TAMBOUR DOORS

tambour doors

Tambour doors

- storage space solutions
- interesting design
- great flexibility
- easy to use
- small space requirements
- good accessibility

IT'S THAT SIMPLE...
... to order using the web form.

Fill in the form:

- ✓ Dimensions
- ✓ Slide direction
- ✓ Type of tambour doors
(overlay × fitted, screwed × recessed,
plastic × metal)
- ✓ Colour design
- ✓ Winding system (backwall, spiral,
with C3 mechanism)

Order form for tambour door sets

You will see:

- ✓ Number of required items
- ✓ Price calculation

N RAUVOLET Crystal line sets

High quality and modern look. All this and more is part of the RAUVOLET Crystal line. Thanks to the combination of the advantages of glass and polymers, these tambour doors are more resistant to cracking, scratching and they are lighter than real glass, which also comes with a neat and more refined design and appearance.

- choose from 3 standard high polished colours
- other existing RAUVISIO Crystal colours on request
- sets are ready for immediate assembly
- cassette system C3 ensuring comfortable opening and closing
- standardised dimensions

362785	for set dimensions: width 900, height 600–1,000
362786	for set dimensions: width 900, height 1,000–1,500

Metallic Line sets with 29 mm running track

- custom made tambour door sets ready for quick and simple assembly
- Rauvolet tambour door system 20 and 25 mm
- surface treatments: aluminium and brushed stainless steel
- the package contains all the necessary components
- individual set dimensions match the usual cabinet sizes
- designed for minimum clear depth of the body 265 mm or rather 276 mm (25 mm profile)
- for material of the thickness 15–19 mm
- atypical sets can be custom made using the order form available at www.demos-trade.com

Set of custom made tambour doors

88386	1 000–1,500			

¹⁾ the outer dimension with a body wall thickness of 18 mm is calculated

Metallic Line sets structure

- 1 – C3 balancing mechanism
- 2 – pelmet
- 3 – Metallic Line tambour door profile
- 4 – overlay runner system with running track 29 mm
- 5 – slam rail with integrated grip profile and backstop profile
- 6 – glide for Metallic Line tambour door profile
- 7 – slam rail glide
- 8 – plastic stop for slam rail
- 9 – end cap for 29 mm running track

 separate components on page 12.23.

TAMBOUR DOORS

Metallic Line sets

Ravoulet Acoustic Line acoustic tambour doors

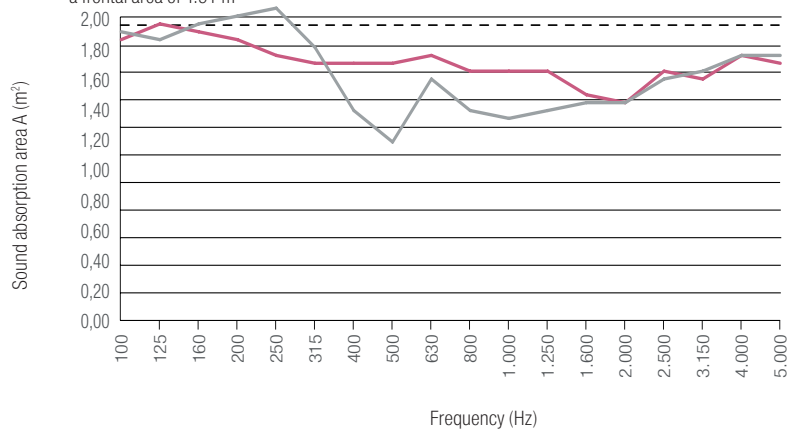

- allows up to 80% of the noise to be absorbed
- continuous perforations, inserted acoustic fleece
- use on cabinets, side and height boards, partitions or as a decorative material
- possible deliveries of only one set for one cabinet
- specific solutions on request

Other acoustic solutions:

- for acoustic fronts of pedestals see p. 11.24
- for acoustic panels see p. 11.31-11.34
- acoustic boards - Catalogue of board materials

Equivalent sound absorption area in accordance with ISO 354 (reverberation chamber) - cabinet with a frontal area of 1.91 m²

— acoustic curve 12 mm (cabinet without binders) — acoustic curve 12 mm (cabinet with binders)

Classic recessed runner system – 8 mm and 12 mm

- running tracks are embedded into a pre-milled groove inside the cabinet
- milling width 13 mm (for 8 mm), or 17 mm (for 12 mm – suitable for high tambour doors with horizontal movement)
- milling depth 12.5 mm

Recommended tambour door profiles:

- E23 Plastic (8 mm), p. 12.19–12.20
- E4 Plastic (12 mm), p. 12.21
- E9 Plastic (8 mm), p. 12.22

Winding system:

- backwall
- spiral

Applicable mechanisms for vertical running direction:

- C8
- Caddy
- C6

Recessed runner system

- flexi runner system allows the tambour door to be curved into an arch
- spiral winding can be formed from the running profile while keeping minimum arch size milling width 13 mm, milling depth 13 mm
- running tracks are embedded into a pre-milled groove inside the cabinet
- running profile available in black and grey only
- Flexi runner system can only be bent in one direction

Recommended tambour door profiles:

- E23 Plastic (8 mm), p. 12.20
- E9 Plastic (8 mm), p. 12.22

Winding system:

- backwall
- spiral formed from a running profile

Applicable mechanisms for vertical running direction:

- C8
- Caddy
- C6

Top Basic fitted runner system – screwed

- all-plastic runner system
- simple assembly: no milling, just adjust the length of the rail and screw
- possible additional assembly into already completed cabinets
- assembly with running corners and attachment with screws
- running tracks are parallel with the inside edge of the cabinet
- the running tracks intended for the tambour door profiles in the colour of aluminium (plastic) and wood decor are available only in the uni colours (decor with no pattern)

Recommended tambour door profiles:

- E23 Plastic (8 mm), p. 12.23–12.24

Winding system:

- backwall

Applicable mechanisms for vertical running direction:

- C8
- C6
- possible also with C3 after adjusting the running profile

Top fitted runner system – screwed with cover

- aluminium running tracks, pelmets and slam rails
- surface-mounted runner system for screwing inside the cabinet
- simple assembly – no milling, just adjust the length of the track and screw
- possible additional assembly into already completed cabinets
- possible use of pelmets in the decors identical to colour of the tambour door profiles

Recommended tambour door profiles:

- E23 Plastic (8 mm), p. 12.25–12.26
- Metallic Line 20 and 25 mm, p. 12.27
- E9 Plastic (8 mm), p. 12.28

Winding system:

- backwall
- spiral
- C3 winding mechanism

Applicable mechanisms for vertical running direction:

- C3, C6, C8, Caddy

Frame overlay runner system

- overlay runner system
- aluminium running tracks, pelmets and slam rails
- with approx. 15 mm overlay
- uniform design for cabinets with horizontal and vertical slide
- simple assembly: no milling, just adjust the length of the track and screw
- possible additional assembly into already completed cabinets
- possible use of pelmets in decors identical to colour of the tambour door profiles

Recommended tambour door profiles:

- E23 Plastic (8 mm), p. 12.29–12.30
- Metallic Line 20 and 25 mm, p. 12.31–12.32

Winding system:

- backwall
- spiral
- C3 winding mechanism

Applicable mechanisms for vertical running direction:

- C3, C6, C8, Caddy

Overlay runner system with running track 29 mm

- overlay runner system
- only in aluminium and stainless steel decors
- intended only for vertical slide with C3 mechanism
- possible additional assembly into already completed cabinets

Recommended tambour door profiles:

- Metallic Line 20 and 25 mm, p. 12.12–12.13

Winding system:

- C3 winding mechanism, p. 12.33

Maximum recommended cabinet body dimensions for horizontal running direction

profile type	max. cabinet height at horizontal slide	max. width at horizontal slide	
		single-door	two-door
E23 plastic (8 mm)	1,150 mm	1,600 mm	2,000 mm
E4 plastic (12 mm)	1,900 mm		
Metallic Line 20 mm	1,150 mm	1,400 mm	
Metallic Line 25 mm	1,500 mm		

Classic runner system – recessed

- For tambour door profiles:
- E23 Plastic (8 mm), p. 12.19–12.20
- E4 Plastic (12 mm), p. 12.21
- E9 Plastic (8 mm), p. 12.22

Pelmet for Metallic Line

code	surface	package
R92841	aluminium	2.5 m
R92842	stainless steel	

Adapter for running track for Metallic Line

code	colour
R95590	black

- only with C3 mechanism

Corner of the Frame running track for Metallic Line

code	colour
R95799	black

- only when using the runner system on the back of the cabinet
- can be used both for horizontal and vertical running direction

Spiral track for Metallic Line

code	colour
R95831	black

- can be used both for horizontal and vertical running direction
- recommended max. dimensions for vertical running direction: max. width 1,164 mm, max. height 1,240 mm

C3 balancing mechanism

code	outer width (mm)	inner width (mm)
R93228	400	350-384
R92848	600	550-584
R92852	800	750-784
R92853	1,000	950-984
R92854	1,200	1,150-1,164

- simple and quick assembly
- use for plastic tambour doors and Metallic Line
- mechanism with flexible width (34 mm range)
- max. cabinet height 2,200 mm, only 1,900 mm where the width is 600 mm
- 🔗 better flexibility when using C3 extension adapter (R96219), for inner widths 350-1,184 mm

Extension adapter

code	max. extension (mm)	package
R96219	165	1 set

- for C3 balancing mechanism
- the minimum length of the extension adapter is 50 mm.
- if the length of the extension adapter is greater than 80 mm, it is necessary to use a guide roller wheel, which is located about 30 mm from the end of the extension adapter

Extension adapter shortening calculation:

internal width of the cabinet – width of the C3 mechanism + 50 = total length of the C3 extension in mm

C6 winding mechanism

code	description
R88329	suitable for all systems

- economic version suitable for all runner systems, slide direction is only vertical
- can only be used in combination with tambour door profiles: E23 plastic, Metallic Line 20 mm

C8 winding mechanism

code	description
R00060	winding mechanism
R00039	set of support rods

- assembly only with the backwall running
- the end of the tambour door must always be on the back of the body (even when closed)
- possible assembly into an already finished cabinet with tambour door (backwall running necessary)

Caddy mechanism

code	description
R00069	Caddy brake (right assembly) black

- only for tambour doors that open from top to bottom and wind up to spiral
- possible additional correcting of the braking effect of the finished cabinet from the outside
- easy assembly, minimum demands for cabinet body preparation
- assembly of one brake only (on the right), use the second brake, if needed (make to order)
- it is necessary to use a lock (type according to the slam rail), which keeps the tambour door closed

Mid-grip profile

code	colour	code	colour
R84093	black	R96940	aluminium (plastic)
R84094	white	R84096	beech
R84095	grey	R92843	Metallic Line aluminium

- these profiles can be combined with all runner systems
- inserted between the slam rail and the tambour door profile or anywhere between profiles for better serviceability (for high cabinets)

Adhesive tape 50 m

code	description
R95879	transparent (white fibres)

- recommended for strengthening the connection of individual tambour door profiles
- when preparing custom made sets, only the required metres are charged
