
548240	rectifying key for Scilm feet

- compatible with Scilm adjustable feet and Scilm fridge base

Magnetic plinth clip

code	description
392097	for plastic plinths
405134	for wooden plinths

How does the magnetic plinth clip work?

A simple and quick way to attach the plinth to the leg.

Advantages:

- no time-consuming measuring required
- adjust position of the magnet in groove or the clip on the leg as desired
- allows quick installation and removal of the plinth

Plinth clip

possibility to combine with TARGET J10 model

Key-F

Combination of castor and adjustable leg.

The Key-F is the ideal adjusting leg for furniture that needs to be moved from time to time. Thanks to the castor with a load capacity of 120 kg, simply screw the glide into the leg body and the wardrobe will remain standing on castors. Once the wardrobe is positioned, the glide is screwed back out and the wardrobe is levelled.

- strong and stable design of the whole construction

table constructions for assembly – metal

Steel connecting rods

- the connecting rod length is always 140 mm shorter than the indicated table length
- length of the construction = length of the rod + 2 × dimensions of the leg profile (for example: for the table length 1100 mm with a 40 × 40 mm profile, the total length of the construction is 960 + 2 × 40 = 1040 mm)
- rod profile 20 × 40 mm

PÖTTKER
Transforming furniture

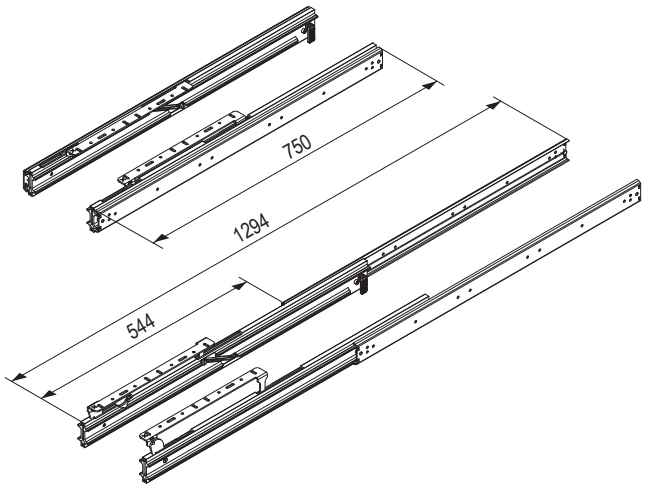

Pöttker fittings for extendable tables

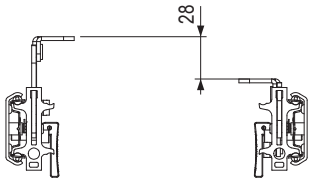

Pöttker Frontslide Basic table slide – BL

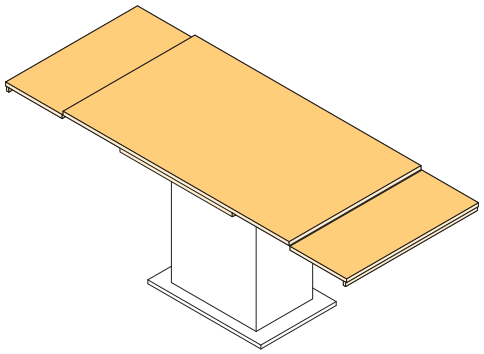

- **contains a pair of slides to extend the table on one side**
- simple installation
- the tabletop pull-out system is solved by the table slide
- installation on the inside part of the frame
- no additional accessories are required
- only for 25 mm thick tabletop
- the mechanism lock is part of the slide
- combination of aluminium and steel

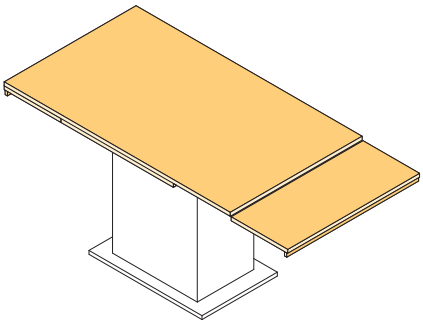

code	installation height (mm)	length (mm)	table insert (mm)	load capacity (kg)
404369	55	750	1 × 500	90

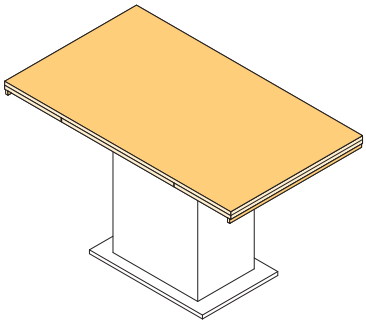

use of two pairs of slides

use of one pair of slides

Pöttker fittings for extendable tables

PÖTTKER
Transforming furniture

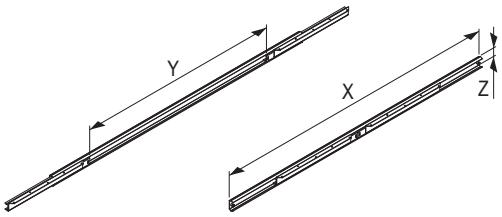

Pöttker Basic table extensions slides

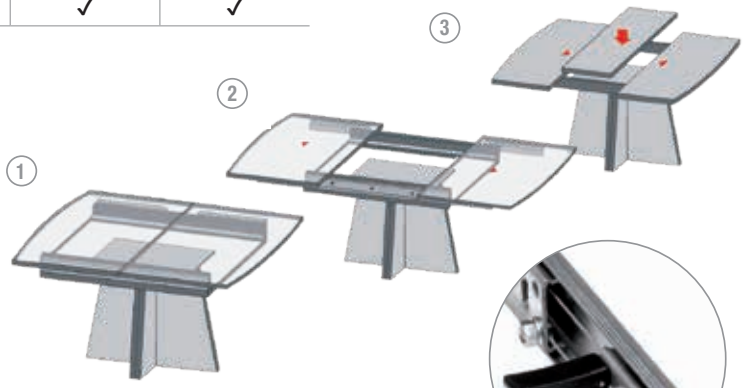

- for table lengths from 680 mm to 1 350 mm, up to a maximum length of extended table 2 350 mm
- designed for tables with open construction
- version with synchronous control and a brake
- made of steel
- rounded edges
- set includes pair of slides

accessories, see p. 8.46–48

code	installation height Z (mm)	length X (mm)	table insert Y (mm)	load capacity (kg)	synchronisation	brake

fittings for offices, home offices, student rooms

COMPLETE SPECIFICATIONS FOR PEDESTAL UNIT MANUFACTURE

Schematics, all parts kits, outputs for CNC machinery, 3D models, all in one place on demos24plus.com

ADVISORY SERVICE

Not sure how to choose or assemble the fittings? Call +420 556 684 310 or email export@demos-trade.com and we will be happy to help you.

SAMPLE ROOM DISPLAYS

What does the appearance, dimensions, and method of operation look like? Come and see for yourself, or send your customers to our sample room. We will walk them through everything and help them make the right choice.

PORTAL

A customer portal for purchasing, order overview, job submission, formatting, and order status tracking. Stock availability, your prices, and much more – all in one place.

DELIVERY TO YOUR DOOR

All orders will be delivered to your hands within 72 hours.

Strong locks with integrated cylinder insert

Central lock

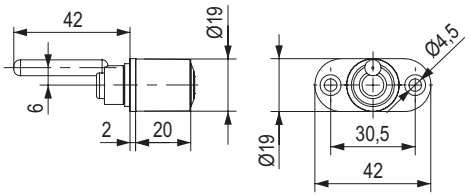

code	description
91201	lock with bar 600 mm, chrome
303335	lock with bar 800 mm, chrome

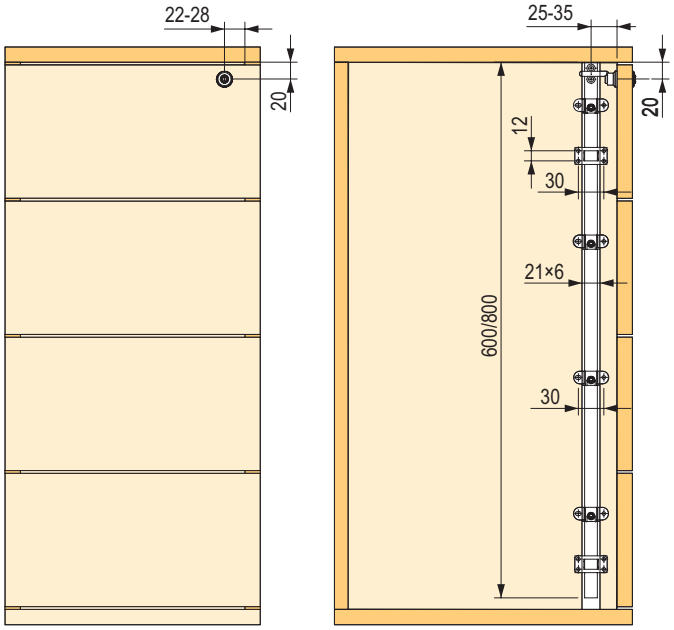

- includes: lock, rosette 1 pc, bar clips 2 pcs,
  additional dowel pins 12 mm with securing screws 4 pcs,
  bar 600 mm/800 mm 1 pc, key 2 pcs, drawers counterparts 4 pcs
- this lock does not have a blocking function to prevent opening of more than one drawer
- the locking bar must be milled into the cabinet body

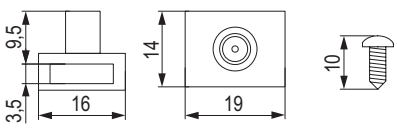

Additional adjustable pin

91214	9 mm

- the package includes a separate adjustable pin and a screw (they do not have to be connected)

Striker plate for central lock for wooden drawer

code	description
544713	metal

- for wooden drawer
- mounting on the side of the drawer
- central lock pin slides into the bottom groove

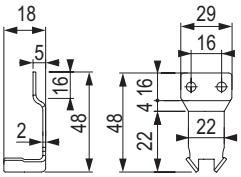

Central lock striker plate

11299	lacquered metal

- for roll runner slides with a side (Metabox)
- mounting on the base of the drawer

StrongLocks electronic lock

Chip/card lock

- mounting on the inside of the door
- the lock does not interfere with the design of the furniture
- easy switching between modes:
  - manual – the lock is locked by using the card
  - automatic – the lock is locked automatically after 6 seconds
- the lock operates at Mifare 13.56 MHz frequency

Programming instructions

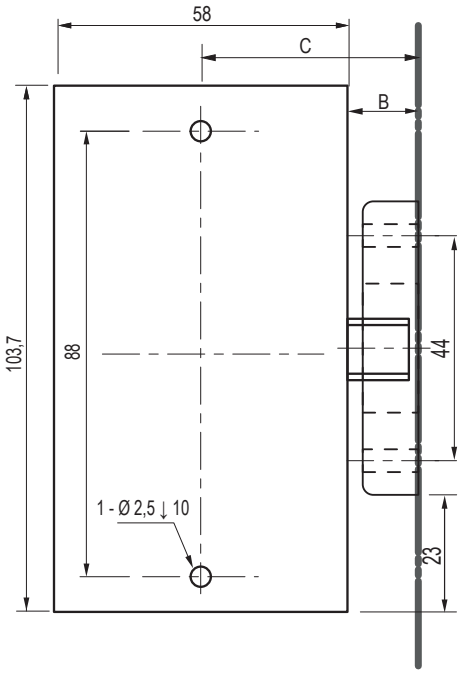

521205

code	description
521205	Mifare 13.56 MHz electronic chip lock
404836	card for lock
534098	key fob
544507	handleless opening system

544507

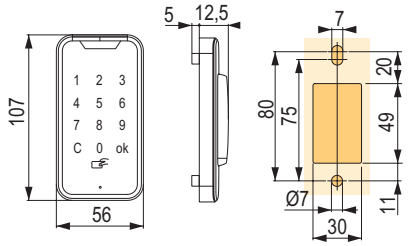

- possibility to use one user card for multiple locks
- one lock can be used for up to 50 different user cards (e.g. 1× master card and 49 user cards)
- one master card can be used for X locks
- one user card can be used for X locks
- the lock remembers the card, not the card the lock
- in the event of low batteries, the lock cannot be opened in case of emergency
- simple and quick assembly
- programmable without the need to disassemble the lock
- power supply: 3 pcs of AA batteries (not included in the package)
- tested battery life of min. 10,000 openings (depending on batteries used)
- integrated antenna in the body of the lock
- optimal for boards with thickness up to 20 mm
- low battery voltage indicator
- signalisation by a long beep sound when the card is held over the reader
- we recommend replacing the batteries at shorter intervals
- using only high-quality alkaline batteries
- installing locks at least 20 cm apart
- package: programming card 1 pc, user cards 2 pcs, lock 1 pc, striker plate 1 pc

Chip card lock with keypad

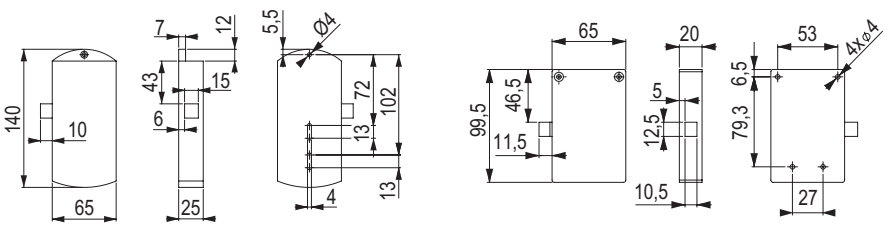

code	orientation
403647	right-left

code	description
404836	chip card

- possibility to open with code or card
- Mifare technology
- **the lock can work in FIX or FREE (public) mode**
- USB connector for emergency power supply in case of battery depletion
- 4 × AA batteries (not included in the package)
- **FAKE PIN technology** – to confuse any unwanted user. Enter any numbers before entering the lock code, then enter the unlock code. This will significantly impair the ability to gain access to unlock
- alarm goes off after the fourth incorrect entry
- package includes: keypad 1 pc, lock 1 pc, cable 1 pc, screws 6 pcs, cam 1 pc, chip cards 3 pcs

Main advantages of the Lehmann locks

- high-quality workmanship
- **made in Germany**
- usual production time of items not in stock: 3–4 weeks
- wide assortment of locks including special solutions

Replaceable inserts

- we offer 1,000 different key combinations in stock, **more on demand**
- the option of assembling groups of locks with the same key
- master key system

Example of lock orientation:

1 – centre lock
2 – left lock
3 – right lock
A – locking
B – unlocking

Lehmann locks with replaceable insert

LEHMANN

Central container lock 421

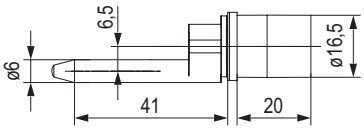

code	orientation	cylinder length (mm)	surface treatment
L00010	right	20	nickel

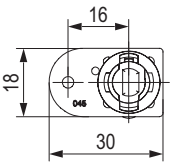

A functioning complete set must include:

- rosette 16.5 mm, 1 pc
- bar according to the length, 1 pc
- bar guide, 2 pcs
- pin for the bar (depending on the number of drawers), 1–? pcs
- striker plate (depending on the number and type of drawers), 1–? pcs
- bar lock + pin 17 mm + spacer (for the option with blocking the opening of more than one drawer)
- replaceable insert 1 pc(p. 09.53)
- the bar must be milled-in
- for BBP pedestals a different type of lock must be used (L00087 or 122965) in combination with bar SVS3 – see p. 09.85

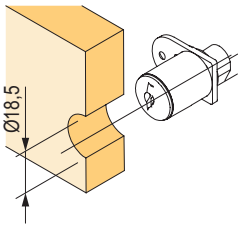

complete office pedestal solutions including drawers and locking system can be found from p. 09.69

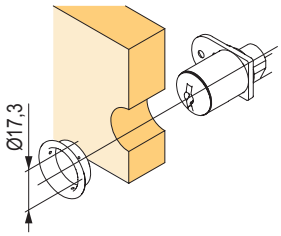

Lock for 4 drawers (complete set)

code	description
136178	complete set for container with 4 drawers

- includes lock 1 pc, rosette 1 pc, bar 600 mm 1 pc, guide 3 pcs, pin 17 mm 5 pcs, socket striker plate 4 pcs, bar lock in top position 1 pc, spacer under lock 1 pc

a removable insert must be supplied as required

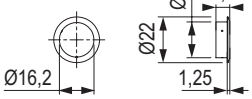

Rosette 16.5 mm

code	description
L00066	nickel

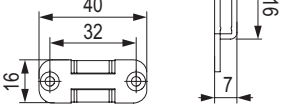

Bar guide

code	description
L00014	black plastic

Replaceable insert

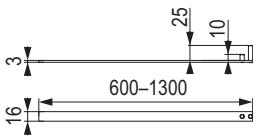

p. 09.55

Bar

code	description
L00011	steel, length 600 mm
L00012	steel, length 800 mm
L00013	steel, length 1,300 mm

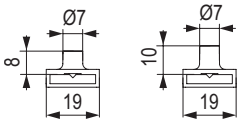

Accessories for container without interlock system

Pins for the bar

code	description
L00025	height: 8 mm, nickel
374832	height: 10 mm, nickel

- the package includes a separate pin and a screw (not necessarily assembled)
- the pin L00025 and 374832 is most commonly used for blocking individual drawers

Striker plate for central lock for wooden drawers

code	description
544713	metal

- for wooden drawer
- mounting on the side of the drawer
- central lock pin slides into the bottom groove

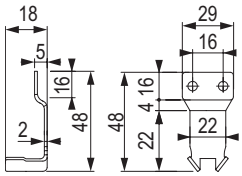

Striker plate for central lock

code	description
11299	lacquered metal

- for roll runner slides with a side (Metabox)
- only for locking
- mounting on the base of the drawer

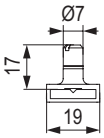

Accessories for container with interlock system

Pins for the bar

code	description
L00018	height: 17 mm, nickel

- the pin L00018 is used for blocking the opening of more than one drawer (in combination with L00015 and L00016)

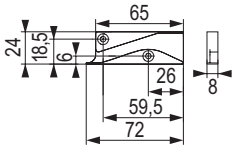

Striker plate

code	description
L00017	black plastic

- cannot be used for Metabox
- with safety latch to prevent opening of more than one drawer

Central lock anti-tilt block

code	description
13408	plastic

- for roll runner slides with a side (Metabox)
- for locking and blocking the opening of more than one drawer
- mounting on the base of the drawer

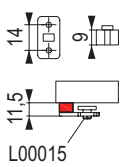

Spacer for bar lock

code	description
L00016	black plastic

for offsetting the bar lock from the cabinet body so that the pin holders do not hit it in case of blocking the opening of more than one drawer

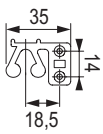

Bar lock in the top position

code	description
L00015	black plastic

- ensures that the bar is secured in top position, in case of blocking the opening of more than one drawer

Lehmann locks with replaceable insert

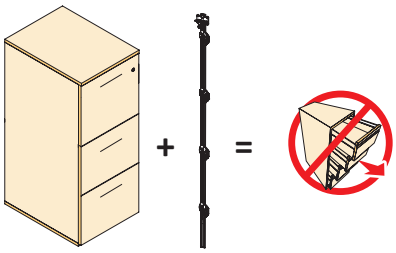

Central locking of drawers

This type of locking system is suitable for any type of slide, including slides with double side, ball bearing, roll runner slides, etc.

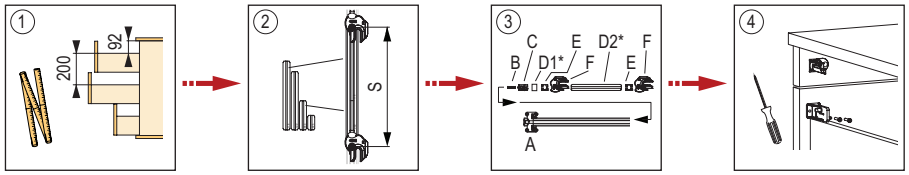

- a universal solution for locking any set of pull-out drawers
- the set includes a solution for locking up to 6 drawers for an inner height of the cabinet body of up to 1000 mm
- blocking the opening of more than one drawer = tipping over protection
- system ready for 32 mm grid (individually adjustable)

Installation

- detailed installation manual is included in the package or available for download at www.demos24plus.com

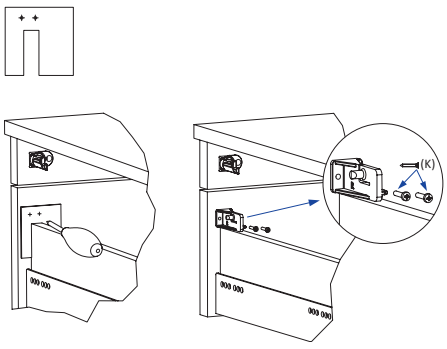

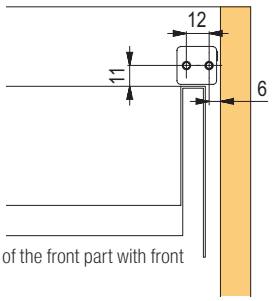

1. preparation – defining basic dimensions
2. selection – selecting individual parts according to the instructions
3. fitting – fitting the central locking bar SVS3
4. mounting – installation of the central bar and the striker plate to each drawer

Mounting of the blocking pin

Align all the fronts and install the blocking pins.
1. select the template appropriate for the drawer type
2. mark the position for screwing on the blocking pins.
3. fasten the blocking pins with screws

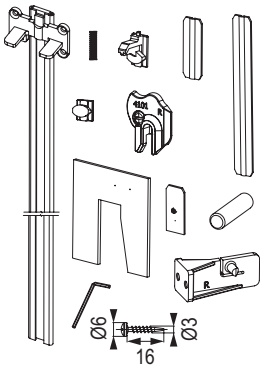

Mounting of locking pin without template
Mark the blocking pin according to the picture

view of the front part with front

code	description
353589	SVS3 universal packet

- the set must be completed with:
  - lock L00087
  - rosette L00066
  - cylinder insert – see p. 09.53
- universal solution for any drawer
  - Strongbox, StrongMax, Antaro, Legrabox, AvantechYOU, etc.
  - for ball bearing and roll runner slides
  - for wooden drawers with concealed slide
- the bar must be milled-in
- the counterpart is installed on the inner side of the front above the side
- the package includes templates for basic types of slides with a double side

Lock 750.15 with bars (complete set)

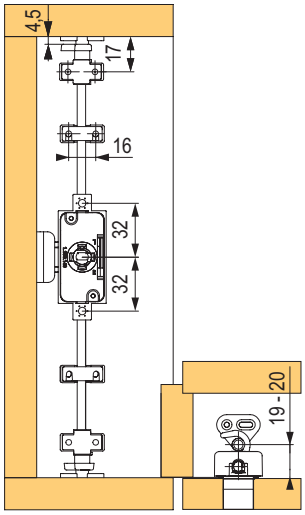

code	description	surface treatment
136176	complete set 1,000 mm	nickel
136177	complete set 1,200 mm	nickel
395513	complete set 1,000 mm	black
395514	complete set 1,000 mm	black

- for the black lock variant, only the lock is black, the rest of the accessories are nickel-plated
- black rosette and black cylinder insert can be purchased for the black lock
- includes: lock 1 pc, rosette 1 pc, bars 2 pcs, upper locking hook 1 pc, lower locking hook 1 pc, guides 2 pcs, pins 2 pcs

a removable insert and an angled striker plate must be supplied as required

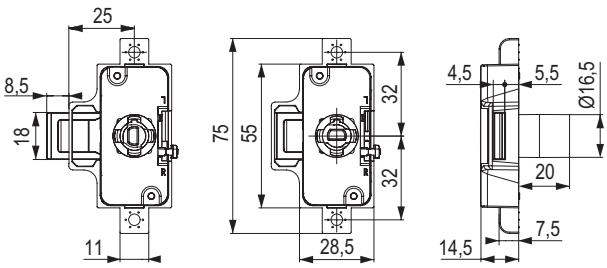

Espagnolette lock 750.25 with bars (complete set)

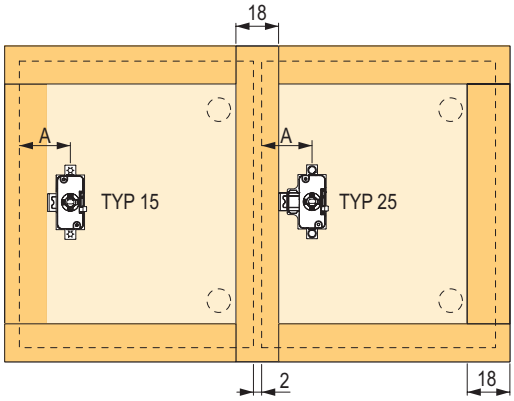

code	description	surface treatment
349745	complete set 1,000 mm	nickel
349747	complete set 1,200 mm	

- includes: lock 1 pc, rosette 1 pc, bars 2 pcs, upper locking hook 1 pc, lower locking hook 1 pc, guides 2 pcs, pins 2 pcs

a removable insert and an angled striker plate must be supplied as required

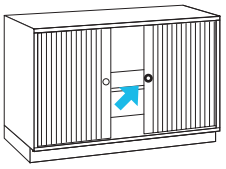

- an example of the use of locks type 750.15 and 750.25 (the same distance between the lock and the edge of both full overlay and half overlay cabinet doors)

Tambour door lock 416

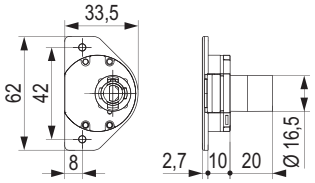

code	description	cylinder length (mm)	surface treatment
L00060	right	20	nickel
385778	right		black
L00061	striker plate for one shutter	×	nickel
385780		×	black
L00062	striker plate for two shutters	×	nickel
L00066	rosette 16.5 mm	×	nickel
275116		×	black

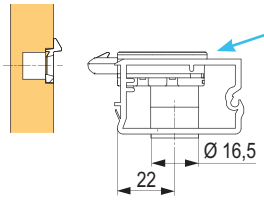

A functioning complete set must include:
- tambour door lock 416 1 pc
- rosette 16.5 mm 1 pc
- counterpart for single tambour (depending on the usage) 0–1 pc
- counterpart for double tambour (depending on the usage) 0–1 pc
- replaceable insert 1 pc(p. 09.53)

- suitable for locking tambour doors with end profile 47 × 25 mm
- **can be used for one or two tambours**

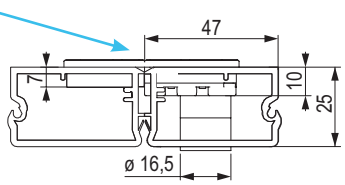

for locking Metallic Line shutters, lock 372.02 (code 224510) can be used, p. 09.42

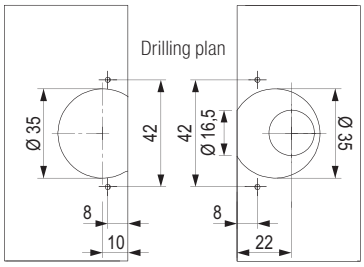

Single tambour

Double tambour

Slam rail 47 × 25 mm for Rehau tambour doors

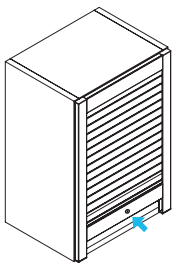

Lock 405 for tambours with overlap

code	description	orientation	cylinder length (mm)	surface treatment
381995	lock 405	right	×	nickel
381999	cylinder		20	
381998	striker plate for lock 406 for shutters with overhanging end strip			
L00066	rosette 16.5 mm			nickel

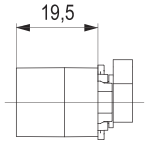

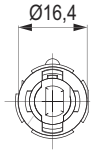

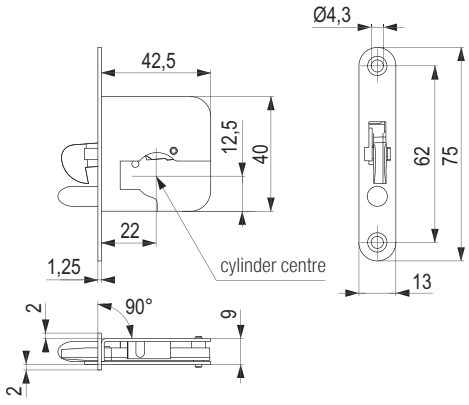

- lock for slam rail with overlap, i.e. only for full overlay Frame shutter with E23 tambour door profile
- the advantage is that the lock latch and the guide pin are concealed and almost invisible

A functioning complete set must include:
- lock 405
- cylinder 142
- striker plate 406
- rosette 16.5 mm
- replaceable insert 1 pc (p. 09.53)

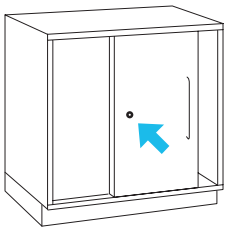

Lehmann locks with replaceable insert

office container equipment

BBP containers

- office products from the BBP company are the result of 50 years of experience in the office equipment field
- BBP container systems are renowned for their innovative design, smooth running of its slides and ease of control
- great emphasis is put on the quality of materials and the manufacturing process, which is why you can always rely on its 100% functionality, even after many years of use and full load
- perfect running, minimal need for force and stability of the slides are the result of precise manufacturing and thorough preparation before manufacturing
- slides are equipped self-closing system, and an option for soft closing, which increases comfort when using the system. In the world of office equipment, BBP products are at the very pinnacle of quality
- BBP also focused on simple assembly of their ORGA AER and TIP AER products
- **BBP office furniture program also includes the LGA certification that guarantees high quality**
- BBP container sets are lockable with Lehmann locks

ADVANTAGES
- in stock
- electronic version of all documentation is available at www.demos-trade.com
- the central lock bar is not milled-in
- simple ordering of a set under one code
- German quality
- ideal for serial production

container length: 740 mm	yes	no

ORGA AER and TIP AER drawers for 392 mm

code	container design	colour	length (mm)
153781	ORGA AER	black metal	515
153782		black plastic	510
153804		black plastic	715
153805		black plastic	710
351776	TIP AER	black plastic	515
351777		black plastic	510

- for inner width of container 392 mm
- inner width of drawer 330 mm
- ORGA AER drawers contain locking pins for locking with SVS bar
- drawer lengths 710 (715) mm only for ORGA AER system
- it is necessary to purchase a locking pin for TIP AER drawers (1 pc 351782 / drawer)

ORGA AER drawer for 292 mm

code	colour	length (mm)
221366	black metal	515

- for inner width of container 292 mm
- inner width of drawer 230 mm
- this drawer also contains locking pins for locking with SVS bar

Partial drawer runners for ORGA AER and TIP AER drawers

code	container type and inner width (mm)	description	slide length (mm)	load capacity of the slide (kg)
308744	ORGA AER width: 392 and 292 mm	right with self-closing system	540	25
308743		left		
308745		left with soft closing		
308747		right with self-closing system	740	
308746		left		
308748		left with soft closing		
351779	TIP AER width 392	right	540	
351778		left		

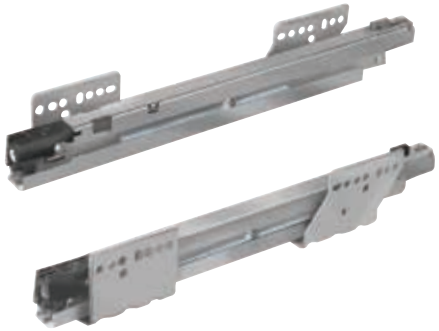

- the left slide can be selected to meet your requirements, i.e. whether you just want the drawer to close automatically or whether it should be also dampened at the same time

Full extension slides for ORGA Aer drawers

code	description	slide length (mm)	load capacity of the slide (kg)
153786	left with self-closing system	540	40
153787	right with self-closing system		
153809	left with self-closing system	740	50
153810	right with self-closing system		

- original soft closing for these slides is supplied separately (code 308749)
- for inner width of container 392 and 292 mm

Oil damper for full extension slides for ORGA AER drawers

code	description
308749	separate damper

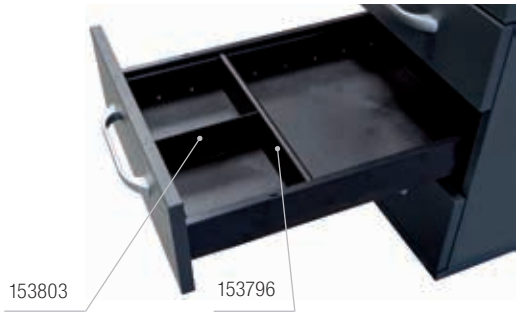

- the original damper is simply inserted from the front side into the full extension slide and is secured by twisting
- we recommend using a damper for both the right and left slide

Internal partitions

code	description
547373	transverse plastic divider (230 mm), compatible with longitudinal partitions
153796	cross plastic divider A4 (length 330 mm)
153802	lateral plastic divider A5 (length 220 mm)
153803	lateral plastic divider A6 (length 162 mm)

- for attaching a lateral divider A5 or A6, it is necessary to use a cross plastic divider A4 (code 153796)
- only for inner width of container of 392 mm

Paper tray

code	description
195381	plastic compartment for A4 documents

- for drawers of length 510 (515) mm, maximum of pieces to be used: 4 pcs
- for drawers of length 710 (715) mm, maximum of pieces to be used: 7 pcs
- only for inner width of container of 392 mm

office container equipment

Adapter for suspension files A4 for insertion into drawers

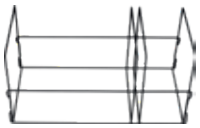

code	description
153797	plastic extension for drawers 392 mm
229159	extension for drawers 510 mm
259777	metal extension for drawers 292 mm

- two adapters 153797 inserted one after the other are used for drawers 710 mm
- 2 pcs of extensions are needed for one filing cabinet

153797

259777

Front panel braces for high drawer fronts

code	description
153799	for metal drawers
153800	for plastic drawers

- there is always a right and a left front panel brace in the package
- serves as a support for the high front of the drawer

Pen tray for insertion into drawers for 392 mm

code	description
153801	pen tray for insertion into a drawer

- dimensions: 337 × 196 mm
- only for inner width of container of 392 mm

ORGA AER and TIP AER pen trays

code	height (mm)	description
497989	40,8	black plastic for ORGA AER / TIP AER 392 mm
308735	30	black plastic for ORGA AER 292 mm

497989

Partial extension slides for ORGA AER and TIP AER pen trays

code	type and inner width	description
504231	ORGA AER width 292/392 mm	right
504232		left with self-closing system
504234		left with soft closing
497991	TIP AER width: 392 mm	right
497992		left

- for OrgaAer system, the left slide can be selected depending on whether the drawer should only close automatically or whether it should be also dampened

Front mounting screws to drawers and filing cabinet frames

code	description
153821	screw with large head for metal drawer front attachment (7.3 × 12 mm)
153822	screw with large head for plastic drawer front attachment (7.3 × 19 mm)

- 4 pcs of screws are required to attach one drawer front

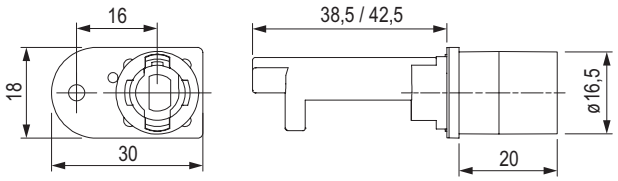

Lock 429 for SVS3 bar with pen tray

code	type and inner width	description
L00087	ORGA AER width: 392 and 292 mm	right, cylinder length 20 mm, nickel
352505	TIP AER width: 392 mm	

the lock must be supplied with a replacement insert Lehmann as required (p. 09.53)

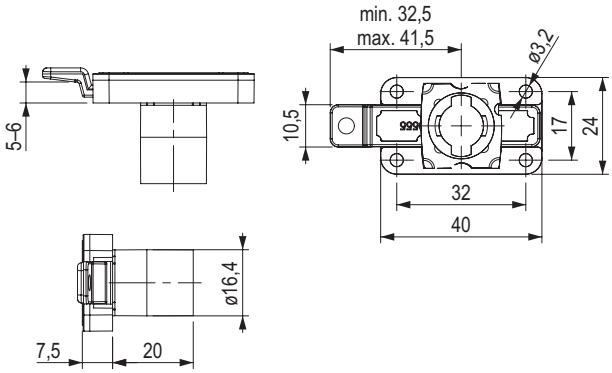

Lock 430 for SVS elevon bar without pen tray

code	type and inner width	description
122965	ORGA AER width: 392 and 292 mm	right, cylinder length 20 mm, nickel / black plastic

a Lehmann replaceable insert must be ordered with the lock as required (p. 09.53)

- primarily designed for locking of SVS bar, can be also used as a drawer lock

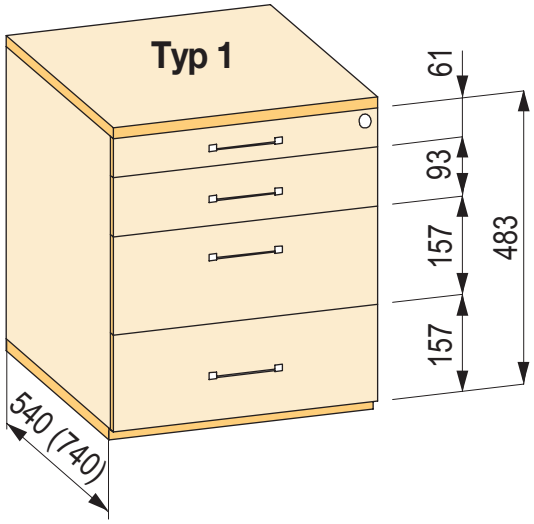

office containers – sets

ORGA AER and TIP AER

- a complete set always includes drawers, slides, a lock, SVS 3 bar and screws for attaching drawer fronts
- the pen tray in the ORGA AER and TIP AER system is always plastic and has only partial extension slides for the inner width of the container 292 mm or 392 mm
- you can find the drawing documentation on our website under the codes of the individual complete sets

In the case of a non-standard pedestal unit configuration that is not offered as a set, a central lock bar of length 1,000 mm can be ordered separately, with the option of custom drawer positioning:
- version with pencil tray (max. 6 drawers + 1 pencil tray), code 353593
- version without pencil tray (max. 6 drawers), code 353595
- more information on page 09.111

a Lehmann replacement insert must be ordered with the complete set as required (p. 09.53) and if applicable a rosette (L00066)

universal locking bar

LEHMANN

Set for creating an individual locking bar

The universal set serves to create your own SVS3 locking bar for your own container solution. All you need to do is assemble the SVS3 locking bar with a 32 mm grid. The set is therefore universal, but it is necessary to observe several conditions that are determined by the technical design of the bar.

Main features:

- possibility to build custom container solution
- for inner width of container 392 and 292 mm
- for ORGA AER I TIP AER series
- it is necessary to adhere to the 32 mm grid
- simple calculation and assembly of the locking bar
- the set includes a solution for locking up to 6 drawers for an inner height of the cabinet body of up to 1000 mm
- There are two sets to choose from:
  - for containers with pen tray
  - for containers without pen tray

code	description
353593	SVS3 packet for BBP containers with pen tray
353595	SVS3 packet for BBP containers without pen tray

Drawer under the tabletop

code	description	colour
402767	drawer including full extension slides with self-closing system	white
402768		black
402770	set of spacers for the drawer	white
402771		black

BBP

- suitable for tabletops with a maximum connecting bar height of 50 mm
- internal dimensions: width 305 × depth 345 × height 40 mm
- outer dimensions: width 430 × depth 410 × height 70 mm
- full extension slides with soft closing
- Lehmann lock is included in the package
- set of spacers contains:
  - front spacer 1 pc, height 53 mm
  - rear spacer shafts 2 pcs, height 53 mm
  - 6 screws 4.5 × 70 mm for mounting to the tabletop
- option of connecting max. 2 drawers on top of each other
- use 4 × 30 mm screws (not included) to connect two drawers one on top of the other

reddot winner 2020

a cylinder insert must be purchased additionally, see p. 09.53

BBP cabinet hanging filing cabinets – individual components

Orga Aer

- suspension frames and wide drawers of the Orga Aer system offer a wide range possibilities of cabinets and filing cabinets
- cabinet equipment can also be supplied in non-standard sizes according to the conditions of the supplier
- everything is always organised so that both design and quality stand out together with clear arrangement
- the Orga Aer system is protected against tipping over of the filing cabinets by the SVS3 locking bar
- suitable for hanging folders and filing cabinets that possess a hook for hanging (they are commonly available e.g. in stationeries)

Drawers and frames

code	inner width (mm)	depth (mm)	description
153811	762	390	cabinet metal frame for suspension files
394745	412	540	cabinet metal frame for suspension files
394746		390	

- for width 762, 8 pcs of screws (153821) are needed to attach the front
- for width 412, 4 pcs of screws (153821) are needed to attach the front

394746

153811

Full extension slides for cabinet drawers and frames

code	length (mm)	load capacity (kg)	description
503412	390	60	left with self-closing system and soft closing
503413			right with self-closing system and soft closing
503414	540	65	left with self-closing system and soft closing
503415			right with self-closing system and soft closing

Divider for suspension filing cabinet with depth 390 mm

code	description
153815	metal divider

- serves to divide the frame for suspension files into two parts
- thanks to this divider, it is possible to hang files both lengthwise and crosswise

Front panel brace for high front

code	description
153816	metal front panel

- front panel brace is used to reinforce the front of a high cabinet drawer or a suspension filing cabinet
- piece in package (2 pieces of clips are required for one drawer or frame)

Frame covers

code	description
153823	plastic right cover for drawers and frames
153824	plastic left cover for drawers and frames
153825	plastic right cover for drawers and frames

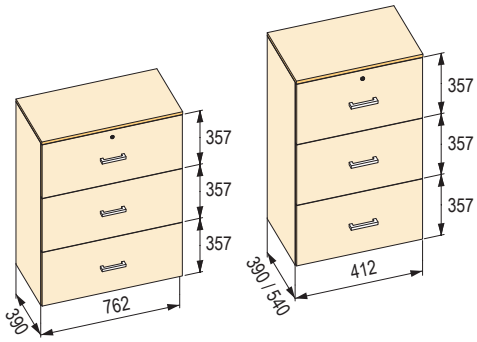

- only serves to cover the front of the drawers and frames if used for a cabinet with doors (without the fronts of drawers)
- the right and left parts are for the version with an internal width of 762 and 412 mm
- the centre part is for the 762 mm version and it is necessary to shorten it for the inner width of 412 mm

hanging filing cabinets – sets

- a Lehmann replacement insert must be ordered with the complete set as required (p. 09.53) and if applicable a rosette (L00066)
- screws (code 153821) are supplied separately as required
- 8 pcs of screws are needed for one drawer

❗ Complete sets are units composed of other codes and are intended for simple ordering of more complex assemblies. They do not have to be stocked out and packaged together

cable exit

Metal with soft closing

code	outer dimensions (mm)	colour	mounting hole (mm)

connecting fittings, grilles and vents

SAMPLE ROOM DISPLAYS

At the sample room you can not only view some types of connecting fittings but purchase them on the spot – no waiting required. Come and see for yourself.

PORTAL

A customer portal for purchasing, order overview, job submission, formatting, and order status tracking. Stock availability, your prices, and much more – all in one place.

ADVISORY SERVICE

Not sure how to choose or assemble the fittings?
Call +420 556 684 310 or e-mail export@demos-trade.com and we will be happy to help you.

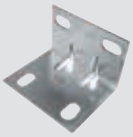

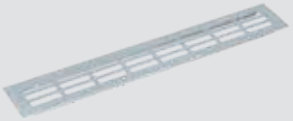

DELIVERY TO YOUR DOOR

All orders will be delivered to your hands within 72 hours.

screws for interior

For versatile use

- 4CUT point – no pre-drilling needed (most materials [1])
- unique point profile with a square cross section together with a corrugated thread speed up screwing and reduce the force required for screwing
- much lower risk of material cracking at the edge
- all that means faster and better work, longer battery life and lower bit wear
- Multi head ensures milling into board materials with minimal damage to the surroundings, reduces the possibility of spinning the screw when attaching metal objects
- Wirox coating has 20 times higher corrosion resistance compared to conventional screws
- perfectly fitting bits

Special features:

A improved Pozidrive or Torx

B white zinc surface treatment (WIROX) – higher corrosion resistance, free of harmful chromium

Advantages:

1 sharp point and square cross section for easy and fast drilling-in

2 corrugated thread – easy application

3 grooves under the head – they mill the head into the material with minimal damage to the surroundings, significantly reduces the possibility of spinning the screw when attaching metal objects

perfectly fitting bits

the multi head does not spin

corrugated thread

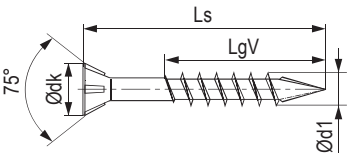

square cross section

Spax M

WIROX

size (d1) (mm)	code	total length (Ls) (mm)	thread length (LgV) (mm)	outer diameter of the head (dk) (mm)	bit
3,5 × 45/30 partial thread	**372152**	45	30	6	T15
3,5 × 50/35 partial thread	**372153**	50	35	6	T15
4,0 × 50/35 partial thread	**360297**	50	35	7	T20
4,0 × 60/40 partial thread	**360298**	60	40	7	T20
4,5 × 50/35 partial thread	**362693**	50	35	8	T20

- size 4.5 × 50 is ideal for connecting MFPB

[1] some materials may require pre-drilling, we recommend testing it

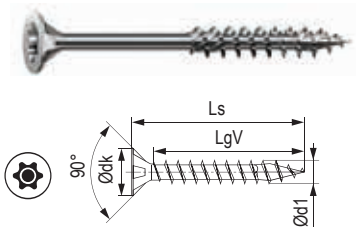

- particularly suitable for MDF boards
- no pre-drilling[1], reducing the risk of material splitting and bulging
- CUT point with a corrugated thread for easy drilling-in
- special narrow head with 75° angle with groove for clean countersinking
- partial thread for tightening the upper part
- also used as a substitution for the confirmat screw

[1] partial thread is particularly suitable for two boards clamping

T-STAR plus

- the above mentioned advantages combined with T-Star plus drive
- we recommend the use of genuine T-STAR plus bits for perfect performance
- fitting ensures better centering and power transmission, prevents slipping at side pressure
- working with conventional Torx bits will not allow you to take full advantage of the improved drive

size (d1) (mm)	code	total length (Ls) (mm)	thread length (LgV) (mm)	outer diameter of the head (dk) (mm)

screws for interior

Pozidrive

- the above mentioned advantages combined with PZ (Pozidrive) Cam-Out drive
- Wirox coating has 20 times higher corrosion resistance compared to conventional screws
- the advantage of the Cam-Out drive is a deeper design that ensures quality torque transmission even when the bit deflects from the axis (up to 5°)

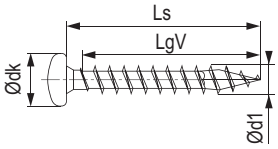

size (d1) (mm)	code	total length (Ls) (mm)	thread length (LgV) (mm)	outer diameter of the head (dk) (mm)	bit

5,0 × 80	**372179**	80	61	9,7	PZ2

Pozidrive bits can be found in chapter 12

[1] partial thread is particularly suitable for two boards clamping

Screws with a pan head

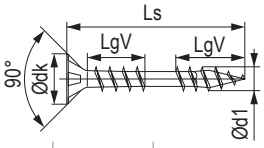

size (d1) (mm)	code	total length (Ls) (mm)	thread length (LgV) (mm)	outer diameter of the head (dk) (mm)	bit
3,5 × 12	**374928**	12	7	7	T15
4,0 × 15	**372025**	15	13	8	T20
4,0 × 16	**360728**	16	15	8	T20
4,0 × 16	**360727**	16	15	8	PZ2
4,5 × 16	**365828**	16	15	8	T20

- suitable for fastening of slides and other applications where a flat bearing surface is required
- this type does not cause deformation of the board, it allows a possible slight shift, etc.
- available for both designs of drives – PZ2 and T-STAR plus

For connecting two boards

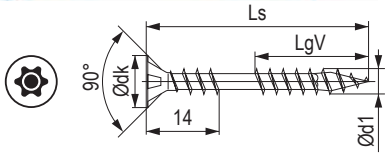

size (d1) (mm)	code	total length (Ls) (mm)	thread length (LgV) (mm)	outer diameter of the head (dk) (mm)	bit
4.0 × 33 double thread	**387737**	33	6 + 16	8,0	T20

- screw is ideal for connecting two boards
- perfectly clamps the boards together
- 33 mm length is ideal for connecting boards with a thickness of 18 mm – no risk of unwanted drilling through
- 4CUT point – no pre-drilling needed
- corrugated thread – easy application
- grooves under the head – they mill the head into the material with minimal damage to the surroundings, significantly reduces the possibility of spinning the screw when attaching metal objects
- Wirox surface treatment has 20 times higher corrosion resistance compared to conventional screws

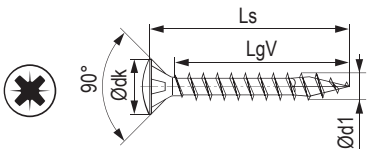

size (d1) (mm)	code	total length (Ls) (mm)	thread length (LgV) (mm)	outer diameter of the head (dk) (mm)	bit
4,5 × 50	**372721**	50	21,5	8,8	T20

- suitable for fixing floors to the substructure
- the second thread ensures a firm clamping of the floor to the substructure (reduces the floor creaking)
- 4CUT point, no pre-drilling needed
- Wirox surface treatment has 20 times higher corrosion resistance compared to conventional screws

Pozidrive with raised countersunk head

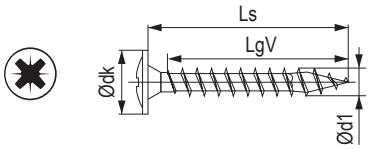

size (d1) (mm)	code	total length (Ls) (mm)	thread length (LgV) (mm)	outer diameter of the head (dk) (mm)	bit
3,5 × 16	**375156**	16	13	7,0	PZ2
3,5 × 20	**375174**	20	16	7,0	PZ2
4,0 × 16	**360299**	16	13	8,0	PZ2
4,0 × 20	**367456**	20	16	8,0	PZ2

Elegant look of the raised countersunk head, nickel surface treatment – fits perfectly with furniture hinges

Tips for use:
raised countersunk head – perfect hinge appearance, suitable for other products, designed for countersunk head, Spax technology for higher firmness of the joint.

With raised countersunk head and the collar

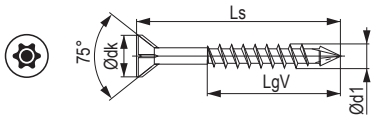

size (d1) (mm)	code	total length (Ls) (mm)	length of the thread (LgV) (mm)	outer diameter of the head (dk) (mm)	bit
3,5 × 17	**364719**	17	15	8,6	PZ2
3,5 × 20	**364720**	20	18	8,6	PZ2
3,5 × 25	**388123**	25	23	8,6	PZ2
3,5 × 30	**387581**	30	27	8,6	PZ2
3,5 × 35	**382718**	35	32	8,6	PZ2
4,0 × 20	**467071**	20	18	9,6	PZ2

- suitable for fixing the back to the cabinet body
- Wirox surface treatment has 20 times higher corrosion resistance compared to conventional screws
- large bearing surface guarantees high joint strength

Screw for solid wood

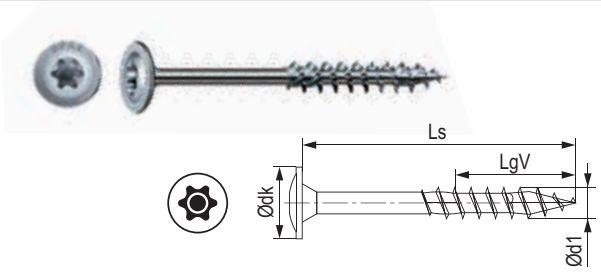

size (d1) (mm)	code	total length (Ls) (mm)	thread length (LgV) (mm)	outer diameter of the head (dk) (mm)	bit
3,5 × 35	**376001**	35	20	6	T10

- suitable for fixing solid wood without the risk of cracking (floorboards, flooring, laths, etc.)
- special narrow head with 60° angle with groove for clean countersinking
- 4CUT point with a corrugated thread for easy drilling-in
- Wirox surface treatment has 20 times higher corrosion resistance compared to conventional screws

screws for exterior

Frame screws with washer head

size (d1) (mm)	code	total length (Ls) (mm)	thread length (LgV) (mm)	outer diameter of the head (dk) (mm)	bit
6 × 60	**360300**	60	56	13,6	T30
6 × 80	**360301**	80	61	13,6	T30
6 × 100 / 61	**360302**	100	61	13,6	T30
6 × 120 / 68	**360303**	120	68	13,6	T30
6 × 140 / 68	**360304**	140	68	13,6	T30
6 × 160 / 65	**360305**	160	65	13,6	T30
8 × 80	**360306**	80	70	20,0	T40
8 × 100 / 80	**360307**	100	80	20,0	T40
8 × 120 / 80	**360308**	120	80	20,0	T40
8 × 140 / 80	**360309**	140	80	20,0	T40
8 × 160 / 80	**360310**	160	80	20,0	T40
8 × 180 / 80	**360311**	180	80	20,0	T40
8 × 200 / 80	**360312**	200	80	20,0	T40
8 × 220 / 80	**360313**	220	80	20,0	T40
8 × 240 / 80	**360314**	240	80	20,0	T40
8 × 260 / 80	**360315**	260	80	20,0	T40
8 × 280 / 80	**360316**	280	80	20,0	T40

- suitable for wooden constructions, pergolas, fastening of objects, etc.
- washer head – large bearing surface for transmission of great force
- 4CUT point – no pre-drilling needed (most materials [1])
- unique point profile with a square cross section together with a corrugated thread speed up screwing and reduce the force required for screwing
- from the length of 160 mm the milling section Spax 4CUT – noticeably reduces torque during tightening
- much lower risk of material cracking at the edge
- all that means faster and better work, longer battery life and lower bit wear
- Wirox coating has 20 times higher corrosion resistance compared to conventional screws
- perfectly fitting bits

[1] some materials may require pre-drilling, we recommend testing it

WIROX

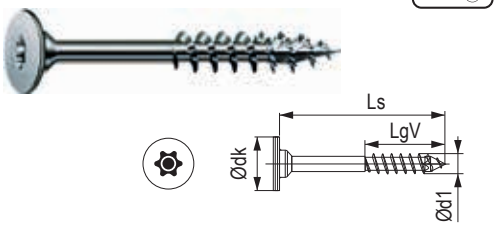

unique Spax screws

regular screw

Screw with flat head

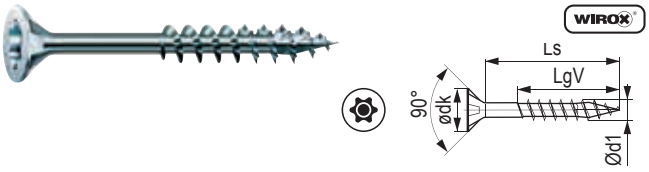

WIROX

size (d1) (mm)	code	total length (Ls) (mm)	length of the thread (LgV) (mm)	outer diameter of the head (dk) (mm)	bit
4 × 30	**405862**	30	16	4,0	T20
4 × 34	**405370**	34	16	4,0	T20

- decorative screw with flat head
- for connecting two boards
- head height only 1 mm and diameter 10 mm
- nickel surface treatment

T-STAR plus with countersunk head

WIROX

size (d1) (mm)	code	total length (Ls) (mm)	length of the thread (LgV) (mm)	outer diameter of the head (dk) (mm)	bit

8,0 × 180 / 80	**375382**	180	80	15,1	T40
8,0 × 200 / 80	**375383**	200	80	15,1	T40
8,0 × 220 / 80	**375384**	220	80	15,1	T40

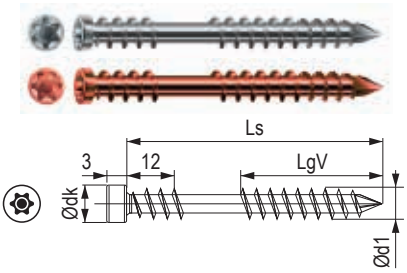

- the above mentioned advantages combined with T-Star plus drive
- we recommend the use of genuine T-STAR plus bits for perfect performance
- working with conventional Torx bits will not allow you to take full advantage of the improved drive

Cylindrical terrace screws TXS - stainless steel

A2 AISI 304

A2 antik

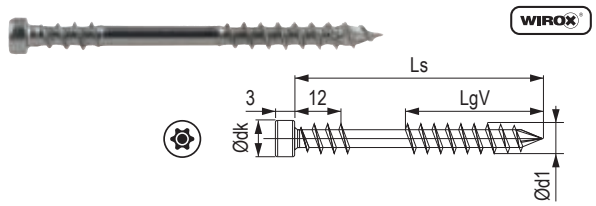

size (d1) (mm)	code	colour	total length (Ls) (mm)	thread length (LgV) (mm)	outer diameter of the head (dk) (mm)	bit
5,0 × 40	**375466**	silver	40	21	7	T25
5,0 × 50	**361416**	silver	50	22,5	7	T25

5,0 × 50	**360319**	antique	50	22,5	7	T25

- small cylinder head
- faster and better work, longer battery life and lower bit wear
- the double thread prevents loosening during drying
- suitable for hardwood terraces
- stainless steel A2
- particularly for hardwoods, we recommend pre-drilling boards with drill bit 375995

Decking screw, cylindrical

size (d1) (mm)	code	total length (Ls) (mm)	length of the thread (LgV) (mm)	outer diameter of the head (dk) (mm)	bit
4,5 × 60	**361418**	60	27,5	6,0	T20

- steel material with Wirox surface treatment
- the set includes a two-step drill bit and a T20 bit
- particularly for hardwoods, we recommend pre-drilling boards with drill bit 361432

Spax Stick Pro

code
376051

- concealed clip mounting type
- suitable for softwood terraces (Siberian larch, etc.)
- one package (120 pcs) is sufficient for about 3 m²

Spax Kaiman board straightener with accessories

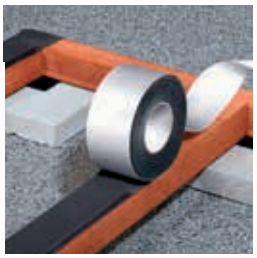

code
360321

- pulling force up to 600 kg
- set includes: adjustable board straightener, 4× spacer, marking strip

Spax Tape

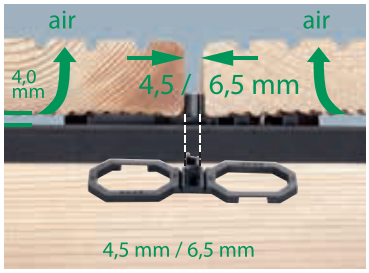

code	length (m)
360322	30

- rubber tape between the board and the substructure
- 87 mm width

terrace accessories

Spax Air spacers

code	dilatation (mm)	number of pcs per package	packs per m²
360324	4,5	100	~ 7,0

- eliminate waterlogging between the board and the substructure
- ensure the spacing between the boards

Spax × PAD plate

code

360323

- rubber 100 × 100 × 8 mm
- 25 pcs in package

T-STAR plus bits

6 × 80/50 partial thread	**228991**	T30

- high-quality countersunk wood screws
- surface treatment: white zinc
- hexagonal drive is capable of transmitting high torque without skipping
- suitable for screwing long screws
- use in hard materials, etc.

Tightening bits

103550	6,3 × 13 / 9	white zinc

connecting bolts

Flat

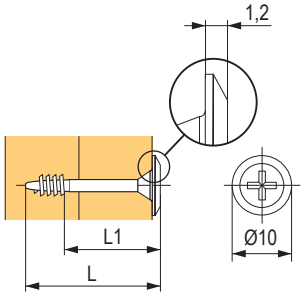

code	surface treatment	extent of connection (mm)	hole diameter (mm)
507029	nickel	30–40	5

- M4 thread
- decorative bolt with elegant flat head
- for connecting two boards
- head height of only 1.2 mm
- head diameter 10 mm

Flat

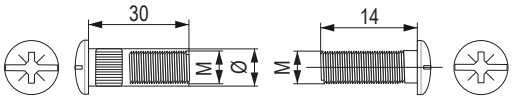

code	size	for material thickness
283324	4 × 31/20, partial thread	18 – 20 mm
392234	4 × 27/16, partial thread	15 – 16 mm

- decorative screw with elegant flat head
- for connecting two boards
- head height of only 1.2 mm, diameter: 10 mm
- nickel surface treatment

Bolt + nut

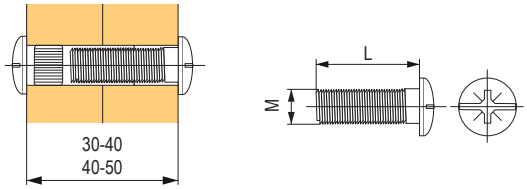

code	thread	extent of connection (mm)	hole diameter (mm)
15036	M4	30–40	5
15038	M6	30–40	8

Connecting bolt

code	thread	length L (mm)	hole diameter (mm)
92773	M6	14	8
15039	M6	30	8

- with the help of connecting bolts and nut, a joint range of 30–40 mm (with 14 mm bolt) and 40–50 mm (with 30 mm bolt) can be created
- surface treatment: nickel

Connecting nuts

code	thread	length L (mm)	hole diameter (mm)
92772	M6	30	8

- surface treatment: nickel

bolts for handles

Snap-off bolts for handles

code	size
93299	M4 × 50

- bolts for handle fixing, cruciform drive
- surface treatment – white zinc
- can be cut every ca. 5 mm to the length of 25 mm

Bolts for handles

code	size
10144	M4 × 8
15074	M4 × 10
10142	M4 × 12
15076	M4 × 16
10158	M4 × 20
10145	M4 × 22
10155	M4 × 25
10153	M4 × 30
15077	M4 × 35
10154	M4 × 40
95318	M4 × 45

- bolts for handle fixing, cruciform drive
- surface treatment – white zinc

Rubber handle pad

code	description
08002	transparent

- for proper operation, use 2 pcs pads per one bolt
- for mounting handles on glass panels
- metal must not lie directly on glass
- for bolt diameter 4 mm

wall plugs

Spax

code	size (mm)	package (pcs)	recommended screw size
405553	6 × 30	80	5
405569	6 × 45	50	5
405592	8 × 40	100	5

- universal wall plug for solid materials
- the degree of tensile load depends on the type of drilled material, detailed information can be found on our portal

Universal

code	size (mm)	package (pcs)	recommended screw size
92700	6 × 30	100	3,5–5
92701	8 × 40	100	4,5–6
92702	10 × 60	50	6–8
92703	12 × 60	25	8–10

- universal wall plug for solid materials

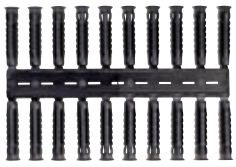

Knotting wall plug with a rim

code	size (mm)	package (pcs)	recommended screw size
15067	6 × 38	100	4
15065	8 × 51	50	5
15066	10 × 61	50	6

- universal wall plug for hollow and solid materials

TX

code	size (mm)	package (pcs)	recommended screw size
229048	6 × 30	20	4–5
229049	8 × 40	20	4,5–6
229050	10 × 50	10	6–8

- universal wall plug for solid and hollow materials
- high resistance against stripping

Turbo AL

code	size (mm)	package (pcs)
229045	10 × 35	100

- special metal wall plug for use to plasterboard, autoclaved aerated concrete and particle board
- cuts into the material without pre-drilling (it is better to pre-drill a 6 mm hole in particle board)
- recommended screw for fastening: 4–4.5 mm (regular particle board screw)

Turbo

code	size (mm)	package (pcs)	recommended screw size
229046	10 × 35	100	4

- special wall plug for use in plasterboard
- it cuts into plasterboard without any pre-drilling
- recommended screw for fastening: 3.5–4 mm

GBH

code	size (mm)	package (pcs)	recommended screw size
229047	10 × 55	50	3,5–4

- special wall plug for use in autoclaved aerated concrete, plaster boards and similar lightweight materials
- minimum risk of stripping
- high load capacity

Recommendation.
For assembly, it is advantageous to use screws with button head. The flat bearing surface allows easier adjustment, potential repositioning, etc. The conical shape of the countersunk head does not allow repositioning of the fixed object when tightening. The advantage of the button head is also smaller distortion and better pressure distribution. Dome head screws can be found on p. 10.16.

self-adhesive cover caps

Matching to Egger decors

biscuits, patching materials

KNAPP®

Simplify your work

- No special power tools are needed to install the biscuits.
- Cost-effective.
- Option for all types of wood or wood-based materials.
- Not only slide-in, but also snap-on connections.
- Easy installation of ready-to-assemble parts on the assembly – basically without power tools.

dowels, biscuits, patching materials

Calibrated connecting dowels – birch

without adhesive

with adhesive

code	dimensions (mm)	package (pcs)
340719	8 × 35	8 650
344255	8 × 35 with glue	
362946	8 × 40	7 600
395167	8 × 35	1 000
396181	8 × 35 with glue	
396182	8 × 40	

- both types of dowels are suitable for standard dowelling, as well as for **automatic dowel machines**
- dowels are electronically tested for geometry, a much smaller probability of a defective piece
- version with glue is particularly suitable for adhesive injection automated machines – no nozzle cleaning after application, water (contrary to glue) will not dry or degrade the surface of the board

When using dowels with glue, water should be injected into the hole (1/3 to 1/2 of the depth) – water volume of ca. 0.2 to 0.4 cm^3 into each hole. The glue which is on the dowel is activated and begins to stick. Final curing of the adhesive occurs within 24 hours.

15602	120	20
15605	150	20

Pull IN

code	surface treatment
283321	nickel
507042	black nickel

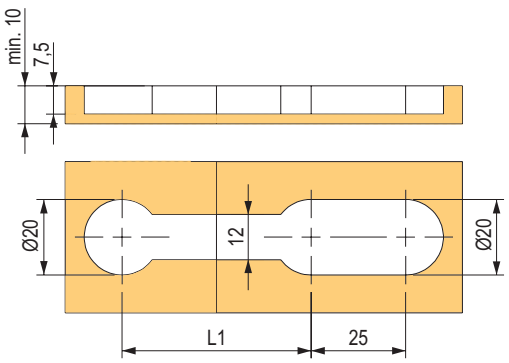

- high strength
- special shape of countersink causes tightening connecting parts to each other
- suitable screw – euro screw with a countersunk head

Screws for thin and compact worktops

code	drilling pitch L1 (mm)
459398	50
549450	100

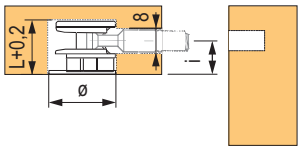

- tool for tightening with ball-head key 469488

eccentric connecting fittings

Connecting fittings cam

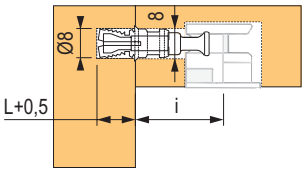

code	board thick-ness (mm)	diameter (mm)	length L (mm)	dimensions i (mm)	colour
229902	15 / 16	15	12	7,75	zinc
229903	18 / 20	15	13,5	9,3	zinc

Quick cam screw-in dowel

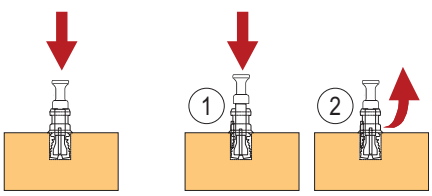

code	pitch i (mm)	drilling diameter D (mm)	hole depth L (mm)
92794	24	8	11
157847	34	8	11

- cam screw-in dowel for faster assembly, vibration-resistant
- greater strength of joint by 30%
- high tolerance for positioning of cam holes (± 0.5 mm)
- pre-installation option during manufacturing
- saves time during installation – no screwing
- the same hole diameter as for dowels – no need to change the drill

mounting

disassembly

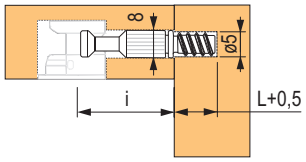

Cam screw-in dowel – type TE

code	pitch i (mm)	drilling diameter (mm)	thread length L (mm)
92796	24	5	9,5
15020	34	5	11

- with euro thread

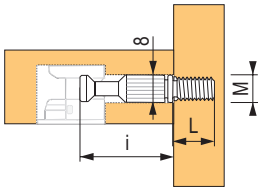

Cam screw-in dowel M6

code	pitch i (mm)	thread	thread length L (mm)
352557	34	M6	8,5

- for use in metal components or with drill-in nuts

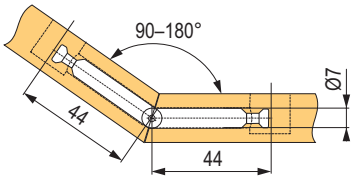

eccentric connecting fittings

Angular cam screw-in dowel

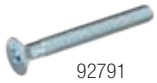

code	pitch (mm)	hole diameter (mm)
229898	44	7

- for angular connection from 90° to 180°

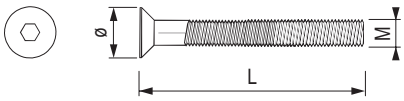

Bolts for barrel nut

code	thread	diameter (mm)	length L (mm)
92791	M6	12	50
92792	M6	12	60

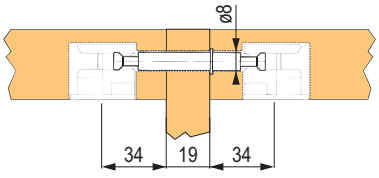

Double cam screw-in dowel

code	pitch (mm)	hole diameter (mm)
229899	34–19–34	8

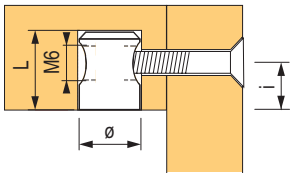

- for 19 mm centre panel

Barrel nut BA02

code	inner thread	diameter (mm)	length L (mm)	dimensions i (mm)
92793	M6	10	14	9

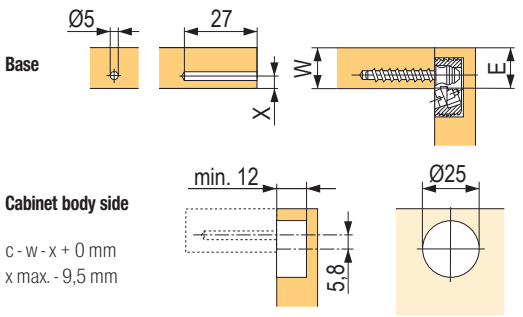

Connecting fittings

code	Blum code	colour
13716	42.0700.01	white
13715	42.0700.01	brown

- connecting fittings for cabinet body with a connecting bolt
- plastic housing with a pre-mounted cam from zinc
- connecting bolt made of zinc, die casted

shelf connectors

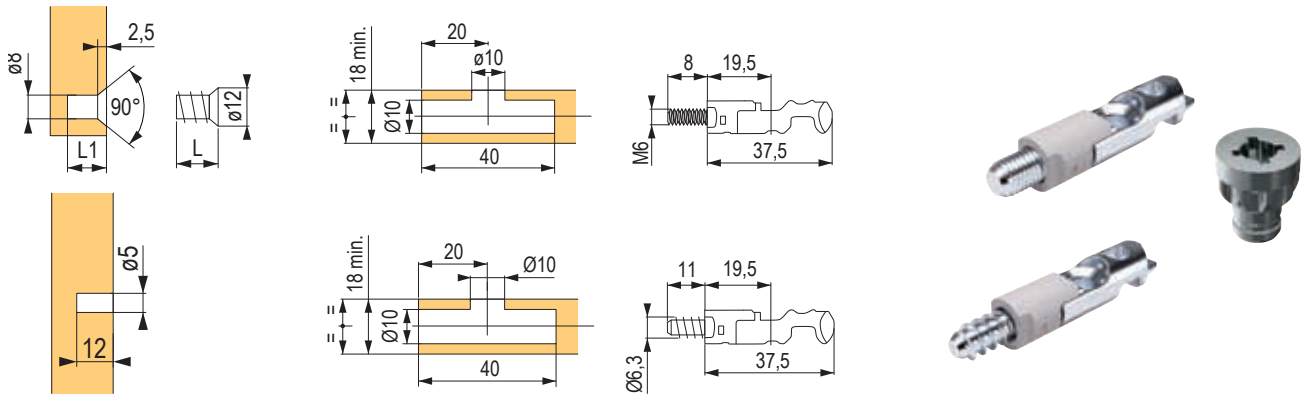

Target J10

- connection for heavy load, high strength and easy assembly
- recommended to combine with wooden dowels to add wooden dowels
- suitable for mass furniture production as well as for individual furniture production
- practical solution for a wide range of applications
- bolt joint will ensure a firm connection, use of cordless tools will speed up assembly
- easy pre-assembly
- drilling template 359816 for panels 16–18 mm, 359817 for side panels

code	thread type	counterpart in the cabinet body	type
507045	M6	**15021**	M6 × 13
		283069	M6 × 17
		292628	M6 × 20
507046	11 mm euro thread	×	×

- complete set includes connector dowel and fixing screw
- the option with M6 thread must be supplemented with a suitable counterpart in the cabinet body
- suitable screw cap 360956 - white, diameter 15 mm

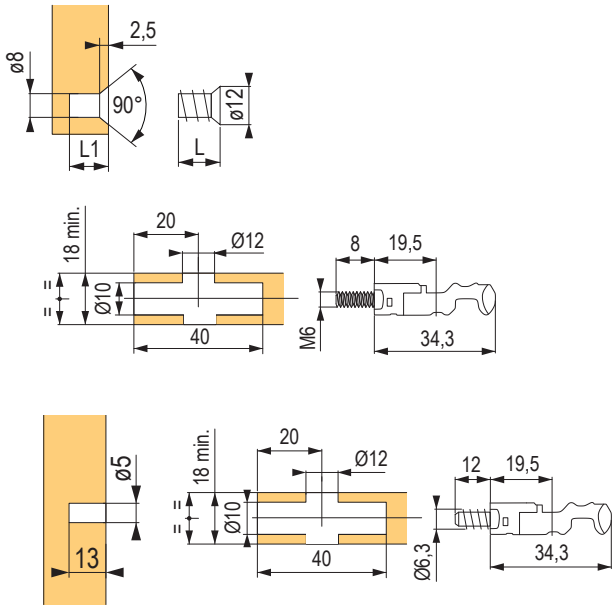

Target J12

code	thread type	counterpart in the cabinet body	type
507048	M6	**15021**	M6 × 13
		283069	M6 × 17
		292628	M6 × 20
507049	12 mm euro thread	×	×

- complete set includes connector dowel and fixing screw
- the option with M6 thread must be supplemented with a suitable counterpart in the cabinet body
- screw cap diameter 15 mm in white 360956

360956

Kore 15

- suitable for materials 16–25 mm
- recommended to combine with wooden dowels
- easy pre-assembly
- bolt joint will ensure a firm connection, use of cordless tools will speed up assembly

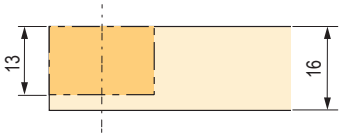

code	thread type	type	colour
549447	M6 × 8	simple	white
549449		double	
549448	12 mm euro thread	simple	

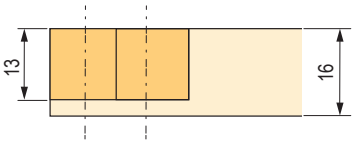

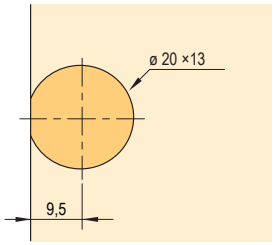

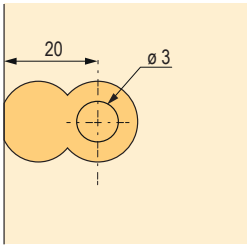

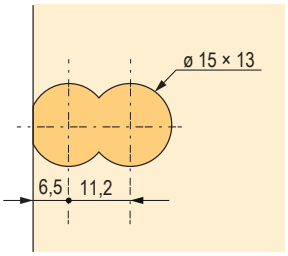

- double for combination with Integrato tech A, G levelling foot on page (08.13)
- for M6 thread, drill-in nut 15021 or 283069 must be added
- supplied including cover cap

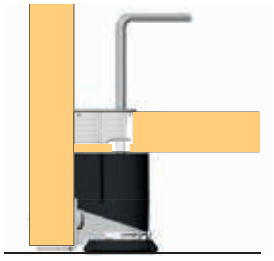

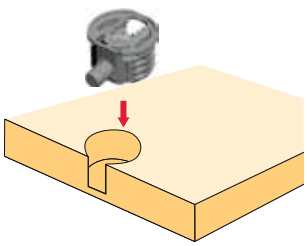

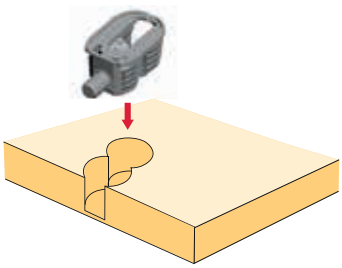

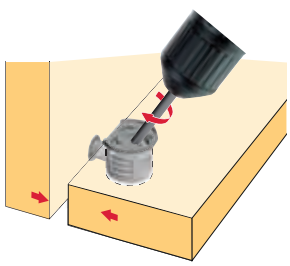

fittings for cabinet body construction

PAD – permanent dowel

228817

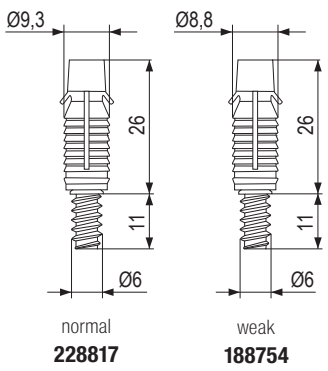

188754

code	description
228817	normal – green
188754	weak – black

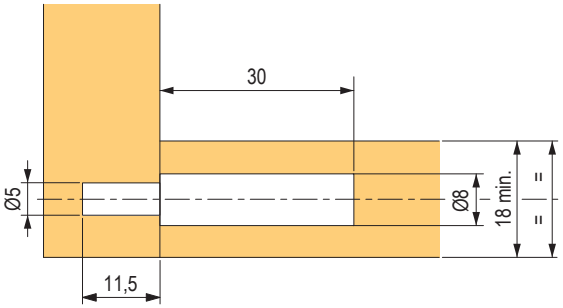

- fast, non-detachable connection
- weak – black version is designed for materials with thinner structure
- we recommend testing it before mass production
- recommend applying edge tape on the furniture panel

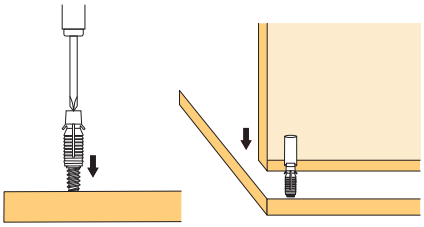

normal **228817**

weak **188754**

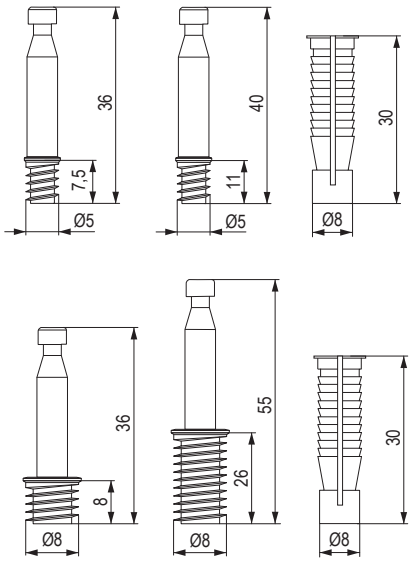

QUICK-SET

YouTube

code	description
459417	Z5058 QUICK-SET 5 mm (wall plug + pin connection)
459418	Z5057 QUICK-SET 8 mm (wall plug + pin connection)

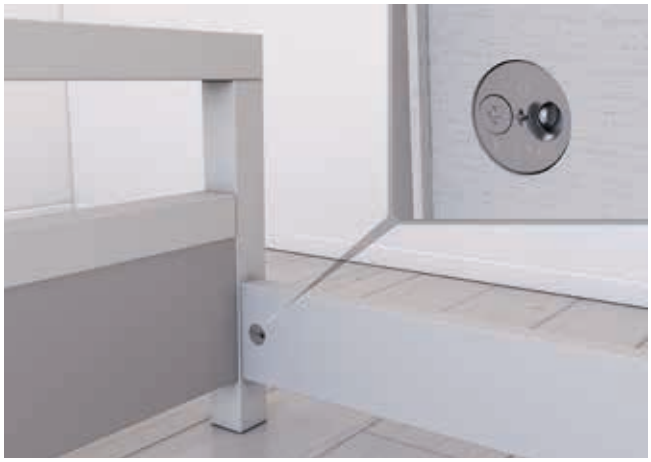

VIS bed connector

Set contains:

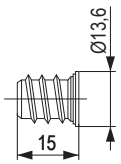

code	description
283322	VIS set

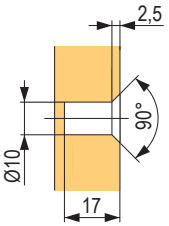

- use the included drill-in nut M8 or a through nut (for board thickness 18 mm) for installation
- tolerance up to 1.2 mm

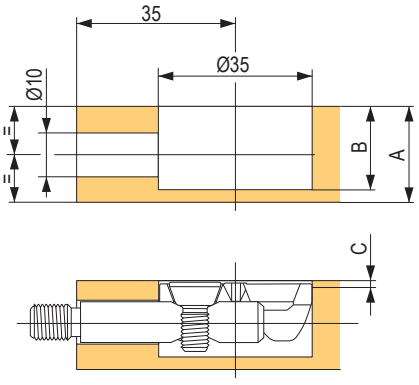

Set contains:
- connector dowel
- drill-in nut M8 × 15
- VIS body
- bolt with cone nut
- through nut for fixing to problematic materials
- tolerance up to 1.2 mm
- for materials with a thickness of 19 mm and more

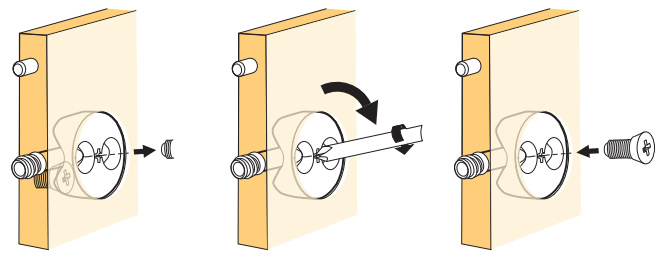

When using several pieces, gradual tightening is not necessary, just screw after putting onto connector dowel. The design enables a fixed connection thanks to two different positions.

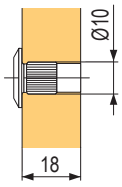

A (mm)	B (mm)	C (mm)
19	16,5	0,3
20	17,5	0,8
22	19	1,8
25	20,5	3,3
30	23	5,8

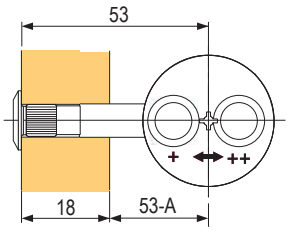

simple tightening: turn to change from + to ++

eccentric connecting fittings

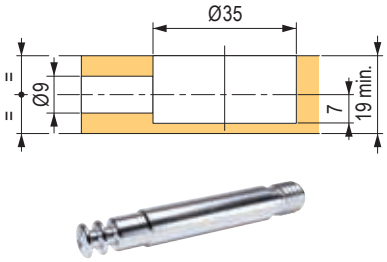

Spiral Lock

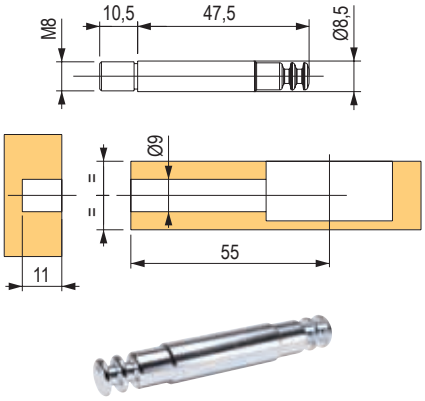

- for heavily stressed connections
- optimal pressure distribution
- protection against stripping and loosening of connection
- fast connection, a cordless screwdriver can be used
- min. board thickness: 19 mm

code	description
228818	cam M8 / 55 mm

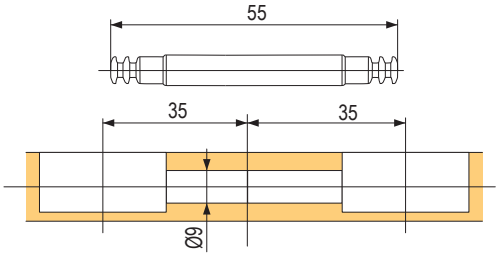

code	description
228821	spiral lock bolt, 55 mm

- bolt with M8 thread
- use with a suitable drill-in nut M8 (15022)

code	description
228822	twin bolt

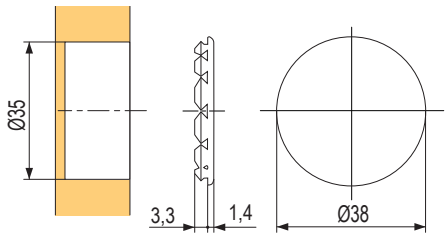

- double bolt
- pitch: 2 × 35 mm

code	description
228823	white cover cap

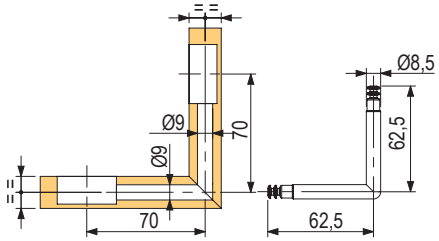

- material: plastic
- diameter: 35 (38) mm
- white colour

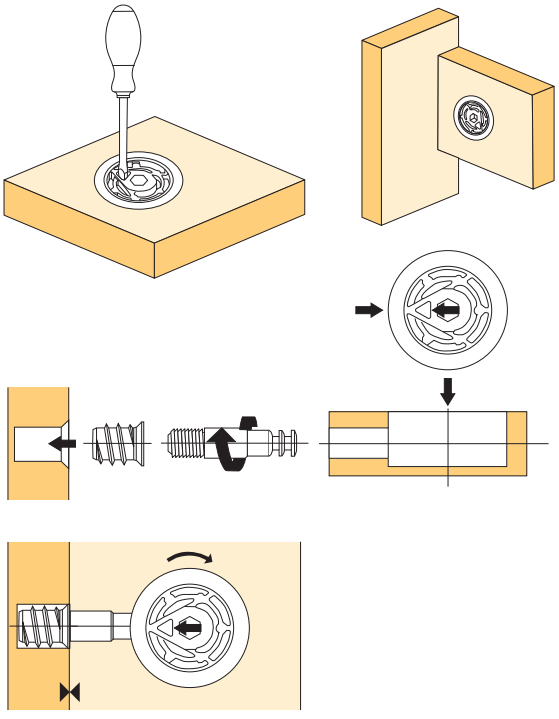

code	description
288644	corner bolt

shelf supports and connectors

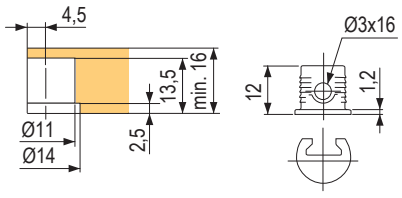

Shelf support – Maori

- fixed connection of parts, also suitable for higher loads (libraries, cabinets, etc.)
- it consists of two parts – plastic for the shelf and a zinc casting screwed to the cabinet panel
- shelf part can be fastened using a screw with countersunk head 3 ×16
- including a wall plug with a screw, for a 5 mm hole
- meets the EN 14749/05 standard

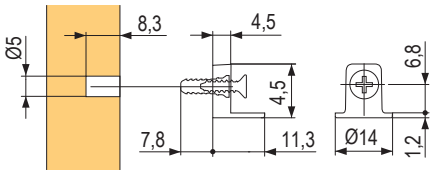

code	description
268928	shelf part for inserted option
507052	shelf part for full-loaded option

code	description
268929	cabinet panel part

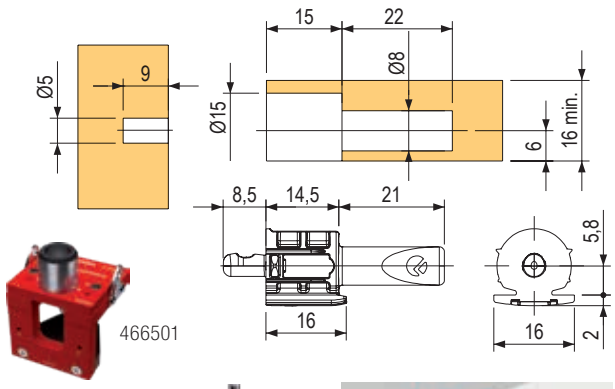

Shelf support – Kintai

- elegant shelf support
- simple and fast assembly without the need for tools
- joint can be disassembled repeatedly (for easy transport)
- shelves positions can be changed according to your preferences
- **minimum shelf thickness: 16 mm**
- meets the EN 16337/2013 standard

code	colour	package
414265	white	1
414267	grey	
414269	anthracite

concealed shelf holders

Triade Pro system

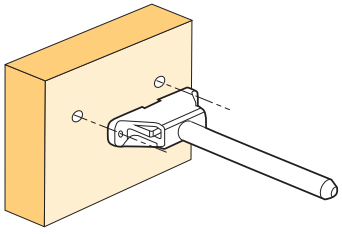

- concealed construction system for independent shelves with a possibility of a three-way adjustment
- available versions:
  - Triade Pro MINI, min. shelf thickness 25 mm
  - Triade Pro, shelf thickness 25–40 mm
  - Triade Pro MAXI, min. shelf thickness 40 mm
  - Triade Pro XXL, for honeycomb shelves, min. thickness 40 mm
- adjustable in three directions:
  - vertical: for perfect alignment of the holders on the wall
  - side: the possibility of lateral shift ensures easy installation even when drilling off the exact axis
  - tilt adjustment: ensures a straight shelf even on uneven wall, with the help of a wrench it is possible to adjust even a partially installed shelf – setting is visible immediately
- high load capacity
- supports that increase load capacity of Triade Pro for materials with lower bearing capacity are available for all types
- use of support is recommended to achieve full load capacity
- material: zinc-steel alloy
- **optional use of safe-lock screw to prevent the shelf from unintended movement using a security locking to prevent the shelf from sliding out**

milling on p. 10.55

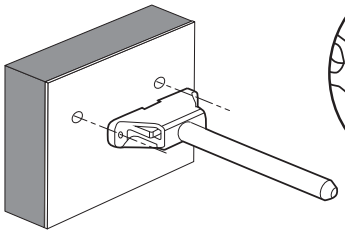

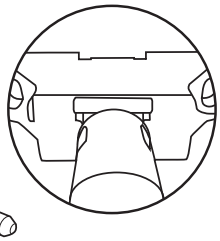

Installation

for wood

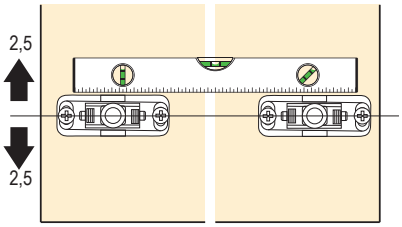

wall/plasterboard

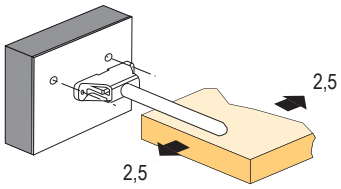

vertical adjustment
aligning multiple holders

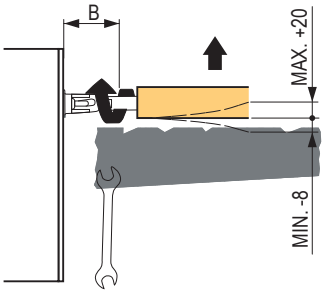

recommended screws with dome head, max. diameter 5 mm

Important: install only with the arrow up!

shelf insertion and side adjustment
lateral adjustment of the shelf (for example, when placing multiple shelves side by side)

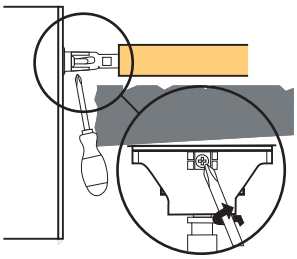

tilt adjustment
rotate the wrench clockwise

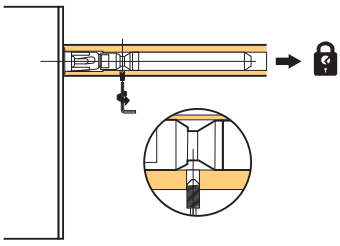

model	offset from the wall (β) (mm)	(mm)
Triade Pro Mini	approximately 45	-6
		+13
Triade Pro	approximately 45	-6
		+13
Triade Pro Maxi	approximately 70	-8
		+20
Triade Pro XXL	approximately 70	-8
		+20

screw the safety screw to fix the holder

secure the shelf on the pin with a grub screw

concealed shelf holders

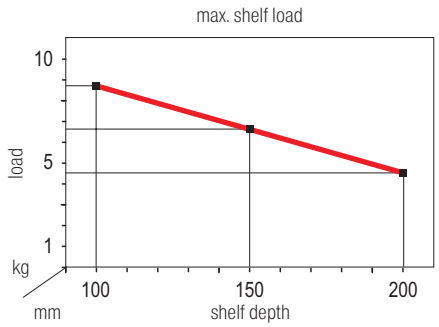

Concealed shelf holder Triade Pro Mini

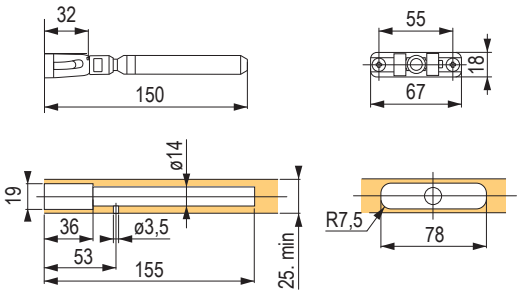

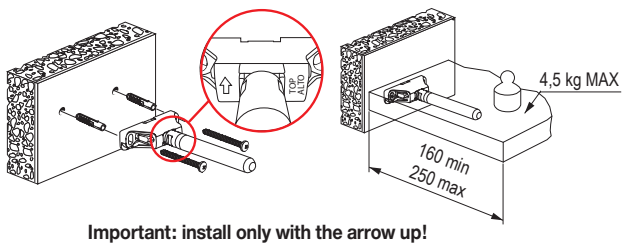

code	use
507077	for shelves with a minimal thickness of 25 mm

- enables adjustment in three directions – shelf can be adjusted vertically, horizontally and tilted as desired

Declared load applies only when the relevant support is used and the shelf load capacity is sufficient. The manufacturer is not responsible for damage caused by improper installation, poor underlayment, defective shelf, etc.

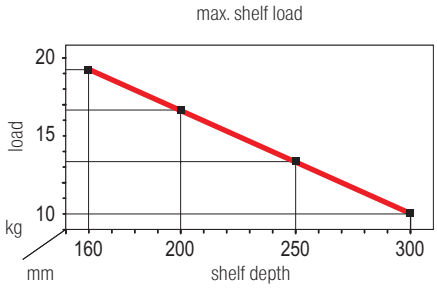

Important: install only with the arrow up!

Support for Triade Pro Mini

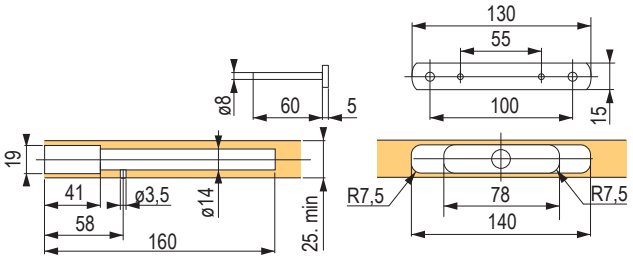

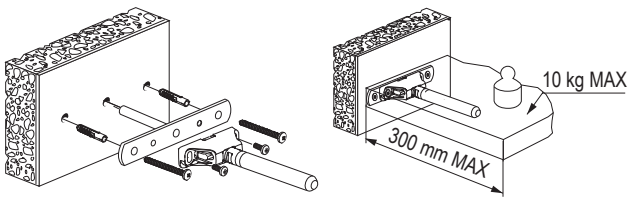

code	use
337998	support for Triade Pro Mini holder + screws M5 × 12

- ensures firmer connection to the wall
- this accessory is optional

Declared load applies only when the relevant support is used and the shelf load capacity is sufficient. The manufacturer is not responsible for damage caused by improper installation, poor underlayment, defective shelf, etc.

concealed shelf holders

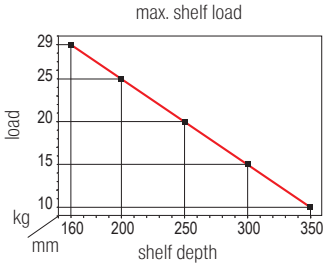

Concealed shelf holder Triade Pro

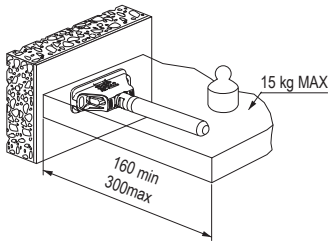

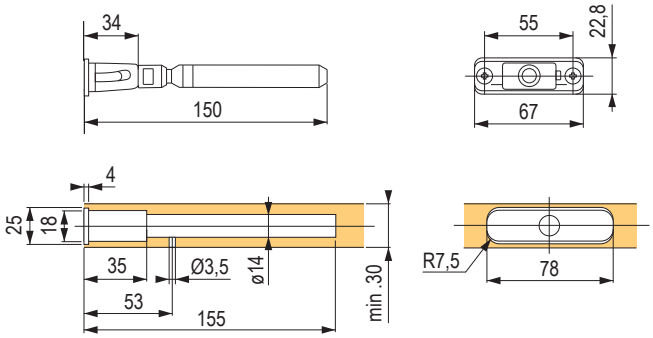

code	use
507078	for shelves with a minimum thickness of 25 mm

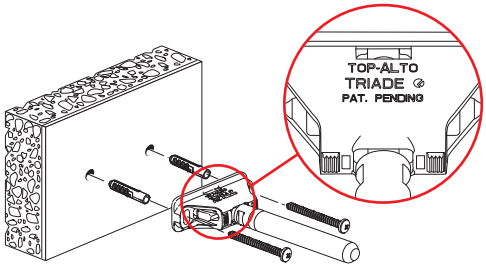

- enables adjustment in three directions – shelf can be adjusted vertically, side and tilted as desired

Declared load applies only when the relevant support is used and the shelf load capacity is sufficient. The manufacturer is not responsible for damage caused by improper installation, poor underlayment, defective shelf, etc.

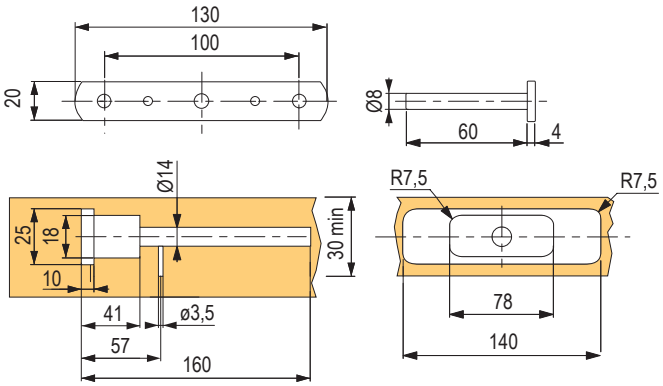

Important: install only with the arrow up!

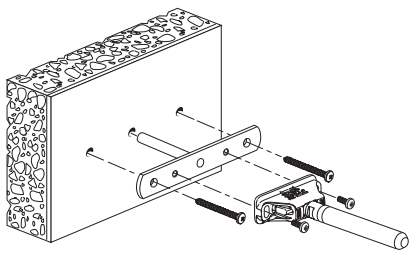

Support for Triade Pro

code	use
15579	support for Triade Pro holder + screws M5 × 12

- ensures firmer connection to the wall
- this accessory is optional

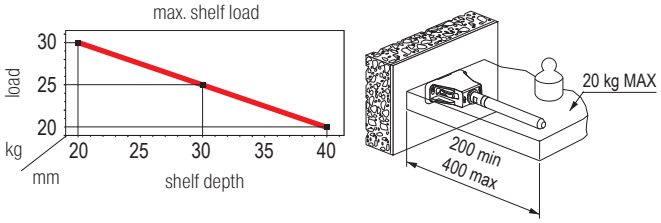

Concealed shelf holderTriade Pro Maxi

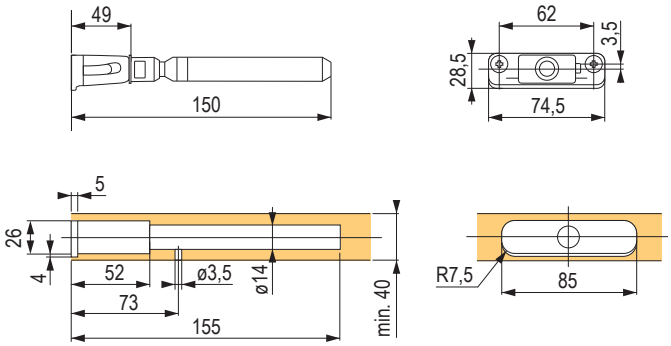

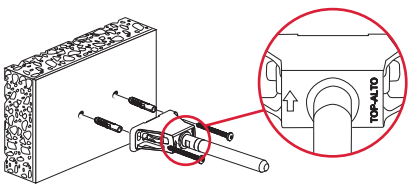

code	use
507079	for shelves with a minimum thickness of 40 mm and depth of 200 mm

- enables adjustment in three directions – shelf can be adjusted vertically, side and tilted as desired

Declared load applies only when the relevant support is used and the shelf load capacity is sufficient. The manufacturer is not responsible for damage caused by improper installation, poor underlayment, defective shelf, etc.

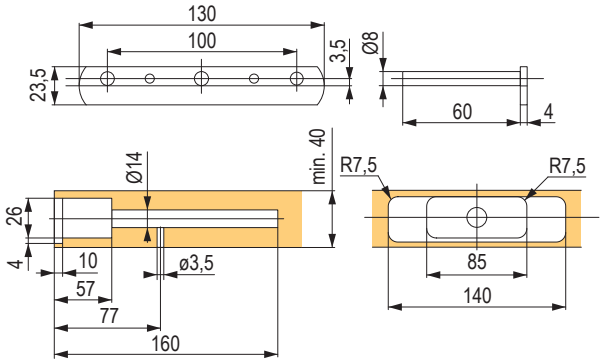

Important: install only with the arrow up!

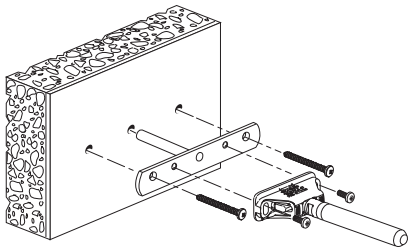

Support – Triade Pro Maxi

code	use
352036	support for Triade Pro Maxi holder + screws M5 × 12

- ensures firmer connection to the wall
- this accessory is optional

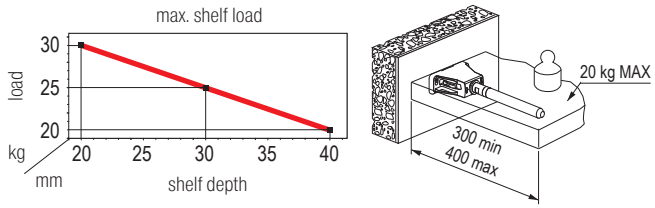

concealed shelf holders

Concealed shelf holder Triade XXL

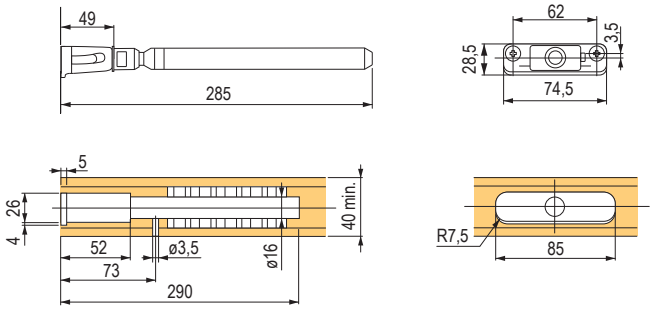

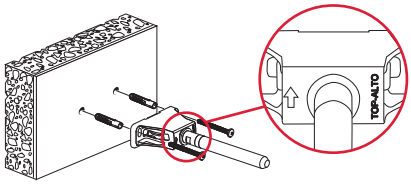

code	use
507080	for shelves with a minimum thickness of 40 mm and depth of 300 mm

- enables adjustment in three directions – shelf can be adjusted vertically, side and tilted as desired
- suitable for solid wood shelves, can also be installed in honeycomb boards

Declared load applies only when the relevant support is used and the shelf load capacity is sufficient. The manufacturer is not responsible for damage caused by improper installation, poor underlayment, defective shelf, etc.

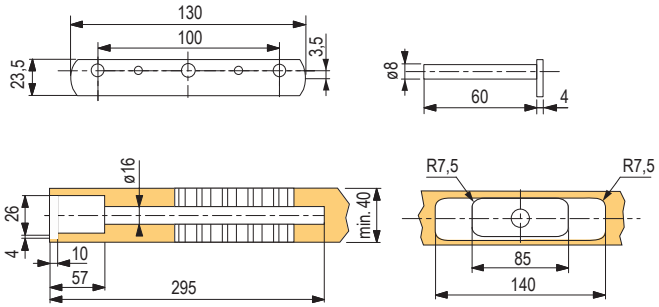

Important: install only with the arrow up!

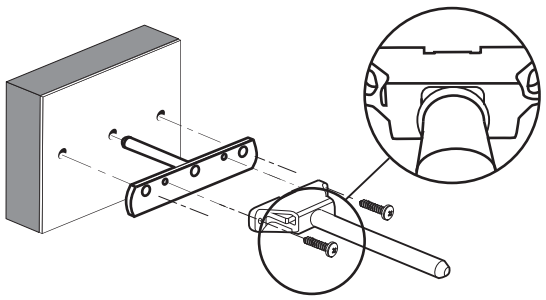

Support – Triade Pro XXL

code	use
352036	support for Triade Pro XXL holder + screws M5 × 12

- ensures firmer connection to the wall
- this accessory is optional

Triade Pro profiles

283326

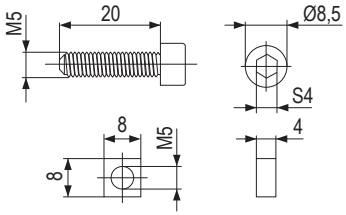

283325

- for mounting concealed shelf holders on plasterboard walls and other walls with low load capacity
- the profile is fastened to the bearing wall elements
- 2 versions for all types of Triade Pro holders
- connecting bolts and nuts must also be ordered

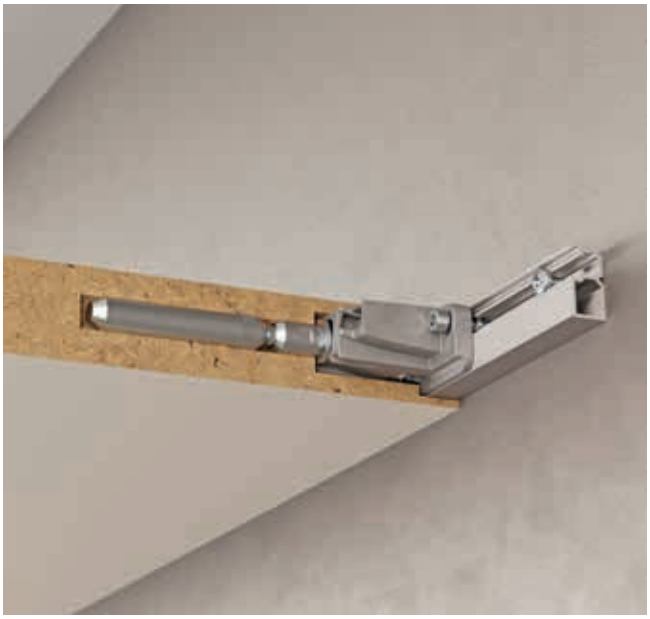

code	description
283326	Triade Pro Mini and standard
283325	Triade Pro Maxi and XXL

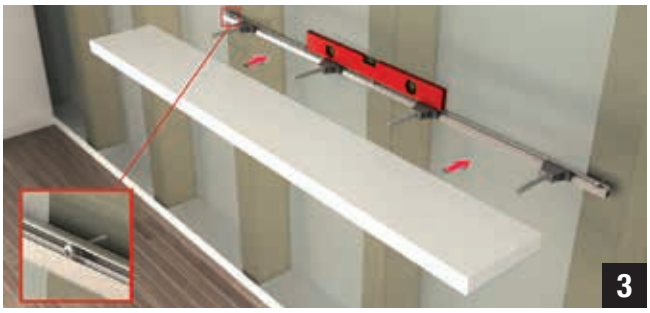

- profile length 2.4 m

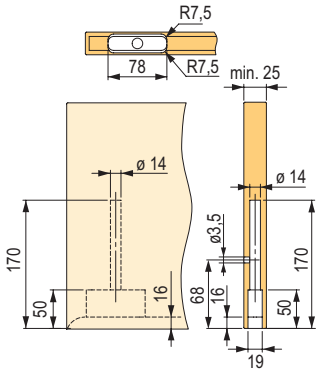

code	description
284344	mounting bolt with a nut, 4 pcs

- set for 2 holders

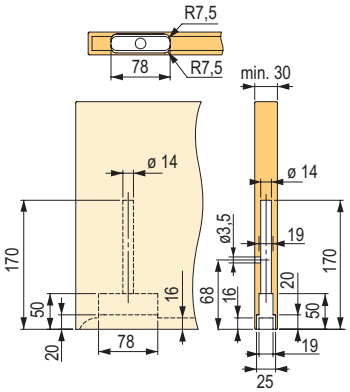

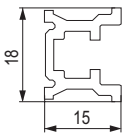

TRIADE MINI

TRIADE MAXI

TRIADE XXL

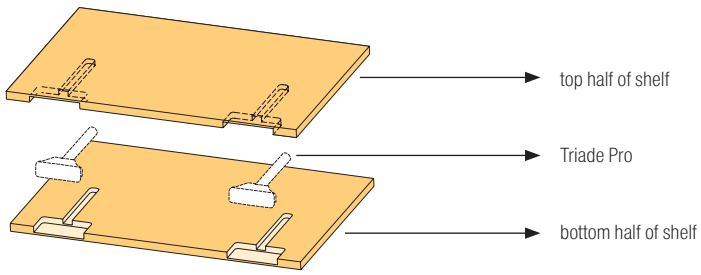

283325

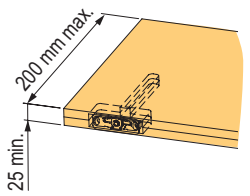

concealed shelf holders

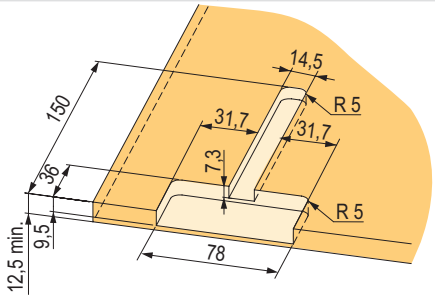

Milling for the Triade Pro system

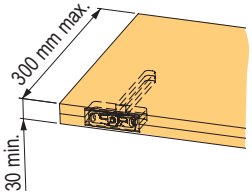

- installation is possible by milling on CNC machines and subsequent connecting of two parts

	top part – milling	bottom part – milling
Triade Pro Mini	both halves the same	
Triade Pro	both halves the same	
Triade Pro Maxi		
Triade Pro XXL		

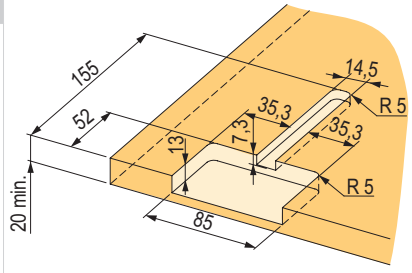

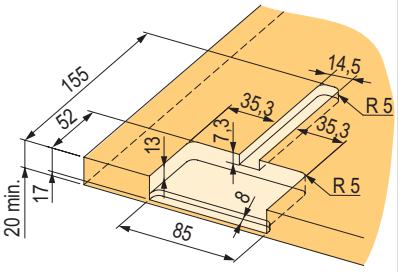

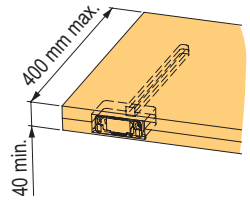

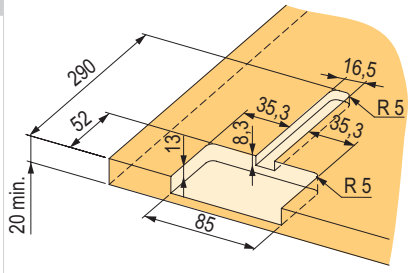

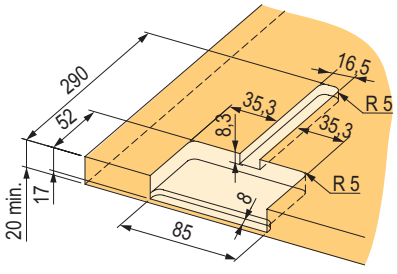

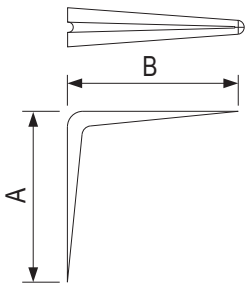

- drawings for milling using TRIADE profiles are available for download at www.demos-trade.com

brackets

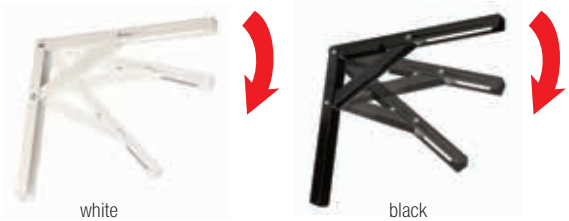

Bracket

code	load capacity – pair (kg)	dimension A (mm)	dimension B (mm)	colour
10772	40	100	125	white
10773	40	125	150	white
10774	50	150	200	white
10775	50	200	250	white
10776	60	250	300	white
10777	70	300	350	white
10778	40	100	125	brown
10779	40	125	150	brown
10781	50	200	250	brown

10784	70	300	350	brown

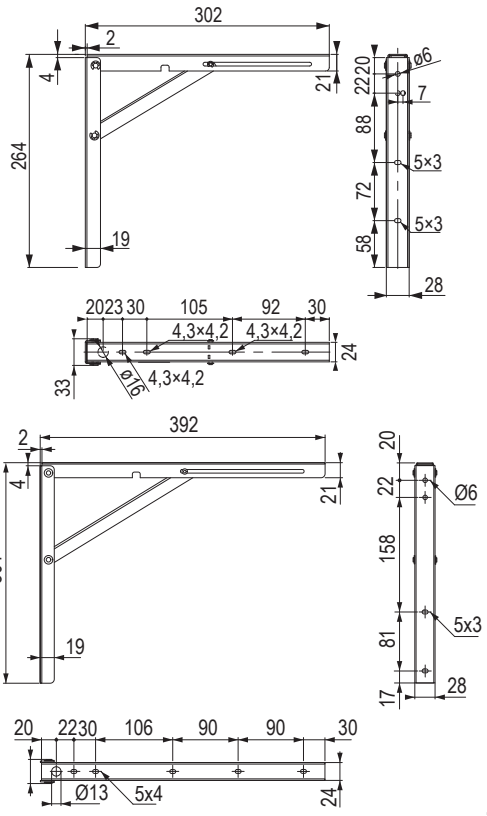

Folding bracket

code	height (mm)	depth (mm)	colour
303071	264	300	white
303073	304	400	white
303072	264	300	black
303074	304	400	black
347818	264	300	satin
347819	304	400	satin

- load capacity 100 kg (when using 2 brackets per board of width of 600 mm)
- ideal for folding shelves, small dining tables, bars
- white, black and satin colour are comaxit
- the distance of the shelf from the wall when the bracket is fully tilted is 30 mm

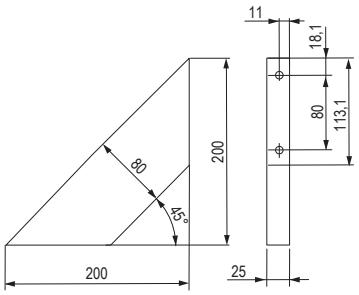

brackets

Side

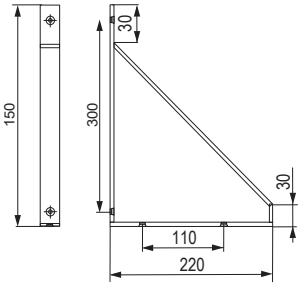

code	height × depth (mm)	colour	load capacity (kg)
548331	200 × 200	black	30

- Design shelves with easy 2-way assembly.
- The special shape of the brackets allows the shelf to be mounted by supporting or hanging.

Loft

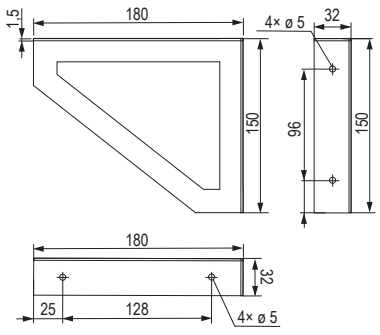

code	height × depth (mm)	colour	load capacity (kg)
548332	300 × 220	black	30

- Design shelves with easy 2-way assembly.
- The special shape of the brackets allows the shelf to be mounted by supporting or hanging.

Delta

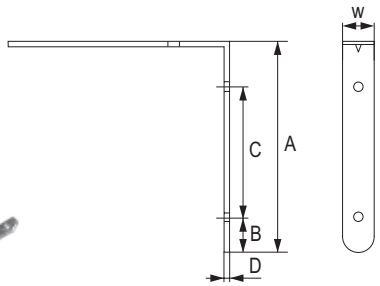

code	height × depth (mm)	colour	load capacity (kg)
548403	150 × 180	black	30

metal connecting angled brackets and plates

Angled bracket

Door buffer – BI-Material

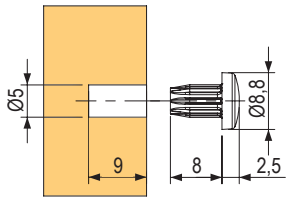

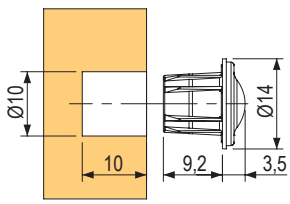

229142

code	name	drilling (mm)	damping part dimensions
229142	BI-Material transparent	5 mm	8,8 × 2,5 mm
507087	BI-Material white		
507088	BI-Material anthracite		
507089	BI-Material grey		
507090	BI-Material brown		
279341	Soft transparent	10 mm	14 × 3,5 mm

- buffer for drilling-in, two-material design allows easy installation
- suitable also for machine assembly
- material: transparent plastic

Door buffer – FLEX

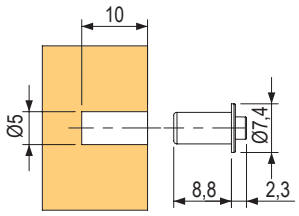

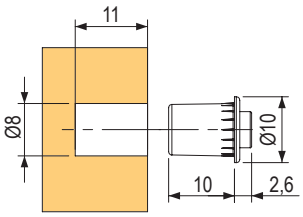

507091

code	colour	drilling (mm)
507091	grey	5
507092	anthracite	
283318	grey plastic + transparent	8

- buffer for drilling-in
- contains silicone
- soft closing material designed for intense shock absorbtion
- suitable also for machine assembly

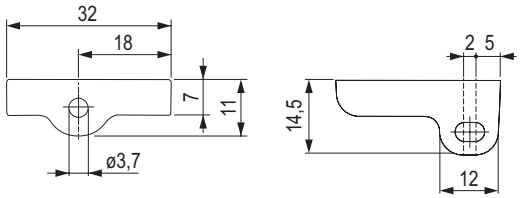

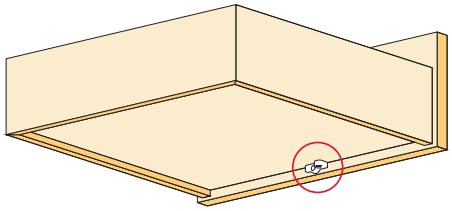

Fixing joint – Connect

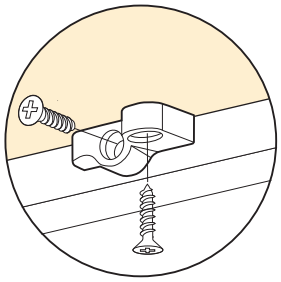

code	description
283328	for drawer fronts, reinforcement of parts

- for screw with a countersunk head screw, diameter: 3.5 mm

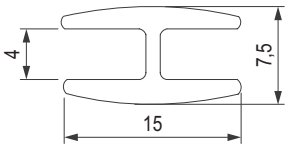

Rear connecting profile (2 m)

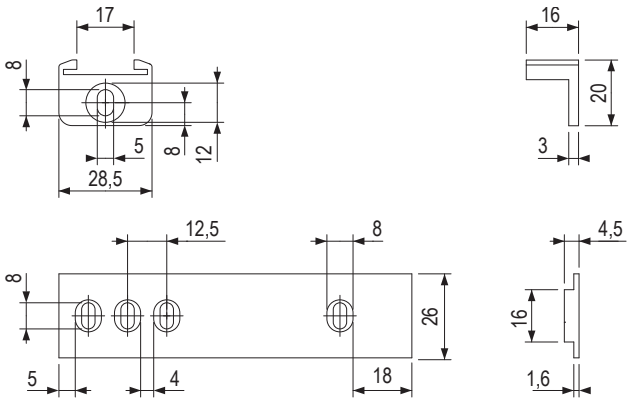

code	colour

cams, dowels and sockets

Eccentric cam connecting fittings – Rastex 15

- design solution facilitates assembly – this allows the sides to be clamped up to 4 mm from the front edge of the furniture component
- the rim covers the edges of drillings, making an additional cover cap unnecessary
- to be used for furniture components with a thickness of 15, 16 and 18 mm
- zinc casting

For components with a thickness of 15 mm

code	Hettich code	surface treatment	package (pcs)
104406	79457	nickel-coated	200

- without a rim

For components with a thickness of 16 mm

code	Hettich code	surface treatment	package (pcs)
104410	25062	nickel-coated	200

- without a rim

For components with a thickness of 18 mm

code	Hettich code	surface treatment	package (pcs)

105430	71055	brown	
105429	79490	black	
105427	9134720	pine	

- without a rim

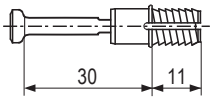

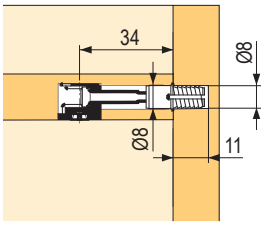

Fast installation dowel Rapid S DU 325

code	Hettich code	package (pcs)
105070	47458	200

- expanding socket for 8 mm drilling diameter
- fastening dimension: 30 mm
- steel and blue plastic

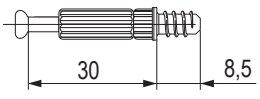

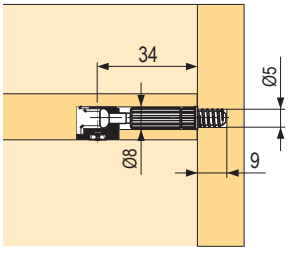

Screw in dowel Twister DU 320

code	Hettich code	package (pcs)
107959	48038	200

- for Rastex 15
- euro thread, for 5 mm drilling diameter
- fastening dimension: 30 mm
- galvanised steel, black plastic

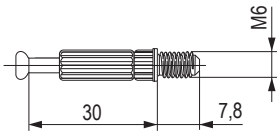

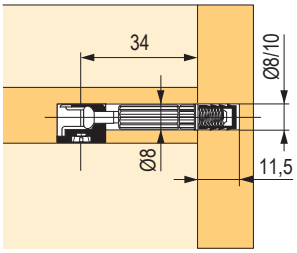

Screw in dowel Twister DU 644

code	Hettich code	package (pcs)
105082	20157	200

- for Rastex 15
- thread M6 × 7.8 mm
- fastening dimension: 30 mm
- galvanised steel, black plastic

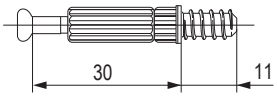

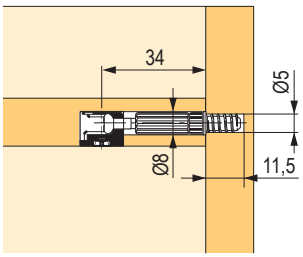

Screw in dowel Twister DU 232

code	Hettich code	package (pcs)
107955	20058	200

- euro thread, for 5 mm drilling diameter
- fastening dimension: 30 mm
- galvanised steel, black plastic

Screw in dowel Twister DU 243

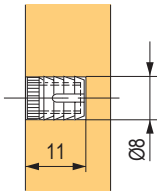

code	Hettich code	package (pcs)
107956	20056	200

- fastening dimension: 20 mm
- galvanised steel, green plastic

Socket no. 49

code	Hettich code	package (pcs)
106614	40005	200

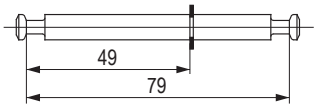

- for M6 thread
- drilling diameter: 8 mm
- white plastic

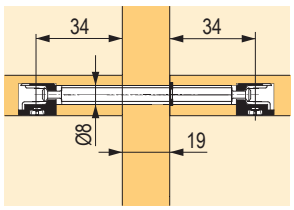

Double dowel – DU 853

code	Hettich code	package (pcs)
105053	79568	100

- for dividing wall with a thickness of 19 mm
- with Seeger circlip ring
- drilling diameter: 8 mm
- chromate-treated steel

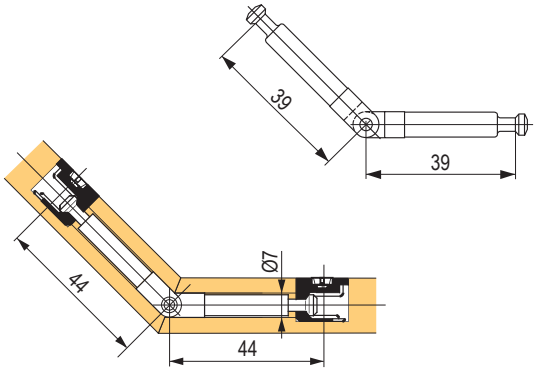

cams, dowels and sockets

Angle dowel – DU 860

code	Hettich code	package (pcs)
105061	79580	100

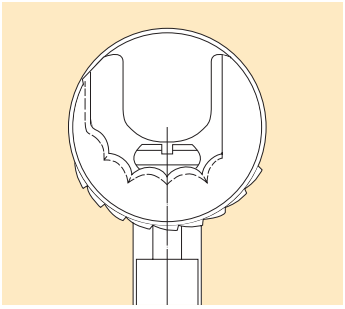

- usable from 90 to 180°
- drilling diameter: 7 mm
- chromate-treated steel

Eccentric cam connecting fittings – Rastex 25

- high safety thanks to inner and outer notches
- notches prevent cam from spontaneous loosening
- the torque necessary for loosening is three times higher than that for a comparable cam fittings
- zinc casting

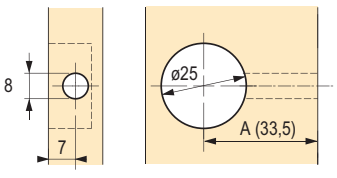

Rastex 25 without a rim

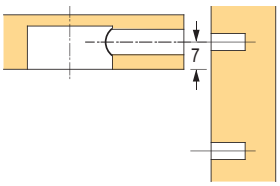

code	Hettich code	description
104443	13116	no surface treatment, 200 pcs in package

- without a rim

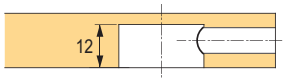

diagram of drilling the furniture component

drilling diagram
A = fastening dimension + 9 mm

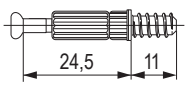

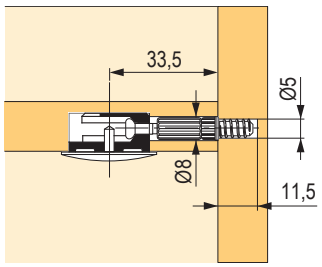

Screw in dowel Twister DU 262

code	Hettich code	description
105076	20060	200 pcs in package

- for Rastex 25
- euro thread, for 5 mm drilling diameter
- fastening dimension: 24.5 mm
- galvanised steel / blue plastic

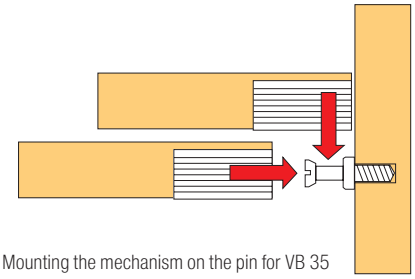

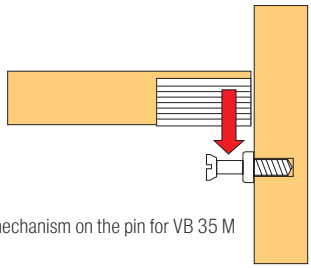

Eccentric cam connecting fittings – VB 35

- decorative connecting fittings for shape-stable connections on the well-tried cam principle
- fittings are pressed into a drilled hole with a 20 mm diameter
- furniture component is mounted from the top or front
- in case of a base, the cam can be tightened also from the top – for this, it is necessary to drill a hole through the bottom

Mounting the mechanism on the pin for VB 35

Mounting the mechanism on the pin for VB 35 M

VB 35/16 for component with a thickness of 16 mm

code	Hettich code	description
104468	65509	zinc casting, nickel-coated, 200 pcs in package

VB 35/19 for component with a thickness of 19 mm

104478	65513	zinc casting, nickel-coated, 200 pcs in package

Dowel – DU 328 / DU 261

code	Hettich code	description
105023	65540	200 pcs in package

- for VB 35/35 M, VB 36/36 M, VB 135
- euro thread, for 3 mm drilling diameter
- fastening dimension: 6,7 mm
- galvanised steel

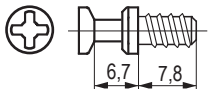

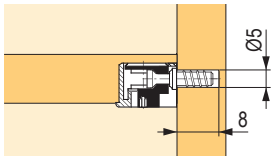

Dowel – DU 322 / DU 260

code	Hettich code	description
105022	64872	200 pcs in package

- for VB 35/35 M, VB 36/36 M, VB 135
- euro thread, for 5 mm drilling diameter
- fastening dimension: 6,7 mm
- galvanised steel

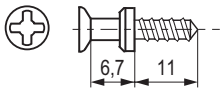

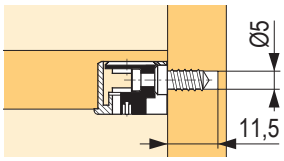

Dowel – DU 321 / DU 279

code	Hettich code	description
104997	74688	200 pcs in package

- only for VB 35/35 M, VB 36/36 M, VB 135
- with high rim
- euro thread, for 5 mm drilling diameter
- fastening dimension: 6,7 mm
- galvanised steel

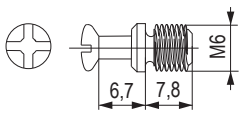

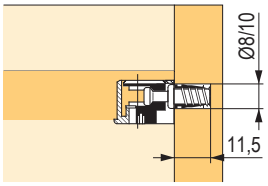

Screw in dowel – DU 648

code	Hettich code	description
105038	65534	200 pcs in package

- thread M6 × 7,8 mm
- fastening dimension: 6,7 mm
- steel

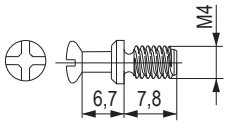

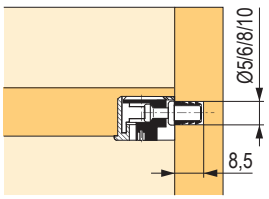

Dowel – DU 426

code	Hettich code	description
105028	65370	200 pcs in package

- for VB 35/35 m, VB 36/36 m, VB 135
- M4 × 7,8 mm thread
- fastening dimension: 6,7 mm
- steel

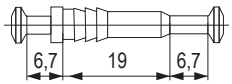

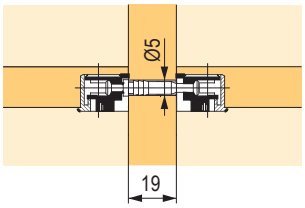

Double dowel – DU 867

code	Hettich code	description
105057	65536	200 pcs in package

- for VB 35/35 m, VB 36/36 m, VB 135
- for dividing wall with a thickness of 19 mm
- drilling diameter: 5 mm
- fastening dimension: 6,7 mm
- steel

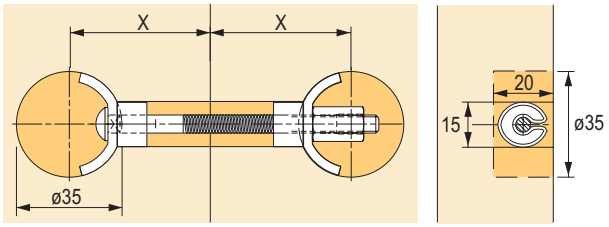

shelf connectors, connecting bolts

AVB 5 connector

code	Hettich code	length (mm)	dimension X (mm)	package
104702	25084	65	30–37	50 pcs
104704	79386	100	48–55	50 pcs
104703	16048	150	73–80	50 pcs

- for shape-stable and firm connection of worktops
- drilling for the housing ø 35 mm
- min. drilling depth 20 mm
- two rounded clamping plates
- two pre-mounted clips ensure easy installation: they hold the clamping plates and connectors in correct position, permitting easy insertion into drilling or routed recess – while leaving both hands free for bracing
- chromate-treated steel

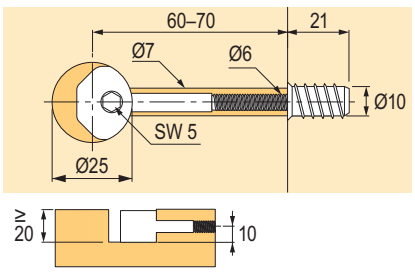

Connecting bolt – VB 25 T

code	Hettich code	description
104752	9079555	50 pcs in package

- integrated 90° gear with internal hexagon socket allows convenient and quick removal with a cordless screwdriver or hexagon wrench No. 5
- hole diameter for housing 25 mm
- housing: zinc casting
- bolt and sleeve: galvanised steel

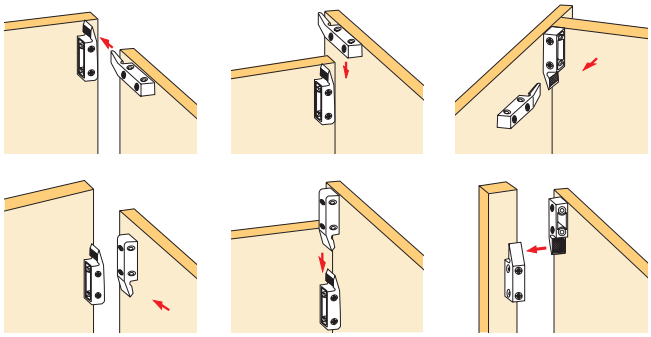

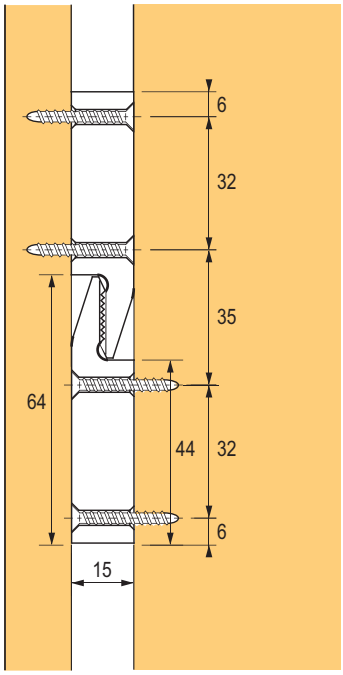

MultiClip cabinet hanger

code	Hettich code	description
104127	46080	200 pcs in package

- only one plastic component is the base of the MultiClip cabinet hanger; this prevents the swap of parts by mistake, minimising the risk of incorrect assembly
- MultiClip has a square cross section and can therefore be mounted from any side
- hole pitch of 32 mm allows it to be used in system 32
  fastening tabs are slightly bent inwards; after suspending, they will clip and thus provide firm connection for suspended parts
- the notched surfaces on the inner sides of fastening tabs strengthen connection and allow greater tolerance during assembly; this also enables adjustment of suspended parts

fixing by screws with a countersunk head, diameter 4 mm

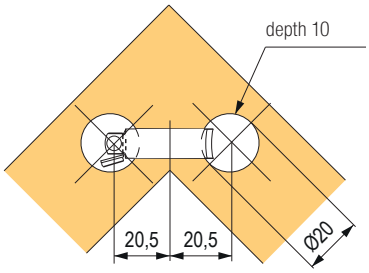

shelf connectors, connecting bolts

Mitre joint – VB 160

code	Hettich code	description
104163	47608	100 pcs in package

- for flat door frames or ring profiles
- recess depth only 10 mm
- brown plastic housing

Hinge hook ø 6 × 50 mm

code	Hettich code	description
104630	46103	100 pcs in package

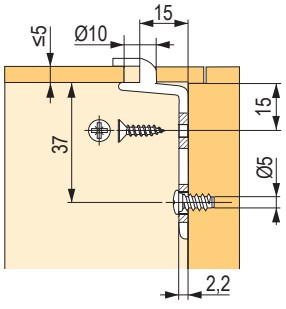

- steel wall plug ø 8 × 40 mm
- plastic

Back connector – RV 1

code	Hettich code	description
103856	19558	100 pcs in package

- nickel-coated zinc casting

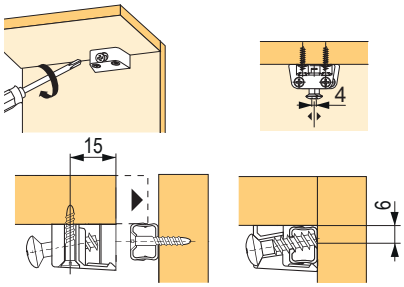

Trapezoidal connecting fittings – TZ 4 STD

code	Hettich code	description
103883	20891	100 pcs in package

- with a pre-mounted screw
- housing: nickel-coated zinc casting
- guide part: steel

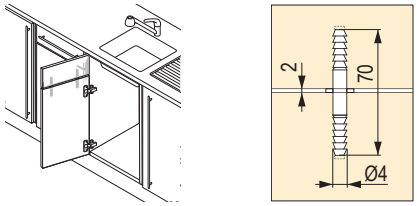

Connecting part for fronts VB 15

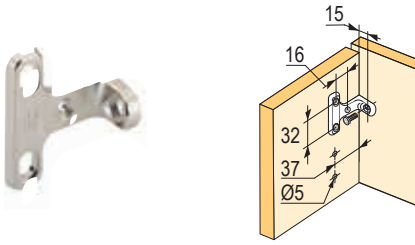

code	Hettich code	description
104680	79666	100 pcs in package

- including plastic washer, thickness 2 mm
- galvanised steel

Back connector – RV 7 D

code	Hettich code	description
106759	56614	100 pcs in package

- nickel-coated zinc casting

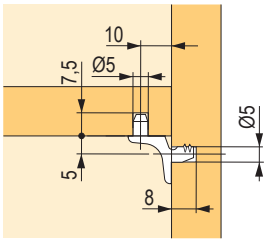

shelf supports

Shelf support – Sekura 1.1

code	Hettich code	description
106523	19557	500 pcs in package

- pin diameter 5 mm
- 1 safety pin
- nickel-coated zinc casting

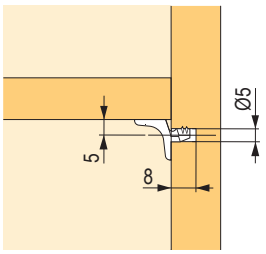

Shelf support – Sekura 2

code	Hettich code	description
106512	25100	500 pcs in package

- pin diameter 5 mm
- nickel-coated zinc casting

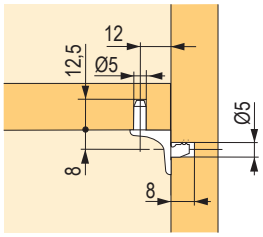

Shelf support – Sekura 6

code	Hettich code	description
106513	79707	500 pcs in package

- pin diameter 5 mm
- 1 additional safety pin
- nickel-coated zinc casting

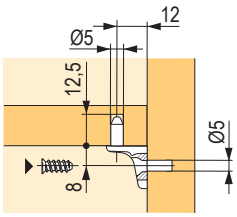

Shelf support – Sekura 7

code	Hettich code	description
106514	53012	500 pcs in package

- hole diameter 5 mm for euro screw, diameter 6.3 mm with countersunk head
- 1 additional safety pin
- nickel-coated zinc casting

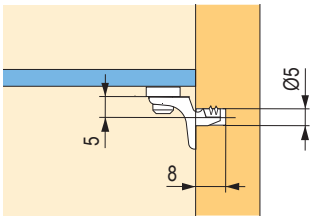

Glass shelf support – Sekura 8

code	Hettich code	description
184626	47609	500 pcs in package

- pin diameter 5 mm
- nickel-coated zinc casting, transparent plastic

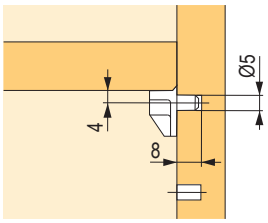

shelf supports

Support – Safety

code	Hettich code	description
106511	16180	500 pcs in package

- steel dowel with clear plastic supporting part

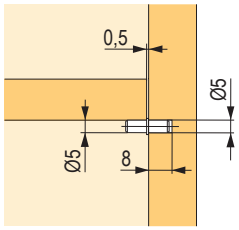

Shelf support – Duplo

code	Hettich code	description
106489	46642	nickel-coated, 500 pcs in package
106491	13138	chromate-treated, 500 pcs in package

- steel

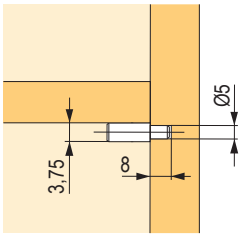

Shelf support with a rim

code	Hettich code	description
106502	16181	500 pcs in package

- chromate-treated steel

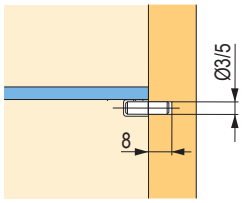

Glass shelf support

code	Hettich code	description
106516	79709	pin diameter 5 mm, 500 pcs in package
106515	79710	pin diameter: 3 mm, 500 pcs in package

- with clear plastic cover cap
- soft plastic supporting part eliminates “clacking” of glass shelves
- chromate-treated steel pin, transparent plastic

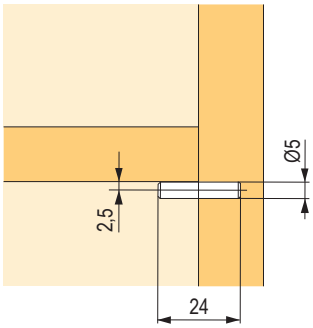

Shelf support 5 × 24 mm

code	Hettich code	description
106488	25124	pin diameter 5 mm, 500 pcs in package

- galvanised steel

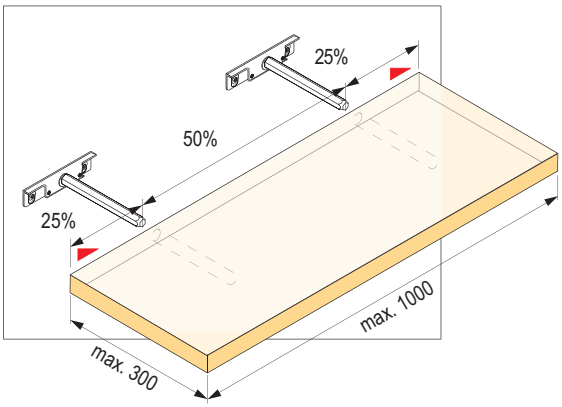

shelf holders

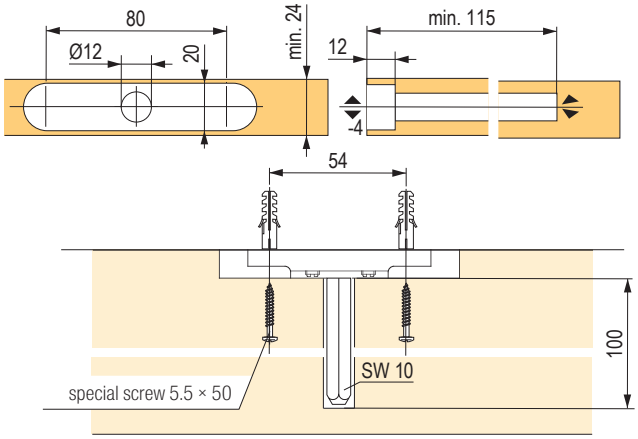

Shelf holders – Titan

code	Hettich code	description
106060	47661	20 pcs in package

- concealed mounting
- max. load including shelf 9 kg with using 2 holders
- max. load capacity with shelf dimensions 1000 × 300 mm is 50 kg/m², 1000 × 250 mm is 100 kg/m², 1000 × 200 mm is 160 kg/m²
- max. load capacity includes the weight of the shelf
- bearing pin: SW 10 mm
- height adjustment: ± 4 mm
- min. shelf thickness: 24 mm
- shelf tilt adjustment
- galvanised steel

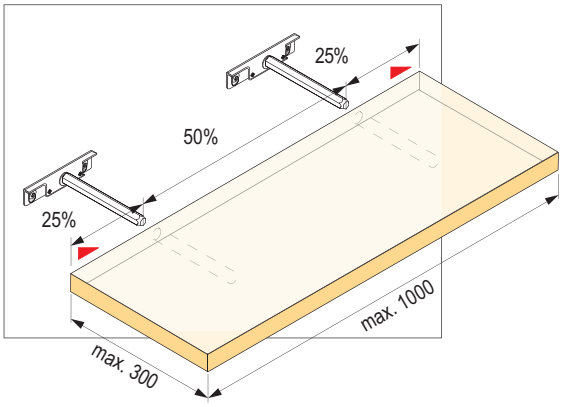

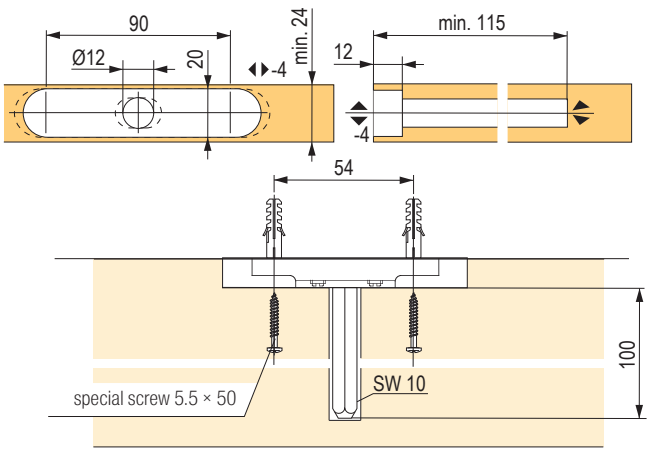

Shelf holders – Titan 1

code	Hettich code	description
106061	79713	20 pcs in package

- concealed mounting
- max. load including shelf 9 kg with using 2 holders
- bearing pin: SW 10 mm
- height adjustment: ± 4 mm
- side adjustment: ± 4 mm
- min. shelf thickness: 24 mm
- shelf tilt adjustment
- galvanised steel

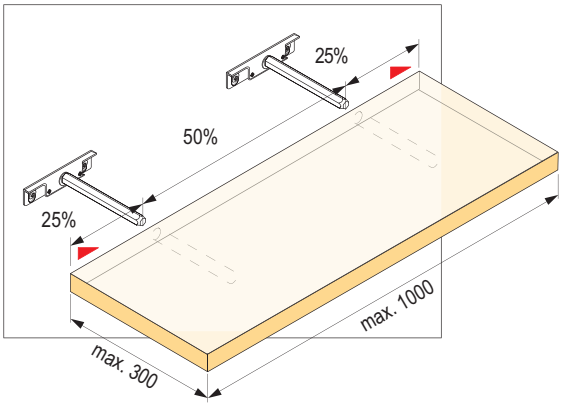

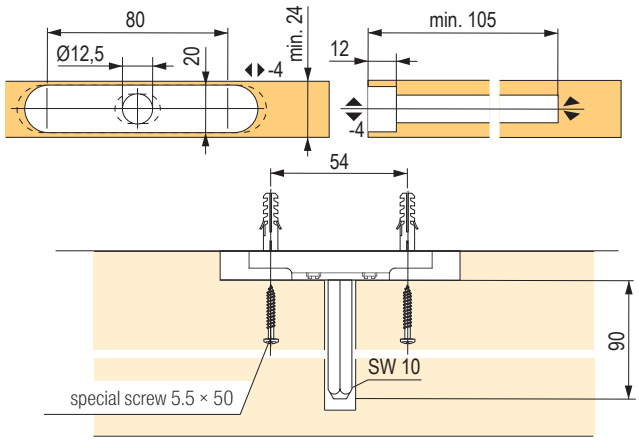

Shelf holders – Titan 2

code	Hettich code	description
106062	63598	20 pcs in package

- concealed mounting
- max. load including shelf 9 kg with using 2 holders
- bearing pin: ø 12 mm
- height adjustment: ± 4 mm
- min. shelf thickness: 24 mm
- shelf tilt adjustment
- galvanised steel

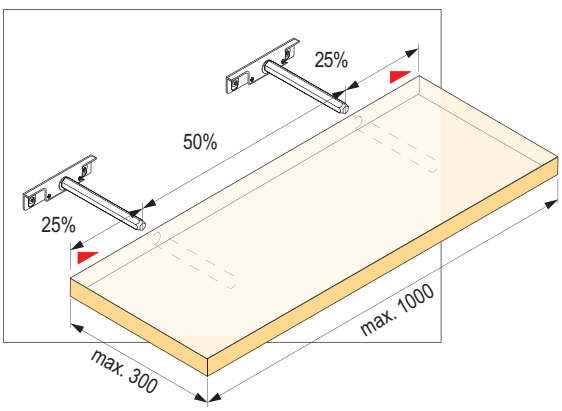

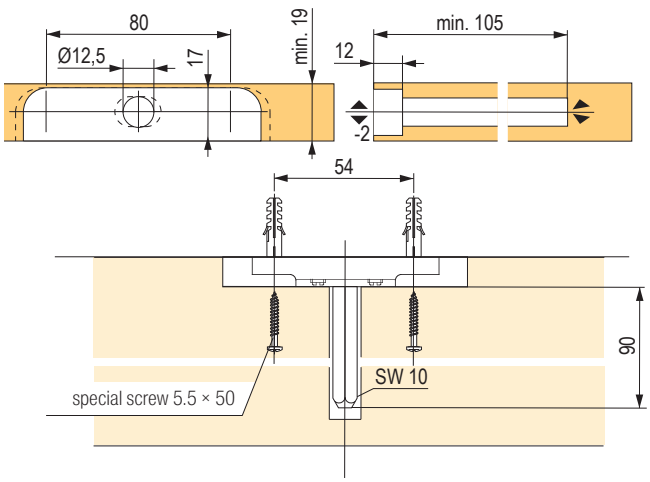

Shelf holders – Titan 3

code	Hettich code	description
106064	79714	20 pcs in package

- concealed mounting
- max. load including shelf 9 kg with using 2 holders
- bearing pin: ø 12 mm
- height adjustment: ± 2 mm
- min. shelf thickness: 19 mm
- shelf tilt adjustment
- galvanised steel

adjustable cabinet hangers for top cabinets

APC 1 cabinet hanger

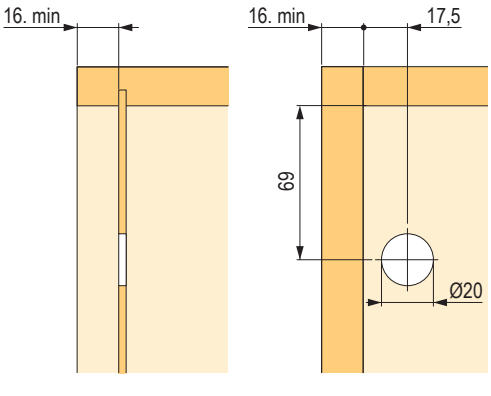

code	description
396226	concealed adjustable cabinet hanger, set

- right-hand adjustable fitting, hidden behind the rear wall of the cabinet
- only the 20 mm diameter cover cap is visible from the front side
- mounting by screw fixing into the wall and cabinet body
- height adjustment 18 mm; depth adjustment 31 mm; lateral adjustment approx. 45 mm (by sliding on the wall plate)
- load capacity 70 kg/pc, 140 kg/pair

Set contains:
- two pieces of fittings
- wall plates
- white plastic cover caps
- screws into the cabinet body (6 pcs)

APC 6 cabinet hanger

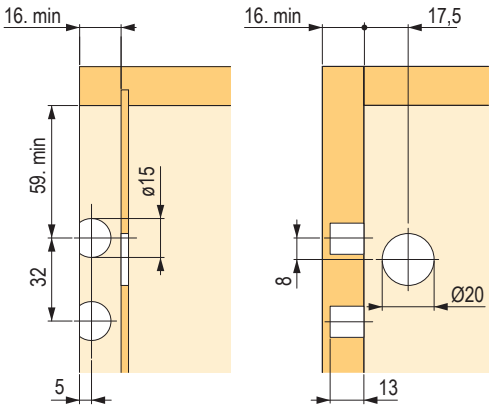

code	description
396227	concealed adjustable cabinet hanger, set

- adjustable cabinet hanger for the right and left side, hidden behind the back panel of the cabinet
- only the 20 mm diameter cover cap is visible from the front side
- assembly on pins in pre-drilled holes in the sides of the cabinet body with securing by screws in the sides or in the bottom of the cabinet body
- height adjustment 18 mm; depth adjustment 31 mm; lateral adjustment approx. 45 mm (by sliding on the wall plate)
- load capacity 65 kg/pc, 130 kg/pair

Set contains:
- one pair of hangers
- wall plates
- white plastic cover cap
- screws into the cabinet body (6 pcs)

ITALIANA ferramenta

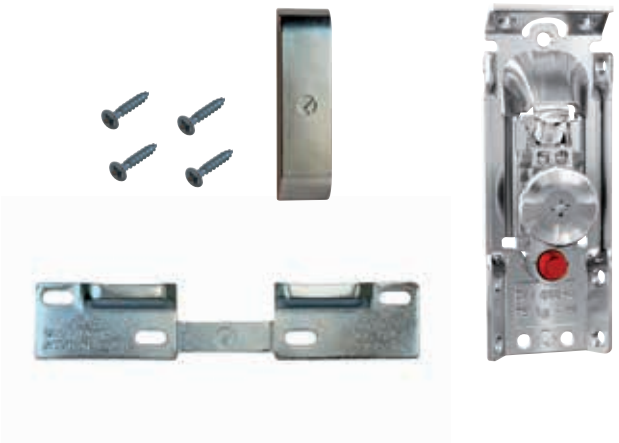

adjustable cabinet hangers for top cabinets

Libra H1 cabinet hangers with locking

code	description
361269	set for one cabinet (including template)

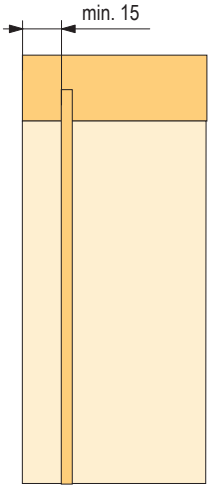

- right-hand adjustable cabinet hangers
- secured with eccentric clamp and screws
- locking bolt against unhinging of the cabinet from hanging profile in accordance with the standard EN14749
- load capacity 130 kg / pair
- height adjustment 13 mm; depth adjustment 12 mm; lateral adjustment approx. 30 mm (by sliding on the wall plate)
- for cabinet body depth up to 350 mm (top cabinets)
- for wall mounted installation, the 352537 wall bar can also be used

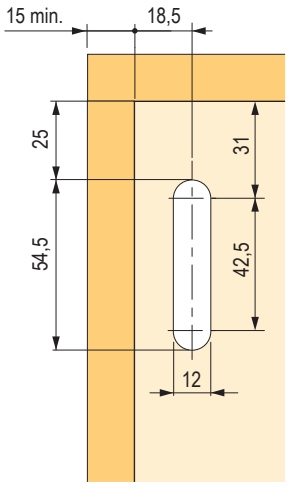

The set includes:
- pair of cabinet hangers and cover caps
- assembly template
- wall plate
- screws into the cabinet body

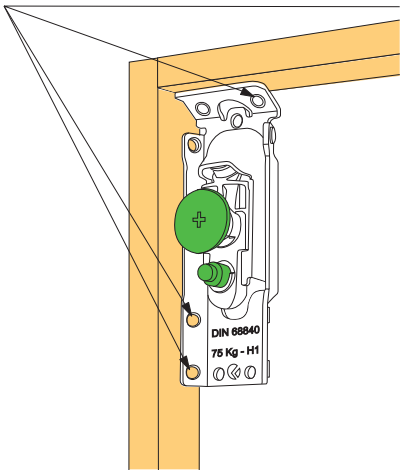

Installation of the cabinet hangers

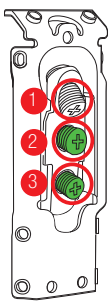

drilling holes for adjustment

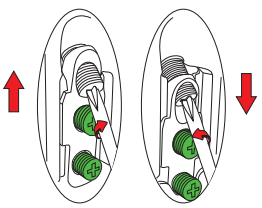

recommended fastening screws ø 3.5 × 20

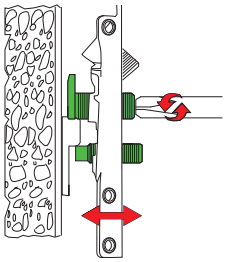

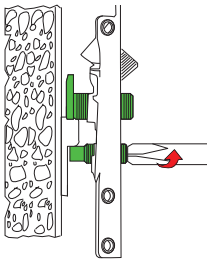

1 – height adjustment

2 – adjustment of offset from the wall

3 – safety latch against unhinging

adjustable cabinet hangers for top cabinets

Libra H2 cabinet hanger with locking

code	description
134959	right-hand

- right-hand adjustable cabinet hangers
- secured with eccentric clamp and screws
- locking bolt against unhinging of the cabinet from hanging profile in accordance with the standard EN14749
- load capacity 150 kg / pair
- the back should be inserted 16 mm from the rear edge of the cabinet body
- height adjustment 13 mm, depth adjustment 12 mm
- for cabinet body depth up to 350 mm (top cabinets)

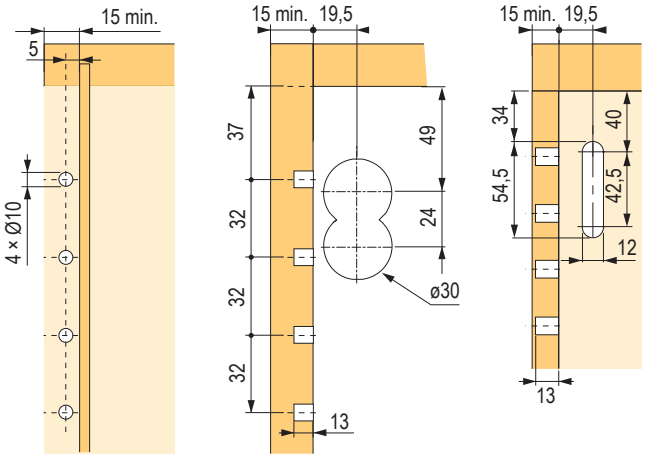

recommended wall bar 352537, or wall plates 134964 or 134965

Cover caps

code	type	colour
134963	wide	white
160564		grey
227087	narrow	nickel

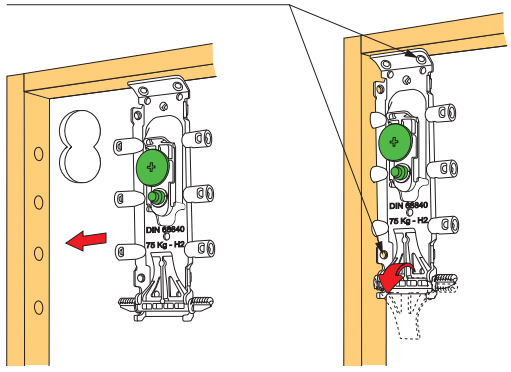

- for drilling 30 mm

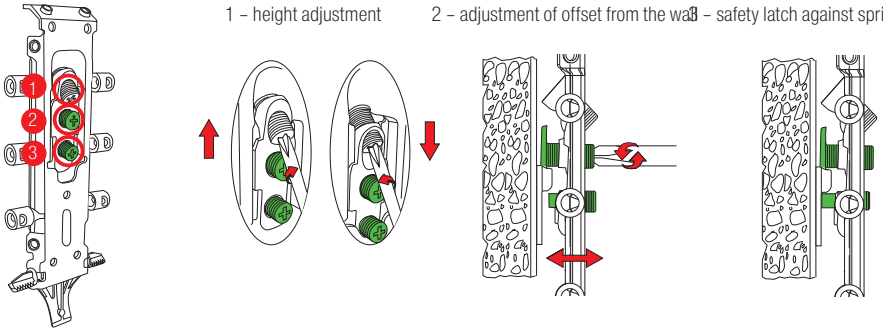

Drilling holes for adjustment

Installation of the cabinet hangers

recommended fastening screws ø 3.5 × 20

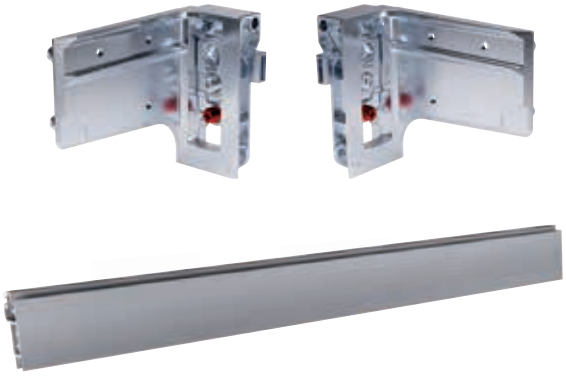

ITALIANA ferramenta

adjustable cabinet hangers for bottom cabinets

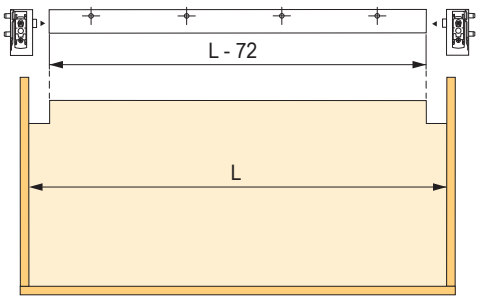

Libra H7 cabinet hanger with locking

code	description
231361	set of hangers for one cabinet
231362	aluminium profile, 2 m

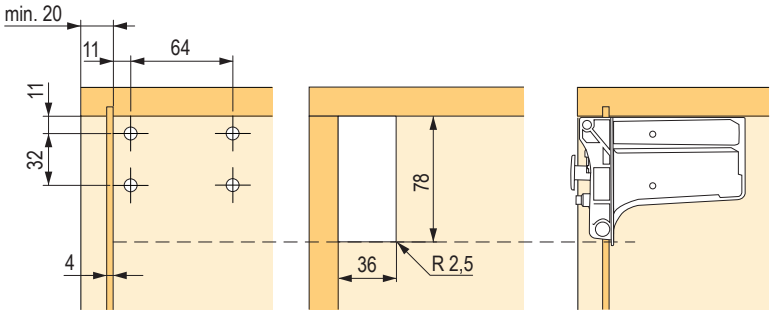

Notes:
- locking bolt against unhinging of the cabinet from hanging profile in accordance with the standard EN14749
- load capacity up to 210 kg
- height adjustment 13 mm, depth adjustment 12 mm
- flat design of cabinet hanger (only 3.5 mm), possibility of using a deep drawer without limitations
- load capacity of the hangers affects the type of anchor and base material
- the set includes – a pair of cabinet hangers, wall plate WP5 and fixing fasteners
- connecting aluminium profile must be ordered separately

Optimal number of fixing holes according to the recommendations and consideration of the installer

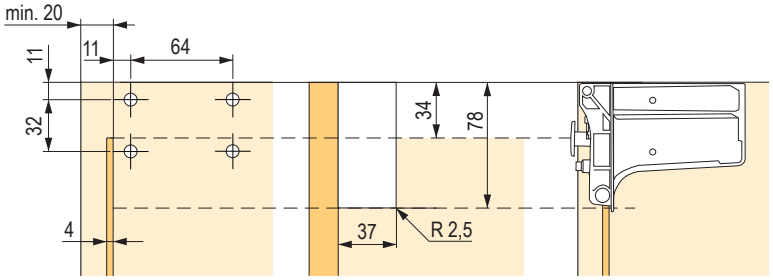

drilling with rear panel with thickness of 4 mm

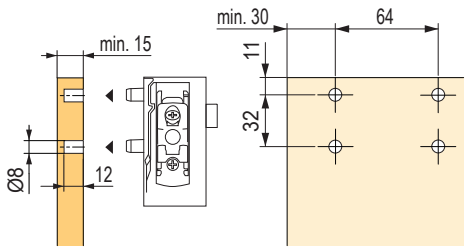

recommended number of holes

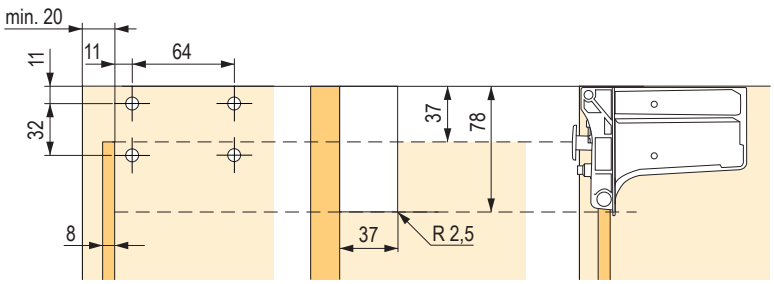

outer cabinet body width	number of holes
≤ 450	×
451–600	1
601–950	2
951–1200	3
≥1201	4

drilling plan with rear panel thickness 4 mm and aluminium profile

drilling without rear panel

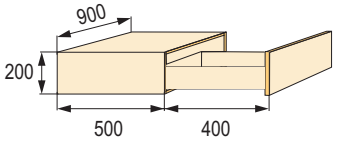

12345 Item in stock **12345** Item on demand

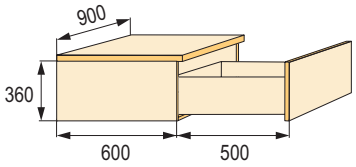

adjustable cabinet hangers for bottom cabinets

Load capacity depending on cabinet body dimensions

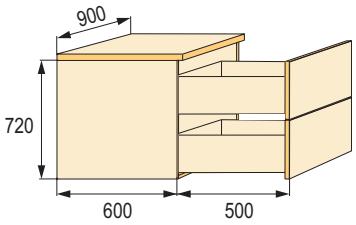

cabinet body type	without using a profile	with profile with two anchor holes
cabinet body without a drawer	120 kg	160 kg
cabinet body + drawer	80 + 30 kg	120 + 30 kg

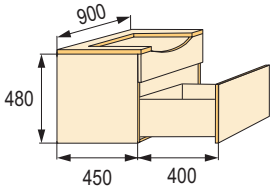

cabinet body type	without using a profile	with profile with two anchor holes
cabinet body without a drawer	150 kg	180 kg
cabinet body + drawer	110 + 30 kg	140 + 30 kg

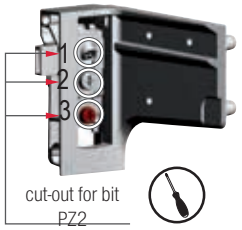

cabinet body type	without using a profile	with profile with two anchor holes
cabinet body without a drawer	170 kg	210 kg
cabinet body + drawer	100 + 60 kg	140 + 2× 30 kg

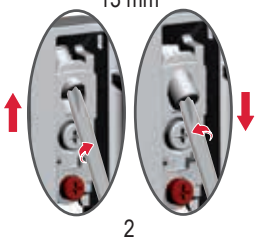

cabinet body type	without using a profile	with profile with two anchor holes
cabinet body without a drawer	170 kg	210 kg
cabinet body + drawer	130 + 30 kg	170 + 30 kg

The reported data, empirically obtained, exclusively refer to the constructions and examples shown, correctly positioning and assembled by using wall plate.

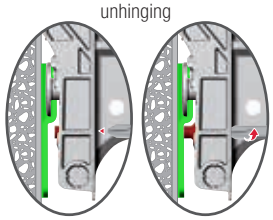

1
height adjustment:
13 mm

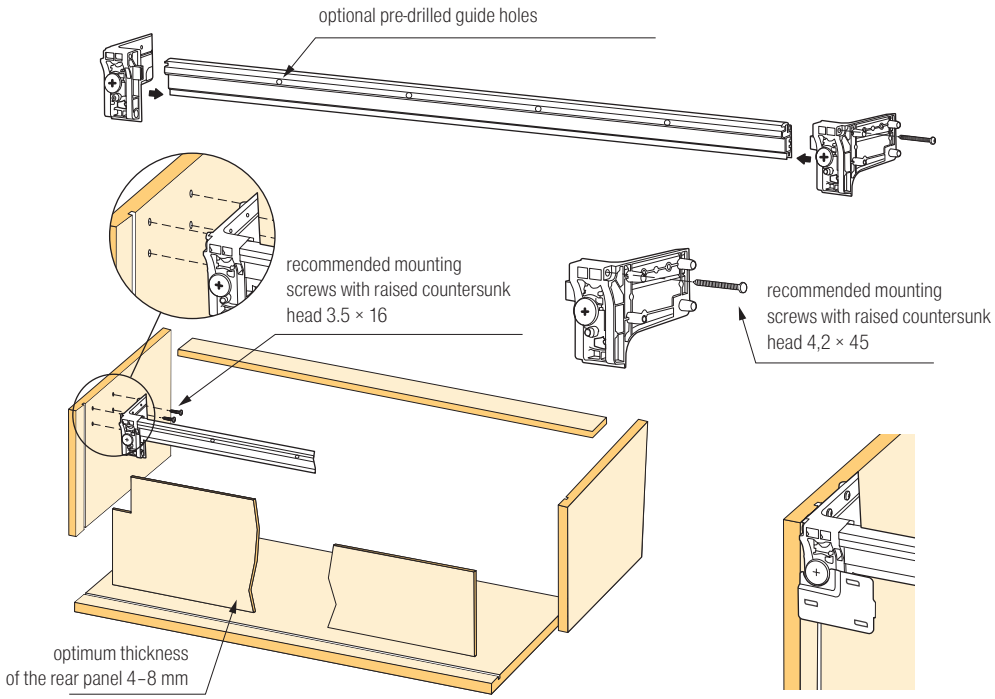

2
depth adjustment:
12 mm

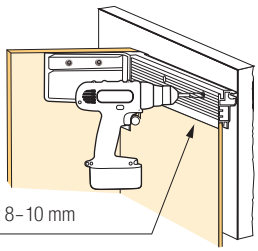

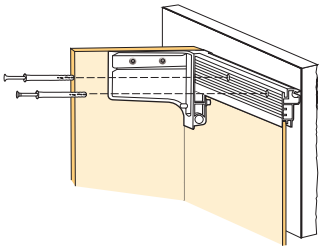

3
safety latch against unwanted unhinging

extra fixing holes
Pre-drilled holes facilitate drilling the wall. Their use reduces the stress put on the left- and right-sided hinges.

RESPONSIBILITY OF THE INSTALLER
- to find out whether the wall onto which the cabinet will be hinged is sufficiently strong and well adjusted
- to adapt mounting and suspension to the wall quality

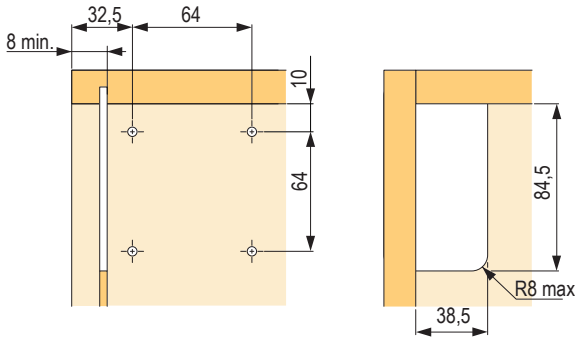

ITALIANA ferramenta

Fittings for toilet cubicles

The fittings are made of AISI 304 stainless steel and structural elements of aluminium anodised profiles.
This makes them suitable for places with increased humidity, chlorine or salt content. Damp environment combined with compact laminate worktops is not a problem for these fittings and is therefore ideal for projects in swimming pools, changing rooms and others. Individual components are ready for use with HPL compact laminate board of 12 mm with complete connecting fittings. Fittings for other board thicknesses are available on request.

Set example:

The cubicle requires (depending on the type, number, ...):

- hinges (2–3 pcs for 1 door)
- set of closer and indicator
- door handle
- door backstop
- components for construction – choose from aluminium or stainless steel profiles depending on the type
- adjustable leg
- angle brackets

Screw-on hinges

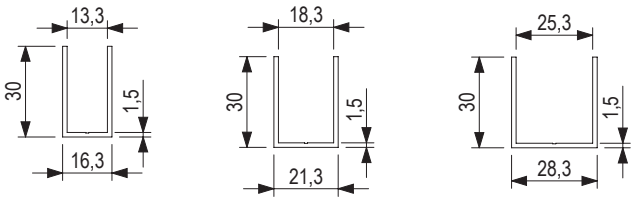

code	description	screw-on
248251	Toilet hinge, left SH70	12 mm

414708	Toilet anodised aluminium top profile 10/25 mm, length 3.2 m

Handle

code	description
248242	door handle H38

- handle (knob) is most often placed above the lock
- supplied with connecting fittings

Adjustable leg

code	description
310841	height: 150 mm, 12 mm
320753	height: 150 mm, 18 mm

- supplied with connecting fittings

Backstop

code	description
248243	door backstop

- supplied with connecting fittings

fittings for toilet cubicles

Construction accessories

code	description
248259	Toilet connecting pipe 32 mm, length: 3 m
248260	Toilet pipe wall attachment
310516	Toilet top fixing clamp, type T, for 12 mm[1]
340563	Toilet top fixing clamp, type T, for 18 mm[1]
248261	Toilet corner pipe connector 90°[2]
248262	Toilet T pipe connector[3]
248270	Toilet top fixing clamp 90°

[1] Delivered with connecting fittings for the installation of 12 mm or 18 mm boards. Used to connecting pipe extension and board mounting.
[2] Used to corner connection of pipes.
[3] Used to connecting pipe extension and upright connecting pipe connection.

SEPARATE CATALOGUE

For a complete overview with examples of interior handles, see the separate design catalogue of Tulip handles. Use it when making selection with the customer.

3D MODELS FOR FURNITURE PLANNING SOFTWARE

All handles are prepared in 3D for planning programs. You can download them on our portal demos24plus.com.

SAMPLE ROOM DISPLAYS

The best way to choose the handles is to see them in person. We have them on display in our sample rooms so that the prospective buyer can attach them to the chosen door decor.

PORTAL

A customer portal for purchasing, order overview, job submission, formatting, and status tracking. All in one place: stock availability, your prices, and much more.

ADVISORY SERVICE

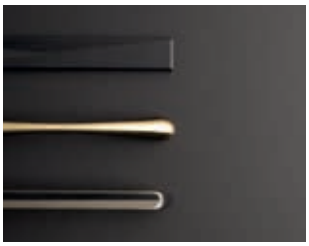

Not sure how to choose or assemble the fittings? Call +420 596 223 455 or email export@demos-trade.com and we will be happy to help you.

DELIVERY TO YOUR DOOR

All orders will be delivered to your hands within 72 hours.

SAMPLE ROOM DISPLAYS

Kitchen sinks and kitchen taps can be selected by looking through this catalogue, but how can you check what they actually look like? Come and see for yourself, or send your customers to our sample room. We will demonstrate everything to them and help them make the right choice.

PORTAL

A customer portal for shopping, order overview, placing formatting orders and checking their status, information about stock and your prices and much more in one place.

ADVISORY SERVICE

Not sure how to choose or assemble the fittings? Call +420 556 684 310 or email export@demos-trade.com and we will be happy to help you.

DELIVERY TO YOUR DOOR

All orders will be delivered to your hands within 72 hours.

FRANKE

built-in kitchen hoods

External exhaust

- Higher performance – the odour filter reduces the performance of the recirculation hood by up to 20%.
- Greater safety – leads all fumes outside the kitchen.
- Quieter operation.
- Cheaper operation – no need to change odour filters.
- Backdraft shutter not included.

Recirculation

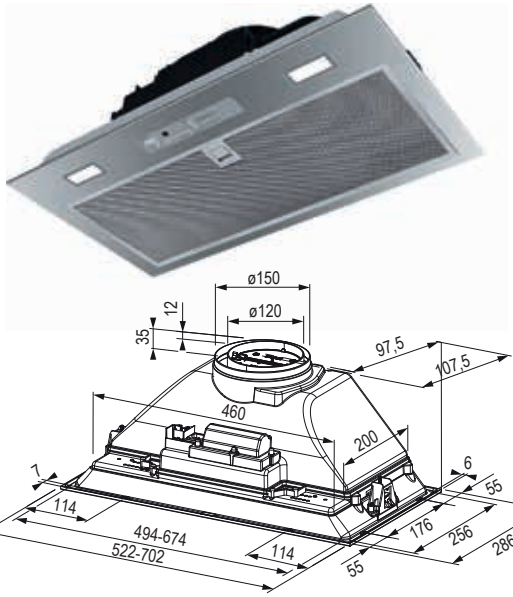

- Most Franke kitchen hoods can also be used for recirculation when the filtered air goes back to the room.
- Activated charcoal odour absorbing filters are not included in the delivery (unless stated otherwise).
- There is also the option to purchase a long service life filter where the filter can be washed 5–8 times in the dishwasher.

BLANCO

Blanco kitchen sinks

quality, design and functionality in every detail

The range features three premium materials:
- stainless steel, Silgranit®, PuraDur®, and PuraPlus® ceramic, each offering unique advantages.

Stainless steel - classic elegance
BLANCO's high-quality premium stainless steel is synonymous with cleanliness, durability, and versatile design.

Key features:
- resistant to corrosion and high temperatures
- hygienic and easy to maintain
- timeless appearance suitable for any kitchen
- available in various surface finishes (e.g. satin gloss, smooth texture, Durinox®).

Silgranit® PuraDur® - modern elegance
Exclusive granite composite made from approx. 80% natural quartz. Combines the beauty of stone with the practical properties of a modern material.

Key features:
- resistant to scratching, staining, and common kitchen acids,
- non-porous, smooth surface that repels dirt,
- easy maintenance and hygienic safety (suitable for contact with food),
- wide range of colours with a silky stone surface,
- colourfast even after prolonged exposure to light.

PuraPlus® ceramic
- natural beauty and durability

Natural appearance with exceptional durability.

Key features:
- high resistance to temperatures, scratching, and common household substances
- colourfast even after prolonged exposure to sunlight
- smooth, non-porous surface with PuraPlus® treatment – repels water and dirt,
- easy maintenance and a long-lasting clean appearance.

Blanco granite kitchen sinks

BLANCO granite sinks made from the original Silgranit® PuraDur® material are a combination of modern technology and the natural beauty of stone.

The material, developed and manufactured in Germany, contains approximately 80% natural quartz sand, which guarantees its high strength, durability, and long service life.

The Silgranit® PuraDur® surface has a silky matt, pleasant-to-touch 'stone' character and is available in a wide colour palette that can easily be coordinated with the worktop and tap. Thanks to its special composition and closed structure, it is exceptionally durable and at the same time easy to maintain.

Key features of Silgranit® PuraDur® material:
- High resistance to scratching, impact, and common kitchen substances.
- Resistance to the high temperatures of everyday kitchen use – hot pots and baking trays can be placed on it without concern.
- Natural resistance to common household acids (e.g. vinegar, lemon juice).
- Smooth, non-porous surface repels dirt and makes cleaning easier.
- Hygienically safe material – suitable for contact with food, with Hygiene+Plus antibacterial treatment.
- Colourfast and UV-resistant – colour does not change even with prolonged use.
- Luxurious appearance with the natural texture of stone – combining aesthetics and practicality.

waste disposers

EcoMaster Economy EVO3 for small households

code	description
354034	1/2 HP (375 W)

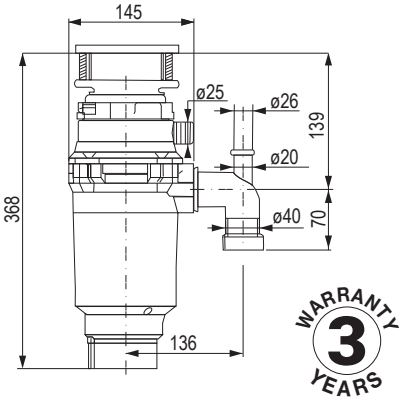

- designed for small households or for places with non-standard or very tight mounting space
- all crushing components are made of stainless steel
- noise damping by covered motor

TECHNICAL INFORMATION:

- speed: 2600 rpm
- torque: 1.5 Nm
- chamber volume: 1.48 l
- crushing segments: stainless steel, reinforced blades
- weight: 4.4 kg

EcoMaster Standard EVO3 for regular households

code	description
337729	3/4 HP (550 W)

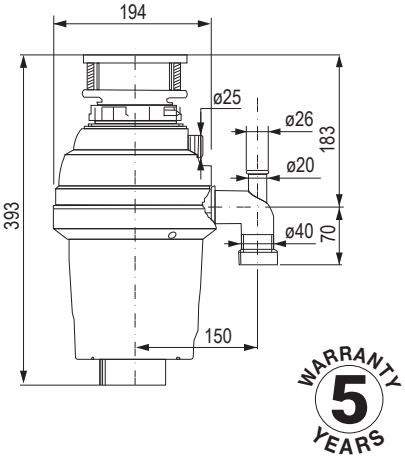

- suitable for all normal households and in places with a lack of space under the kitchen sink
- all of its crushing components are made of stainless steel; sufficient power and motor damping

TECHNICAL INFORMATION:

- speed: 2700 rpm
- torque: 1.8 Nm
- chamber volume: 1.48 l
- crushing segments: stainless steel, reinforced blades
- weight: 5 kg

EcoMaster DELUXE EVO3 kitchen food waste disposer for the most demanding users

code	description
337731	3/4 HP (550 W)

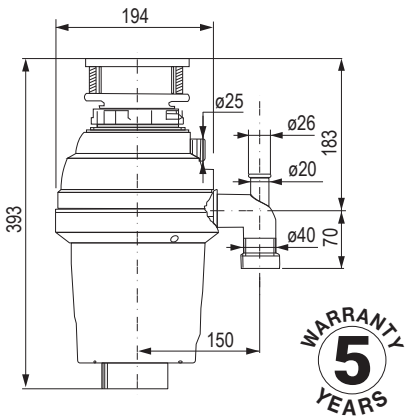

- suitable for larger households
- a great choice for those who do not like compromise and enjoy luxuriousness
- from a technical point of view, this waste disposer delivers perfection to all elements in the smallest detail
- compared to cheaper models, it has the biggest crushing chamber, the best overall noise damping of the chamber and motor
- the crushing ring is higher and, in addition, equipped with a double row of perforations for faster and finer crushing

TECHNICAL INFORMATION:

- speed: 2700 rpm
- torque: 1.8 Nm
- chamber volume: 1.9 l
- crushing segments: stainless steel, reinforced blades
- weight: 5.7 kg

EcoMaster LCD EVO3 kitchen food waste disposer for catering facilities

code	description
337734	1 HP (750 W)

- for medium-demanding commercial facilities with a frequency of 200 to 300 meals per hour
- kitchens, restaurants, schools, hospitals, retirement homes, congregate care facilities, canteens

TECHNICAL INFORMATION:

- speed: 2800 rpm
- torque: 2 Nm
- chamber volume: 1.9 l
- crushing segments: stainless steel, reinforced blades
- weight: 5.7 kg

Pneumatic switch for EcoMaster waste disposers

code	colour
367540	matt stainless steel
500886	polished chrome
500888	black matt
500889	matt white

- serves as a controller to start the waste disposer (direct connection to the waste disposer)
- standard positioning in the kitchen sink area, same as the kitchen tap (35 mm hole)
- waste disposers can be used also without this controller (using a switch-operated electric socket)

Tubular siphon for EcoMaster waste disposers

code	description
231705	plastic

- recommended for faultless assembly of waste disposer

Hose for EcoMaster pneumatic switch

code	description
500890	air hose approx. -+1 m

- the hose of the pneumatic switch is designed to be connected directly to the waste disposer
- together with the button is used to control the waste disposer.
- air hose approx. -+1 m

aluminium frames, furniture tambour doors

DELIVERIES OF COMPLETE DOORS MADE OF ALUMINIUM FRAMES INCLUDING GLASS

We can supply you with customised doors according to your specifications using the online configurators or order forms available for download on our website.

DELIVERIES OF COMPLETE SETS OF TAMBOUR DOORS

We can supply you with a customised set of tambour door slats including track system according to your specifications using online configurators or order forms available for download on our website.

SAMPLE ROOM DISPLAYS

How do some tambour door systems work or look like? Come and see for yourself, or send your customers to our sample room. We will walk them through everything and help them make the right choice.

PORTAL

A customer portal for purchasing, order overview, job submission, formatting, and order status tracking. Stock availability, your prices, and much more – all in one place.

ADVISORY SERVICE

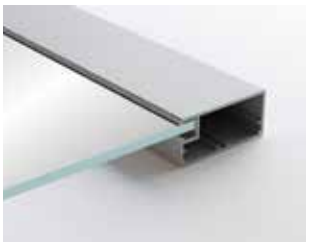

Not sure how to choose or assemble the fittings? Call +420 556 684 310 or email export@demos-trade.com and we will be happy to help you.

DELIVERY TO YOUR DOOR

All orders will be delivered to your hands within 72 hours.

aluminium frames

Aluminium frames

- aluminium frames are custom made according to customer requirement – as standard, we offer frames with hinges, frames for lift fittings, sliding frames (including fittings)
- aluminium frames are delivered including glass, they are assembled according to requirements, with drilled or milled holes for fittings
- we can of course drill holes for handles according to the customer's requirements
- the holes in the profile itself have a diameter of 4.9 mm and 7 mm in the glass, with a plastic spacer attached to each hole to prevent glass breaking
- always use the current version of the form on our website www.demos-trade.com to calculate the price and place your order
- glass thickness: 4 mm
- possibility of inserting horizontal and vertical partitions into frames (partitions come from BRW or Vivaro profiles)

aluminium anodised	white polished	black matt	gold	white matt

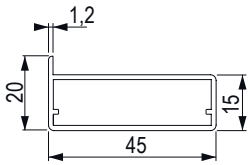

- weight: 0.42 kg/m

the diagram showing the position of the connecting component can be found on p. 13.7

- not suitable for transparent glass (visible glued joint)

Pisa

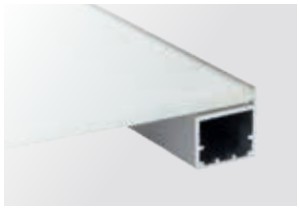

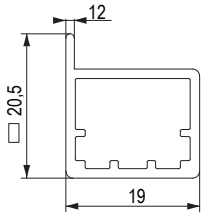

01	02	05	12	14
aluminium anodised	white polished	black matt	gold	white matt

- weight: 0.44 kg/m
- glass frame panel is 3 mm smaller compared to outer frame dimension
- not suitable for transparent glass (visible glued joint)

Asti

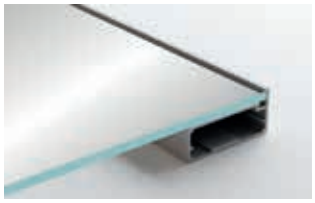

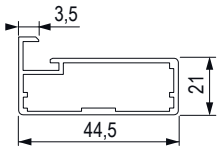

05	14
black matt	white matt

- weight: 0.27 kg/m
- glass frame panel is 3 mm smaller compared to outer frame dimensions
- not suitable for transparent glass

Corleone

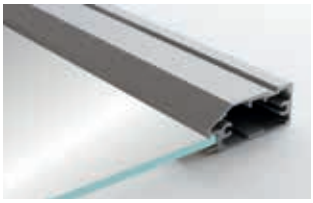

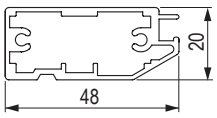

01	05
aluminium anodised	black matt

- weight: 0.50 kg/m
- glass frame panel is 4 mm smaller compared to outer frame dimension
- maximum recommended frame dimensions is 1500 × 600 mm

the diagram showing the position of the connecting component can be found on p. 13.7

Siena

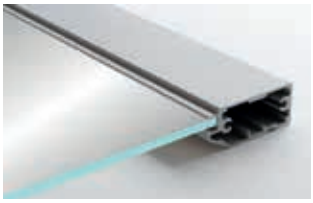

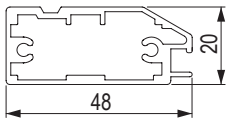

01
aluminium anodised

- weight: 0.72 kg/m
- glass frame panel is 87 mm smaller compared to outer frame dimension

Palio

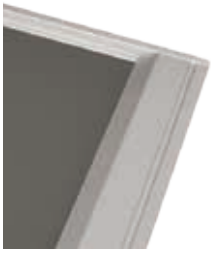

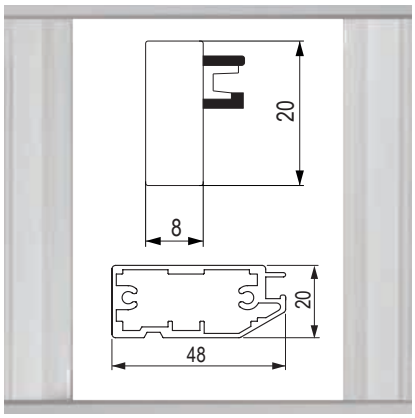

01
aluminium anodised

- weight: 0.72 kg/m
- glass frame panel is 87 mm smaller compared to outer frame dimension

aluminium frames combined

Varna – Siena

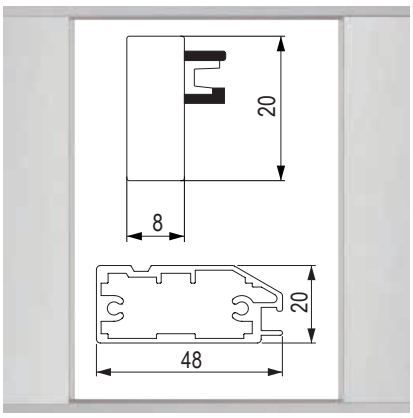

01
aluminium anodised

- the weight of the Varna profile: 0.47 kg/m
- the weight of the Siena profile: 0.72 kg/m
- the glass frame panel is 87 mm smaller than the outer dimensions of the frame in the case of the Siena profile, 18 mm smaller in the case of the Varna profile

holes for hinges cannot be drilled in the Varna profile, therefore in the case of opening doors we recommend to use the Varna profile always for the width of the frame and the Siena, Palio or Rocca profiles for the height.

Varna – Palio

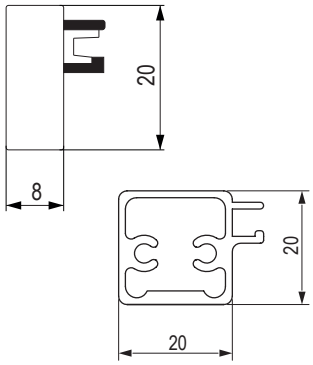

01
aluminium anodised

- the weight of the Varna profile: 0.47 kg/m
- the weight of the Palio profile: 0.72 kg/m
- the glass frame panel is 87 mm smaller than the outer dimensions of the frame in the case of the Palio profile, 18 mm smaller in the case of the Varna profile

holes for hinges cannot be drilled in the Varna profile, therefore in the case of opening doors we recommend to use the Varna profile always for the width of the frame, and the Siena, Palio or Rocca profiles for the height

Varna – Rocca

01	05
aluminium anodised	black matt

- the weight of the Varna profile: 0.47 kg/m
- the weight of the Rocca profile: 0.45 kg/m
- the glass frame panel is 43 mm smaller than the outer dimensions of the frame in the case of the Rocca profile, 18 mm smaller in the case of the Varna profile

holes for hinges cannot be drilled in the Varna profile, therefore in the case of opening doors we recommend to use the Varna profile always for the width of the frame, and the Siena, Palio or Rocca profiles for the height

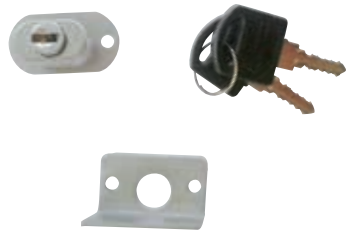

Dividers

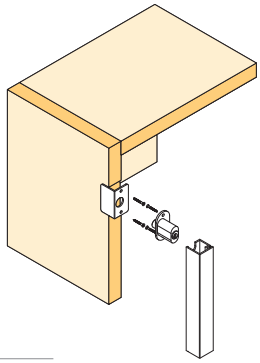

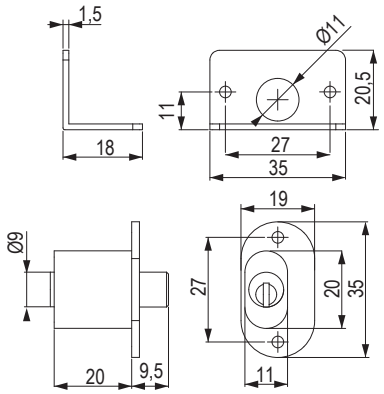

- only BRW and Vivaro profiles can be used as a dividing (transition) profile

FurnSpin: slide and turn fitting

An elegant turn reveals the interior of the furniture. The open doors will not obstruct the passageway – here, the entire cabinet body moves with effortless ease. With another turn, the interior disappears from view and the furniture once again shows its closed face. "The Joy of FurnSpin" by Hettich inspires in any interior. The multi-award-winning FurnSpin fitting gives furniture manufacturers creative freedom to design truly new solutions.

- FurnSpin fitting sets are available in three sizes: S (80 kg), M (100 kg) and XL (120 kg)
- Version with Silent System soft closing or Push to open Silent for handleless furniture
- For furniture with a height from 700 to 2400 mm

Hettich

RAUVOLET Noble MATT tambour doors – sets

362784	for set dimensions: width 600, height 1000–1500
362786	for set dimensions: width 900, height 1000–1500

METALLIC LINE tambour doors – sets

- custom made tambour door sets ready for quick and simple assembly
- Rauvolet tambour door system 25 mm
- surface treatments: aluminium and brushed stainless steel
- the package contains all the necessary components
- individual set dimensions match the usual cabinet sizes
- designed for minimum clear depth of the cabinet body 265 mm or rather 276 mm (25 mm profile)
- for material of the thickness 15–19 mm
- atypical sets can be custom made using the order form available at www.demos-trade.com

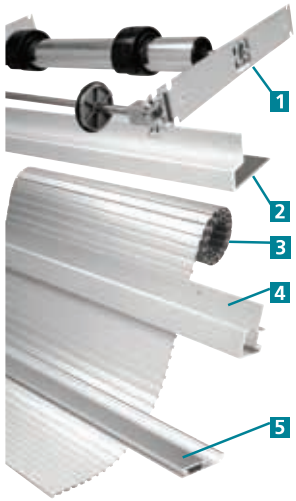

Sets of custom made tambour doors

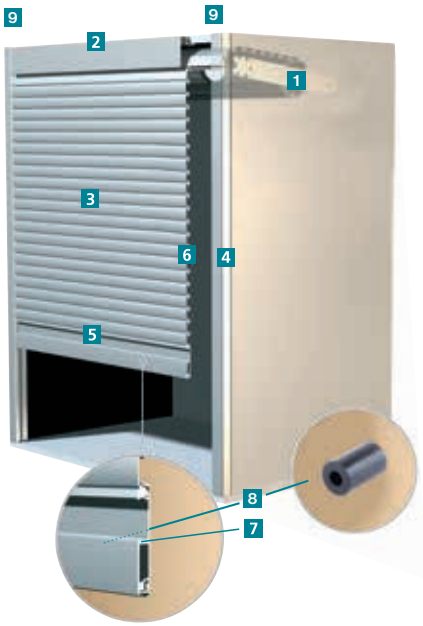

code	cabinet height (mm)	cabinet width[1] (mm)	surface treatment	height of the tambour door profile (mm)
157936	600 – 1 000	600	aluminium	25
157937	1 000 – 1 500			
157939	1 000 – 1 500	900		
157940	600 – 1 000	600	stainless steel	
157941	1 000 – 1 500			
157943	1 000 – 1 500	900		

[1] the outer dimensions with a cabinet body wall thickness of 18 mm is calculated

Metallic-line sets structure

1 – C3 counterbalance mechanism
2 – pelmet
3 – Metallic Line tambour door profile
4 – overlay track system with running track 29 mm
5 – slam rail with integrated grip profile and backstop profile
6 – glide for Metallic Line tambour door profile
7 – slam rail glide
8 – plastic stop for slam rail
9 – end cap for 29 mm running track

individual components on page 13.34

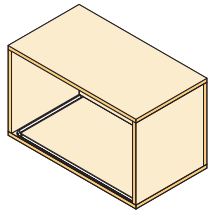

overview of running profiles

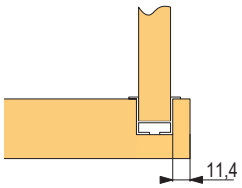

Classic recessed track system – 8 mm

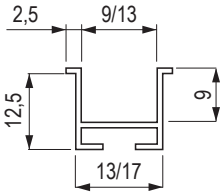

- running tracks are embedded into a pre-milled groove inside the cabinet
- milling width 13 mm (for 8 mm), or 17 mm (for 12 mm – suitable for high tambour doors with horizontal movement)
- milling depth 12.5 mm

Recommended tambour door profiles:
E23 Plastic (8 mm), p. 13.23–24
E4 Plastic (12 mm), p. 13.25
E9 Plastic (8 mm), p. 13.26
Winding system:
- backwall
- spiral

Applicable mechanisms for vertical running direction:
- C8
- Caddy
- C6

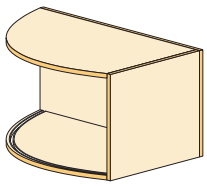

Recessed track system Flexi – 13mm

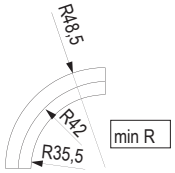

- flexi track system allows the tambour door to be curved into an arch
- spiral winding can be formed from the running profile while keeping minimum arch size
- milling width 13 mm, milling depth 13 mm
- running tracks are embedded into a pre-milled groove inside the cabinet
- running profile available in black and grey only
- Flexi track system can only be bent in one direction

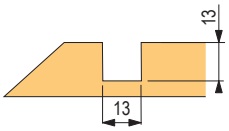

Recommended tambour door profiles:
E23 Plastic (8 mm), p. 13.23–24
E9 Plastic (8 mm), p. 13.26
Winding system:
- backwall
- spiral formed from a running profile

Applicable mechanisms for vertical running direction:
- C8
- Caddy
- C6

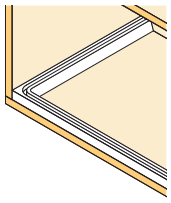

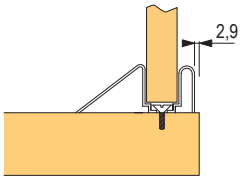

Top Basic fitted track system – screwed

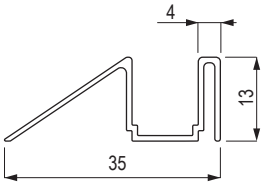

- all-plastic track system
- simple assembly: no milling, just adjust the length of the rail and screw
- possible additional assembly into already completed cabinets
- assembly with running corners and attachment with screws
- running tracks are parallel with the inside edge of the cabinet
- the running tracks intended for the tambour door profiles in the colour of aluminium (plastic) and wood decor are available only in the uni colours (decor with no pattern)

Recommended tambour door profiles:
E23 Plastic (8 mm), p. 13.23–24
Winding system:
- backwall

Applicable mechanisms for vertical running direction:
- C8
- C6
- possible also with C3 after adjusting the running profile

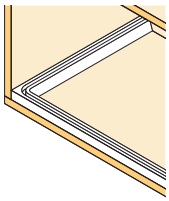

overview of running profiles

Top fitted track system – screwed with cover

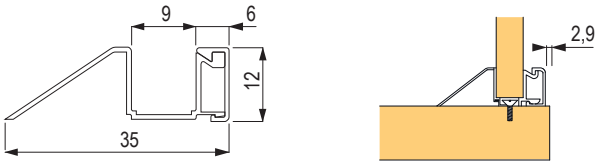

- aluminium running tracks, pelmets and slam rails
- surface-mounted track system for screwing inside the cabinet
- simple assembly: no milling, just adjust the length of the rail and screw
- possible additional assembly into already completed cabinets
- possible use of pelmets in the decors identical to colour of the tambour door profiles

Recommended tambour door profiles:
E23 Plastic (8 mm), p. 13.23–24
Metallic Line 25 mm, p. 13.30
E9 Plastic (8 mm), p. 13.26

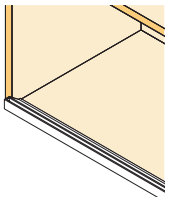

Winding system:
- backwall
- spiral
- C3 winding mechanism

Applicable mechanisms for vertical running direction:
- C3, C6, C8, Caddy

Frame overlay track system

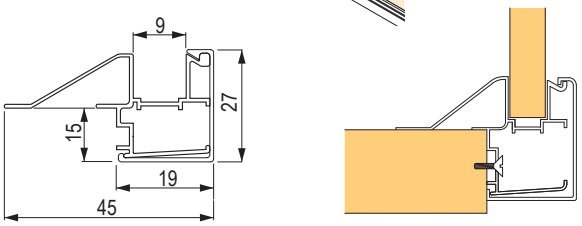

- overlay track system
- aluminium running tracks, pelmets and slam rails
- with approx. 15 mm overlay
- uniform design for cabinets with horizontal and vertical slide
- simple assembly: no milling, just adjust the length of the track and screw
- possible additional assembly into already completed cabinets
- possible use of pelmets in decors identical to colour of the tambour door profiles

Recommended tambour door profiles:
E23 Plastic (8 mm), p. 13.23–24
Metallic Line 25 mm, p. 13.30

Winding system:
- backwall
- spiral
- C3 winding mechanism

Applicable mechanisms for vertical running direction:
- C3, C6, C8, Caddy

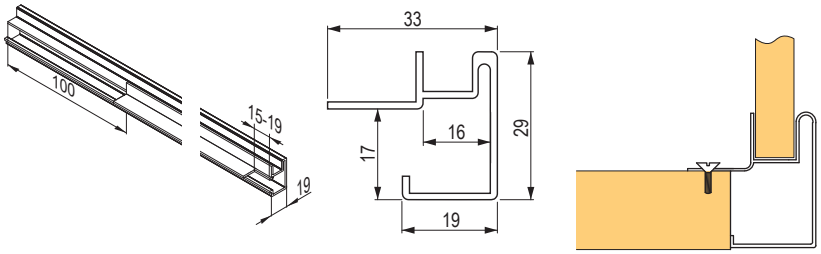

Overlay track system with running track 29 mm

- overlay track system
- only in aluminium and stainless steel decors
- intended only for vertical slide with C3 mechanism
- possible additional assembly into already completed cabinets

Recommended tambour door profiles:
Metallic Line 25 mm, p. 13.30

Winding system:
C3 winding mechanism, p. 13.37

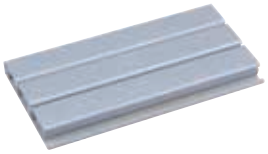

Drawing of the running track shortening

All for the furniture making

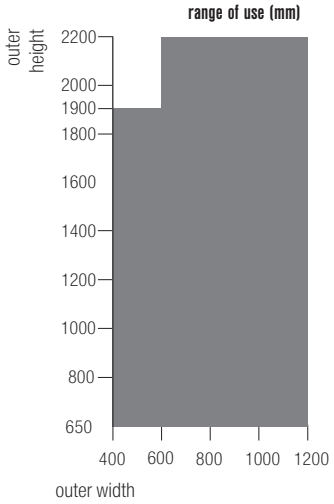

winding mechanism

C3

code	outer width (mm)	inner width (mm)
R93228	400	350 – 384
R92848	600	550 – 584
R92852	800	750 – 784
R92853	1 000	950 – 984
R92854	1 200	1150 – 1 164

- simple and quick assembly
- use for plastic tambour doors and Metallic Line
- mechanism with flexible width (34 mm range)
- max. cabinet height 2200 mm, only 1900 mm where the width is 600 mm
- better flexibility when using C3 extension adapter (R96219), for inner widths 350–1184 mm

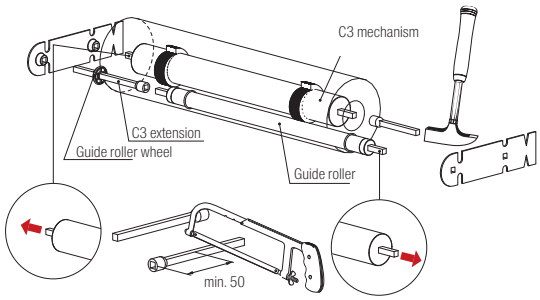

Extension adapter

code	max. extension (mm)	package
R96219	165	1 set

- extension adapter shortening calculation: **inner cabinet width – width of the drive C3 + 50 = total length of the C3 extension in mm**
- for C3 counterbalance mechanism
- the minimum length of the extension adapter is 50 mm
- if the length of the extension adapter is greater than 80 mm, it is necessary to use a guide roller wheel, which is located about 30 mm from the end of the extension adapter

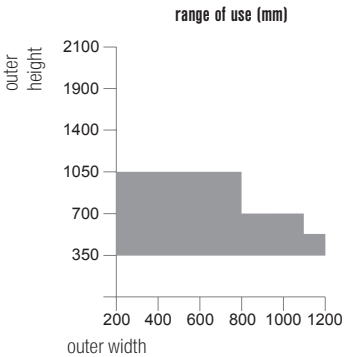

C6

code	description
R88329	suitable for all systems

- economic version suitable for all track systems, slide direction is only vertical
- can only be used in combination with tambour door profiles: E23 plastic, Metallic Line 20 mm

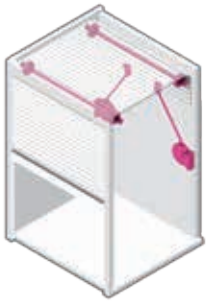

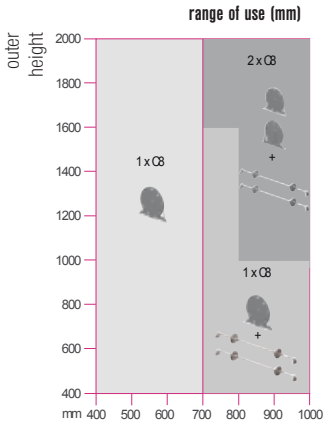

winding mechanism

C8

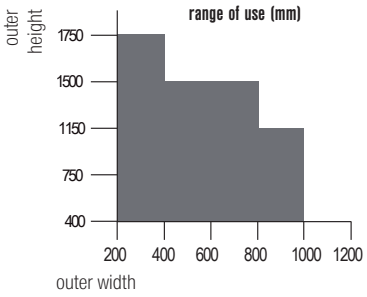

code	description
R00060	winding mechanism
R00039	set of support rods

- assembly only with the backwall track system
- the end of the tambour door must always be on the back of the body (even when closed)
- possible assembly into an already finished cabinet with tambour door (backwall track system necessary)

Caddy

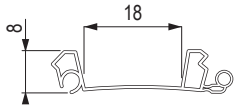

code	description
R00069	Caddy brake (right assembly) black

- only for tambour doors that open from top to bottom and wind up to spiral
- possible additional correcting of the braking effect of the finished cabinet from the outside
- easy assembly, minimum demands for cabinet body preparation
- assembly of one brake only (on the right), use the second brake, if needed (upon request)
- it is necessary to use a lock (type according to the slam rail), which keeps the tambour door closed

Centre handle profile

code	colour
R84093	black
R84094	white
R84095	grey

code	colour
R96940	aluminium (plastic)
R84096	beech

- these profiles can be combined with all track systems
- inserted between the slam rail and the tambour door profile or anywhere between profiles for better serviceability (for high cabinets)

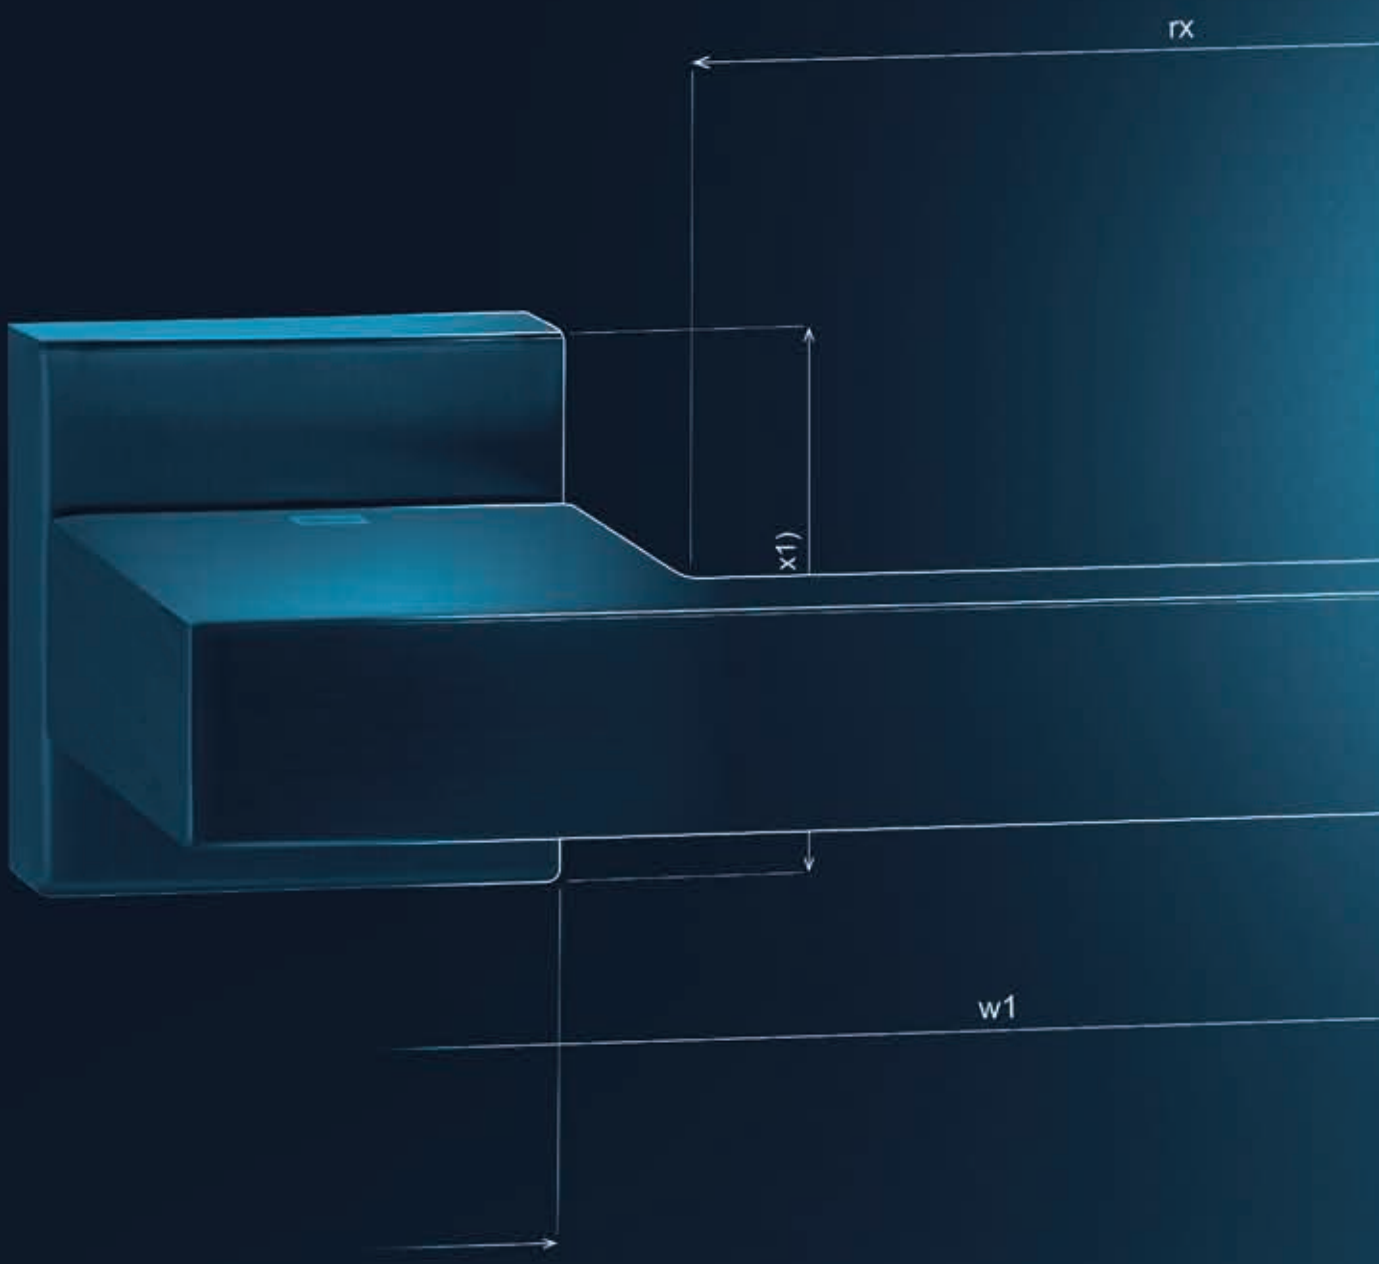

Adhesive tape 50 m

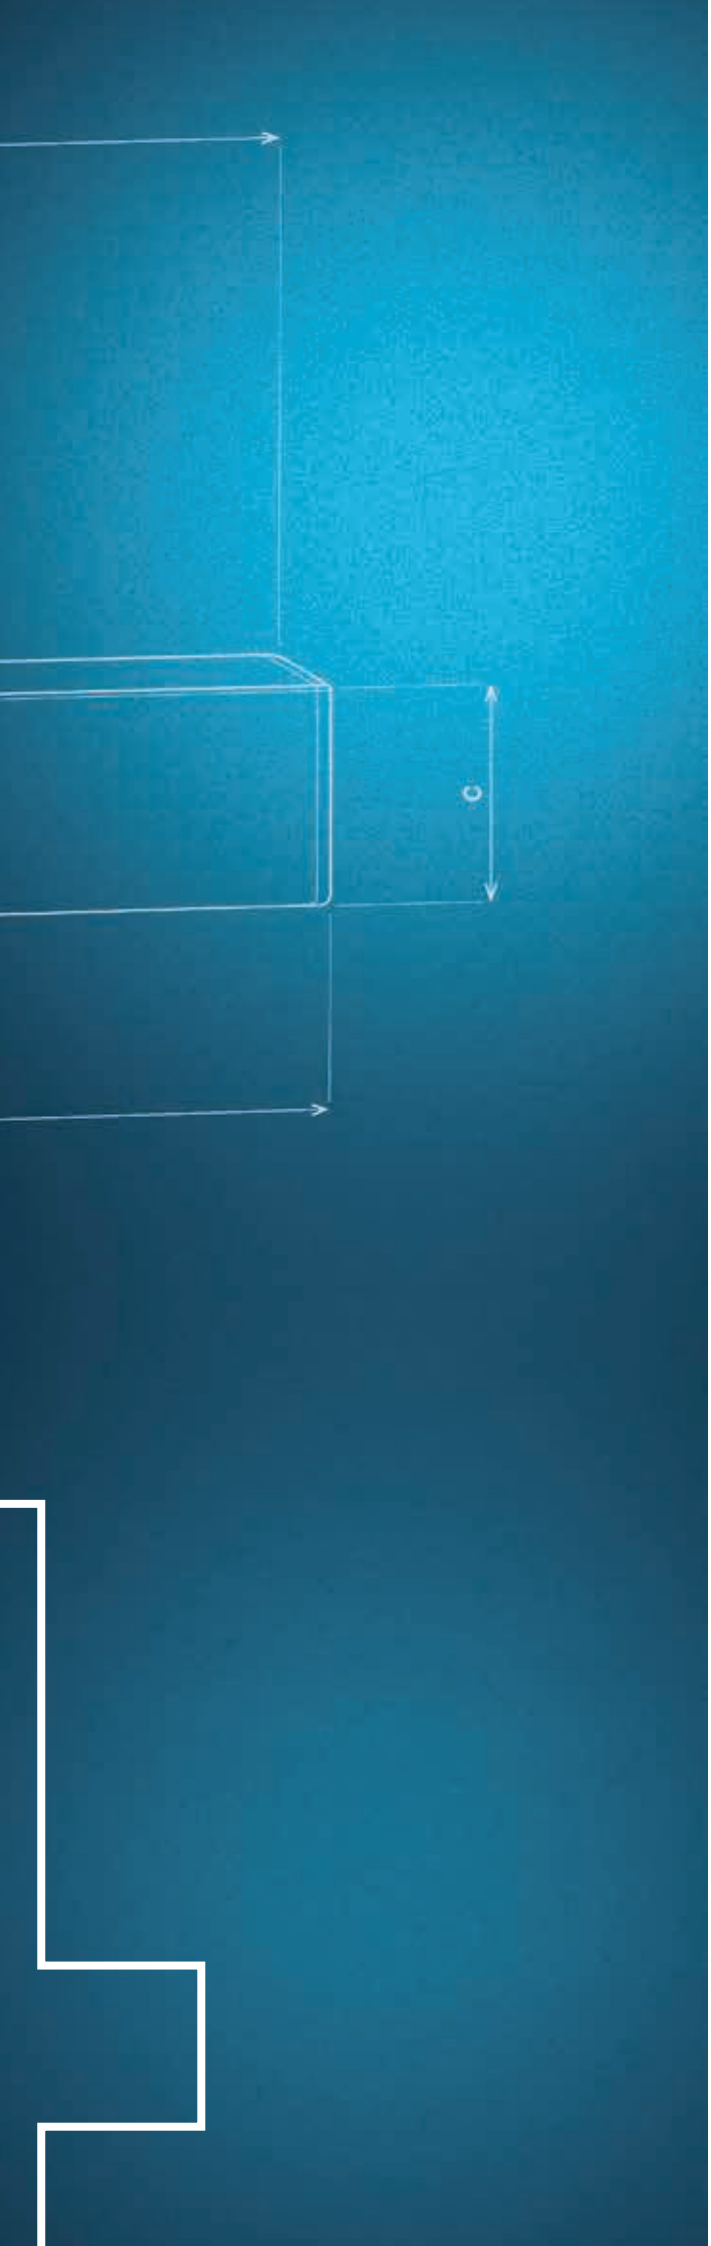

code	description
R95879	transparent (white fibres)

- recommended for strengthening the connection of individual tambour door profiles
- when preparing custom made sets, only the required metres are charged

fittings – non-standard

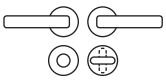

Types of door locks

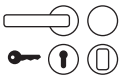

There are several abbreviations in the catalogue that indicate the lock type available. Select the type carefully with respect to which doors you will install the lock / handle on. – interior or safety doors.

Abbreviations indicate the lock type available:

BB  lock with a hole for a classic key for key-operated lock – flat entrance doors

PZ  lock for a key with cylinder insert – for entrance doors, offices

WC  set used for bathrooms and toilets, on the inside of the door there is a lock (so called "turn and release"), from the opposite outer side, there is a rose with a groove for opening in case of emergency

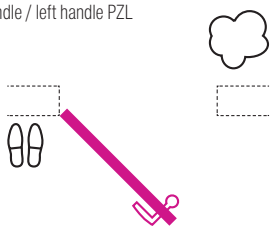

KPZL  set of knob – left handle, lock with cylinder insert, handle inside, knob outside

KPZR  set of knob – right handle, lock with cylinder insert, handle inside, ball outside

How to select a handle depending on the door opening direction and hinge position

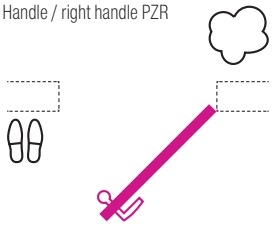

The following picture will help you to determine the direction of door opening and related orientation of the fitting:

Knob / left handle KPZL
Handle / left handle PZL

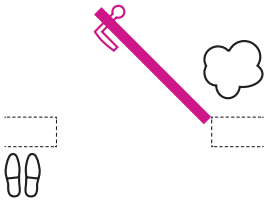

Left door, inward opening

Knob / right handle KPZR
Handle / right handle PZR

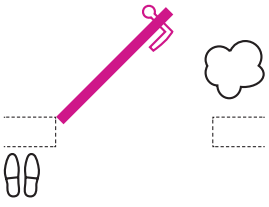

Right door, inward opening

Knob / right handle KPZR
Handle / right handle PZR

Left door, outward opening

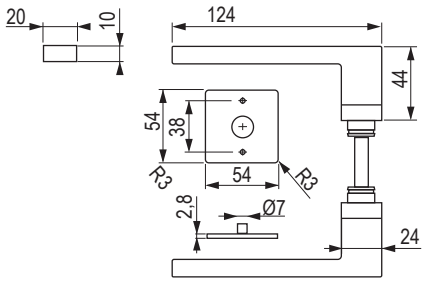

Knob / left handle KPZL
Handle / left handle PZL

Right door, outward opening

hinges for non-rebated doors

K2460, for medium-heavy non-rebated doors

code	description	colour
401655	K2460 hinge	satin chrome
402478	K2460 hinge	satin nickel
471257	K2460 hinge	black
256292	K2460 hinge clip for door-frame lining + screw[1]	
256293	K2460 hinge clip for door-frame lining + screw + cup[1]	

[1] accessories, see p. 14.19

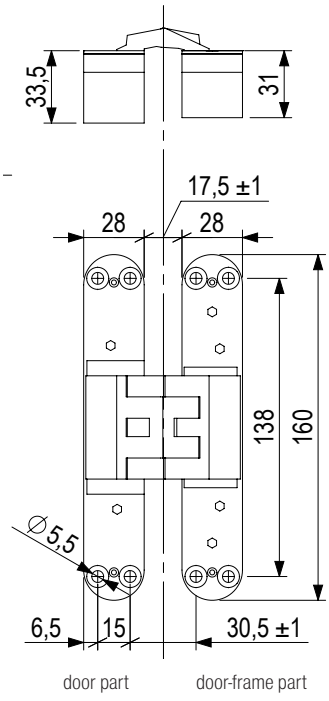

Advantages of the hinge:
- user-friendly adjustment in all 3 directions
- hinge mounting holes identical to the most common hinges on the market
- elegant design

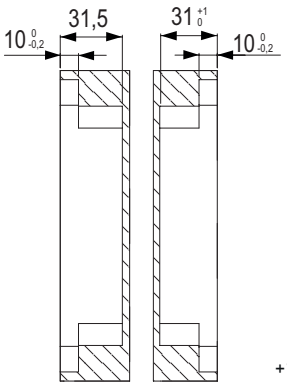

Hinge technical specifications:
- minimum door thickness: 26 mm when installing the hinge at the centre of the door
- load capacity for 2 hinges: 60 kg
- door dimensions: 600/900 × 2100 mm

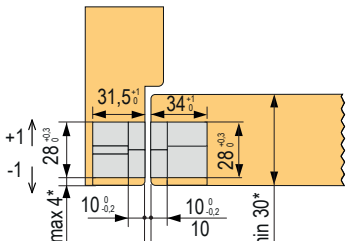

Adjustment in all 3 directions:
- height (Z): ± 3 mm
- right-left (X): ± 3 mm
- forward-backward (Y): ± 1.5 mm

K5080, for heavy non-rebated doors

code	description	colour

503288	K5080 hinge	black
255983	hinge clip for door-frame lining[1]	

[1] accessories, see p. 14.19
- screw-on hinge cover caps

Advantages of the hinge:
- user-friendly adjustment in all 3 directions
- hinge mounting holes identical to the most common hinges on the market
- timeless design

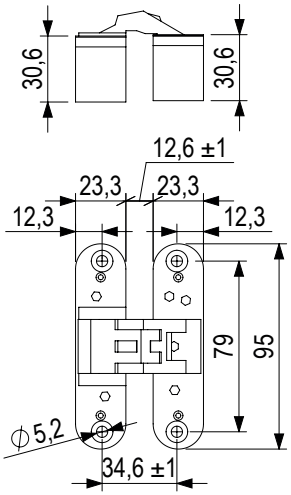

Hinge technical specifications:
- minimum door thickness: 36 mm when installing the hinge at the centre of the door
- load capacity for 2 hinges: 80 kg
- door dimensions: 600/900 × 2100 mm

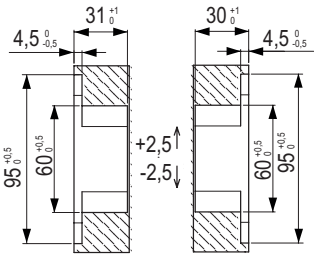

Adjustment in all 3 directions:
- height (Z): ± 3 mm
- right-left (X): ± 3 mm
- forward-backward (Y) ±1 mm

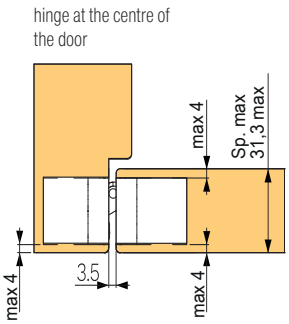

hinges for non-rebated doors

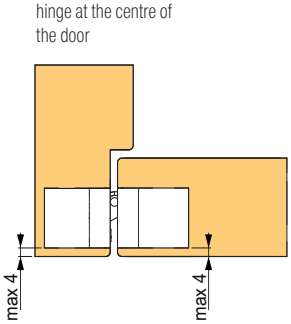

K6100, for non-rebated doors

code	description	colour
255984	K6200 hinge	satin chrome
549420	K6200 hinge	black
255986	door-frame lining clip[1]	

[1] accessories, see p. 14.19

- **Advantages of the hinge:**
- user-friendly adjustment in all 3 directions
- fireproo
- design

Technical specification of the hinge:

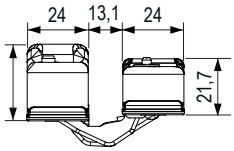

- minimum door thickness: 31 mm when installing the hinge at the centre of the door
- load capacity for 2 hinges: 45 kg door height up to 2100 mm
- load capacity for 3 hinges: 60 kg door height up to 2100 mm
- load capacity for 4 hinges: 60 kg door height over 2100 mm

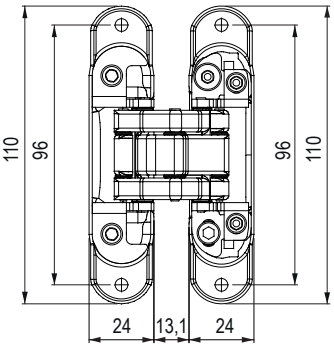

Adjustment in all 3 directions:

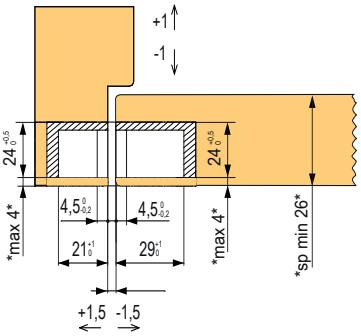

- height (Z): ± 2.5 mm
- right-left (X): ± 3 mm / ± 2 mm
- forward-backward (Y) ±1 mm

K8060, for medium-heavy non-rebated doors

code	description	colour
549416	K8060 hinge	satin chrome
549418	K8060 hinge	black
549419	door-frame lining clip[1]	

[1] accessories, see p. 14.19

- **Material:**
- steel
- higher load capacity compared to zamac
- user-friendly adjustment in all 3 directions
- magnetic cover caps

Technical specification of the hinge:

- minimum door thickness: 32 mm
- load capacity for 2 hinges: 60 kg

Adjustment in all 3 directions:

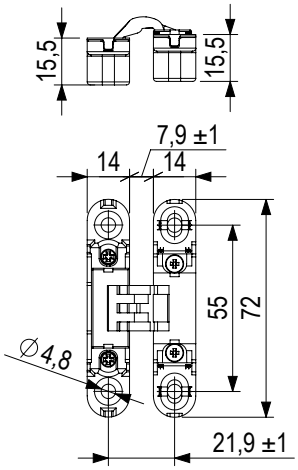

- height (Z): ± 2.5 mm
- right-left (X): ± 1.5 mm
- forward-backward (Y) ±1 mm

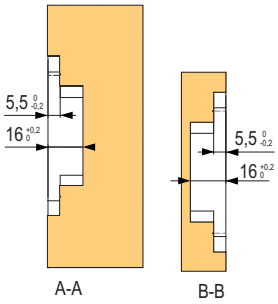

hinges for non-rebated doors

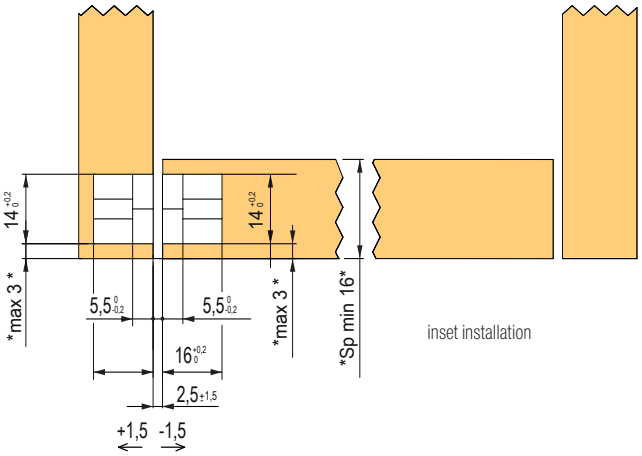

K6100, for light non-rebated cabinet doors

- suitable for furniture doors, e.g. for kitchen units or living room wall units

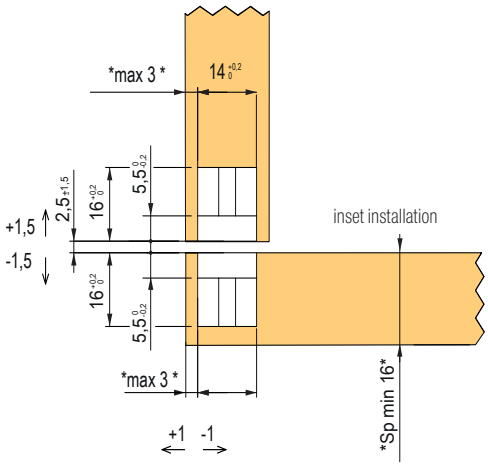

code	description	description
255989	K6100 hinge	satin chrome
344291	K6100 hinge	black

Advantages of the hinge:
- user-friendly adjustment in all 3 directions
- can be used for door thicknesses from 18 mm

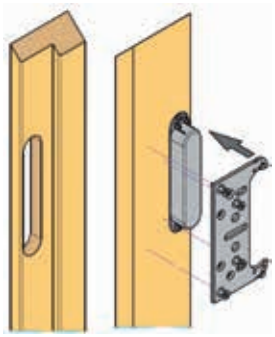

Hinge technical specifications:
- minimum door thickness: 20 mm when installing the hinge at the centre of the door
- load capacity for 2 hinges: 10.5 kg max. door height: 1000 mm
- load capacity for 3 hinges: 10.5–14 kg max. door height: 1500 mm
- load capacity for 4 hinges: 1–9 kg max. door height: 2 000 mm

Adjustment in all 3 directions:
- height (Z): ± 1.5 mm
- right-left (X): ± 1.5 mm
- forward-backward (Y) ±1 mm

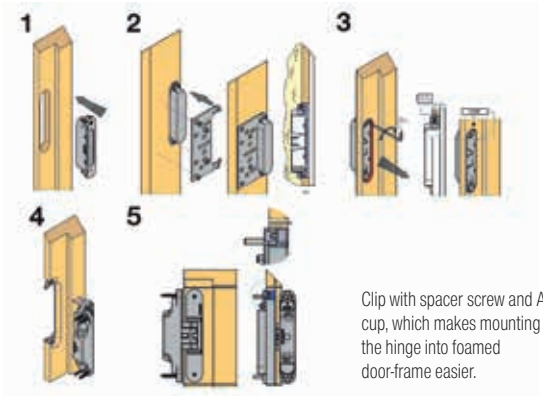

hinges for non-rebated doors – accessories

424051	1130

The floor drop seals are mounted into the bottom edge of the door. When closing the door, the closing pin is seated on the door-frame and the inner mechanism of the strip with the silicone gasket creates a perfect seal. The height of sealing contact point is adjusted on the side using the adjusting screw.

Stoppino door stop

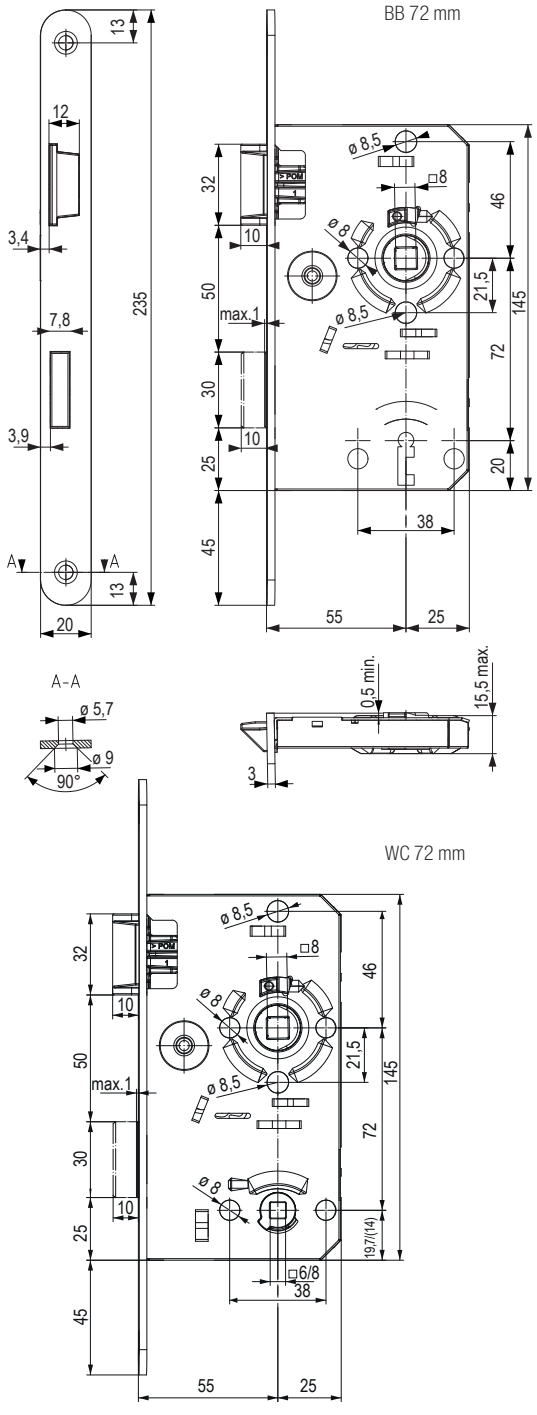

Example of use

grey	black

Warranty Claim Procedure

Dear customers,
although we always strive to improve the quality of our services, there are exceptions when you need to reject the goods (due to quality, type, or quantity of delivered product).

In such case, please proceed as follows:

Provide the following details with the warranty claim:
- **invoice No.**
- **product code and description**
- **claimed quantity**
- **reason for rejection**
- **requirement for remedy (replacement, credit note)**

Report the warranty claim no later than three business days after product receipt. Warranty claims after three days will be disregarded.

Warranty Claim department for mail-order:
tel.: (+420) 596 223 470
fax: (+420) 596 223 471
e-mail: reklamace@demos-trade.com

A full text of the electronic form of the Warranty Claim Procedure can be found at www.demos-trade.com, Download tab. To lodge a warranty claim in the case of a sale in a store, please contact the respective store. Contact details are provided at the back of the catalogue.
