Explanatory notes

Sorters As Drawer Inserts

- Durable polypropylene material, highly resistant to extreme temperatures, is ideal for long-term use.
- Modular construction can be easily assembled and taken apart as needed.
- Perforated bottom for customised drawer trimming.
- Bin lid keeps out dirt and spills and makes cleaning easier.
- Two handles ensure better stability when handling and carrying the bin.
- StrongBins products are designed with functionality, durability and ease of maintenance in mind – the perfect choice for your everyday needs.

.....

The easiest way to place a waste sorter in the kitchen is to put it in a drawer. This is what the new StrongBins sorter range for 600 and 800–900 mm cabinet bodies is for. Just put the sorters in the drawer and that's it. The construction into which the sorter bins are inserted can be shortened to the depth and width of the drawer by up to 5 cm.

Non-slip Mat

The technology for the kitchen is manufactured to minimise noise. For drawers with particle-board bottoms where stored dishware rattles with each movement, there are non-slip mats to prevent unwanted noise.

460688 | STRONG Non-slip mat 500 mm, 1.2/20 m white

460689 | STRONG Non-slip mat 500 mm, 1.2/20 m grey

460690 | STRONG Non-slip mat 500 mm, 1.2/20 m black

461052 | STRONG Non-slip mat 500 mm, 1.2/20 m anthracite
